IS A GOOD ONE.

Morgan & Wright, Chicago Ill. [*Bicycle Tires*]: There can be no question about the advisability of using the Hardware trade as a means of disposing of bicycles and bicycle parts, and as to the efficiency of HARDWARE, we can only say what we would say in reply to an inquiry from any other publisher, i. e., we have no direct means of knowing whether our "ads" do us good or not. If we insert an "ad," it is on our judgment that the publication is a good one.

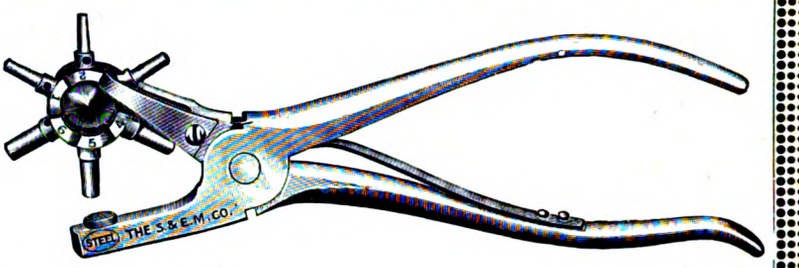
"Bright and Newsy."



Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

HARDWARE

VOL. XVII. JUNE 10, 1898. NO. 5.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The approach of the vacation season adds another cause to those springing from the war, for a lessening demand for general goods which has the effect of slackening the impetus surrounding manufacturing conditions, and will make the months of July and possibly August, as dull in point of promise as the summer season has usually been found.

The jobbing Hardware trade of the West continues to enjoy a good distribution of stock arising from a regular and steady demand. Notwithstanding excessive rains, the prospects for fine crops are of the most promising character. The comparative dullness in the Eastern jobbing trade, which has been the feature of the season, it is anticipated, will give way to advancing quotations which, before another season, will be made prominent through war taxes, an increasing circulation of money, in contemplation by Congressional action, and the widely expanding interests springing from the successful prosecution of the war, following the controlling necessity of having a standing army of larger proportions, and a navy in harmony with it in national importance.

The prices of sisal and manila hemp have been so rapidly advanced by the manufacturers that the jobbers who sensibly made early purchases, may be said to control the market, being able to cut current quotations largely, and still see a liberal profit.

Sheet zinc and copper rivets and burrs show some improvement in price under advancing conditions

The low prices prevailing on many goods have created a short supply in consequence of increased consumption largely upsetting calculations. This is notably the case with plain and barb wire, wire cloth, poultry netting, lawn mowers and garden tools generally, the slow delivery of which, even on early stock orders, has proven an embarrassment to the jobbing fraternity.

The month of June brings the end of the bicycle manufacturing season, with the exception possibly of assembling the few parts remaining over in sufficient quantity to make complete machines. The present season has not been as productive of either sales or profits as the makers hoped, when the campaign for the year was promulgated.

Low prices, even on leading wheels, were supplemented in other directions by the offering of many old and new productions at the lowest quotations ever known in the business. This, with the absence of so many of our young men, called into service of the government by war conditions, followed by a long rainy season of record-breaking significance, capped the climax, which had already been discounted by insufficient advertising and curtailed expenses.

The failures for the month of May have been much less in number than was anticipated, considering it was the first full month under war conditions. They proved to be less than in 1897, when they gave evidence, by their diminished number of the heavy improvement in business which made the year so remarkable. They were in number 222 for 1898, as against 241 for 1897. Even in Canada they show for May only half the number in 1897, being 16 as against 32 in that year.

Hardware Dealers as Cycle Agents.

It is inconceivable that the makers of first-class bicycles, even those having an established reputation, the result of many years' expenditure of money, should reach a point where they feel that profitable results, which should form a crown to all successful effort, can be reached without some systematic and sustained methods to interest the Hardware trade.

It is to be hoped, when planning the campaign for the coming season, that a greater degree of attention will be given to the desirability of agencies for the leading wheels being located among the dealers in Hardware in every enterprising town.

Make it interesting in some way to these reputable dealers, so that many may find it to their advantage to be the one house in any town to sell a particular wheel. Avoid making any arbitrary rules and distinctions, usually repelling in their nature, beyond naming an established price. Make the terms correspond with other seasonable goods, which make it unnecessary to pay for the goods almost before they are ready for the trade, or else suffer pecuniarily to the extent of a compulsory cash discount.

Upon some such terms the several makes of high-grade wheels could be successfully and economically marketed; a wider distribution would possibly result therefrom, and when a loss was made, it would not be of such an extensive character as to jeopardize the existence of the company represented.

Let the cheaper low-grade wheels only, seek department store channels for sale and distribution. There are few things that have so stultified the progress of marketing wheels of world-wide reputation under commendable auspices, than the fact that high grade, un-

Digitized by Google

questionably superior cycles succumbed to the bargain counter moguls and decided to reach the public through such questionable representation.

The Hardware dealers of the country are a reputable body of long-established houses, possessing character, probity and honesty, backed up by capital and credit worthy of their honorable record. Contracts involving thousands of dollars of liability have every season been entered into by them under conditions and terms that have been scrupulously adhered to. If there is any one thing in which they would be found different from the usual run of bicycle agents, it would be a palpable lack of that irresponsibility which has invariably been the distinguishing feature of local aspirants for agency honors not already in established business.

The 20,000 to 25,000 Hardware dealers present a phalanx of workers from which a selection of agents could be obtained, the efforts of which to make a successful representation of manufacturing interests, would be of the most satisfactory and profitable kind, and redound to the lasting credit of all concerned. See to it, oh ye intelligent and far-seeing cycle makers, that efforts are inaugurated to secure these desirable and energetic workers for the season now approaching.

In Time of War.

The war still goes bravely on. A few shells are daily fired, some powder is burned, brigadier-generals are added to the list, and the Star Spangled Banner is gaily flying over a united country. The navy has shown that it is a magnificent machine in capable hands; an army is being created as rapidly as circumstances will permit, and volunteers are offering themselves in numbers far in excess of the demand. There has been seen, as Tennyson sings, "the sudden making of splendid names," and events have demonstrated that heroism is as abundant in these latter days of the nineteenth century, as in those older years when war was the world's chief occupation.

Viewed from all the standpoints of human experience or expectancy, results have been as satisfactory as could have been expected or hoped for. Spain has not yet been smashed, but all the hard knocks so far given have befallen her. The outlook does not promise her any serious advantages in the future. The only hope she ever had, that of foreign intervention, has become an impossibility—due largely to the faithful steadfastness of England as America's great European friend.

Meanwhile, the patriotic people of America are going about the business of life very much as though no war existed. There is a great supporting principle in the belief that one's cause is just, and that ultimate triumph is assured. In that case, neither conscience nor fear disturbs. The feeling now is that the Fourth of July of 1898 will see a double celebration—to the old-time patriotic outburst will be added the rejoicings over a peace that shall crown a victory nobly won.

Taxing Corporations.

The article in our last preceding issue, opposing the proposition to tax all corporations one-fourth of one per cent. on their gross receipts, has attracted much attention, and the Senate has recognized the justice of it, at least to the extent of exempting all corporations, except those refining petroleum and sugar, which are required to pay one-fourth of one per cent. upon their gross receipts, and sleeping car companies, which are required to pay a stamp tax of one cent on each ticket sold. This was accomplished by a special amendment offered by Senator White, of California, who admitted that he wanted to punish the large corporations in these particular industries. It is a curious illustration of the unthinking prejudice which yellow journalism has inspired in the public mind against the co-operative investment of capital. While the Standard Oil Co and the American Sugar Refining Co. have grown rich, they have conferred upon the public ten dollars of benefit for every dollar conferred upon their stockholders. This is illustrated by the following figures:

PRICES OF REFINED PETROLEUM OILS, PER GALLON.

	Cents.		Cents.
1871,	25.7	1891,	7.0
1881,	10.3	1898,	6.15

PRICES OF RAW AND REFINED SUGAR, BEFORE AND SINCE THE CONSOLIDATION OF SUGAR REFINERIES.

Before Consolidation.

(Average price for nine years.)

Centrifugals (Raw.)	Granulated (Refined.)
6.807 cents.	7.905 cents.

Difference between raw and refined, 1.098 cents.

After Consolidation.

Centrifugals (Raw.)	Granulated (Refined.)
4.291 cents.	5.272 cents.

Difference 0.981 cents.

Of the gross receipts of these corporations, probably two-thirds are paid out for labor, etc. That their labor is well compensated and well treated, is shown by the fact that neither of these corporations has ever had a strike. They have a far greater number of partners (stockholders) than the separate plants, which have been combined into these corporations, had. Corporations are simply a type of economic co-operation. Railroads would not be possible without them. The comforts and luxuries of modern civilization are almost wholly due to them. The Pullman Palace Car Co. probably contributes more to the comfort of humanity than most corporations. Yet, because it is a successful corporation, it is singled out as a shining mark for taxation. The bill expressly states that the tax shall be paid by the corporation, and they cannot add it to the price of their tickets. As regards oil and sugar, however, it is different. They can make the public pay the tax, raising their prices correspondingly. Senator White's proposition is like that of the man on horseback, who, thinking that his own weight was a sufficient burden for the horse, lifted the saddlebags and put them upon his own shoulders. Doubtless, corporations are sometimes unjust and tyrannical, but the weight of evidence on the side of their usefulness and beneficence is overwhelming, and we prophesy that the prejudice against corporations will fade away before the sunlight of experience and publicity.

The New York State Hardware Jobbers.

The regular meeting of the New York State Association of Hardware Jobbers was held in Troy, N. Y., on May 26th, the members being entertained by J. M. Warren & Co., at the Troy Club. There was the usual business session, after which an elaborate collation was served, covers being laid for nineteen. C. W. Tillinghast presided, and welcomed the guests in a brief speech, in which he referred to the various events of his long business experience. An address was also delivered by Gen. C. Whitney Tillinghast, II., and the president, Charles H. Turner, of Albany, expressed on behalf of the Association their appreciation of the cordial entertainment which had been extended.

HARDWARE TRADE AND THE WAR.

During the past week *Hardware* has devoted considerable time to finding out the direct effect of the war upon the Hardware trade.

The result has been even more gratifying than could have been reasonably expected. In many cases, expressions of the most sanguine character, backed up by incontrovertible facts in the shape of accomplished business, have been received, while in no case is there a desire to view the situation from a pessimistic standpoint.

There can be no doubt that the Hardwareman, in common with all other men, is prone to come to a halt in open-eyed astonishment when confronted with anything that may be viewed as a disturbing element in commerce, and this same listless inaction is the most serious deterrent that befouls and clogs the wheels of commerce. Taking the most extreme stand that pessimism can suggest, and assuming there is absolutely no business, it is infinitely better mentally, morally, physically and commercially for the business man to have an aggressive plan of action mapped out, and to pursue this plan unflinchingly. Action must inevitably bring results, and properly directed action not only brings good results, but is attended by a host of minor blessings which, in their totality, are almost as important as business success. Action guards the mind by distracting the attention from petty annoying details, thereby permitting concentrated effort on the main points. It furnishes a constant motive, and in so doing, prevents the brain from becoming a gloomy storehouse for "dull care." In employing both mind and body, it feeds and grows upon itself, and gives birth to new energy and new effort, and, consequently, to new and increasing results. We may well borrow an example of this from the daily reports of the men of our navy. Speaking of the bravery of the men, and the excellent results obtained under hot fire from the enemy, an officer says: "The men were too busy to pay any attention to the fire from the forts," while all navy officers agree that the man who has the hardest time is the unfortunate non-combatant. That is the whole secret. Keep "too busy to pay attention to the enemy's fire," and your own work will show the results, despite the most depressing conditions.

We quote the following reports from among the many received, as showing that instead of retrogression, we can really show an increase of business over that of the preceding year, and that the only shortage is based upon a false estimate of expectation of a boom, rather than upon a fair comparison with other years.

E. W. Bliss & Co., Brooklyn, N. Y., report contracts on hand for one year in advance. These are in part government work, as the firm manufacture, among other articles of war and peace, the Whitehead torpedo, and are at present turning these out as rapidly as possible.

The Sickels & Nutting Co., New York, in reviewing their business for the present year, report an increase of 33⅓ per cent. in the West over the same period of the preceding year, while the Eastern conditions are constantly improving.

The Armstrong Mfg. Co., Bridgeport, Conn., report large sales of pumps, stocks and dies and tool-kits. While they are not supplying the government direct with these articles, there is no doubt of their destination, as every ship fitted out by the navy requires, in addition to a stock of fittings, a complete set of machinist's tools.

W. & J. Tiebout, New York, state that, notwithstanding the fact that a great many young men have been withdrawn from yachting life by the calling out of the Marine Reserves, the fact is more than compensated for by the amount of government and other orders made necessary in the fitting out of transports, and the remodeling of yachts and tugs into scout and torpedo boats. An increase over last year is shown.

A. G. Spalding & Bro., New York, can trace no bad results from the war. The sale of sporting goods of all descriptions has been retarded more or less by the continued wet weather; but since fair weather has set in a decided impetus has been given to all lines. Two of their factories are now busy on canvas clothing and hammocks intended for use in hot climates by the army.

Chas. Morrill, New York, reports brisk domestic and foreign trade in saw-sets, punches, pliers, etc., the month of May showing a decided increase over the same month of 1897.

Hartley & Graham, New York, report larger sales of Colt's Service revolvers. This arm is used by officers of both the army and navy, as well as by the officers and privates of all mountain batteries, where it takes the place of a sabre. This firm have also supplied the Astor Battery with six 12-pound rapid fire mountain guns of 3-inch calibre, made by Hotchkiss of France.

The Plume & Atwood Mfg. Co., New York, while handling no government contracts, report an increase of business over the corresponding period of last year, and consider the outlook most encouraging for a good business this fall.

The Magnolia Metal Co., New York, are receiving orders through jobbers for the government, and report themselves busy. In connection with one order the jobber wrote: "I desire to state further, that there are quite a number of such orders likely to be placed in the near future for your metal for fitting out and repairing United States war vessels, the department having found Magnolia Metal to be the most uniform and reliable in its make-up, and the most suitable in all respects for this work."

Travers Bros., New York, are getting their share of Government orders; the most recent of which was a shipment of 60,000 pounds of rope to Tampa, Fla., and 18,000 pounds of fine rope for the manufacture of hammocks. Altogether they report an increase of 30 per cent. in volume over the same period of last year. Questioned in regard to the phenomenal rise in price of all material used in rope and twine manufacture, the reply was that other influences than the war were also responsible for this. An increase in all materials of from 15 to 120 per cent. has already taken place; while a much higher advance is expected. The jute crop of India is very short owing to the bubonic plague. The Manila crop is also lamentably short, and can not be moved until the present difficulty is settled. The Mexican crop of sisal is not any too large, and considerable hesitation is shown in moving it while two hostile fleets haunt the Gulf of Mexico and the adjacent waters. The weather so far experienced has increased the size of straw by one-half; and the estimate is made that from 12,000 to 15,000 tons excess binder twine will be required for the season's crop. Raw sisal is selling now for 10c., which means at least 12½c. when worked up in binder twine; and the probability of manila reaching 15c. seems reasonable. Hemp binder twine, which was used so extensively during the latter '80's and early '90's, but was forced out by the

Digitized by Google

price, is again found in the market, and is selling at 8c. This price will, of course, advance as the demand grows; and it looks as though the early buyers of this line will largely discount future increased prices.

These expressions, culled from many equally satisfactory ones, show that there is business to be obtained; and it is fair to assume that in most cases where complaints of business being at a standstill are made the real trouble lies in the fact that the necessary effort is not forthcoming to secure it. Mark Twain, in speaking of the itineracy of the Mississippi River, says that it is no uncommon thing for the man who goes to bed with a farm on the bank of the river, to wake in the morning to find his estate is twenty miles inland. The channels of trade are no less unstable, and every national imbroglio is liable to switch those channels into the adjoining county while we sleep. It is therefore the man who rises to the emergency, and not only keeps his pilot eye on these changes, but follows them up, and camps on the new bank, who secures all that is coming.

A New War Atlas.

E. C. Atkins & Co., Indianapolis, Ind., certainly understand the kind of literature which will be most acceptable now, when everybody, even in the busiest business houses, is talking war and all that relates thereto. They have published a war atlas of some 25 pages, measuring 14x11 inches in size, and containing 13 full page maps, printed in colors, showing the world at large, North America, the United States, Europe, the West Indies, the various groups of islands which enter into the present conflict, Spain, Cuba, the East Indies, etc. In addition to these, there is a full page devoted to the flags of all nations, one to the arms of the various nations, and another to the flags of the American Union. All of these are highly colored, and filled with information of the most valuable character. In addition to this, a number of pages are devoted to reading matter, in which can be found almost everything necessary to a full description of the situation. For instance, there is a history of the war with Spain, statistics as to the navies of Europe and the United States, the correspondence with Spain, the President's message and call to arms, a full chronology of the war between the United States and Spain, a history of Cuba, etc., etc. It is a publication that will be in daily use by every person into whose hands it may fall. With a modesty so natural to this company, they have reserved but one page to themselves, and upon the outside back cover can be found representations and descriptions of a number of articles more closely allied to the ways of peace than those of war—that is, E. C. Atkins & Co.'s high-grade saws and saw tools. We congratulate this important house upon a publication that reflects credit upon themselves and upon the trade.

Condensed Hardware Wisdom.

The following nuggets are culled from the June announcement of that Cleveland worthy, "The Man at the Corner Desk," with the W. Bingham Co :

One gratifying thing about the Hardware business is the standing in the various communities its votaries as a class enjoy, and their general worthiness.

The public seems to regard the Hardware business as upon a little higher plane than the generality and accords to the ironmonger a corresponding amount of its esteem.

There is no other branch of trade of equal prominence so free from suspicion of dishonorable practices, in which the goods are sold so entirely upon their merit and where the true value is so easily discernible.

There are no paper soles in horseshoes, no shoddy in wire cloth, no masquerading of a base as a precious metal in hog jewelry, nor do sand, glucose, chicory, chalk or water play any adulterous part in the Hardware stock.

Everybody knows the difference between a manufacturing accident and a deliberate intent to deceive, and the man of metals is usually able to pacify his customer and work a new tool out of the philanthropic jobber—when the manufacturer in turn will make good the loss.

It may be that the lack of opportunity to cheat helps to keep the Hardwareman honest, or that the cleanness of the craft attracts to it only honest men, but be that as it may, there is no class of trade in which that ever-increasing factor in business, the Moral Risk, is less a matter for anxious consideration than among the members of the guild of iron.

Some polysyllabic theolog says that "Responsibility is co-equal with opportunity," a statement that is none the less true that it is old enough to carry arms against the bearded pard.

That the Hardwareman recognizes the fact is plain from the prominence he takes as a rule in the affairs of his town, and that he is found a true and loyal citizen, furthering to the best of his ability the good of the community whose esteem he holds

He is not an office-seeker, for he is a busy man and serves a jealous and arbitrary mistress, but his voice is heard in the councils of his party, and he votes as he believes to be right.

In club and church, in fraternal society and business organization, in popular movements of all kinds, the Hardwareman is found, brainy and energetic, and marking his influence upon the history of events.

New Hardware Club Manual.

The labor of preparing a new manual for the Hardware Club of New York was again delegated, some time since, by the board of governors of that body to one of their number, Alfred D. Clinch, and the result of his careful labors is before us. The manual is in every respect equal to its predecessors, also prepared by Mr. Clinch, and contains all the information which a publication of that character should furnish, giving a list of the officers and committees, dates of meetings, constitution, by-laws, house rules, articles of incorporation, list of resident and non-resident members, and a list of those who have departed this life while members of the Club. Mr. Clinch has given to this labor that devotion and thoroughness which are a part of everything he undertakes, and we are certain that the work is as nearly correct as it is within the possibility of human endeavor to accomplish. It is uniform in size with those of previous years, and is handsomely bound in green cloth, with the club monogram and date, 1898, upon the outer cover. The Club is to be congratulated upon the publication of so useful and ornamental a manual.

Scene: An ammunition store on Broadway.

Enter, a new porter with a strong constitution, no nerves, and a twenty-five pound bag of bird shot on his shoulder. By leaning at an angle of fifteen degrees, he transfers the shot to the floor by the most direct route; and as the building stops trembling, the bookkeeper alights from an attempt to touch the ceiling with his head, and demands to know what the —— porter means.

"Sure, I'm doin' what I'm tould. Don't it say on the bag 'Drop Shot.' D'yez think I can't rade?"

The Wells Fargo Express Co. have ordered a quantity of short barreled Remington shot guns of No. 10 gauge. It is rumored that these are for the use of the company's messengers on the overland mail trains.

The man who dyes his whiskers and the woman who bleaches her hair never fool any one but themselves.—*Exchange.*

SOUTHERN HARDWARE JOBBERS.

As announced in the last preceeding issue of *Hardware*, the eighth annual convention of the Southern Hardware Jobbers' Association will be held at Old Point Comfort, Va., on Wednesday, Thursday and Friday of next week, or June 15th, 16th and 17th. This session promises to be one of exceptional interest and value, as there will be several joint sessions of jobbers and manufacturers, at which subjects of mutual interest will be discussed and acted upon, and out of this there must certainly grow a closer bond of union between these two great lines of the Hardware business. Special papers have been prepared, and will be read at these sessions. The president of the Association, G. W. Barnett, has requested us to state that all manufacturers or their representatives will be welcome at this meeting. Arrangements have been made for reduced transportation, or one fare and a third for the round trip, for all territory east of the Mississippi River, with the exception of the New England States, and visitors from that section of the country can purchase transportation to New York City, from which point they can secure the reduced rates. In addition to the business meetings, there will be social gatherings, and a great many of the members will be accompanied by their wives.

The following is the full official programme and list of officers and committees for this eighth annual convention of the Southern Hardware Jobbers' Association:

OFFICERS:

President: G. W. Barnett, Teague, Barnett & Co., Montgomery, Ala.

First Vice-President: J. J. Mandlebaum, Fones Bros. Hardware Co., Little Rock, Ark.

Second Vice-President: John Donnan, W. S. Donnan & Co., Richmond, Va.

Secretary-Treasurer: C. B. Carter, Montgomery, Ala.

EXECUTIVE COMMITTEE:

W. A. Parker, Beck & Gregg Hardware Co., Atlanta, Ga.
W. E Gibbins, Woodruff Hardware Co., Knoxville, Tenn.
J. D. Moore, Moore & Handley Hdw Co., Birmingham.
A. B. Palmer, Palmer Hardware Co., Savannah.

TRANSPORTATION COMMITTEE:

W. E. Newill, King Hardware Co., Atlanta, Ga.
T. W. Gathright, May & Thomas Hdw. Co., Birmingham.
W. S. Robertson, Watkins-Cottrell Hdw. Co., Richmond.

MANUFACTURERS' COMMITTEE:

G. R. Vaughn, Barney-Cavanagh Hdw. Co. Mobile, Ala.
F. S. Gray, S. B. Hubbard Co., Jacksonville, Fla.
B. T. Haynes, Rome Hardware Co., Rome, Ga.

GRIEVANCE COMMITTEE:

Chas. H. Ireland, Odell Hardware Co., Greensboro, N. C.
Bruce Keener, C. M. McClung & Co., Knoxville, Tenn.
R E. Bell, R. E. Bell, Weatherford, Tex.

MEMBERSHIP COMMITTEE:

A. P. Duncan, McLendon, Duncan & Co., Waco, Texas.
O. B. Barker, Barker-Jennings Hdw. Co., Lynchburg.
J. H. Fall, J. H. Fall & Co., Nashville, Tenn.
Geo. E. King, King Hardware Co., Atlanta, Ga.
N. A. Gladding, E. C. Atkins & Co., Memphis.

PRESS COMMITTEE:

A. B. Palmer, Savannah.
C. H. Watkins, Richmond, Va.
J. H. Watters, Norfolk, Va.

RECEPTION COMMITTEE:

Irby Bennett, Chairman.
A. W. Bond, Bond & Tabb Bros.
C. L. Campbell, Peck, Stow & Wilcox Co.
R. D. Carver, Cincinnati Barbed W. F. Co.
Tom Ellis, Hermann Boker & Co.
F. H. Forman, American Steel & Wire Co.
C. M. Fouche, Knoxville, Tenn.
T. H. Gossett, Jno. H. Graham & Co.
Joe Grubb, Hussey, Binns & Co.
Geo. H. Harper, Matthai, Ingram & Co.
J. M. Hottel, G. & H. Barnett Co.
A. L. Hunt, Richmond, Va.
H. B. Lupton, Oliver Wire Co.
O. C. Mead, No. 93 Reade Street, New York.
C. T. McKinnie, Stanley Works.
Guy Mitchell, Mallory-Wheeler Co.
G. A. Seaver, John Russell Cutlery Co.
Fred Seeley, Wiebusch & Hilger.
Wm. Skirving, Samuel Cupples W. W. Co.
W. P. Smith, J. C. McCarty & Co.
R. D. Turwiler, Wallace Bros.
D. M. Walke, Keen & Hagerty Mfg. Co.
F. C. Wheeler, Hermann Boker & Co.
Chas. H. Weir, Wier & Wilson.
J. K. Wilson, Wier & Wilson.

SERGEANT-AT-ARMS.

H. H. Beers, Schmachtenberg Bros., New York.

ORDER OF BUSINESS.

Morning session, Wednesday, June 15th.

Delegates and visitors will please assemble in the Convention Hall promptly at 10 A. M.

Meeting called to order by the President.
Chorus: "America."
Address of Welcome by the President.
Calling of Roll.
Distribution of Badges.
Report of Reception Committee.
Informal Reception of Manufacturers and Jobbers.
Adjournment of Manufacturers and their representatives.
Annual Address of the President.
Reading of Minutes of 1897 Convention.
Report of Secretary-Treasurer.
Report of Transportation Committee.
Report of Grievance Committee.
Report of Manufacturers' Committee.
Report of Membership Committee.
Report of Scovil Hoe Committee.
Report of Handled Hoe Committee.
Appointment of Special Committees.
Communications.
Miscellaneous Business.

Afternoon Session—June 15th.

Joint Session of Manufacturers and Jobbers.
Reading of papers:

MANUFACTURERS' RELATIONS TO THE JOBBERS.
Mr. Jas. B. Oliver, of Oliver Iron & Steel Co., Pittsburg.
Mr. Jas. D. Foot, of Kearney & Foot Co., New York.

JOBBERS' RELATIONS TO THE MANUFACTURERS.
Mr. O. B. Barker, of Barker-Jennings Hardware Co., Lychburg, Va.
Mr. J. D. Moore, of Moore & Handley Hardware Co., Birmingham, Ala.

DISCUSSION.

Opening of the Question Box.
General Discussion.

Morning Session—June 16th (Executive.)

Reading of papers:

CREDIT, Mr. F. R. Boocock, Secretary, National Association of Credit Men.

DISCUSSION.

A DELINQUENT LIST OF ACCOUNTS,
Mr. W. A. Parker, of Beck & Gregg Hardware Co., Atlanta, Ga.

DISCUSSION.

Opening of Question Box.
General Discussion.

Afternoon Session—June 16th (Executive.)

Reading of papers:

HARDWARE JOBBERS' ETHICS,
Mr. Frederick Orgill, of Orgill Bros. & Co., Memphis.
Mr. Chas. H. Ireland, of Odell Hardware Co., Greensboro.
Discussion Opened by Mr. Geo. E. King, of King Hardware Co., Atlanta, Ga.

Digitized by Google

Opening of Question Box.
General Discussion.

Morning Session—June 17th (Executive)

Reading of papers:

OUR UNPROFITABLE GOODS AND WHAT SHALL WE DO WITH THEM? Mr. John Donnan, of W. S. Donnan & Co., Richmond, Va.

HOW TO MAKE THE HARDWARE JOBBING BUSINESS MORE PROFITABLE, Mr. J. J. Mandlebaum, of Fone Bros. Hardware Co., Little Rock, Ark.

Discussion Opened by Mr. Jas. Moroney, of Moroney Hardware Co., Dallas, Tex.

Opening of Question Box.
General Discussion.

Afternoon Session—June 17th (Executive.)

Miscellaneous Business.
Opening of Question Box.
General Discussion.
Reports of Special Committees.
Election of Officers.
Selection of place for next Annual Convention.
Adjournment.

Beck & Gregg Annual Banquet.

The Beck & Gregg Hardware Co., Atlanta, Ga., enjoyed a very agreeable evening on May 26th, when the members of the company and the employees of the firm met in their fifth annual family re-union, in the cafe of the Kimball House. These gatherings have been an annual feature since 1893, and all parties interesfed look forward to the feasts with peculiar pleasure. Since the initial banquet was given the working force of the company has nearly doubled. One of the marked features of the occasion was the unique manner in which the banquet table was ornamented. It was completely covered with nearly every article to be found in a Hardware store, and presented a most beautiful appearance. In the centre of the table was a large bell. Scattered here and there were large chains, axes, squares and every other implement imaginable. Next to the toastmaster stood a large anvil, which he utilized in calling the men to order. Suspended above the table were green and red lanterns, set off with patriotic colors. At the lower end of the table was an immense wagon umbrella.

The banquet board was arranged in a T-like shape, with the members of the company sitting at its head. The toastmaster sat in the centre. On either side of the upper end of the board there were two empty chairs, on which hung large American flags. They represented the absence of J. H. Parker and E. M. Hollyman, who are now enlisted in the Second regiment of Georgia volunteers.

R. Y. Graves acted as toastmaster, and well did he serve in that capacity. After enjoying the palatable menu, the speech making began, lasting until nearly midnight. The first speaker of the evening was L. H. Beck, president of the company. He said that the banquet made him revert to the time when the firm was incorporated—thirty years ago. The working force then, he said consisted of only two men—himself and "the bald-headed gentleman on the left," referring to W. H. Crumley. Mr. Beck spoke of its being the first incorporated mercantile company in the South, and its proprietors the youngest business men in Atlanta.

He was followed by David Baker, who delighted those present with a vocal selection. The following toasts were then responded to:

"A Man's a Man for a' That."—Ellis Hickman.
Plain Facts.—John T. Chambers, Jr.
Song.—D. A. Baker.
"'Tis Well to Scratch and be Scratched, God Bless the Duke of Argyle."—D. A. Disbrow.
"You'll Find Mankind an Unco' Squad."—E. C. Lyle.
"Doing Good in More Ways than One."—W. D. Paden.
"Unknown Quantities."—J. P. Persons.
"What Fools These Mortals Be."—R. L. Ramsay.

Short talks were made by Mr. Crumley, W. A. Parker and C. H. Wilcox. At the close of the festivities, the toastmaster proposed that the men return their heartfelt thanks and gratification to Mr. Beck for the banquet, which was done.

The men gathered in the hall of the dining-room and sang, "God Be With You Till We Meet Again." Those present were: Messrs. J. B. Hardin, Henry Franklin, O. H. Jones, E. T. Jervey, J. H. Washburn, C. H. Wilcox, L. H. Beck, R. Y. Gray, W. H. Crumley, W. A. Parker, R. M. Crumley, L. C. Gregg, W. H. Carr, B. H. Johnson, J. T. Chambers, J. W Webster, O. P. Smith, G. P. Lowry, Brader Parker, R. E. Rushton, D. A. Baker, J. M. Farnsworth, E. M. Fuller, M. C. Love, George Matthews, J. L. Thornton, I. A. Lewis, S. E. Clark, A. W. Kennedy, H. T. Russ, Frank Sherman, Norman Sharp, W. C. Hollyman, R. L. Farnsworth, W. D. Paden, Norvall Stover, R. L. Ramsay, F. H. Dox, J. L. Holcomb, J. P. Persons, C. B. Rosser, Jr., D. A. Disbrow. Adolph Steiner, Ellis Hickman, C. A. Newborn, E. C. Lyle, M. P. Russ, N. L. Johnson, A. R. Logan.

The Lane Bros. Co.

Hereafter the old and well-known firm so long going under the name of Lane Bros., Poughkeepsie, N. Y., must be greeted under the more comprehensive and progressive title of the Lane Bros. Co. This accession to corporate form is announced under date of May 16, 1898. The firm consisted heretofore of John G. Lane and William J. Lane, while the members of the new association, and the only share-holders, as well as officers, are as follows: William J. Lane, president; John G. Lane, vice-president; George Lane, treasurer; John M. Janes, secretary. All these shareholders and officials have been for years actively engaged with the former firm. This advance step is a sure guarantee that the enterprise and fair dealing that have won such success in the past, will be continued and increased in the future.

The Howard Chainless.

The Howard Chainless Cycle Co., of Newark, N. J., whose generous offer of a new one hundred and twenty-five-dollar chainless wheel for each of the ten oldest machines offered them, appears in another column, have just issued a very artistic little pamphlet calling attention, in a "high-grade" manner, to the many excellencies of their product. They emphasize the facts that they are the only manufacturers who produce chainless wheels exclusively, and that they make only one grade—the best that experience, skill and expense can bring forth.

The many illustrations bring out the fine points of the Howard wheel as well as giving views of different parts of the factory. A complete list of parts and prices is also given.

The Bryant Electric Co., Bridgeport, Conn., are erecting a new two-story power house 50 feet square. The building has brick side walls, and the framework is of steel skeleton type. The floor of the building is supported on heavy girders and columns, which carry steel joists supporting corrugated iron arches and concrete floor. The roof has clear span trusses carrying corrugated iron covering, lined with Patent Anti-Condensation Roof Lining, which prevents the condensation of moisture on the underside of the roof covering, and avoids any damage or inconvenience from moisture dropping on the delicate machinery or material on the floor below. This building was designed and the steel material furnished and erected by the Berlin Iron Bridge Co., East Berlin, Conn.

HARDWARE costs only One Dollar a year.

OLD TIME DRUMMING.

One of the best known characters on Chambers Street, New York, to-day, is the veteran salesman, Henry T. Wakeman, now established under the protecting wings of that paragon of "bargain" houses, Patterson, Harral & Gray, No. 85 Chambers Street. "Wake," as he is familiarly called by old-timers, possesses a quiet and persistent personality, which during the forty or fifty years of devotion to Hardware interests in some form or another, has been recognized from the Great Lakes to the Gulf.

He first appeared upon the horizon of New York City traffic about 1860 or '61, having been one of the earliest dealers in Hardware located in the town of Yonkers, which at that period gave but little evidence of its present importance. After a number of years' steady work in that field, not meeting with the success he hoped for, he sold out his interests there to "Uncle Benny" Washburn, whose identity with the Hardware business has continued through himself and sons from that day to this.

Wakeman migrated to New York fully determined to become a "Hardware drummer." He connected himself at first with the firm who were the immediate predecessors of the jobbing house of Brown, Harris & Hopkins, in which house the writer first became familiar with his idiosyncracies.

When Wakeman started in for Brown, Harris & Hopkins, he was uncertain what line of local trade he ought to drum. It was suggested that he select the ship chandlery dealers along West and South Streets who were good steady buyers of many lines of regular goods, such as files, scoop shovels, axes, hatchets, etc., and away went Wakeman with flags a-flying to make a success of the programme. About two days after that, while the writer was in the front of the store being interviewed by a manufacturer's representative, in rushed one of the most prominent ship chandlers on West Street, who feelingly inquired:

"Mr. Hop, have you a representative by the name of Wakeman?"

"Oh, yes," I responded; "he is one of our most indefatigable salesmen."

"I've no doubt of it," said the dealer. "But will you kindly send somebody down to the store and 'call him off;' he has been sitting there on a nail keg, hugging his knees for three hours, and I don't dare to enter my own store for fear of being talked to death; I am willing to confess he's too d——d indefatigable for me."

Striking for higher game than the local trade gave promise of providing, "Wake" became a steady and pertinacious frequenter of a string of hotels at which the buyers—who at that day all visited this city—usually spent from three days to a week.

Among these hotels may be recalled the "Merchants'" and "Western" on Cortlandt Street, the "International," "Lovejoy's" and "French's" on Park Row, "Sweeney's" in Chatham Street, and "Earle's" at Canal and Centre Streets. They were regular "eel pots" for good paying trade, and the drummers daily and nightly surged back and forth through their wide open portals, picking up many a good buyer looking for cash bargains. The list included the "Metropolitan" and "St. Nicholas" hotels, which helped to "fill the quota," and were daily and nightly added to the rounds.

"Wake" never missed a trick. It is related of him that on one occasion he saw "Sam Busick," of Sheldon, Hoyt & Co., walking with that loping gait of his around the bar at the Western Hotel. Being new in the business at the time, "Wake" made up to him—while Sam led him on—when it wasn't long before "Wake" had given "Sam" his card, and counseled him "not to leave town before he had inspected the fine stock of goods" in the store he represented. "Sam," smiling inwardly, kept the card, and when Hoyt, Busick & Co. advertised for a salesman at a later date, Wakeman applied for the position, but though he didn't get it at that time, a short time after, going in again, he saw Sam Busick, and he, remembering the previous incident, hired him off-hand.

"Wake" was zealous to make a prompt and favorable impression, so he took a few of the firm's cards, wrote his name over the top of them, and in two hours' time had so impressed a buyer he happened to meet coming out of a wholesale hat house, that the buyer took his card and started for Sheldon, Hoyt & Co.'s. On presenting the card to Mr. Hoyt, with a request to "look over the stock," Hoyt said, "Why, we have no salesman by the name of Wakeman." "Oh, yes, we have," said Sam Busick, who was sitting near by, "I hired him this morning." The customer was secured, a big bill sold, and Wakeman, in a single round, had earned his laurels as a "snap shot" salesman.

He stayed with Hoyt, Busick & Co. until they declined business, and had earned good money in their employ, which, in one year, I remember, was over $7000, on a "commission" basis.

Wakeman was one day passing Sweeney's Hotel, corner of Duane and Chatham Streets, when he saw sitting outside in a dejected mood a man giving every appearance of a big buyer of merchandise. He sat down beside him—the sidewalk in those days used to have a number of chairs covering it on the shady side of the house which were utilized by the summer guests. Entering into conversation, he learned his original estimate wasn't much out of the way. The old gent told him frankly he had been on a spree for a week, had spent all the ready money he had, except about two dollars and a draft which he had in his pocketbook. Sweeney had presented his bill for about one hundred dollars, and he felt bad because he hadn't the "ready" to pay him. "Wake" looked at his draft, which was for $4800 and seemingly O.K.; so he told him if he would go over to Sheldon, Hoyt & Co.'s store with him, he would arrange to get him the money to pay his bill. This pleased the old merchant, and the firm, examining the draft, sent it down-town while he was looking around, ascertained it was all right, kept it to pass to his credit, letting him have the $100. Before the buyer left town he had bought Hardware enough to take to Galveston, Tex., where he belonged, to fully use up the proceeds of the draft. This, "Wake" always considered, was a good day's business.

In the old days, when the name of Henry Ward Beecher was quoted in every paper in the country, the first Sunday morning a country merchant spent in New York, when he was on buying goods, was devoted to going to Beecher's church and listening to the eloquence so universally referred to. Taking this fact into consideration, for his religious convictions were not of a very prominent kind, Wakeman took a sitting, and on Sunday would watch the strange faces present at the services, quite frequently finding in the same pew or the one adjoining, a merchant whose purchases in this market amounted to thousands of dollars. "Wake" would make his acquaintance at some

Digitized by Google

period during the morning, and under cover of the church associations, would find out where he was stopping, and what kind of merchandise he was purchasing in this market, would follow up the scent, and usually land his fish.

In one case, I remember, he caught a buyer from Jamaica, West Indies, and succeeded in selling him a bill of $3000, which was supplemented by several orders amounting to as much more.

This method of obtaining business, which at that time was not frowned upon, as cash sales were prevalent, would be difficult of achievement at present, the greatly lessened number of jobbing houses making such competition an unknown quantity. HOP.

Death of John F. Macomber.

John F. Macomber died at his residence in Framingham, Mass., on Saturday, June 4th. He had been closely identified with the Hardware trade of Boston for nearly fifty years. He became a partner in the firm of Horton, Hall & Co. in 1851, and was the senior partner in the firm of Macomber, Bigelow & Dowse, who succeeded them in 1873. A lingering sickness, commencing in 1883, finally compelled him to retire from business in 1886, when the firm of Bigelow & Dowse was formed.

His sickness was such that it made him an invalid for nearly fifteen years and confined him to his room. His bodily infirmities never dulled his active intellect, and he always took a deep interest in affairs and was ever ready to advise and encourage those who sought his advice. He will be remembered by the trade and the Hardware manufacturers as a man of sterling integrity and honor, and those who knew him best will appreciate the qualities that made him a successful business man, a congenial companion and a true friend.

In respect to his memory, the Hardware trade of Boston displayed their flags at half mast on the day of his funeral.

The following expressive conundrum comes, it is needless to say, with dewy freshness from the intellectual department of the Troy Nickel Works, Albany, N. Y., and speaks for itself:

DEWEY

use Alaska Stove

Trimmings?

The new building which the Waterville Cutlery Co. are erecting at Waterville, Conn., will have a steel roof which is being erected by the Berlin Iron Bridge Co. The trusses are steel, and the covering is corrugated iron lined with the Berlin Co.'s patent anti-condensation fireproof lining. The building is 21 feet wide and about 100 feet long, and is to be used as a forge shop in one end, and in the other will be located the boilers and engines.

Alder & Boyd, manufacturers' representatives, No. 37 Warren Street, New York, have been appointed export representatives of J. H. Sternbergh & Son, Reading, Pa., manufacturers of bolts, nuts, washers, lag screws, rivets, and refined merchant bar iron.

A Model Fire Sale.

The Manchester *Union*, of Manchester, N. H., gives marked evidence that one well-known Hardware house of this country knows how to take advantage of its opportunities, and to snatch victory from the very jaws of the fire-fiend. There was recently a fire of considerable extent in the Hardware store of the John B. Varick Co., in which the loss was great. Did the members of this enterprising company sit down and bemoan their fate, or lie sleeping while the insurance adjusters were haggling over payment for the losses? They did not. They immediately set to work, and fired a broadside into the people of Manchester in their daily newspapers, following the example of the Navy Department, with bulletins No. 1, 2, 3, etc. In short, they opened their store at the earliest possible moment, and began the offering of bargains which certainly made the mouths of the people in that section water for very anticipation. A perusal of these advertisements—and any man who commences to read one of them will finish it, whether interested in this special sale or not—shows that the company carry about everything known to the Hardware trade, running from meat choppers to opera glasses, and from "Pocos" to garden seeds. The following is a sample of the eloquent and convincing manner with which the company fix attention upon their sale, and prove to the public that they mean just what they say—a series of statements which are models in their fetching power:

"In regard to the above goods we would state that they are coming out much better than we expected from a superficial examination. A majority of these goods will be as good as new, with a little cleaning. Our principal loss was by smoke and water. But we have no time to clean up the goods. We are just crazy to get them out. We want to fix our store up. We hate the sight of the smoked and charred boxes, shelves, drawers and showcases. We are going to mark each and every article at a price that will move it quick. This will be no fake fire sale. We have not got to send to Boston for goods and bring them in the back way nights. We carry more goods in stock than any one Hardware jobbing house in New England. We want all the storekeepers in New Hampshire and Vermont to come to our store during this sale. They can buy goods at this sale and take them home and double and triple their money. This will be the greatest money-saving proposition that has ever been laid before the citizens of Northern New England. Anyone who fails to take advantage of it, please don't blame us."

Our Aluminum Output.

Almost without precedent in the mineral development of this country is the rapid growth which has characterized the aluminum mining industry in recent years says the *Constitution*.

At the beginning of the present decade there were only about 150,000 pounds of aluminum mined in the United States. Since that time the figures have been as follows:

	Pounds.
1891	188,000
1892	208,000
1893	312,000
1894	817,000
1895	900,000
1896	1,300,000
1897 (Estimated)	4,000,000

On account of its light, and yet at the same time, substantial qualities, aluminum has largely superseded brass and other metallic compounds, and is sure to make itself felt with vigorous impress upon the world's commerce.

The Fulton Stamp Works, New York, have recently moved into more commodious quarters at No. 213 Grand Street, where the facilities for displaying a large stock are much better than at their old quarters, No. 22 Beekman St.

SOME FACTS ABOUT WIRE.

How many of those who sell and use wire have any idea what operations it goes through in the process of manufacture? Wire-making practice has of course changed in recent years as have most manufacturing processes. The earliest forms of wire were hammered from rough bars. This crude way was superseded later when it was discovered how to draw, and this method of wire-drawing is now universally applied for wires of any material. Modern wire-making forms the subject of a very interesting article in the Sibley *Journal of Engineering* from the pen of A. L. Orton, who surveys the industry from one end to the other. In the case of iron wire, he explains, the metal is first converted from "blooms" to "billets" and from "billets" to "rods" at one heat. This is accomplished by long train rolls which pass the rods from one to the other. The rods average from 2 to 600 yards in length. Very large sizes of wire may be made by continued rolling of the rods.

The rods thus produced by rolling in the heated state are made into wire by the process of "cold-drawing." By this process the rods of iron and steel, rolled several hundred yards long, are first pointed at one end by hammering or by a special machine, and are then cleansed by washing in a bath of dilute sulphuric or hydrochloric acid, and afterwards are immersed in lime-water to give a drawing surface. After drying by heat they are ready for the drawing mill, which consists of a series of horizontal drums or pulleys, 10 to 30 inches in diameter, termed "blocks," mounted on vertical axes on long benches. Accompanying each drum are drawplates and pincer drawers. The drawplates are discs or blocks of cast steel drilled with tapering holes, the small ends of which correspond exactly to the size of wire to be drawn from it. The form of the hole, of course, determines the form of cross section of the wire, which is usually circular, though not necessarily so. When the holes become worn from use and depart from their original gauge, the metal is hammered around the small end, closing it, after which it is reamed out to standard size. Where great uniformity of gauge is required, as in fine gold or platinum wire, perforated rubies or similar hard minerals are fitted in the drawplate. The drawplates are clamped in vises fixed to the bench. As the tapering end of the rod is inserted in the hole of the plate, mechanical pincers seize it and pull it through. The pincers are fixed on horizontal arms, which are moved backward by cams fixed on the axes which rotate the drums. The wire as it is pulled through by the pincers is wound on the drums. The bottom of the drum is fitted with recesses to correspond with projections on a cam mounted on the same axis. The drum can be raised so as not to be in contact with the cam, and then may be turned freely on a spindle. When enough wire has been drawn through the drawplate by the pincers to make one turn round the drum, the wire is taken from the pincers and fastened to the drum, which is lowered, and the cam fitting in its base turns it and winds the wire upon the drum. The drums draw from five to seven hundred feet per minute for ordinary wire, and somewhat slower for crucible steel. The wire has now been drawn down one size, reducing the diameter about ten per cent., and the process is continued until the proper gauge is attained. It is said that copper wire may be reduced fifteen sizes at one drawing. In continuous wire-drawing several drums are placed in line on a frame so that the wire winds on and off each one successively. Between the drums rotating discs, made of some extremely hard substance reamed out to size, are placed so that the wire passes through them. The holes in the succeeding discs are smaller than those in the preceding ones. Thus the cross-section may be reduced a number of sizes in one operation. Of course, the speeds of the drums are proportional to the elongations produced by the reducing of the diameter of the wire, and have to be very exactly regulated so that there may be no undue stretch or slack between the drums. The drawing is facilitated by the application of lubricants; a kind of grease for the larger grades, and liquids such as soapy water and milk for the smaller. Where a straw-colored wire is not objectionable, a weak solution of copper sulphate is used as the drawing liquor. These lubricants coat the wire with a mucilaginous or metallic film, so as to preserve it from oxidation and leave a polished surface.

Wire-drawing increases the hardness of the metal, so that the wire has to be frequently annealed during the process. In practice, fine wire is thus softened six or eight times. The annealing pots consist simply of metal chambers into which the wire is placed, and the pot is then hermetically sealed. The process of heating requires several hours at a red heat, a temperature of 600 to 700 degrees F. being best. The pots and their contents are then allowed to cool slowly. An average charge for a pot is two and a half tons of wire.

Steel commonly used in the wire trade contains from one-tenth to one per cent. of carbon. Four-tenths per cent. of carbon in the steel used would make steel spring wire, five-tenths ordinary wire rope and six-tenths of one per cent. piano wire. Where toughness is required the per cent. of manganese may range as high as seven-tenths of one per cent.

The process of wire-drawing greatly increases the strength of the material from which it is drawn. Thus it has been found possible to temper steel wire to sustain a load equivalent to 190 tons per square inch, while 70 tons is considered large in test pieces of hard steel. Such wire, however, is not of practical use, because it is exceedingly brittle, and the brittleness increases very rapidly in proportion to the strength towards this limit. A strength of 150 tons is considered the greatest that can be combined with the essential ductility and elasticity.

Copper wire is manufactured by rolling ingots or billets into rods in the hot state, and drawing them as in the case of iron wire. Its great superiority over iron in conductivity and its freedom from electro-magnetic induction, give it an immense advantage for electrical uses. Its greater price per ton is compensated by its lesser weight per unit of resistance. It has been shown, on a copper and iron line 278 miles in length, whose resistance and capacity were rendered equal, there was an increase of speed of nearly 13 per cent. as compared with iron wire. Though a large part of the telegraph service is supplied with galvanized iron wire, copper alone is employed for the long-distance telephone, the electric light, and the transmission of electric energy.

Of the other metals and alloys employed in the manufacture of wire, the most important is silicium bronze. This alloy was patented by Weiller, of Paris, in 1882, and is formed by adding silicium and sodium to copper in a certain manner. The properties of this metal show a conductivity of 40 to 98 per cent., that of copper three to six times that of iron, although only one-fourth the weight, and tensile strength nearly equal to that of steel. It will not oxidize readily, and will therefore last almost indefinitely, and in France is rapidly superseding iron and steel in

Digitized by Google

electric transmission. It may be made of varying strength, but its conductivity rapidly decreases as it approaches its tensile limit. That recommended for telegraph wires is an alloy showing a conductivity of 80 per cent. that of pure copper, and a tensile strength of 35 tons. When iron is used the conductivity is 16 per cent. and the strength about 25 tons, showing the silicium bronze to have five times the conductivity of, beside being much stronger than, ordinary telegraph wire, weight for weight. With a strength of 50 tons it still shows a conductivity two and a half times that of iron.

Aluminum is not regarded as a useful metal for wire manufacture, its tensile strength in this form being only 10 tons, and elastic limit very low.

Taxes on Corporations.

Editor of The Tribune: On May 18th you printed on your editorial page a quotation from *Hardware* in which the tax proposed by the Senate Committee on Finance on the gross receipts of corporations was severely and justly criticised. The argument of *Hardware* in opposition to this tax, so far as it went, was excellent, but unfortunately they propose in lieu thereof, a uniform tax on sales on gross receipts of all business men.

It is probable that in making such a proposition as this they do not realize that they are advocating a further indirect tax on consumption. I think that it will be generally admitted that of these taxes we already have at least enough, and it is time to call a halt on imposing taxes which shift, and are intended to shift, the burden to the shoulders of the great mass of the people.

There was no reason whatever for classing all corporations together, as the Senate Committee did, for, as *Hardware* pointed out, a corporation per se is solely co-operation, but a certain kind of corporation is perculiarily a fit subject for taxation. Quasi-public corporations which enjoy the use of public property, and whose business is a monopoly, can properly be called upon to pay a part of what is given them by the public. As these corporations enjoy monopoly privileges, taxes laid upon them will stay where they are put and not be handed on in higher prices to their customers.

There is another objection to the taxation of business besides the added burden thereby imposed on consumers. The inevitably decreased sales due to higher prices tend to discourage business enterprise, and the part of the burden thus falling on business men restricts the opportunity for employment and adds to the number of the unemployed.

WILLIAM JEFFERY.

New York, May 21, 1898.

Recent Trade Publications.

The George Tritch Hardware Co., Denver, Col., have issued an attractive and comprehensive catalogue of Sporting Goods, covering about everything in this department of a great business, that could be desired. It is well arranged, and printed upon heavy book paper, that brings the many illustrations out to good advantage. In a note of explanation, the company say: "In sending out our first catalogue of Sporting Goods we wish to say that we have taken up this line with the intention of making it one of our leading features. We will be second to none in the variety and choice selection of goods, and our prices will compare favorably with any wholesale house. With stock complete and prices right, we hope to have the liberal patronage of the trade of the whole Western country."

The James Swan Co., Russell & Erwin Mfg. Co., Nos. 43–47 Chambers Street, New York, sole agents, have just issued a complete trade catalogue of their productions, in order to call especial attention to the large variety of tools manufactured by them under one brand and bearing the "Swan" trade mark. These goods have been recognized by the trade, which has for years been familiar with their merit, as possessing a high standard of quality and finish. The goods enumerated in this catalogue, which forms a pamphlet of forty-five pages, embraces the following desirable and well-known lines of standard tools: Boring machine, ring, gas fitters', hollow, and millwright augers; auger and car bits; countersink, dowel, screwdriver, plug and sugar bits; tap borers, boring machines, tanged firmer and socket firmer chisels; socket framing, firmer and paring chisels; regular pattern, carriage and wagon makers' drawing knives; adjustable and folding handle drawing knives; gimlets and gimlet bits; tanged socket, paring and turning gouges; tool chests, etc. Few makers of similar goods present so large a variety of tools in a single catalogue, all of which form part of the appropriate stock for a Hardware emporium. In another column will be found the discount sheet applying to this catalogue, which, complete, may be obtained from the agents upon request.

We have received from the Summers Automatic Cycle Lock Co., Columbus, Ohio, a neatly edited pamphlet, which describes and illustrates in a graphic manner a variety of coin-controlled stand or rack locks for bicycles, now being placed on the market. The locks are made to operate on two coins, as preferred, a cent and a nickel. It is impossible to withdraw the key until the coin is inserted and the wheel locked in; after which nothing but the key will release it. This not only assures the safety of the wheel, but makes the putting in of the coin and the return of the key essential to the use of the lock. If so desired, the lock can be made to operate free by returning the coin automatically upon the release of the wheel; the coin being held simply to guarantee the return of the key, which is sometimes a temptation to a mischevious boy. The stands are made in different sizes, varying from a single to a ten-lock, or larger to order, and have the added advantage of being portable. As each lock must earn only 3½ cents per day to return 400 per cent. per annum, it should not be a difficulty to make it a paying investment, and this is doubly assured by the fact that the locks are sold to only one person or firm in each city.

"A Handy Book," made for carrying in the pocket, containing price lists and miscellaneous information of especial use in the office and workshop, has been prepared for the W Bingham Co., Cleveland, Ohio, by J. B. Comstock, better known as "The Man at the Corner Desk." It is all that the name implies, and a great deal of useful knowledge has been crowded into a little space.

Three U. M. C. Victories.

The Union Metallic Cartridge factory loaded shells have three more victories to be recorded. The World's Championship Trophy for inanimate objects was won at Kansas City by C. W. Budd, of Des Moines, Ia., whose record was 96 out of 100. The trophy is a remarkably handsome piece of work by Tiffany, standing two and a half feet high. It is gold plate on copper and is valued at $500.

J. Sedam, of Denver, won the Interstate championship, killing forty-two live birds straight; while the State championship and medal were awarded to J. B. Porter, to whose credit were forty-one live birds straight.

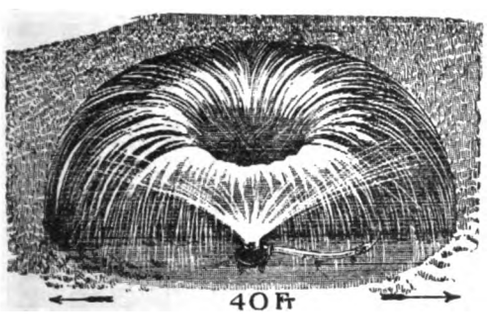
To Pay as We Go.

Editor Hardware: Your editorial in *Hardware* on the proposed tax on corporations is remarkably good.

The tax on all sales or receipts is the right thing, making it large enough to furnish money to pay as we go.

This would let all participate, and avoid discrimination, and the tax will be freely paid.

THE LOCKWOOD-TAYLOR HARDWARE CO.



Cleveland, Ohio May 27, 1898.

Digitized by Google

NEW GOODS AND SPECIALTIES.

The Spiral Lawn Sprinkler.

The Brightwood Washer Co., Nos. 15–17 Taylor Street, Springfield, Mass., are placing upon the market the Spiral Lawn Sprinkler shown in this connection. This article is made of iron, in one piece, and it is said, therefore, that it

cannot get out of repair, as there is nothing about it to break or clog up, and no movable parts to wear or repair. Being left on the hose, it is always ready for use, and can be easily moved from place to place, without shutting the water off. It can be held in the hand, making a spray for flowers, shrubs, etc., while the surface sprinkled can be regulated by the supply of water to the largest or smallest area. The water revolves around a stationary post, and is forced through a one-half inch opening, at an angle of forty-five degrees, making a fine, even spray. The Spiral is japanned or nickeled, is neat in appearance, and strong.

New Line Cream Cans and Dairy Pails.

The Buhl Stamping Co., Detroit, Mich., are sending some artistic circulars to the trade describing their new lines of Cream Cans and Dairy Pails. These goods are described as "the most perfect of their kind in construction and durability." The cream cans have deep flanged covers which spring over the wired tops of the cans, and at small extra cost are furnished with the new Buhl patent cream can gauge, or with their new spout faucets. These improvements add to the cleanliness of the cans, a point always sought after in the products of the Buhl factory. The

cans are made to hold 14, 16, 18 or 20 quarts, as desired, and are packed in crates containing one dozen each. The "Milk Maid" Dairy Pails bear the well-known "Milk Can" trade mark as a guarantee of quality. They are made of the best steel, extra heavy, and retinned, and hold 10, 12 or 14 quarts, full capacity. These pails are packed three dozen in a crate. The Buhl Stamping Co. have added to their already large assortment of milk cans a new low-priced can called the "Sunrise." This can has a convex cover, like their New York, or Eastern pattern, and either

stamped or malleable iron drop handles, as preferred. It weighs 18 pounds and is strongly made to stand hard usage. Special circulars and quotations of the above goods will be mailed to dealers only, on application.

New Oil Stove Tea Kettle.

The W. H. Sweeney Mfg. Co., Brooklyn, N. Y., call attention to their No. 10 Oil Stove Tea Kettle, which is, as the name indicates, specially designed for use with oil and gas stoves. One of its chief merits is its flat construction, giving a large heating surface, and thus allowing the water

to heat quickly, which is certainly a consideration when the hot weather makes fires of any kind unbearable. It is made of the best grade of tin-plate and heavily nickeled, and retails at twenty-five cents, and the large sales already made indicate that it fills a popular necessity.

R. A. Penick & Son, South Boston, Va., inform us that business in their section continues fair, and that they have had all they could do, for several weeks past. The wheat crop in their section is not as good this season as it was last but is above the average; tobacco is low; and collections are holding up well, for this season of the year. The war has had some effect on business, but not so severely as had been expected. A fine Fall trade is anticipated. They say, in conclusion, "unless some unexpected change takes place, 1898 will be the best year we have had in the seven last past."

The government, while having adopted the small calibre rifle generally, for the army, are still in possession of a great many of the .45 calibre; and it is reported depend entirely for this size cartridge on the U. M. C. people; whose factory is working twenty hours per day on government contracts.

When a man shoots himself for love it is generally on account of some girl named "Pearl" or "Birdie."—*Chicago Record.*

Review of the Markets.

Hardware: While the general trend of business locally has been of a character to beget conservative transactions of late, the successful prosecution of the war and the growing belief that it will not prove of extended duration, brings to the front the requirements for fall trade, which, with the war question satisfactorily disposed of, it is anticipated will prove to be an extremely hopeful one. Prices show no radical changes. Ordinary everyday traffic is good by comparison with last year. The vacation dullness brings its own limitation to sales, and the future promise, indicated by encouraging reports from the trade of the country, give us no fears for the year's general commercial average.

Wire Nails: The market for wire nails continues to be favorably handled by the large companies now controlling the output so extensively. The quotations have been without material change for a long time. and with the present moderate demand are scarcely susceptible of radical change. Stocks, no doubt, are on the increase in the hands of leading makers, but this is to be expected, in preparing for the usual shut-down in July, for cleaning-up purposes and stock-taking. The market may be stated firm at the quotation of $1.35, f. o. b., factory, Pittsburg or Cleveland, which is the carload price to retailers, to whom quotations are generally given in net prices delivered, having freight to destination added to base price. The New York market is still held at the quotation of $1.45 for carload lots on dock, and $1.55 for smaller lots from store.

Cut Nails: The cut nail market manifests but little movement. Prices are low, and volume of transactions unimportant in character. New York prices may be quoted: For carload lots on dock, at $1.17½ to $1.20; smaller lots from store, $1.25@$1.30.

Barb Wire: Business continues good in this important staple, local demand being moderate, but export requirements continue large. Local prices are maintained firmly and may be quoted in carload lots on dock, at a basis of $1.85 for four-point galvanized, while smaller lots from store are held at $2; painted being held at a difference in price of 30 cents.

Copper Rivets and Burrs: Under date of June 1st, the announcement is made that the following manufacturers of copper rivets and burrs have appointed U. T. Hungerford, No. 121 Worth Street, New York, sales agent for the distribution of their entire product: The Plume & Atwood Mfg. Co.; Detroit Copper & Brass Rolling Mills; Rome Brass & Copper Co.; Holmes, Booth & Haydens; Benedict & Burnham Mfg. Co., Bridgeport Brass Co., Coe Brass Mfg. Co. In connection with the above important arrangement, Mr. Hungerford announces that from the above date all sales, shipments, etc., of these goods, will be made exclusively through him. The standard price list adopted will be as follows:

Nos.	3 to 7 inclusive,	8	9	10	11	12	13	14	15
	49	50	52	54	56	58	60	65	70 cents per lb.

The following discounts to the general trade are announced: Terms 60 days or 2 per cent. for cash if paid within ten days of date of invoice, with a freight allowance of ½ cent per pound on the net weight of goods, f. o. b., factory or New York:

Regular Belt and Hose Rivets and Burrs.....Per cent., 55 to 60
Burrs only..... " 40 to 45

The following extras for special packing are announced, the most important change being for assorted lengths in a box, as will be noted:

	Per pound.
Rivets or Rivets and Burrs (uniform lengths in each box), packed in ⅛ or ¼ pound boxes, net additional	1c.
Rivets or Rivets and Burrs (uniform lengths in each box), packed in ¼ pound boxes, net additional	2c.
Rivets or Rivets and Burrs (assorted lengths in each box), packed in 1 pound boxes, net additional	1c.
Rivets or Rivets and Burrs (assorted lengths in each box), packed in ⅛ or ¼ pound boxes, net additional	2c.
Rivets or Rivets and Burrs (assorted lengths in each box), packed in ¼ pound boxes, net additional	3c.
Tinning Rivets or Burrs, net additional	2c.

Each size and kind are packed in cases containing 100 pounds. The change involved in the above selection of a single sales agent, and the advance in prices on these staple goods, result from the unprofitable business which has lately been the feature of all sales. It is hoped the proceeding will bring stability to market quotations, and thus prove quite satisfactory to the entire trade.

Sheet Zinc: The manufacturers of sheet zinc, under date of May 28th, have announced an advance in prices which makes $6 per 100 pounds the base for sheet zinc in 600 pound casks, f. o. b., mill, which includes all thicknesses between Nos. 9 and 15 gauge, widths between 32 and 46 inches, and lengths between 84 and 90 inches. At the same time the following extras were also announced, being given in cents per 100 pounds:

An extra charge is made for all packages smaller than 600 pounds, as follows:

100 lb. casks (all Nos. up to No. 12 inclusive), 30 cents per 100 lbs.
100 lb. boxes (not larger than 30x40 inches), 30 cents per 100 lbs.
200 and 300 lb. casks (all Nos. up to No. 14 inclusive), 20 cents per 100 lbs.
200 and 300 lb. boxes (not larger than 36x50 inches), 20 cents per 100 lbs.

The prices referred to above are subject to a special discount when ordered in lots of less than 3000 pounds, of 6 per cent., and 3 per cent. additional for cash with order.

Cordage: The range of prices for carload lots of rope has been on the upward grade for some time and still continues. While the manila hemp in the hands of importers in New York and Boston is known to be of fair proportions, the blockade at Manila which will shortly go into effect, will prevent much hemp from leaving that port and give the market additional strength. Sisal still continues in short supply even with recent importations, and present stock is claimed to be largely sold but undelivered. Business continues moderate under the circumstances, speculation not entering into it largely, and the following quotations indicate the market:

Manila, 7-16 inch and larger.....@ lb, 9¾c.
" ⅜ inch.....@ lb, 10¼c.
" ¼ and 5-16 inch.....@ lb, 10¾c.
Sisal, 7-16 inch and larger.....@ lb, 8¾c.
" ⅜ inch.....@ lb, 9¼c.
" ¼ and 5-16 inch.....@ lb, 9¾c.

Binder Twine: During the past two weeks business under advancing conditions as to price has been exceedingly large. The very large increase in the value of fibre, has made the several advances in the price of twine by the manufacturers, very natural, and occasionally irregular. Prices have been regulated greatly by amount of stock on hand ready for delivery. There is every indication of a phenomenal consumption of twine this year and record-breaking prices will undoubtedly be reached. Present quotations f. o. b. Eastern factories range as follows for carload lots:

White Sisal, 500 feet to the pound.....@ lb, 10¾c.
Standard, 500 feet to the pound.....@ lb, 10¾c.
Manila, 550 feet to the pound.....@ lb, 11¾c.
Pure Manila, 650 feet to the pound.....@ lb, 12 c.

Travers Bros., No. 107 Duane Street, New York, are placing upon the market a hemp binder twine running 500 feet to the pound, and tested to 105 pounds, which they quote at 8 cents, allowing a discount of ½ cent a pound for car-

Digitized by Google

load lots. It is doubtful if this low quotation will be long maintained.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 45 cents per gallon; in lots of 5 barrels or more, 44 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

James Swan Co., under recent date, issue a new catalogue of tools, which is referred to in another column, and to which the following revised discount sheet applies:

THE COLUMBUS TRADE.

Trade still continues good, and there is a very steady demand for seasonable goods, and several lines are hard to get promptly. We might mention the following among the scarce articles: Lawn mowers, steel goods, snaths, screen goods, poultry netting, smooth wire and binder twine. The latter article is getting very scarce, and price seems to be no object; it is a question of getting the twine. We find the prospect for a big wheat crop is excellent, and it is lucky for the farmer that he can get a good price for wheat to offset the high price he must pay for twine. The season for planting has been very backward. We are having what might be termed the wet season, and very little corn planting had been done in this neighborhood up to June 1st. There is plenty of time yet, however, to make a good corn crop. Almost everything the farmer has to sell now is bringing a good price. Horses

Is very little more than that of a poor one—the difference in service is immense. How great it is buyers as a rule don't realize. In our own business we find that this point, impressed on a hesitating purchaser, never does any harm and in many cases lands his order for a first-class belt. We all know what that means—more money at the time, and the best kind of foundation laid for further sales.

Our **Carbon** is a safe, serviceable belt, thoroughly constructed of excellent materials; **Double Diamond,** stronger and finer, adapted to exceptionally severe work; **1846 Para,** a magnificent belt, built of the choicest rubber and heaviest, most powerful duck. Write for particulars.

are in good demand, but they must be good ones. Cattle and hogs are bringing better prices. Hen fruit is cheap, and only brings about one cent per cackle, but as long as a hen doesn't get "set" in her way, she cackles pretty regularly every day—07 cents per hen every week is not so bad while worm and bug dirt lasts. Of course, we are not counting the rooster's cackle. It always struck us that a rooster has a lot of "sand in his craw" to stand up and cackle when a hen lays an egg. That is another proof that the chap who makes the most noise is not always the one who does the business.

SMITH BROS. HARDWARE CO.

THE PORTLAND TRADE.

While business is not as satisfactory as we could wish, prices are generally well maintained, and collections better than we might have expected after a year when all our farmers suffered from short crops. It has been many years since our farms have proved so unproductive as in 1897, and we are now feeling some of the effects of the shortage.

The outlook, however, is very encouraging for the present year. The country never looked better, and the trees give promise of a large fruit crop.

The war has frightened some of our over-timid summer visitors, and many who contemplated erecting new summer homes on our coast, have laid aside their plans until another year. We think this is short-sighted, as with labor and material so cheap, there has not been a better season for building for a long time, and there is not the least danger of our coast being visited by any of the demoralized navy of Spain.

We confidently expect next season will bring higher prices for lumber and labor and perhaps Hardware.

Our season has been too cool to start the freezer, refrigerator, or screen trade up to its usual volume, but will probably result in rush orders later on.

EMERY-WATERHOUSE CO.

THE ALBANY TRADE.

The recent ideal spring weather has helped to improve the condition of trade which, even with the rainy season of the past few weeks, has not been below the record of previous years. An unprecedented demand for field and garden tools and implements, has been greatly assisted by the early spring weather of the past, and there has been strong evidence of the continual shortness of stocks on the part of the smaller dealers throughout this section.

Lawn mowers have been a very conspicuous commodity, on account of the demand and the scarcity in the hands of dealers as well as manufacturers. The difficulty in getting orders filled promptly from manufacturers, has been severely felt by the large jobbers who usually reorder at this time of the year. The extremely low prices prevailing on these goods, have naturally popularized them with the public who possibly would not buy as freely at the higher prices ruling in past years.

The screen door and window screen business now at its height, has also been very conspicuous as quick selling goods this season. The wet weather has interfered to quite an extent in the distribution of such articles as rubber hose and lawn sprinklers, but the warmer weather which is sure to come later in the season, will no doubt use up present stocks in the hands of dealers.

A slight flurry has been caused in the nail market by the issuing of a circular from a heretofore unknown factory, quoting nails below price of the large American Steel & Wire Co., and the three other very heavy nail manufacturers. While this lower price has caused considerable talk among the dealers, yet there appears to be a doubt regarding the quality and standard gauge of the nails. This condition of things is only temporary, as there is good reason for believing that price of nails will show no signs of weakness, but can be at any time advanced by the few large makers now so thoroughly organized, as to control the market price of this leading article in the Hardware line.

The excellent condition of trade on leading goods, and steady prices prevailing on all goods, is most satisfactory to the dealers at large in this territory. A much better condition exists regarding trade, it is thought, in this limited territory than in the cities along the seaboard, which appears to be evidence of the fact that the effect of war is felt more perceptibly near the coast than in the interior.

ALBANY HARDWARE & IRON CO.

THE ST. PAUL TRADE.

The business record of the first five months of the year 1898 is made up, and we are now entered upon the sixth month. This has been with varying results in different localities. In the money centers of the East, when war was seriously threatened, and later, when it was declared, the effect was to very greatly frighten their bankers, and for a time completely upset their money market. These bankers and capitalists seemed to lose sight of the fact that this is a great Nation (with a capital N); that its resources are immense, and that the people not only have the money to do it with, but are willing to pay all the expenses of the government, including those of a moderately sized war, such as we now have on hand. When this did occur to them, they regained their lost equilibrium, and now the money market is fast regaining its normal condition.

This Eastern condition did not have much effect on business here. Our bankers did not lose their heads, but pursued the even tenor of their way, doing business as usual, and extending their usual accommodations to their customers, thus preserving confidence, and encouraging busi

ness, which seems a much better way than anticipating and inviting a panic.

The general business of the Northwest has felt and we hope will continue to feel, the good effect resulting from the great bulge in the price of farm products. We, of course, know that the fabulous price of May wheat was purely speculative, and was brought about by the manipulation of Leiter and his coadjutors, but nevertheless it brought considerable money to the farmers of Minnesota and the Dakotas. Potatoes at 60 to 70 cents per bushel at interior points, and dairy products, meats, corn, oats, etc., at largely advanced prices, have removed many mortgages and encouraged many a granger to make improvements in buildings and in other ways that give a decided stimulus to general business. Certainly, the wholesale business of this locality, up to the present time, has been very satisfactory, and as we have been blessed with plentiful and timely rains, the outlook for a good crop is encouraging, which, if realized, means good business for the balance of the year.

Prices of staple goods have not fluctuated much, save with the article of rope, in which there has been a sharp advance. It is true, however, that in almost all kinds of seasonable goods there is a rather short supply, owing to the active demand for the same.

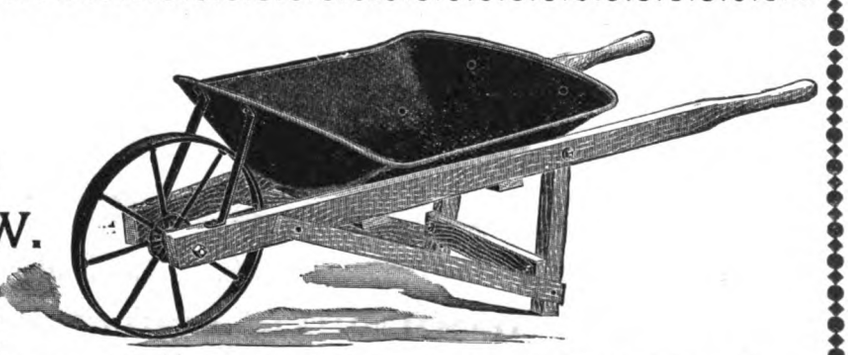
C. W. HACKETT HARDWARE CO.

THE PITTSBURG TRADE.

All firearms being "contraband of war," importers are finding difficulty in getting in their stock for the fall trade, but by hook or crook they are getting them in, so that no famine may be feared in that line. Ammunition makers, also, are not sure that they can fill orders promptly, because of the government demands upon the powder works.

Manila rope continues to climb towards old-time prices, and fortunate holders of stock are having a harvest which they would like to see extended to a few more items. The great bulk of goods, however, is not affected appreciably by the war, and we cannot see that they will be, unless it assumes much larger proportions than seems probable.

We were shown a little pamphlet lately, written by a traveling salesman, in which he advocates an agreement among jobbers that their men shall not call on trade oftener than once in sixty days, thus reducing expenses and allowing more opportunity for mail orders. The great bugbear of the jobbing trade at present is the expense account, and it will require some united effort to effect a change in the plan of doing business to reduce it within safe limits. All jobbers remember when they used one traveler where they now use three or four, and that results were better under the old plan. We do not believe it impracticable to so arrange it that each distributing centre should have certain prescribed limits of territory which is naturally tributary to it, and within which the jobbing houses of that city should not be interfered with by other cities. The retailer would be protected by the competition of the four or six jobbers in that city, which certainly is enough for good business, and the useless expense of travelers from other cities, with offers of special inducements in the equalization of freights, etc., would be avoided. This is an evil common to all jobbing houses, and we believe a return to old and natural conditions would not only better the condition of the jobber, but in the end be also more satisfactory to the retailer. LOGAN-GREGG HARDWARE CO.



THE CLEVELAND TRADE.

Associations organized to improve business methods, at their meetings ought to discuss live topics, one of which is, shortage on goods. The habit of deducting the amount in remittance without a full explanation, is not a fair way to do business.

A party claiming shortage should be entirely willing to verify his statement by oath, if that is necessary, to aid the seller in getting the allowance from the factory if the goods were shipped direct. Such claims should be made on receipt of goods, and should be accompanied with careful tally sheets, or statement, to be used by the seller to convince the factory of such shortage. Manufacturers are very reluctant to admit an error, as they carefully provide

Situation Wanted.

SITUATION wanted in a retail Hardware store by a sober young man, who is energetic, honest and reliable; have had three years' experience. Can furnish the best of references. C. M. LESH, Americus, Kan.

For Sale.

A GOOD clean stock of Hardware, stoves, tinware and agriculurtal implements in one of the best villages in New York State, situated in a splendid dairy section. Stock will invoice about $6000. Best reasons for selling. Address R. W., care HARDWARE, No. 143 Chambers Street, New York.

to prevent them. Such statements should be as convincing as the facts permit.

The seller is often suspected of doubting his customer's statement, when he is seeking to get the facts necessary to get the claim allowed. This is the unpleasant part of such transactions. Again, goods should not be returned before writing the seller, as it causes needless expense, because it often happens that they should be returned to the manufacturer instead of to the seller.

If we were all prepared to suffer, rather than do injustice, life would be much pleasanter, and in the long run justice would be done. To insist on our own rights, need wrong no one. To insist on the rights of others, helps to keep our own secure. We are all under suspicion, because of the unjust action of a few. The standard of business is improving and organized business associations ought to be of great benefit in this direction. Business men are usually so upright that an exception creates distrust, as a counterfeit greenback does.

Again, when goods are delivered by the seller to the transportation company, he has fulfilled his part of the contract. If delays, damage or loss occur, the obligation is to the purchaser and not the shipper, although he usually aids in collecting it.

If a buyer desires extension in time of payment, he should notify the seller before it becomes due, and ask it as a favor if he cares for a high grade of credit.

The amount of money a man is worth does not always determine his grade of credit His business methods have an important influence. Improved methods of business can only come through individual improvement. Self-improvement is much more important than an effort to improve other people.

The compelled economy of our long dull time laid a foundation for prosperity that even war cannot wholly destroy. It would not have been hard to guess what would have been without a war, but it is harder to guess what it will be with it. We must wait to see. The demand for wire has been unusually large for May, and shipments very much delayed, as the mills are full of orders. The demand for nails is increasing. LOCKWOOD-TAYLOR HARDWARE CO.

THE CHICAGO TRADE.

There does not seem to be any cessation in the demands for wire cloth, netting, window screens, doors, ice cream freezers and kindred lines of goods. High grade bicycles are also difficult to secure from manufacturers as rapidly as we would wish, and trade in the leading staple goods in other lines of Hardware is much larger than we have had for the corresponding period one year ago.

The war with Spain seems to be taken for granted and does not interfere apparently with Western trade conditions to any great extent.

Prices for farm products continue to be very favorable to the farmer—a large acreage is sowed and planted, with favorable prospects for a good crop.

With so much in our favor it is but reasonable to expect an enormous demand for all classes of goods from consumers, and more especially the farmers of the great Northwest, from all of which we argue a fine trade for Chicago Hardware jobbers right through the year.

WELLS & NELLEGAR CO.

THE DENVER TRADE.

A backward spring has made a little difference, perhaps, in general business in this section, but May has closed on a good month's business in the Hardware line. For the first five months of 1898 we estimate the volume of business 20 per cent. greater than during the same months of 1897. The outlook is good. The snowfall of last winter being lighter than the average, there was great uneasiness regarding the supply for irrigation this summer, but the late spring rains have been ample compensation, and a good harvest is now assured so far as water is concerned, and water is the principal requirement in this State for successful farming. This means much for Colorado, with its annually increasing agricultural products.

Mining is prosperous, and the output will probably exceed that of any previous year. All things considered, this may be a banner year, and no one will find fault if it should prove to be. GEORGE TRITCH HARDWARE CO.

THE PHILADELPHIA TRADE.

At last the weather has settled down to a condition of normal Spring, but the delay in the season has been somewhat unfortunate.

Accounts, however, of trade conditions throughout the country are so uniformly favorable, very confident expectations are being held in regard to summer and fall trade, while the advocates of higher prices seem to have more foundation for their arguments than for some time past.

So far, prices have shown but little change, although such spring goods as window and door screens and wire cloth are so scarce that it is impossible to fill orders promptly, and prices are already higher in consequence.

Collections continue fair, and there is, perhaps, an increase in the number of small accounts now paid up, indicating, perhaps, the amount of money being put into distribution by the expenditures of the government and which is now having its effect on trade channels.

BIDDLE HARDWARE CO.

THE DAVENPORT TRADE.

Weather continues favorable to growing crops, that are looking well, and give promise of an abundant harvest.

Sales for April show a very satisfactory increase over April of 1897, although the margin of profits has not increased in proportion to the sales. There is a scarcity of plain and barb wire, lawn mowers, screen doors, poultry netting and many other staple seasonable goods. Collections satisfactory. SICKELS, PRESTON & NUTTING CO.

There's no other file "just as good," The ARCADE is the best.

ARCADE Files are all made with Weed's improved increment cut, equal to the best English hand-cut files.

If this statement is correct it is certainly for your interest to handle Arcade Files, and we stand back of its correctness by offering to send you a sample order of files at our own risk, to be returned at our expense if they are not in every particular what we claim for them. The smallest order will receive equal attention with the largest.

Copyright, 1898.
The Arcade File Wks.

No, sir. I want the ARCADE. It cuts faster and wears longer than any other file made.

We're all out of ARCADE files. Try this; it's just as good.

The Arcade File Works,

THE POPULARITY

Of our premium list, evidenced by the eagerness with which new subscribers are availing themselves of the opportunities offered, has compelled us to extend the time limit. We will therefore continue this offer until further notice to **NEW 1898 SUBSCRIBERS.**

ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

Needs no introduction to the Hardwareman. He already knows what a valuable adjunct to his business this semi-monthly visitor is, with its reliable "Prices Current," its "Market Reviews" and its general news of interest to the Hardware trade.

FOR $1.00 We will send "HARDWARE" for one year, and **ANY ONE** of the following articles:

A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.

Huebsch's Year Book.

A 365-page Cloth Bound Diary—one page for each day in the year—4½x9 inches, bound in flexible cloth covers. Invaluable to merchants, manufacturers, bookkeepers, clerks, etc.

Indexed Coupon Books

representing one hundred dollars—to enable you to put your business on a cash basis—do away with pass books—to prevent bookkeeping errors. No disputes over accounts—no delinquent debtors or bad accounts. Used throughout the country now instead of credit system.

A numbering stamp, which will number from 1 to 999,999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.

FOR $1.25 We will send "HARDWARE" for one year and your choice of the following six premiums:

1. A Perfect Fountain Pen . . . . with 14 kt. gold pen and a filler, warranted to give the most satisfactory results. Made by one of the oldest fountain pen houses in America, and fully guaranteed. . .

2. A Silver Mounted Stationery Set. Seal, letter opener, and paper knife with pearl blade—that gives an air of elegance to your desk. . . .

3. Huebsch's Year Book . . . . (large size), 6x9 inches, bound in flexible cloth, made to last. IT IS YOUR BUSINESS MEMORY, and will not fail you.

4. If You Have a Good Name . . . you may like to see it in your window. We send you ten of the best white enamel 4-inch letters, with a half pound of best cement and full instructions for putting up. If 4-inch letters are too large, send for twenty 2-inch letters. If you require more than the quantities specified, we will send you extra letters; 4-inch at 6 cents each, and 2-inch at 3 cents each. . . . . .

5. Half Dozen Photographs. . . . . Send us any photograph, with your name and address written plainly on the back, and we will return it to you together with six medallion copies of the original, mounted on celluloid, with a wire stand. We guarantee the medallions to be as good as the original. . . . .

6. Bushnell's Price Book . . . bound in seal morocco, 4¼x6⅞ inches, 200 pages, adapted to the use of the traveling man, the home salesman and the office. Neatly indexed, red edged, ruled faint, printed headings. This practical Price Book is in almost universal use. . . . . .

The First American Patent.

As there is going on in the scientific world a discussion as to the first patent granted by this government and its date of issue, the *Inventive Age* sets forth the facts, in a recent issue.

The first patent was issued at Philadelphia, on the 23d of December, 1796; but nearly six years prior to this (in 1790) a patent was given to Samuel Hopkins for a new method of making pot and pearl ashes. We are not aware that this process, or formula, had anything to do with machinery. But in Passmore's machine, letters patent for which were issued on the date referred to, "the conjurer for cooking and boiling water" (note the absence of the comma after "cooking"), we find the beginning of the patented mechanical idea, from which the wheel of American inventive mechanism has rolled so triumphantly down the road of human achievement.

There have been several claims to right of priority as to the first patent issued in the United States—notably to Samuel Bartlet in 1808, for an improvement in rolling tub mills; and one issued to Miss Mary Kies, of South Killingly, Conn., for "weaving straw with thread." But the potash pearl ash invention is the father of the patent brood, and is, as we have stated, followed by the "machine for cooking and boiling water." The patent for the latter can be seen in the National Museum.

Use of Bicycles in Norway.

According to United States Consul Man at Bergen, bicycles are in general use in Norway, although not as extensively as in other parts of Europe, the use, perhaps, being more limited to the class in comparatively easy financial circumstances. The roads are macadamized and would be adapted to bicycling were it not for the large rainfall in western Norway, which amounts to about eighty-five inches per annum. The hilly nature of the country is an additional drawback, necessitating as much walking as riding. In spite of these conditions, however, the consul says the bicycle continues to grow in popularity.

Most of the bicycles sold in Norway are from Germany and the United States. The duty on cycles is 30 kroner ($8.04) each. There is no differential duty favoring cycle manufacturers in other countries. Canadian bicycles with wood rims, mud guards and other American improvements are advertised and sold as "American" wheels.—*Exchange.*

"PIONEER"

FIFTY POINT CARBON STEEL TUBING

The uniformity obtained from our process of manufacture is especially desirable for bicycle purposes.

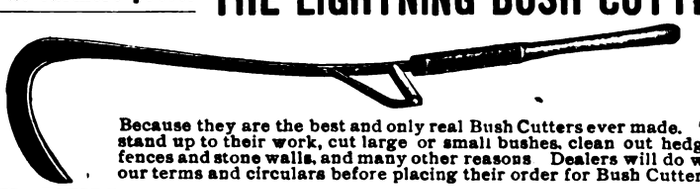
There is a rapidly increasing demand for seamless tube owing to its adaptability to purposes for which laboriously drilled solid stock has heretofore been necessary.

No Specially Prepared Samples.

THE POPE TUBE CO.,
HARTFORD, CONN.

"Pioneers" in Correct Composition.

We should be pleased to quote you discounts on application. Send for printed matter.

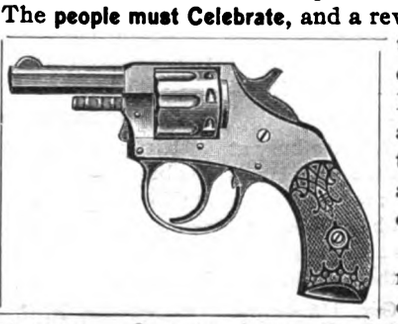


"Has Our Esteemed Favor."

Edward Darby & Sons, Philadelphia, Pa. [*Wire Goods*]: For the past few years we have been in HARDWARE, and we beg to remind you that it has our esteemed favor, and will recommend the same to anyone desirous of a good, useful, common-sense trade journal such as HARDWARE is.

One of the First and Last Advertisers.

New Jersey Car Spring & Rubber Co., Jersey City, N. J. [*Rubber Goods*]: This company was one of the first to enter your list of advertisers, and we expect to be among the last to retire. We feel that HARDWARE is one of the publications we can't afford to stay out of.



Why do farmers prefer THE LIGHTNING BUSH CUTTERS?

Because they are the best and only real Bush Cutters ever made. They can stand up to their work, cut large or small bushes, clean out hedges along fences and stone walls, and many other reasons. Dealers will do well to get our terms and circulars before placing their order for Bush Cutters.

THE BEMONT MFG. CO., South Glastonbury, Conn.

FOURTH OF JULY, owing to the excitement of **WAR,** will be the occasion of such a demonstration of patriotism as has not been known heretofore. The **people must Celebrate,** and a revolver is the safest and most satisfactory noise-maker.

Our Young America Double Action lines are particularly adapted to the **FOURTH OF JULY** trade, and being made in Rim Fire, as well as Central Fire, allow the use of inexpensive ammunition. Dealers, if you would avoid the rush and the probability of disappointment, place your orders at once. Our catalogue describing our complete line will be sent to any address, free.

Harrington & Richardson Arms Co., WORCESTER, MASS., U. S. A.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Ashton, Ill.—A. W. Rosecrans & Co. have opened a new store and intend carrying a stock of Hardware.

Britt, Iowa.—F. B. Rogers & Son have opened a new Hardware store, handling Hardware, stoves and tinware and sporting goods.

Canajoharie, N. Y.—W. L. Klinkhart.

Denver, Col.—Murray-Gifford Hardware Co. has been incorporated with a capital stock of $10,000; Larimer; Fort Collins. Incorporators: Carroll J. Murray, Frank D. Abbott, Frank E. Gifford.

Erie, Iowa.—J. M. Cross, who was employed by Gunther & Sons for a number of years, has opened a Hardware and tin shop north of the square.

Idaho Springs, Col.—The Lowell Hardware Co. has been incorporated with a capital stock of $15,000. Directors: B. F. Lowell, J. E. McIntyre, O. W. Lowell.

Ironwood, Mich. — Lesselyong Hardware Co.

Lamar, Mo.—L. Loman.

Montreal, Can.—St. James Hardware Co.

Oto, Iowa.—Daniel Griffen has opened a new store, handling Hardware, stoves, tinware, furniture, etc.

Pecatonica, Ill.—G. W. Frey has purchared a Hardware store.

Randsburg, Cal.—E. G. Ord.

Shelton, Conn.—D. N. Clark.

Stockbridge, Mich.—Mann & Stephens have moved into their new Hardware store at this place. The store is as well appointed and convenient as any in the county.

Tiffin, Ohio.—Geo. W. Moore.

Utica, N. Y.—Radell & Bowman have recently opened a mill supply store.

Changes and Improvements.

Alexis, Ill.—Harry Bailey has disposed of his interest in the Alexis Hardware Co. to his partner, C. A. Wray, who will continue the business under his own name.

Ashton, Ill.—W. J. Stevenson, Hardware, succeeded by W. S. Rosecrans.

Atlanta, Ga.—The Beck & Gregg Hardware Co. will erect on Marietta Street a three-story brick store, seventy-five feet wide and 200 feet long. The new building is to be ready by October.

Baker City, Ore.—Shinn & McCord, Hardware, succeeded by Asa Shinn.

Conneaut, Ohio.—Carpenters are busy at work building an addition to the Kirk Hardware Co.'s store. The new room will be on Washington Street and will be of great accommodation to the firm, as at present their store is much too small for their stock.

Dundas, Minn.—J. H. Orr, Hardware, agricultural implements, etc., succeeded by W. W. Hassau.

Fiskdale, Mass.—J. S. Woodhall, who has been in the Hardware and tinsmith business about three years, has closed out his business.

Floyd, Iowa.—William Morse, Hardware, succeeded by Frank Spencer.

Harbine, Neb.—L. J. Hiatt, Hardware, succeeded by O. H. Tasche.

Hurley, S. D.—T. J. Hill, Hardware, sold agricultural implements to R. W. White.

Lushton, Neb.—P. H. Pursell, Hardware, succeeded by Robert H. Shepherd.

Minden Mines, Mo. — Edward Marsh, Hardware, etc., sold to Sandford Bros.

Morris, Minn.—E. W. Randall, of Hamline, and S. J. Stebbins, under the firm name of Stebbins & Co., have purchased the Hardware stock, building and lot from A. A. Stone, on Atlantic Avenue.

Oakland, Cal.—Arrangements are being made by E. R. Tutt, the Hardwareman, for the erection of a building on the property owned by him on the south side of Thirteenth Street, near Washington. He will put up a three-story brick building with basement, covering the lot 25 x 100 feet in size. It will have an ornate front of pressed brick and galvanized iron. The work will be pushed forward as rapidly as possible, and Mr. Tutt expects to occupy the entire structure himself in about two months. The cost of the improvement will be between $12,000 and $13,000.

Owatonna, Minn.—John Gladback, Hardware, succeeded by N. J. Schafer.

Pierce, Neb.—D. W. Elliott, Hardware and agricultural implements, sold out.

Pittsfield, Mass.—James S. Mattoon, for some years a clerk with Barker & Belden, is to start in the Hardware business on his own account.

Sanford, Fla.—H. M. Papworth has retired from active partnership in the firm of W. J. Hill & Co., Hardware merchants, with which he has been connected for about ten years. W. J. Hill will continue the present business at the same location.

St. Petersburg, Fla.—J. R. Moore, Hardware, stock purchased by P. B. Stoner & Son, of Dade City, who have taken possession.

Waukesha, Wis.—H. M. Horning Co., Hardware, succeeded S. A. Perkins.

Webster City, Iowa.—The Rasmussen Hardware and implement business has been transferred to W. C. Grant, of Sibley, Iowa.

Business Embarrassments.

Detroit, Mich.—Alfred E. Hamlin, who has been the proprietor of a Hardware store at No. 808 Fort Street, West, for many years, has made a voluntary assignment for the protection of all creditors, to the Union Trust Co.

Greenville, N. C.—D. D. Haskett, dealer in Hardware, has made an assignment to R. J. Cobb.

Mansfield, Ohio.—W. J. Thornton, Hardware dealer, has made an assignment to H. E. Bell. Assets and liabilities are about $1000 each.

Montreal, Can.—Letang, Letang & Co., wholesale Hardware merchants, No. 287 St. Paul Street, have made an assignment. The liabilities amount to $100,000, and it is claimed that the assets are $200,000, giving a surplus of $100,000.

Snow Hill, Md.—John S. Hurlock, Hardware, reported to have made an assignment.

West Chester, Pa.—Frederick D. Reid, Hardware, reported to have made an assignment.

Burglaries in Hardware Stores.

Baltimore, Md. — Habig & Stegmaier, small loss.

Burlington, N, J.—Seldon R. Probasco, files.

Cokato, Minn.—P. Habberg, Hardware, store burglarized, and a small sum of money taken.

Columbus, Ohio.—Fishback & Co., knives.

Eagle, Wis.—D. L. Newton, cutlery.

Elkhart Lake, Wis.—P. A. LaBudke, $225.

Gilmore City, Iowa.—J. J. Mulholland, razors.

Hersey, Mich.—O. L. Milliard, $120.

Jewell, Ia.—Cary & Knudson.

Macon, Ga.—Culver & Corbin, $100.

Marcellus, Mich.—Moon & Russell, cutlery.

No. Java, N.Y.—Mason & Crahan, cutlery.

Recent Fires.

Albia, Iowa.—J. R. Duncan, Hardware, destroyed by fire. Fully insured.

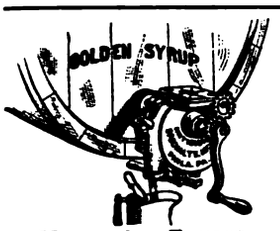
Chicago, Ill.—The Hardware store of Mrs. John Lang, on Wentworth Avenue, has been destroyed by fire. Loss, $1650.

Fessenden, N. D.—A. J. Smith & Co. Hardware merchants, damaged by fire.

Loogootee, Ind.—The Hardware store of Huebner, Shirey & Co. was destroyed by fire quite recently. The loss was $16,000, with an insurance of $4000. The firm have resumed business in other quarters, and will probably rebuild on the old site.

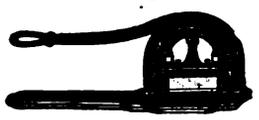
Manchester, N. H.—A disastrous fire has visited the Hardware store of the John B. Varick Co., causing a loss on the stock of about $75,000 and $13,000 on the building.

Merrill, Wis.—F. M. Montgomery's Hardware store has been destroyed by fire. Insured.



Morgan, Minn.—The Hardware store of Billington & Son, of this place was recently partly destroyed by fire. Their loss was very little above insurance, but the firm have decided to discontinue business, and will close out their stock.

Pine City, Minn.—The store of H. N. Welch was destroyed by fire a short time since, with loss about $4000. Mr. Welch has reopened with an entirely new stock, in the Connors block.



Rogers, Ohio.—P. M. Crawford, Hardware, destroyed by fire.

Texarkana, Ark.—J. E. Benjamin's Hardware store has been destroyed by fire.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements. etc , will be gladly received, and promptly published.

New Companies, Etc.

East St. Louis, Ill.—The Missouri Wire & Nail Co. have filed articles of incorporation. They have a capital stock of $10,000, and the incorporators are C. F. Hintze, Richard Scruggs and A. N. Sager.

Lowell, Mass.—The Woods-Sherwood Co. has been incorporated. Capital stock, $20,000. Directors: Wm. H. Anderson, president; Elisha J. Neale, treasurer, and Edward P. Woods. Purpose of organization: the manufacture and sale of wire goods.

Meriden, Conn.—The Bell Shovel Co. has been organized, with a capital stock of $3000.

Neosho, Mo.—The Neosho Chilled Plow Co.; capital stock, $6750. Incorporators: J. E. Alexander, J. C. Alexander, E. D. Smith and E. W. Lillard.

Peoria, Ill.—The Peoria Gun Co., capital $1000, to manufacture animated targets, incorporators: G. N. Portman, C. L. Portman and Charles Rowland.

San Francisco, Cal.—The Hercules Adjustable Pipe Wrench Co. hae been incorporated by Richard O'Connor, H. A. Jones, Hugh Keenan, Joseph M. O'Brien, Thomas E. Ryan. Capital stock, $20,000.

Rochester, N.Y.—Orrin Hoxie, for twenty years with the Sargent & Greenleaf Co., and Charles H. Clark, formerly manager of the Clark Novelty Co. have formed a copartnership for the purpose of building light machinery, special tools, models, etc., under the firm name and style of Hoxie & Clark, with factory and offices at Nos 42 and 44 Stone Street. The factory of the firm is fitted throughout with new and modern machinery and appliances, and the firm are fully equipped to fulfil any contract in their line promptly and satisfactorily.

Topeka, Kan.—The Brendner Mfg. Co. has been organized to manufacture the "Brendner Garden Tool," and have a capital stock of $50,000. The stockholders are W. H. McCamish, J. H. Parrott and J. F. Jagger, Kansas City; Joseph Brendner, of Pacific, Mo., and F. A. Wilcox, of Fremont, Ia.

Topeka, Kans.—The Beatty Mfg. Co. has been organized to manufacture the "Beatty wire splicer pliers," and the capital stock is $25,000. The stockholders are W. H. McCamish, J. H. Parrott, J. F. Jagger, Joseph Brendner and F. A. Wilcox.

Trenton, N. J. — The McCabe Hanger Mfg. Co. have been incorporated to make Hardware specialties; capital stock, $50,000. Incorporators: Thomas G. Bain, Peter H. McCabe and James McCabe, East Orange.

Trenton, N. J.—The New York Wire & Spring Co.; capital stock, $15,000. Incorporators: Robert Smith, Blairsville, Pa.; Julius Berrie, West Hoboken; Ralph B. Smith, New York.

Changes and Improvements.

Abington, Mass.—The Abington Tack Co. have decided to remove their works from this place to Ansonia, Conn., and work will soon cease at the factory here.

Albany, N.Y.—The Brainerd, Tanner Co. have been making improvements in their factory. Several large machines, adapted to the manufacture of general Hardware, were recently installed.

Anderson, Ind.—The Hazen nail mill, which has been idle for five years, will soon be in operation. R. L. Kane, representing a party of Eastern capitalists, has arrived to take charge of the plant. A wire drawing department will be added, and the mill will be run independent of the Wire Nail Trust. The mill has a capacity of 1000 kegs per day.

Anderson, Ind.—The name of the American nail mill plant has been changed to the American Steel & Nail Co.

Batavia, N. Y.—The Johnston Harvester Co. are arranging for extensive additions to their large plant. The cost of new buildings and machinery will be $25,000.

Birmingham, Ala.—A building permit has been issued to T. C. Thompson & Co. for the construction of the Southern Bolt Works on Fourteenth Street, and Powell Avenue. The building is to cost $3000, and work thereon has been commenced.

Niagara Falls, N. Y.—The Carborundum Co. propose erecting a three-story brick building, 50 by 228 feet, which they propose using as a factory for spreading carborundum on cloth and paper.

North Chicago, Ill.—The Chicago Hardware Co.'s foundry has been enlarged, adding one-third to its capacity.

Springfield, Ohio.—The Springfield Machine Tool Co. has begun work on a new machine shop, 60x200 feet, the addition being necessitated by an increasing business. The company is three months behind orders.

St. Louis, Mo.—The St. Louis Screw Co. have filed a notice of an increase in their capital stock from $30,000 to $60,000.

Vincennes, Ind. — The Hartman Plow Works have decided to immediately put up a $5000 building on their addition near the Union Depot, and shareholders owning lots are to erect on each one a cottage for the use of employes.

Waterville, Conn. — The new building which the Waterville Cutlery Co. is erecting will have a steel roof which is being built by the Berlin Iron Bridge Co. The trusses are steel, and the covering is corrugated iron lined with patent anti-condensation fireproof lining. The building is 21 feet wide and about 100 feet long, and is to be used as a forge shop in one end, and in the other end will be located the boilers and engines.

Recent Fires.

Aurora, Ill.—D. H. Smalley & Co., manufacturers of machinery and Hardware specialties, destroyed by fire.

Connellsville, Pa.—The plant of the Slaymaker-Barry Co., manufacturers of locks and builders' Hardware, has been burned. The loss is about $100,000. The buildings were insured.

Gardner, Mass.—The factory of the Central Oil & Gas Stove Co. has been damaged by fire.

Munnsville, N. Y.—The Munnsville Plow Works have been damaged by fire. Loss, $1000; fully insured.

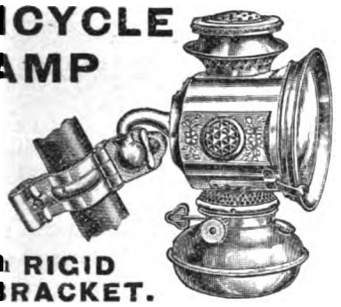
Phelps, N. Y.—The plow works of G. H. Parmelee have been burned to the ground, leaving only the pattern room and office. All the patterns were saved. The loss is about $2000, with no insurance.

Springfield, Mass.—Springfield Machine Screw Co., manufacturers, destroyed by fire, at a loss of $5000. Fully insured.

Miscellaneous.

Kenton, Ohio.—The directors of the Kenton Hardware Mfg. Co. have held a meeting and several new officers were elected. N. H. Colwell's resignation as superintendent was accepted, and R. H. Westerfield was appointed in his place. Asher Letson was elected president and J. H. Pfeiffer, treasurer.

La Crosse, Wis.—As the plans for the new buildings that the La Crosse Plow Co. will erect this season on North Third Street are developed, it becomes evident that the new shops are to be models of modern shop construction. For instance, the great main shop is to be 60 by 220 feet, five stories, besides a full sized basement. This, as all the other buildings, is to be of solid brick and stone masonry, the superstructure being of the finest brick made for the purpose. As to the interior construction, it will be of what is technically known as slow burning, mill construction. In the ordinary sense of the term, there will be no joists at all. The floors of five-inch planks will rest on heavy solid timbers, which will stand more fire than iron columns and girders, inasmuch as there is no expansion and bending of the timbers.



New Haven, Conn.—The Wm. Schollhorn Co., manufacturers of scissors, shears and pliers, at Wooster and Wallace Streets, have received orders for special tools to be used by the army and navy of the United States. Vice-president Frank Schollhorn said that the first order was received from the government a short time ago and others have been constantly coming in up to the present time. The orders now on hand will keep the factory busy during June, July, August and well into September.

Shortsville, N. Y.—The Empire Drill Co. intend to put out 5500 of their drills this season, besides their other implements. The Shortsville Wheel Co. shipped 20,000 wheels the past month, and still orders are coming in so that the works promise to be busy for some time. J. R. Hillman is getting many orders for his apple slicer, and if the fruit crop promises well he will have all he can do to supply the demand.

Ruggles, president; Frank Eveland, vice-president; John March, secretary and treasurer. Directors: F. L. C. Martin, Alex Schwalbach, Frank Eveland, Arthur N. Jervis, Oliver R. Charlick and H. F. Torrey.

Pittsburg, Pa.—The Hensel Mfg. Co. has been incorporated to manufacture an anti-puncture shield for rubber tires. Capital, $2400. Directors: A. P. Kirtland, H. D. McCutcheon, J. Gianini and A. Marshall, Pittsburg; G. S. Lewis, Crafton.

Plymouth, Iowa.—P. W. Carmany.

Salina, Kan.—Law & McHaffie.

Villisica, Iowa.—A. J. Jackson.

Washington, D. C.—G. Fred. Isell.

Washington, D. C.—R. C. Stevens & Co., bicycles and bicycle sundries, have opened a store at No. 1110 F Street, N. W.

Changes and Removals.

Columbia, S. C.—Preston L. Melton Co., bicycles, reported sold to Linneus S. Tompkins & Co.

Galesburg, Ill.—F. R. Gadd, bicycles, etc., moved to Peoria.

Galveston, Tex.—Murray & Mabry, bicycles, etc., reported to have sold out.

Hamburg, Pa.—The Wilhelm Bicycle Works, recently destroyed by fire, will be rebuilt by the Board of Trade.

Houston, Tex.—Bering Cortes Hardware Co. succeeds C. L. & Theo. Bering.

Marion, Ind.—Halladay & Rubey have added Hardware.

Montreal, Can.—The Warwick Cycle Mfg. Co. have dissolved.

New Milford, Conn.—Frank E. Soule, bicycles, succeeded by P. M. Cassidy.

New York, N. Y.—Hulbert Bros. & Co., dealers in athletic goods, bicycles, sundries, etc., West Twenty-third Street, have removed to No. 236 Fifth Avenue, corner of Twenty-seventh Street.

Philadelphia, Pa.—Stevens & Phoenix, bicycles, reported to have dissolved partnership. Each continues.

Springfield, Mass.—James Duckworth has purchased site for a factory on Waltham Avenue. He will erect a new three-story factory, and will occupy same with his bicycle chain manufacturing business just as soon as it can be made ready. He will increase his business by the manufacture of bicycle parts in general.

St. Johnsbury, Vt.—W. Coggins, sold out to D. Stiles and Ed. Cramer, who will continue.

Toledo, Ohio.—Ott & Hemley will remove to larger quarters at the close of the season, and raise their output to 6000 wheels for 1899.

Washington, D. C.—John J. King, sold out.

Recent Embarrassments.

Boston, Mass.—Frank W. Brigham, bicycles, etc., reported to have made an assignment.

Boston, Mass.—The Elastic Tip Co., No. 370 Atlantic Avenue, cycle supplies, have made an assignment. The cause of the assignment was several large failures of debtors of the company.

Chicago, Ill.—Dodson Mfg. Co., bicycles, reported to have appointed a receiver.

Chicago, Ill.—Hector Mfg. Co., bicycles reported to have made an assignment.

East Worcester, Mass.—The Speirs Bicycle Mfg. Co. have made an assignment. The liabilities of the company amount to $140,000.

New York, N. Y.—Rosenberg Bros. & Co., manufacturers of bicycle grips, reported to have made an assignment.

Paris, Ont.—Young Bros., bicycles, have assigned.

Seneca Falls, N. Y.—The Davis & Stevens Mfg. Co., manufacturers of bicycle supplies, have made an assignment to Edward L. Bowell.

Worcester, Mass.—The Rawson Co., bicycle makers, have made an assignment to David J. Lord and Charles B. Southard.

Recent Fires.

Ozone Park, N. Y.—The bicycle repair shop of O. W. Shevalier has been damaged by fire. Loss, $300. Insured.

Rochester, N. Y.—Shaw, From & Co.'s bicycle store, No. 247 North Street, has been destroyed by fire. Loss, $1500, covered by insurance.

West Superior, Wis.—Hunte's bicycle store, damaged by fire at a loss of $6000; insured for $3000.

Miscellaneous.

Boston, Mass.—Arthur M. Little, of the embarrassed E. Howard Watch & Clock Co., does not believe the concern's creditors will lose a dollar. He expects a reorganization on a safe and substantial foundation. Meanwhile, business, he says, will continue as usual, and any and all orders be accepted and promptly executed.

Buffalo, N. Y.—William C. Boak, dealer in bicycle sundries, who has made a general assignment recently, will continue in business. A meeting of the creditors has been held to decide what course to pursue. The condition of Mr. Boak's affairs was discussed, and it was stated that the liabilities amounted to about $79,000 and the assets $75,000.

Hartford, Conn.—Charles G. Huntington, late editorial writer for the *American Cyclist*, has accepted a responsible position in the advertising department of the Pope Mfg. Co. Mr. Huntington has long been recognized as one writing with authority on wheel topics, his work having been widely quoted at home and abroad.

Indianapolis, Ind.—The Western Rubber Co. has been organized to take over the rubber department of the Indiana Bicycle Co., makers of Waverley bicycles. The new company will make an extensive line of tires.

Toledo, Ohio.—The Lozier Mfg. Co., manufacturers of Cleveland bicycles, have agreed with the American Federation of Labor to employ no girls in their factories after this season, which it is stated will end July 1st. The agreement affects factories in Toledo, Toronto, Can., Westfield, Mass., and Thompsonville, Conn. Last year girls were employed by this company, displacing men in operating tools making bicycle parts.

Y&T

CUTS ONE THIRD SIZE.

No. 42.

The case, 2⅜ × 3½ inches, is of iron, old copper finish, and the cylinder, bolt and knob of polished bronze. It is adapted to doors of either hand and of any thickness.

The Yale Rim Night Latch

was at once accepted, when first introduced in 1867, as the best and most secure lock on the market; it is now admittedly the standard of excellence not only in America but throughout the world; it has many would-be competitors, but in its latest form, and with the PARACENTRIC KEY, it has no equal and easily outranks all other night latches in security and popularity.

A supply of folders descriptive of this lock and our less expensive lock of the same type (the No. 22), will be furnished to our Trade Customers on request. The name and address of this Company will not appear on them.

The Yale and Towne Manufacturing Company.

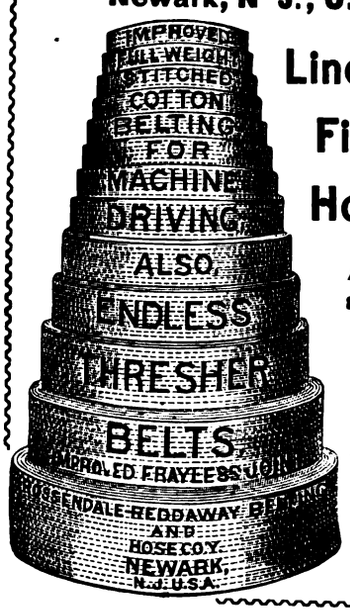
PACKED ONE DOZEN IN A BOX.

The Turn Table "'98" Apple Parer



(With Push-Off).

THE latest and we believe the best Apple Parer for household use on the market. Combines the principles which made the original TURN TABLE PARER so popular with distinct new features which add materially to its effectiveness and warrant the assertion that it is superior to all others in its class.

As the cut shows it is inverted so that parings fall clear of working parts. It pares unusually close at both ends of the apple. The knife as it passes the end of the fork recedes, leaving abundant room for the hand when placing the apple on the fork. The Push-off is entirely automatic, simple but positive. It works like a charm. This machine is made in the most thorough manner and sold for a little money. Examine before purchasing any other.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

THE BURR PATENT
STEEL

Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of." J. C. DEBES,
Supt. of the C. & G. Cooper Co.,
Mt. Vernon, O.

Adopted by the Penna. R.R. Co.

WANTED TEN OLD BICYCLES.

New HOWARD CHAINLESS
To be given in exchange.

OUR Advertising Department proposes to give ten latest Improved Howard Chainless Bicycles, valued at $125 each, in even exchange for an equal number of the oldest bicycles of any make, in good order and condition for use. Awards to be decided from applications sent in before the 4th of July.

All You Have to Do is to send to us in a sealed Envelope:—1. Your name, residence and postoffice address. 2 The name, factory number and description of the bicycle. 3. If you want our illustrated catalogue send two 2-cent stamps.

If you have an old bicycle you merely send the required information. It may bring to your door the best bicycle in the world in exchange for your old one. This is no scheme to secure a payment, subscription, or admittance for an agent. We want the names of people who can use good bicycles. We make HOWARD CHAINLESS BICYCLES exclusively and want to sell one or two in every town this season. Have been making chainless bicycles for years. If no agent in your town handles the Howard Chainless we will allow the first person who buys a liberal amount for his old wheel and offer him an agency.

Advertising Department **HOWARD CHAINLESS CO.,** 760 Summer Ave., Newark, N. J.

HARDWARE DEALERS SELLING BICYCLES

Are making a pleasant and profitable addition to their business. More Hardware Dealers are selling **"Imperials"** as a side line than any other class of merchants, and WHY?

"Imperial Wheels" The Go-Lightly Kind

Registered Trade Mark.

are easy to sell—easy to ride. They give satisfaction and please the riders. **"Imperials"** list this season at

$50, $40 AND $30.

Highest Standard maintained in Workmanship, Material and Finish. They are bound to be Money Makers for any Dealer. ***WRITE FOR TERMS AND DISCOUNTS.***

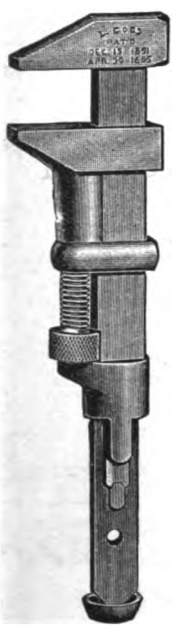
"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR



Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

IS A GOOD ONE.

Morgan & Wright, Chicago Ill. [*Bicycle Tires*]: There can be no question about the advisability of using the Hardware trade as a means of disposing of bicycles and bicycle parts, and as to the efficiency of HARDWARE, we can only say what we would say in reply to an inquiry from any other publisher, i. e., we have no direct means of knowing whether our "ads" do us good or not. If we insert an "ad," it is on our judgment that the publication is a good one.

"Bright and Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

HARDWARE

VOL. XVII. JUNE 25, 1898. NO. 6.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Business generally cannot be said to be dead or even in sluggish condition. Reports from the various trade centers covered by the market letters in our present issue indicate that a remarkably good trade is noticeable for the present month; no apparent falling off when compared with last year, trouble being found in keeping up the supply of goods on hand in a satisfactory condition to meet urgent demands that are of every day occurrence.

Money conditions are easy in the Western states. Collections are reported as being good. The fixed belief that the war can be pushed without jeapordizing new enterprizes will produce gratifying results. Some promising undertakings, which were held in abeyance by martial uncertainties as to time, which checked the money offerings and made close markets during the spring a certainty, now find easier and more sanguine views prevailing, which will be productive of confidence and stability.

All the lines of manufacture connected in any way with agricultural interests are in the most prosperous condition, and numerous manufacturers, under the pressure called for, will turn out this year a product of joyful dimensions; for at the present time many of them find it difficult to supply the demand.

It is anticipated that this prosperous condition of things surrounding the American farmer will surely prove as good for 1899, for the farmers have been forced to practice economy for so long a time they will be compelled to renew almost everything about a well-ordered farm, from necessary machinery to the household appliances suggested by improved conditions of living.

The prevailing extreme quotations on cereals, made possible by speculative methods, can hardly be sustained, but the large crops for which every provision has been made, will bring results that will be more than satisfactory when compared with the previous season in the year of joy just passed.

The iron and steel interests bidding for the large and growing export trade have been greatly benefitted by the extremely low freight rates, which assist in making Lake Superior ores so cheap by comparison; in fact, the low cost on all ores and coke enable us to produce pig iron and its products at phenominally low figures never before attained.

It is just as well to believe that war conditions will continue throughout the remainder of the present year, the necessity still existing for keeping many men under arms, a large navy in a state of constant activity, will result in an expenditure of money of gigantic proportions. This will increase largely the present circulation, and naturally tend to advance prices sufficiently to make it desirable for the dealer to keep constantly abreast of the markets, with but little fear of any retrograding influences tending to make the season's business unprofitable.

How Often Shall Salesmen Call?

With each annually recurring inventory and settlement of the year's business, the question most prominent before every jobbing house in the country is how to reach a maximum amount of sales with a minimum ratio of expense.

This question constantly prevailing, forms a problem in connection with the successful prosecution of the business which needs to be solved, and solved with conservative care, before the fears of a final dissolution of this important branch of the trade shall become a prominent factor and render nugatory every element tending to its perpetuity.

Profits and emoluments are naturally to be expected from a business which in most cases has been successfully prosecuted through many years by the present house and its predecessors, all of them blest with the lamps of experience to illuminate the methods of its leading workers. Notwithstanding this, each recurring year finds diminishing profits, increasing expenses, unexpected losses and fluctuating costs, all of which tend to make the stock sheet present an unexpectedly dismal appearance when it is figured up.

It is universally admitted that the cost of marketing goods is out of all proportion to any possible profit that may be obtained from the distribution thereof. Traveling representatives become more and more numerous, the necessity for intelligence in this branch of the business makes the compensation higher in the scale as the skill to sell and the acquaintance of customers to sell to, becomes a factor in the commercial value of each salesman's abilities.

The conditions of the Hardware trade as it is conducted to-day, require in each individual employe a higher degree of skill, the strictest attention to detail, and a professional love for hard work greater than at any previous period in its history, and it has always been an open question whether services apparently so valuable when contrasted with other lines of business, were sufficiently remunerated; this has formed one of

Digitized by Google

the rocks in the channels of success which annually confront employers.

Travelers, bright, able and attractive men, as the majority of them are who have achieved success, and enjoy an acknowledged mastership, are found on every line of travel, making valued acquaintance with buyers, offering every inducement to make new customers for the house, and quite frequently leaving so small a margin of profit on some transactions as to hazard the acceptance of the order. The nature of their business, active and indefatigable from early morn until late at night in order to achieve deserved success, makes their vocation one recognized by fairly liberal salaries, indulgent expense allowance and considerate treatment in too many ways to count. This department invariably demands an annual attention on account of increased cost, that is rarely given to any other.

How can traveling expenses be saved without reducing volume of sales? Are too many trips made that are positively unproductive of profitable results? Can they be reduced in number? Snould the trade be visited less frequently than we now think necessary? Why not so regulate traveling as to cut the expense down fifty per cent., and induce mail orders, that are now usually held for the arrival of some favored salesman? Some think the main point to be considered is to stimulate mail orders, and this can only be done through the conscientious efforts of the salesman himself; he really "controls the trade," and is paid for doing so; his efforts on behalf of his house keep the customers in line, prevent the many contestants for the same business from obtaining too much of a foothold, and in many ways assist materially in the prompt collection of the outstanding indebtedness.

With a view of discussing some of the reasons why better results are not obtained by the efforts of the jobbing fraternity through present methods, we in this issue give a number of replies to the question propounded in our paper of June 10th, of "How Often shall Salesmen Call?"

The replies which we have received will be found worthy of perusal, being full of interest for all Hardware dealers to whom the subject of reducing expenses is always one certain of close consideration.

Export Trade in Manufactured Products.

In the investigations necessary to make comparisons with foreign trade for our manufactured products which existed ten years ago, and the greatly improved conditions of the present, it must be excessively gratifying to know how steadily and satisfactorily it has increased in volume with each succeeding term, until even now it almost surpasses belief. This immense traffic has not yet reached the zenith of success to which it still aspires and will undoubtedly achieve.

When our increasing exports in the earlier part of the decade referred to became so notably a feature of our manufacturing industries, our commercial competitors, especially those in England, Germany and France, naturally noting our growing importance in this field of the world's progress, consoled themselves with the belief, founded on previous experience, that this industrial development would not long continue; but as soon as a home revival made healthier conditions in our local markets, our efforts for foreign trade expansion would lose the vigor which then was evident, and we would resign the business for the domestic markets that were more productive of profit.

Contrary to such hopeful expectations taken by the manufacturers whose trade we were endeavoring to supplant in country after country, upon obtaining a foothold that gave promise of permanency, we hung on and the increasing demand for raw materials stimulating our mines and furnaces to the utmost, we have eventually so reduced the bottom cost that at the present time we are successful competitors for the traffic long held by England and Germany on seemingly impregnable grounds.

It is a conceded fact that American steel rails will be a familiar sight in China and Japan, in Russia and Australia, backed up wherever placed by the prestige which makes our progressive country the leader of the world in every line of organized effort where mechanical skill and intelligent supply are permitted to go hand in hand. This desirable state of affairs is founded on an economy of cost absolutely unattainable under any but the free and enlightened modes of thought, invention and execution, made possible under American institutions and national ambitions.

During the ten years referred to, our manufactures of iron and steel have surely increased fourfold, iron and steel plates, making a record in their especial lines of a tenfold increase. In tin plate, of which we were such large importers, we have so changed the conditions of the traffic by creating the industry which progressing from a national standpoint, will yet be felt in every part of the world, resulting from economic advantages already within our reach. Our production of wire nails, made possible by mechanical improvement in the period referred to, has been increased over tenfold, and wherever our perfect product finds a purchaser its great superiority is so noticeable in every way as to defy competition.

It is the intention of our manufacturers that there shall be no retrograde movement. When we capture a foreign market we intend to stay in it. In justice to our unexcelled production of mechanical appliances of every description, from machine tools of elementary significance to the more advanced perfection of our mechanical skill, shown in our world-famed locomotives, it must be acknowledged that once they are admitted, and comparisons are instituted, their intrinsic worth, superiority of finish and adaptability to work give them a popularity that makes them difficult to displace.

There is every indication that the export trade of our country, in manufactured products, will reach in the next five years a greater degree of expansion from confessed superiority and economy of cost than has been reached during the past decade, through all other influences combined.

The U. M. C. Co. received the following telegram from their representative attending the tournament held by the Mountain State Gun Club:

"World's squad record broken here to-day. All using U. M. C. smokeless factory loaded shells. Total score, 124 out of a possible 125."

There is a saying the gist of which is that uneasy lies the head that wears a crown, and the same expression applies to debt. If a systematic course is adopted and pursued of meeting obligations at maturity much uneasiness and disaster might be avoided.—*Stoves and Hardware Reporter.*

JOBBERS, AND THE EXPENSE ACCOUNT.

There appeared among the market letters of *Hardware*, in the issue of June 10th, a letter from the Logan-Gregg Hardware Co., of Pittsburg, Pa., in which attention was called to a number of questions of the greatest possible moment to the jobbing houses of the country, in relation to the expense account, division of territory, the calls from traveling salesmen, etc. The points there touched upon suggested so much, and opened the way for so much in the way of discussion, that we asked a number of the leading jobbers of the country to pay especial attention to this letter, with the request that they give us their views thereon. Responses have been prompt and pertinent, and we take pleasure in submitting the same below. We also reproduce herewith the original letter from the Logan-Gregg Hardware Co., of Pittsburg, followed by one of a later date, in which the question is more fully discussed:

How Often Shall Salesmen Call?

We were shown a little pamphlet lately, written by a traveling salesman, in which he advocates an agreement among jobbers that their men shall not call on trade oftener than once in sixty days, thus reducing expenses and allowing more opportunity for mail orders. The great bugbear of the jobbing trade at present is the expense account, and it will require some united effort to effect a change in the plan of doing business to reduce it within safe limits. All jobbers remember when they used one traveler where they now use three or four, and that results were better under the old plan. We do not believe it impracticable to so arrange it that each distributing centre should have certain prescribed limits of territory which is naturally tributary to it, and within which the jobbing houses of that city should not be interfered with by other cities. The retailer would be protected by the competition of the four or six jobbers in that city, which certainly is enough for good business, and the useless expense of travelers from other cities, with offers of special inducements in the equalization of freights, etc., would be avoided. This is an evil common to all jobbing houses, and we believe a return to old and natural conditions would not only better the condition of the jobber, but in the end be also more satisfactory to the retailer. LOGAN-GREGG HARDWARE CO.

Logan-Gregg Co. Go Into Details.

Editor Hardware: At your request, we will give our ideas regarding some of the dangers which confront the jobbing Hardware business, as it is now conducted, and suggest a remedy.

The great bugbear of the business for the past five years, has been the *growing percentage of expense to sales*, which has become so large as to leave little or no net profit.

There are two principal causes for this increased ratio of expense: First, *the extreme low price at which goods are now sold*, compared with prices five, ten and fifteen years ago. A house may have sales of, say $500,000 per year, but in order to reach that amount, it must market double the quantity of goods sold ten years ago. This means more salesmen, more traveling expense, more handlers of goods in the house, more bookkeeping and postage, and more warehouse room, which means more rent.

Second, *increased competition*, which leads many concerns to push for all business in sight, regardless of the cost of getting it, and very often regardless of the price at which they sell.

There might be mentioned, a third cause, growing out of the second, viz.: distribution of such goods as fence wire and nails, oil and lead, which are sold at 2½ to 5 per cent. margin, and billed along with Hardware on sixty days' time. Of course all that business, amounting probably to one-fifth or one-sixth of the total sales, is done as an accommodation to customers, and at an actual loss.

The first of these causes has been very clearly and ably set forth in an address made before an assembly of traveling salesmen, by T. Jas. Fernley, secretary of the Hardware Jobbers' Association. This address has been published in pamphlet form for distribution, and should be read and studied by all Hardware jobbers who have not already given this subject their attention.

Is the jobber, then, doomed to extinction? There are fewer of us now than there were five years ago, and the tendency seems to be towards large houses, and fewer of them.

This is instanced lately in Chicago, and there has not been a new jobbing house started for years.

We believe, however, that there is still a place for the jobber. He has a work to do in the economy of business affairs that cannot be done by any other, and he is entitled to his just compensation for the part he takes in distributing the products of thousands of manufacturers to the thousands of retail stores.

But if the jobber is to have a profitable existence, he must adjust his business to present conditions, and curb his greed for trade that is secured at a loss, which affects not only his own, but all other concerns in the business.

The remedy which seems to us the most practical and most likely to bring success, is along the line of the natural movements of trade.

Every large city is a natural distributing centre. Trade flows to it through natural channels, just as the tributaries of large rivers come from the smallest hamlet back in the hills; and the reflex movement is like the distribution from a huge reservoir to all the surrounding territory.

In these large centres there have grown up great jobbing houses, several of them in each city, enough to make healthy competition, so that the retailer may be protected against imposition. In some centres there may be, and probably are, more than enough. If the natural movement of trade is not interfered with, these houses will get the business from all territory naturally tributary to their city. But as business is done, some cities, more ambitious than wise, reach out beyond their natural territory and grab for trade that would go to another centre. To get it, they must offer inducements, must equalize freights, and cut prices. These cuts are met by the city encroached upon, and the result is, neither has a fair profit on the business done, and retaliation is entered upon with no benefit to any one.

This undue extension of the bounds of trade is done at enormous expense, additional salesmen, heavy traveling expense, advertising, by excursions to the more distant city, etc. It don't pay, but the trade have worked themselves up to the belief that it does, and it seems as though the evil will have to work itself out to the end before it will stop.

Suppose the members of the Hardware Jobbers' Association were to agree not to solicit trade outside of certain prescribed limits surrounding their own cities, which limits are well known to be naturally tributary to them. What would be the result? An immediate discharge of from half

Digitized by Google

to two-thirds of the traveling force, with all attending expenses.

At first, a reduction in number of names on the books, and amount of business; to be followed soon by new names and new business from good near home buyers, whose trade has been overlooked in the scramble for trade further away.

When the new system (which is a return to that of years gone by) got into good working order, the local jobbers could agree to certain rules regarding unprofitable items, credits, etc., which would be advantageous. Take, for instance, fence wire, which is sold at a margin of $1 per ton. If the manufacturer can get us to distribute his product for him on this margin, he is well pleased, for he cannot do it himself for any such money. An agreement might be made to bill this article at an advance on the cash price, and allow a rebate to those who pay cash, the original price to stand if customer takes sixty days' time. This would lift an unprofitable item out of the rut, and give the cash buyer the advantage to which he is entitled. Arrangements of this kind could be made locally, which would now be ineffectual by reason of general competition.

We believe the manufacturer, the jobber and the retailer are indispensable to each other, and that each is entitled to his just compensation for the part he performs. We believe that the best results for all concerned would be realized by jobbing houses confining their energies to their natural limits, and that "Live and let live" should be our motto, rather than "Grab for all in sight."

Pittsburg, Pa. LOGAN-GREGG HARDWARE CO

Agreement Not Practical.

Editor Hardware: I do not consider such an agreement as you mention either practical or satisfactory. The question, "How Often Should Traveling Men Call On a Customer?" depends entirely on local conditions and customs and the cost of doing so. Here in this territory I find it necessary to call on some customers once a week, on others once a month, others once in two months, and still others at longer intervals. To make an agreement to call on all of them every sixty days would not work to the best advantage to the jobber or the retailer.

Yours respectfully,

Waco, Tex. ED. STRAUSS.

Survival of the Fittest.

Editor Hardware: We read with interest the pamphlet referred to. We have read carefully the article of the Logan-Gregg Hardware Co., but we cannot agree with their conclusions. If we were living in Utopia, their suggestion might be practical, but we do not see how any arrangements could be made by which all jobbers could agree to keep "off his neighbor's grass." It seems to us that it is a question of the "survival of the fittest."

Yours truly,

Atlanta, Ga. KING HARDWARE CO.

Discount the Calls Fifty Per Cent.

Editor Hardware: Referring to the letter in your issue of June 10th, "How Often Shall Salesmen Call?" we are glad that this important question has been brought up for discussion.

It is a matter in which all jobbers are interested, and one to which we have given considerable thought without being able to offer a remedy. We believe it would be more profitable both to the jobber and the retailer if the salesmen's visits to the retail trade were discounted 50 per cent. In former years, it was our custom to have our salesmen visit the trade not oftener than four times a year, in the spring and fall, when they were expected to get a good order. Then they made a trip between the two seasons principally to sell seasonable goods and to take filling in orders. As competition has grown stronger, the salesmen's visits have increased, until we find it necessary to call on the trade at least once in thirty days. This, of course, increases the expenses very materially. The orders necessarily being small, the cost of selling the goods has been increased at least 50 per cent.

Every jobber, no doubt, recognizes that this evil should be remedied, but just how it is to be done is a problem which we have been unable to solve. We believe it would unquestionably be more profitable to the jobber, and more satisfactory to the retailer, if the salesmen's visits were restricted to sixty days, except occasionally where a necessity might arise for a special visit in the meantime. It would make a decided difference in the expense account, and the orders would be larger and more satisfactory. If it were possible for local jobbers to form an agreement not to permit their salesmen to cover the same territory more than once in sixty days, the important question would arise as to whether or not other distributing points would not take advantage of the situation and result in a possible loss of trade to the local jobbers. It is true especially with the trade in the rural districts, that the small retail dealers are so closely drummed, that they rarely ever have an opportunity of sending in a mail order, and oftentimes salesmen are so persistent and the dealer so accommodating, that he will look up at least a small order for the salesman when he does not need the goods.

We would like to have a practical suggestion of a remedy for this great evil.

Lynchburg, Va. BARKER-JENNINGS HARDWARE CO.

Little Faith In It.

A well-known New England house writes us:

Editor Hardware: We fear when the roll is called, of those willing to make a division of their trade and restrict their salesmen's visits, that there will not be a corporal's guard who honestly favor such a subdivision or restriction.

One must needs have greater faith and confidence in his brother man before he would enter any agreement of the kind, in the belief that his ambitious neighbor would not concoct some plan by which he might gain an advantage. Man must be born again, or made of different natures than now make up mankind.

It would be easier to make a combination on prices than to subdivide the trade, and every one knows that is impossible.

If a salesman travels over his territory too often, he should know it, and his house should know it, and his territory should be given to some other man to work, or some other man's territory should be added to his.

In many houses the salesmen are like a band of guerillas, having no guide and doing as they like, making no profit for their own house and working all the damage they can for their competitors.

Every well organized house should have a competent head to their sales department, and every salesman should be under his direction. His careful watch should prevent too frequent visits to any one customer, should regulate prices and systematize the whole selling department. When a salesman pays his own traveling expenses, and his compensation depends on a per cent. of his profit, he, too, will know how often to call on his customers.

ANONYMOUS.

No Promise of Success.

Still another prominent New England house expresses its distrust of success in these words:

Editor Hardware: Answering yours in relation to the item, "How Often Shall Salesmen Call?" we will say, however much to be desired this may be, we do not think that any movement can be made to bring it about that would give promise of the least success.

Our experience is that all combinations of this kind are very hard to hold.

As we are sorry to say, there are some in the jobbing

Digitized by Google

business who do not always do exactly as they agree, and if such an arrangement was proposed it would be very difficult arranging salesmen's trips to the satisfaction of the jobber.

There are many of these ideal conditions that have been proposed that are not at all practicable when it comes to business.

The Length of a Drummer's Cruise.

Editor Hardware: Referring to your inquiry as to our impressions as to lengthening the drummer's cruise, we heartily agree with the proposition of longer time "between drinks" of the traveling men. It, however, seems to us that unless all should adopt the idea, that the man who called every sixty days would find that the festive and lively *cuss* who camps with the country customer had gotten away with the periodical fellow's persimmons. Business as well as life has its humps and bumps, and to keep in the swim one has to adapt himself to the conditions surrounding him. We have adopted the principle of, "When it rains to let her rain, and if the hogs come home, we feed 'em."

It is not possible to get some of the jobbers in the Western States, particularly the small jobbers in the small country towns, such as Chicago and St. Louis, to adopt any such idea. They keep *stationary traveling men* in every cross-road country store, so as to be handy to pick up the wants. We must continue to "do as the Romans do."

THE GEORGE TRITCH HARDWARE CO.,
Denver, Colo. Geo. Tritch, President.

When the Millenium Dawns.

A prominent Tennessee jobber writes us as follows:

Editor Hardware: When the millenium dawns, then probably Hardware jobbers will dwell together in unity; but not till old Gabriel blows his horn on Judgment Day, will Hardware jobbers find out that no firm or corporation is possessed of omnipotence.

There are Hardware jobbers who are smarter than their competitors, but this does not constitute them arbiters of their competitors' destiny; the sum of all wisdom is not their monopoly; there are others, and always will be. All honor to the brains of a man or firm who can organize a magnificent establishment and travel one hundred and seventy-five men, but even they have a limit, and the time will come when they will want to *shift* the lead, and do.

If the jobbers were less ambitious, there would be less trouble, but we all get the fever and haste to be rich and want the earth. Napoleon succeeded until his competitors learned his tricks, and then he succumbed to the inevitable.

The apparent success of three or four firms has produced many imitators, and until the young Napoleons measure their lances and ascertain their limit, there will be no *let up* in the disastrous competition now in full blast in every little city, as well as in those of large growth. And no doubt the greatest evil of this headlong demoralizing policy is the unnecessary multiplication of salesmen. These ambitious Napoleons will put on salesmen in any State or Territory who will travel for 45 or 50 per cent. and pay their own expenses, and strange to say, the world is full of such men, of both kinds.

If we discern the signs of the times aright, there will be fewer of these "Whales" in the future, and jobbers will keep off territory that does not belong to them legitimately, and stop longing for Naboth's vineyard.

Respectfully, M. E. F.

Only a Theory.

The manager of a prominent Western jobbing house writes us:

Editor Hardware: Referring to yours of the ninth, would say, we believe we have seen the circular referred to in your Pittsburg correspondent's letter, and have reason to believe that the author of this circular is a "theoretical" traveling man.

At any rate, the proposition which he presents is far easier in theory than practice.

No one will contend that it would not be a great advantage if the number of traveling men might be reduced, as there are many times the number on the road that are necessary to do the business.

The only plan by which a reduction could be made in the number would be by a combination or close association among the dealers in the same lines of business, and an agreement among them to respect the territorial rights of each other.

It would be quite difficult to make such an arrangement; in fact, almost impossible without some pooling arrangement or general selling agency on the part of the merchants selling certain lines of goods in the same territory.

From the Tom Fritts Hardware Co.

Editor Hardware: We fully agree with the Logan-Gregg Hardware Co. that something ought to be done to cut off the unnecessary expense caused by the over-zealous neighbor. But the ever present question arises: "How are you going to do it?" It's a fact that we do over-exert ourselves waiting upon the trade. I mean the whole jobbing fraternity.

But what are you going to do about the concern that says, "Oh, we are hustlers," and see their trade twice a month? You approach them with a paper like that of the Logan-Gregg Hardware Co., and the answer is: "All very well on paper, but it won't work."

While I would be heart and soul in favor of a universal rule of visiting, etc., I see in the effort almost insurmountable obstacles. With my best wishes, etc.

Chattanooga, Tenn. THOMAS W. FRITTS.

Will Do No Harm.

A New York jobbing house of note writes us:

Editor Hardware: Referring to yours of June 9th, we do not think the discussion of the matters you mention will do any harm. It is our opinion that there are some large and aggressive concerns in this country who will not be governed by the discussion, and who are so bent on extending their territory, and doing business up to *their facilities*, that the discussion will have no effect upon their methods. It has always been our policy not to call upon the retail trade too often, to stimulate in every way letter order business, and the only seriously disturbing elements that we meet now are the efforts of large houses in remote districts to get a foothold in this State.

A Question of Combinations.

Editor Hardware: The question of combination that is considered so huge a monster, is involved in the question you submit about traveling salesmen.

The traveling expenses and the salary of traveling salesmen as now managed, is altogether too large a tax on the business, and it could be largely reduced, saving many millions of dollars to the consumer, but it cannot be done, except by general agreement—and the State legislatures and Congress, listening to the senseless clamor, are legislating to forbid combination.

It is perfectly evident to all who have studied the subject that the prosperity of all classes has been promoted in Germany by trusts or combinations, and in the face of all this, Congress forbids our railroads from entering a pool, without which it seems impossible to prevent discrimination, and by which they could save their immense expense of solicitors and advertising agencies, all of which in the end is paid by the people.

The time is rapidly approaching when the business of the country cannot carry the burden of these excessive expenses. Forty or fifty salesmen with the same line of goods

Digitized by Google

travel over the some territory, often four or five together, when a quarter of the number would meet the required demand. Everybody would be as well served and an immense sum of money saved, but to accomplish this, combined action is necessary, and this is made a crime by Ohio and other State legislatures.

Cheap production and distribution can be promoted best by agreemeents, and since "gentlemen agreements" are not strong enough, combinations seem to be the only remedy.

There is a limit, beyond which competition is unprofitable. The question to be settled is, where that limit is. Whether anything but practical results can determine it, is questionable.

Cleveland, Ohio. C. B. LOCKWOOD.

Difficult to Avoid Frequent Calls.

Yet another New England jobber writes:

Editor Hardware: In reference to the matter suggested by the Logan & Gregg Hardware Co., I am quite fully convinced that the present custom of calling so frequently on the trade is very expensive from every standpoint, but in view of the competition made us by the larger manufacturers of miscellaneous Hardware to this class of trade, upon whom we make the frequent calls, I think it would be extremely difficult to avoid these calls, while such inducements are being offered to send orders direct instead of through the legitimate channel, namely, the jobbers.

Should Be Discussed.

Editor Hardware: We are in thorough accord with the article by the Logan-Gregg Hardware Co., and we think that the point should be thoroughly discussed.

Yours very truly,

HARPER & REYNOLDS CO.,

Los Angeles, Cal. C. C. Reynolds, V. Pres.

Death of Joshua Whitmarsh.

The sympathies of the trade everywhere, will be extended to William W. Whitmarsh, of the Putnam Nail Co., Neponset, Boston, because of the death of his son Joshua Whitmarsh, who died of heart failure at Henderson, Ky., on June 2d. The young man was but 28 years of age, having been born in April, 1870, and had already entered successfully upon a business career in connection with the company of which his father is the active head. He was educated in the public schools of Boston, entering Harvard College in 1888, from which he graduated in 1892, being next to the youngest member of his class. Feeling himself fitted for business, and being ambitious to distinguish himself in that connection, he entered the employ of the Putnam Nail Co., as their traveling representative. As such he saw much of life, having visited almost every part of this country. Sometime before his death he had decided upon a professional career, and was arranging for a final course at the Harvard law school, when death overtook him. His funeral occurred at the home residence in Neponset, and was attended by a large number of sorrowing friends.

The newly organized Commercial Trust Co., which has among its members a number of active managers of the Postal Telegraph and Commercial Cable companies, will commend itself especially to the Hardware trade, having among its incorporators George H. Sargent, of Sargent & Co., Robert H. Swayze, of Plume & Atwood Mfg. Co., and George S. Laighton, president of the Russel & Erwin Mfg. Co. Its capital is to be $500,000, with a reserve fund of $250,000.

France has kept 200,000 tons of coal stored at Toulon since 1893 to be ready in case war should break out.—*Exchange.*

Recent Trade Publications.

E. T. Barnum, Detroit, Mich., has just issued a series of catalogues of the goods he manufactures, to the following trades:

TO HARDWARE DEALERS.

Containing many new and original designs of wire and iron work of all descriptions, such as iron and wire and tubular railings, iron fencing and gates and cemetery fencing, elevator enclosures and cabs, fire escapes, roof cresting and finials, jail cells, grave guards, stable fixtures, bank and office railings, shutters, window guards, wire signs, etc.

TO MARBLE DEALERS.

Containing vases, lawn and park settees, chairs and lawn furniture, statuary, fountains, iron fences, etc.

TO THE BANKS.

Containing new and original designs of bank and office railings and partitions in all the latest styles of finish by their improved electro-plate process, bank window guards, doors, screens, etc., etc.

TO BUILDERS.

Containing all kinds of builders' iron work for interior and exterior use, such as iron gratings, window guards, roof cresting and finials, weather vanes, fire escapes, grilles, balcony railings and brackets, iron stairs, columns, partitions, etc.

JAIL CELL CATALOGUE,

For county and city officials, containing improved designs of steel jail cells and cages of all kinds, from small calaboose cells to complete outfits for the largest institutions of this kind.

CEMETERY VAULT CATALOGUE.

For Cemetery Associations, marble dealers, etc., containing a large number of new designs original with them, of vault doors, in bronze, steel and brass, bronze name plates, grilles for vaults, etc.

W. C. Heller & Co., Montclair, N. J., who are everywhere known as the manufacturers of Heller's Steel Hardware Shelf Boxes, have issued a small and attractive pamphlet displaying not only this article, with full description, prices, etc., but also a line of screw cases, spring hooks for sampling shelf goods, tool brackets, box tools, their Grip wire stretcher, and various forms of Heller's mail boxes, Heller's riding harrow, Heller's Perfect harrow, and Heller's ripping plow, No. 1. These are all illustrated, with sizes, descriptions and prices. This pamphlet will be sent on application.

The Thompson Electric Welding Co., Lynn, Mass., have issued a catalogue illustrating and describing their apparatus for electric welding, tempering, annealing, brazing, forging and shaping of metals.

Remember the Name.

Remarkable! That people will tolerate an unsightly, creaking, bulky contrivance to close their doors.

When building they study and use all the resources and taste in having everything beautiful, the entrance is most important which always extends its silent welcome and is often subject to close scrutiny, and should be noble in its fittings, therefore nothing is too good for it. Bommer Spring Hinges are of the best. They combine utility with beauty, and cost no more.

"Practically unbreakable," says the World's Fair Award.

The Remington Arms Co. have recently made a shipment of shotguns to Japan which are designed for special work. The gauge is 24 and 28, and the length of the barrel 34 inches. These measurements are, of course, very different from the American idea of a sporting arm, and it is supposed that they are intended for killing very small birds used in trimming millinery.

Digitized by Google

A Test of the New York Hardware Market.

On Saturday, June 11th, the capabilities of the New York Hardware market were put to a severe test, and met the emergency in a manner that reflected the greatest credit on all concerned. Lieutenant-Colonel Kimball, Quartermaster of the New York Army Depot, has long contended that, for large and immediate shipments, this market was unexcelled. This view has not, however, been allowed to go unchallenged, and there have been many strong protests entered both by the quartermasters and the merchants of other shipping points, as to the comparative merits of shipping facilities, stocks carried, and ability to handle the same promptly. The record of June 11th should quiet all criticism; for, however closely other cities might approach, it would be a practical impossibility to excel it.

On Friday, June 10th, General Miles, at Tampa, Fla., telegraphed Colonel Kimball, of New York, to call for bids for a large quantity of intrenching tools, which were to be shipped immediately upon the opening of the bids. The invitations were prepared and sent to twenty-five of the larger dealers the same afternoon, reaching them in the Saturday morning's mail. Attached to each form was a note, stating that it was desired to ship by express immediately after the acceptance of the bids, and that immediate delivery was of first importance.

The following articles were called for:

1800 Pick Axes, handled. 1800 Handles, extra, for Picks. 2400 Spades, short D handles. 2400 Handles, extra, for Spades. 72 Handled Adzes, carpenters' and R.R. full head, 5 inch cut. 72 Handles, extra, for adzes. 1200 Hatchets, handled, broad or bench, 4½ bit. 1200 Handles for Hatchets. 24 Grindstones, 28 inches diameter, mounted wood, frames for foot and hand power. 24 Sledges, handled, 6 pounds. 24 Handles for Sledge. 48 Hammers, handled, 2 pounds. 48 Handles for Hammers. 24 Cross Cut Saws, 4 foot. 48 Sets Blacksmiths' tools. 48 Sets Carpenters' tools, each set complete in separate box. 12 Portable Blacksmiths' Forges. 60 Kegs Steel Wire Nails, 10d. 60 Kegs Steel Wire Nails, 20d. 60 Kegs 6 inch Spikes. 60 Kegs 8 inch Spikes. 12 Coils Manila Rope, 3 inch circumference. 12 Coils Manila Rope, 1½ inch circumference. 500 pounds Marlin, best. 24 Single Blocks for Rope, 3 inch circumference. 24 Single Blocks for Rope, 1½ inch circumference. 24 Double Blocks for Rope, 3 inch circumference. 24 Double Blocks for Rope, 1½ inch circumference. 12 Triple Blocks for Rope, 3 inch circumference. 12 Triple Blocks for Rope, 1½ inch circumference. 12 Snatch Blocks for Rope, 3 inch circumference. 12 Snatch Blocks for Rope, 1½ inch circumference. (All blocks to be wood, iron strapped, lignum-vitæ sheaves, roller bushed.) 1800 Axes, handled, 4½ pounds, best quality. 1800 Handles for Axes. 30 Bush Scythes, assorted from 24 inch to 26 inch. 300 Riffles for sharpening Scythes. 300 Scythe Snaths, patent bush.

In each case it was necessary to submit samples of the tools bid on, and to state definitely what quantity could be delivered at once.

At 12, noon, Saturday, eighteen bids were opened at the Army Building, and it took until 3 P.M. to inspect samples and consider the prices. The result was that the order was divided among the following six bidders, whose aggregate bids covered the total amount called for, and whose prices and goods were satisfactory: Russell & Erwin Mfg. Co., Topping Bros.; Smith, Lyon & Field; Eyeless Tool Co., A. F. Brombacher and T. N. Motley. The representatives of the successful firms hurried off to their respective houses, and by 8 P.M. that evening the quartermaster's office was notified of the completion of the shipment, and the goods were on their way to Tampa. The accomplishment of this feat on an ordinary week-day would have been a difficult one; and every merchant will realize how much greater the task was, when accomplished on Saturday afternoon, after the street was practically closed.

Russell & Erwin secured about one-third of the whole amount, among which were 1200 spades, 48 sets of carpenters' tools and 300 riffles. Some idea of the amount of work on this order may be gleaned from the way in which the specifications call for the packing of the tools. Each set had to be complete in itself and packed in a separate box. Topping Bros. secured the 48 sets of blacksmiths' tools, adze handles, spades, tackle blocks and sledges. Smith, Lyon & Field supplied 1200 hatchet handles and 1800 axe handles. The Eyeless Tool Co. furnished the picks and handles, which were of the regular R.R. kind, weighing 7 pounds. A. F. Brombacher & Co. supplied 1200 hatchets, 300 bush scythes, 300 snaths and 1200 portable forges, while T. N. Motley delivered 1800 axes, 72 adzes and 24 coils of manila rope.

It is needless to add that the Quartermaster's Department was more than pleased at the expedition with which the shipment was made, and the result will probably be that the New York City market will be relied upon to fill all large orders which demand thorough execution and prompt shipment.

Pelouze Standard Family or Counter Scale.

The Pelouze Scale & Mfg. Co., Nos. 133 to 139 South Clinton Street, Chicago, Ill., are placing upon the market the Standard Family or Counter Sale, which we illustrate herewith. It is made of steel throughout; has a large bras

dial, with good black figures, is ornamented with a nickel rim and provided with a large scoop. In its construction double upright steel supports are used which distribute the weight and insure accuracy. The scales are handsomely japanned and striped. The use of steel throughout in its construction is claimed to be of great advantage, doing away with the customary castings used in scale construction, thus avoiding all possibility of breakage. Retail price is set at $3 each, with liberal discount to the trade.

Michigan Hardware Association.

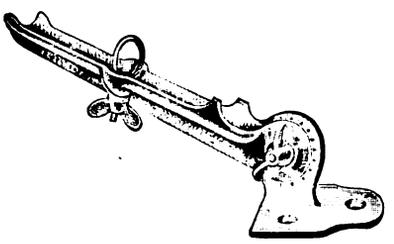
The third annual meeting of the Michigan Hardware Association will be held at the Hotel Cadillac, Detroit, Mich., July 13th and 14th, 1898. All retail Hardware merchants of the State are cordially invited to attend.

Judging from the fact that the membership has nearly doubled during the past year, and all signifying their intention to be present, we predict that this will be the largest and most enthusiastic meeting that the Michigan Hardware Association has ever held.

Mother—What did your father say when he saw his broken pipe?

Innocent—Shall I leave out the wicked words, mamma?

Mother—Certainly.



Innocent—Then I don't b'lieve there is anything to tell you, mamma.—*Dublin World.*

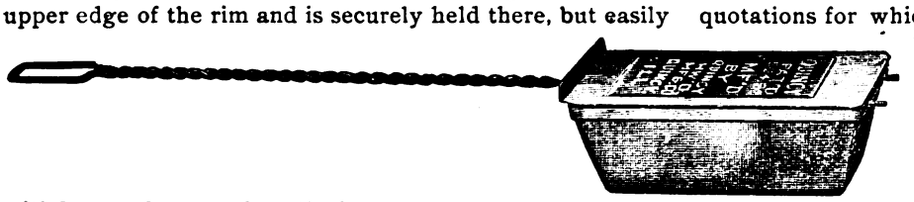
NEW GOODS AND SPECIALTIES.

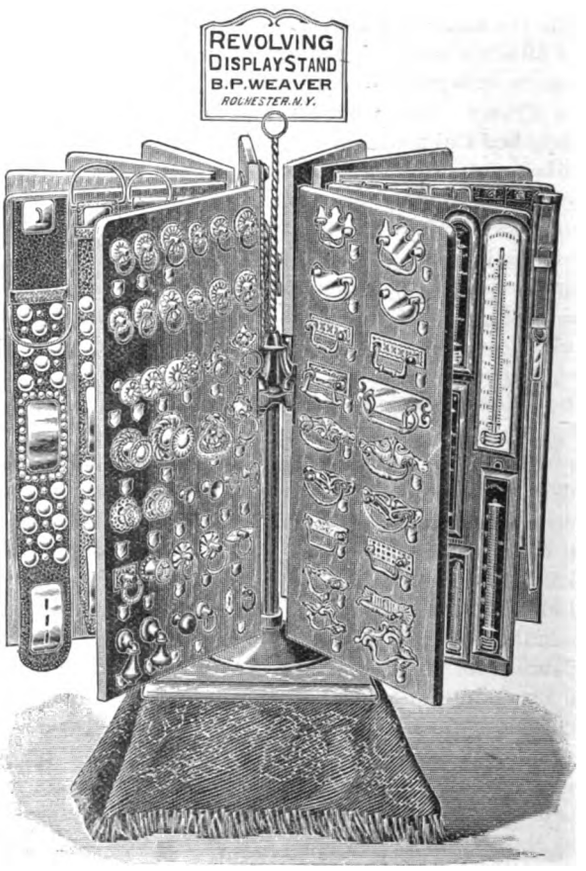
The Trojan Flag Staff Holder.



Allerton-Clarke Co., Nos. 97 Chambers and 67 Reade Streets, New York, have been appointed general agents for the sale of the Trojan Flag Staff Holder, which we illustrate herewith. It possesses features of greater value than usual,

being benefited by recent improvements evidently resulting from inventive experience. It is so constructed that it will hold any size of flag staff from one to two inches inclusive, and permits of a longer and more secure grip on the staff than is customarily seen. By an extremely simple adjustment it is possible to hold the flag in any desired position. They are put up in cases holding two dozen, and the list prices are named as follows: Japanned, $8.25, and galvanized, $9 00 per dozen, the trade discount on which will be given on application.

Climax and Quincy Corn Poppers.



Now that the heat of summer is beginning to be felt, the thoughts of the Quincy Hardware Mfg. Co., Quincy, Ill., seem to have been turned towards Corn Poppers, which have their season in August and September. During the past week this firm has sent us samples of both their patent "Quincy" and "Climax." The former is made of very strong parts, the bowl of which is moved by means of small gear wheels attached to the attractive stained wood handle. This gear motion does away with the tiresome shaking of the popper, which of late years has almost done away with the popping of corn about the family grate, on disagreeable November nights. The lid is made either of tin or wire, and is so attached that it cannot come off or open while the corn is popping, but when the operator wishes to empty the bowl it is a very simple matter to remove the lid. The "Climax" is made entirely of metal, and is much stronger than the ordinary cheap popper, the bowl being made of hard Hardware cloth, with solid tin all the way around. The tin lid slides in a groove on the upper edge of the rim and is securely held there, but easily

withdrawn after popping; the handle is made of twisted tinned wire, with forked ends. These extend through the rim and go through the bowl, thus greatly strengthening it. A small wooden grip is fitted on the other end. The points which struck us as being superior in this popper were the strength of all parts and the wire handle, as in some poppers when the handle is made of wood the heat from the coals soon chars and destroys the handle, and then the popper is of no use. This is not the case with the "Climax," which is the only popper on the market gotten out in this way. The "Quincy" also has wire forks and does not have the wooden handle up over the coals.

Weaver's Revolving Display Stands.

B. P. Weaver, No. 252 Monroe Avenue, Rochester, N.Y., is placing upon the market the Weaver Revolving Display Stand, which we illustrate herewith. It is so constructed

as to give 50 square feet of sample surface in a compact and convenient form. Goods can be displayed upon it in a very inviting manner, which, while interesting the customer, will also save the merchant much valuable time. There are twelve boards, each 12x25 inches, so hinged as to be readily removed either for the purpose of changing the samples, or making an adequate show window display. Stands can be furnished with a less number of boards than twelve, or smaller or larger than the standard size, 12x25, quotations for which will be given on application. The boards may be had in chestnut or black walnut stain, but the regular style is shellac finish. The stand is so constructed as not to be top heavy, the hangers having low bearings, and the weight being transferred to the base by a seamless steel tube, encased and revolving about a shafting formed of a rod of steel set in the base. The stand is adapted for many other lines of goods besides Hardware, and by simply lifting off the boards needed more than one person can be shown goods from the same stand. The price of these revolving stands is $10, boxed, f. o. b., Rochester, with a liberal discount to the trade. Any further information regarding these desirable auxiliaries to a Hardware store will be gladly furnished by addressing as above.

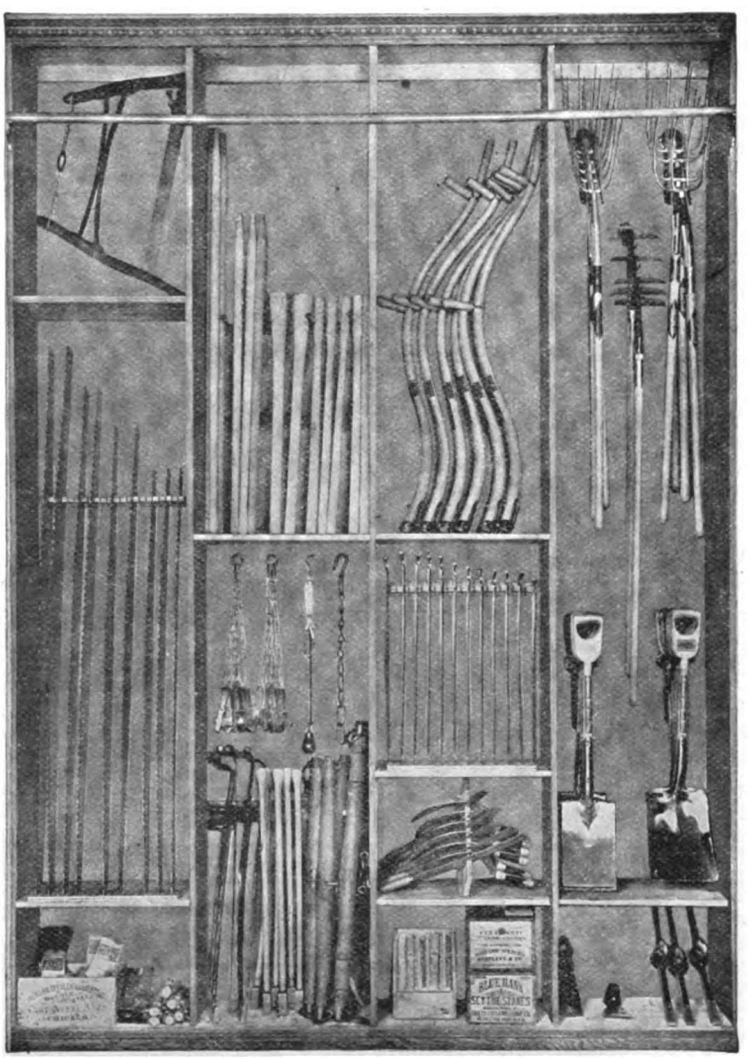
The Scranton Improved Nail Puller, 1898 Model.



We herewith illustrate the Scranton Improved Nail Puller No. 2, as manufactured by The Scranton & Co., New Haven, Conn. This Puller, as illustration will show, is so constructed that it will not roll, and a metal guard is shrunk on the shaft, which prevents the operator from hurting his hand. In this Puller the manufacturers have done away with the old fashioned concealed spring which caused so much trouble when it broke, and have substituted a flat steel spring which it is almost impossible to injure, and which can be readily replaced by the party using the Puller should it from any cause become broken. These

are all new features used under Scranton patents, and will be thoroughly appreciated by parties who have occasion to pull nails. The workmanship and material in these Pullers will be found the same as in the Pullers which this firm have manufactured for the past ten years, and cannot be improved upon. These Nail Pullers, in connection with the other styles manufactured by The Scranton & Co., are being placed on the market through Alder & Boyd, No. 37 Warren Street, New York city, for New York city and export, and through J. C. McCarty & Co., No. 10 Warren Street New York city, in all territory outside of New York city. Either of the above firms will promptly furnish full description with prices.

Steel Goods, Handles, Etc, Cabinet.

The J. D. Warren Mfg. Co., Nos. 152–158 Lake Street, Chicago, have added to their modern style of Hardware shelving a Cabinet which completely ends forever the ragged, unkept form of Hardware stores in the back of the retail room where such goods as handles, neck yokes, whiffle trees, post mauls, hay knives, shovels, spades, forks, etc., are found mixed up indiscriminitely, so that the merchant scarcely knows what he has in stock, and also subjecting the goods to much injury from dust, dirt and rust from floor sprinkling. This Cabinet consists of firm upright standards with adjustable shelves, permitting any height space desired being formed, thus providing suitable space for any goods, or articles, regardless of size. Various kinds of suitable devices are made to hold each article in place, for instance, spring clasps to hold scythes firmly in place; circular crescent brackets for handles; notch brack-

ets for crosscut saws, etc. The style of this Cabinet gives to each class of goods a complete compartment. Snaths, scythes, grass hooks and scythe stones are nicely kept in one, while in another are found wood saws, cross-cut saws, saw handles, wedges, etc., and so on, thus forming a completeness of arrangement in the shelving of everything from A to Z in the Hardware line which will give to the store that complete finished appearance and practical convenience, with a place for every item kept from danger, thus enabling one to instantly know whether the article inquired for is in stock or not, embodying this special distinctive feature that has characterized the Warren Shelving from the beginning. This Cabinet extends from the floor to a point even with the top of the other shelving, matching in and being as solid, the same as all their Cabinets are. Mr. Warren informs us that he has carefully looked over a catalogue of one of the largest jobbers and he finds there is no article of Hardware goods he has not provided for.

SOUTHERN HARDWARE JOBBERS' ASS'N.

The officers and members of the Southern Hardware Jobbers' Association know a good thing when they see it.

This most excellent faculty has always been well exercised in the selection of points at which to hold their annual gatherings, and never to better effect than in the June meeting of 1898. The point chosen upon this occasion was that comfortable point, Old Point Comfort, down on the Virginian coast, with Fortress Monroe frowning upon one hand, the patrol boats before them, the mines filling the harbor, and yet with never a thought or fear of Spanish aggression in the mind of any. It was an ideal place for the conclave, and the great Hotel Chamberlin made most comfortable and commodious headquarters.

The members, their guests, the manufacturers, and the ladies who accompanied both members and guests, owned the hotel and all the surroundings—and for once, even the many brides, with their happy husbands, were compelled to occupy a seat in the second tier.

President Barnett and Secretary Carter were on hand at an early hour on Tuesday, to welcome the members and guests, and were ably reenforced by the members of the reception committee as they arrived. The afternoon and evening of the day were spent in social converse, and the making of acquaintance, while a number took carriages and cars to the many points of interest in the neighborhood.

COMMITTEES AND MEMBERS.

The arrangements for the convention had been carefully made, and a complete programme, the cover of which is shown in this connection, had been printed. In this was found a list of the officers and committees, the full programme of the three days' sessions, and a full list of members, all of which are here reproduced:

OFFICERS:

President: G. W. Barnett, Teague, Barnett & Co., Montgomery, Ala.

First Vice-President: J. J. Mandlebaum, Fones Bros. Hardware Co., Little Rock, Ark.

Second Vice-President: John Donnan, W. S. Donnan & Co., Richmond, Va.

Secretary-Treasurer: C. B. Carter, Montgomery, Ala.

EXECUTIVE COMMITTEE:

W. A. Parker, Beck & Gregg Hardware Co., Atlanta, Ga.
W. E. Gibbins, Woodruff Hardware Co., Knoxville, Tenn.
J. D. Moore, Moore & Handley Hdw. Co., Birmingham.
A. B. Palmer, Palmer Hardware Co., Savannah.

TRANSPORTATION COMMITTEE:

W. E. Newill, King Hardware Co., Atlanta, Ga.
T. W. Gathright, May & Thomas Hdw. Co., Birmingham.
W. S. Robertson, Watkins-Cottrell Hdw. Co., Richmond.

MANUFACTURERS' COMMITTEE:

G. R. Vaughn, Barney-Cavanagh Hdw. Co., Mobile, Ala.
F. S. Gray, S. B. Hubbard Co., Jacksonville, Fla.
B. T. Haynes, Rome Hardware Co., Rome, Ga.

GRIEVANCE COMMITTEE:

Chas. H. Ireland, Odell Hardware Co., Greensboro, N. C.
Bruce Keener, C. M. McClung & Co., Knoxville, Tenn.
R. E. Bell, R. E. Bell, Weatherford, Tex.

MEMBERSHIP COMMITTEE:

A. P. Duncan, McLendon, Duncan & Co., Waco, Texas.
O. B. Barker, Barker-Jennings Hdw. Co., Lynchburg.
J. H. Fall, J. H. Fall & Co., Nashville, Tenn.
Geo. E. King, King Hardware Co., Atlanta, Ga.
N. A. Gladding, E. C. Atkins & Co., Memphis.

PRESS COMMITTEE:

A. B. Palmer, Savannah.
C. H. Watkins, Richmond, Va.
J. H. Watters, Norfolk, Va.

RECEPTION COMMITTEE:

Irby Bennett, Chairman.
A. W. Bond, Bond & Tabb Bros.
C. L. Campbell, Peck, Stow & Wilcox Co.
R. D. Carver, Cincinnati Barbed W. F. Co.
Tom Ellis, Hermann Boker & Co.
F. H. Forman, American Steel & Wire Co.
C. M. Fouche, Knoxville, Tenn.
T. H. Gossett, Jno. H. Graham & Co.
Joe Grubb, Hussey, Binns & Co.
Geo. H. Harper, Matthai, Ingram & Co.
J. M. Hottel, G. & H. Barnett Co.
A. L. Hunt, Richmond, Va.
H. B. Lupton, Oliver Wire Co.
O. C. Mead, No. 93 Reade Street, New York.
C. T. McKinnie, Stanley Works.
Guy Mitchell, Mallory-Wheeler Co.
G. A. Seaver, John Russell Cutlery Co.
Fred Seeley, Wiebusch & Hilger.
Wm. Skirving, Samuel Cupples W. W. Co.
W. P. Smith, J. C. McCarty & Co.
R. D. Turwiler, Wallace Bros.
D. M. Walke, Keen & Hagerty Mfg. Co.
F. C. Wheeler, Hermann Boker & Co.
Chas. H. Weir, Wier & Wilson.
J. K. Wilson, Wier & Wilson.

SERGEANT-AT-ARMS.

H. H. Beers, Schmachtenberg Bros., New York.

Programme . . . .

8th Annual Convention

of the

Southern Hardware Jobbers' Association

June 15th, 16th and 17th 1898

Hotel Chamberlin Old Point Comfort, Va.

ORDER OF BUSINESS.

Morning session, Wednesday, June 15th.

Delegates and visitors will please assemble in the Convention Hall promptly at 10 A. M.

Meeting called to order by the President.

Chorus: "America."

Address of Welcome by the President.

Calling of Roll.

Distribution of Badges.

Report of Reception Committee.

Digitized by Google

DELEGATES TO THE SOUTHERN HARDWARE JOBBERS' ASSOCIATION, AND THEIR GUESTS.

Digitized by Google

Informal Reception of Manufacturers and Jobbers.
Adjournment of Manufacturers and their representatives.

Annual Address of the President.
Reading of Minutes of 1897 Convention.
Report of Secretary-Treasurer.
Report of Transportation Committee.
Report of Grievance Committee.
Report of Manufacturers' Committee.
Report of Membership Committee.
Report of Scovil Hoe Committee.
Report of Handled Hoe Committee.
Appointment of Special Committees.
Communications.
Miscellaneous Business.

Afternoon Session—June 15th.

Joint Session of Manufacturers and Jobbers.
Reading of papers:

MANUFACTURERS' RELATIONS TO THE JOBBERS.
Mr. Jas. B. Oliver, of Oliver Iron & Steel Co., Pittsburg.
Mr. Jas. D. Foot, of Kearney & Foot Co., New York.

JOBBERS' RELATIONS TO THE MANUFACTURERS.
Mr. O. B. Barker, of Barker-Jennings Hardware Co., Lychburg, Va.
Mr. J. D. Moore, of Moore & Handley Hardware Co., Birmingham, Ala.

DISCUSSION.

Opening of the Question Box.
General Discussion.

Morning Session—June 16th (Executive.)

Reading of papers:

CREDIT, Mr. F. R. Boocock, Secretary, National Association of Credit Men.

DISCUSSION.

A DELINQUENT LIST OF ACCOUNTS,
Mr. W. A. Parker, of Beck & Gregg Hardware Co., Atlanta, Ga.

DISCUSSION.

Opening of Question Box.
General Discussion.

Afternoon Session—June 16th (Executive.)

Reading of papers:

HARDWARE JOBBERS' ETHICS,
Mr. Frederick Orgill, of Orgill Bros. & Co., Memphis.
Mr. Chas. H. Ireland, of Odell Hardware Co., Greensboro.
Discussion Opened by Mr. Geo. E. King, of King Hardware Co., Atlanta, Ga.
Opening of Question Box.
General Discussion.

Morning Session—June 17th (Executive.)

Reading of papers:

OUR UNPROFITABLE GOODS AND WHAT SHALL WE DO WITH THEM? Mr. John Donnan, of W. S. Donnan & Co., Richmond, Va.

HOW TO MAKE THE HARDWARE JOBBING BUSINESS MORE PROFITABLE, Mr. J. J. Mandlebaum, of Fone Bros. Hardware Co., Little Rock, Ark.

Discussion Opened by Mr. Jas. Moroney, of Moroney Hardware Co., Dallas, Tex.
Opening of Question Box.
General Discussion.

Afternoon Session—June 17th (Executive.)

Miscellaneous Business.
Opening of Question Box.
General Discussion.
Reports of Special Committees.
Election of Officers.
Selection of place for next Annual Convention.
Adjournment.

LIST OF MEMBERS.

Alabama. Anniston Hardware Co., Anniston; May & Thomas Hardware Co., Birmingham; Milner & Kettig Co., Birmingham; Moore & Handley Hardware Co, Birmingham; Barney-Cavanagh Hardware Co., Mobile; Cunningham Hardware Co., Mobile; D. M. Snow & Co., Montgomery; Teague, Barnett & Co., Montgomery; Teague & Sons, Montgomery. Tullis Hardware Co., Montgomery.

Arkansas. W. W. Dickinson Hardware Co., Little Rock; Fones Bros. Hardware Co., Little Rock.

Florida. The S. B. Hubbard Co., Jacksonville.

Georgia. Athens Hardware Co., Athens; Anderson Hardware Co. Atlanta; Beck & Gregg Hardware Co., Atlanta; Clark Hardware Co., Atlanta; King Hardware Co., Atlanta; F. I. Stone & Co., Atlanta; Culver & Corbin, Macon; Dunlap Hardware Co., Macon; Rome Hardware Co., Rome; Edward Lovell's Sons, Savannah; Palmer Hardware Co., Savannah; J. D. Weed & Co., Savannah.

Louisiana. W. A. Pleasants Hardware Co., Limited, Shreveport.

Mississippi. Melton Hardware Co., Meridian.

North Carolina. Charlotte Hardware Co., Charlotte; Odell Hardware Co., Greensboro.

South Carolina. Marshall, Wescoat & Co., Charleston.

Tennessee. Mitchell, Powers & Co., Bristol; E. C. Atkins & Co., Chattanooga; Magill Hardware Co., Chattanooga; S. B. Luttrell & Co., Knoxville; C. M. McClung & Co., Knoxville; Woodruff Hardware Co., Knoxville; E. C. Atkins & Co., Memphis; Orgill Bros. & Co., Memphis; Thomas, Barnes & Miller, Memphis; J. H. Fall & Co., Nashville.

Texas. Moroney Hardware Co., Dallas; F. W. Heitmann & Co., Houston; H. S. Bettes Hardware Co., Paris; Roberts, Hardwicke & Taylor Co., Sherman; McLendon, Duncan & Co., Waco; R. E. Bell, Weatherford.

Virginia. Barker-Jennings Hardware Co, Lynchburg; Watters & Martin, Norfolk; Paul R. Howard, Norfolk; Charles Leonard, Petersburg; W. S. Donnan & Co., Richmond; Watkins-Cottrell Hardware Co., Richmond.

THE FIRST SESSION

was held in the circular auditorium on the shore at the rear of the hotel—an ideal place for a gathering of this character, and was called to order at 11 A. M., on Wednesday, by President Barnett.

The first number upon the programme was the singing of "America," in which all joined with patriotic enthusiasm, the jobber of Texas and the manufacturer from New England standing shoulder to shoulder and pouring forth their souls in the expression of those sentiments which mark the final and complete reunion of a once-divided people.

AN ADDRESS OF WELCOME,

very appropriate in its sentiments and cordial in its expressions of good will, was then delivered by President Barnett, in these words:

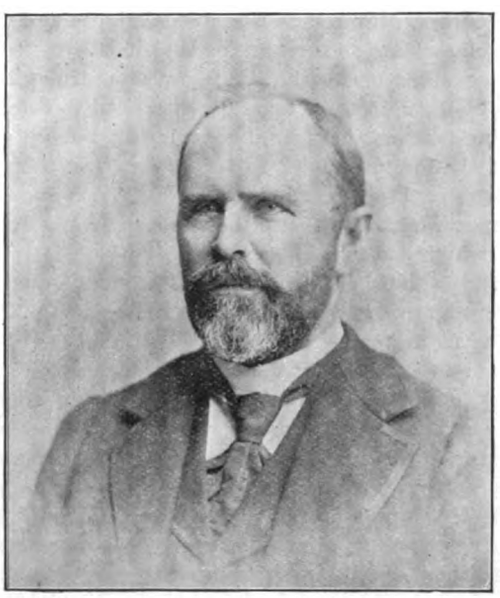
Ladies and Gentlemen: I feel it an honor, and it gives me a great deal of pleasure, to greet and welcome you to this the eighth annual convention of the Southern Hardware Jobbers' Association. We are certainly glad to see you all here.

To these good ladies we feel especially indebted for their presence. We are grateful for the honor you confer upon us. You add greatly to our pleasures. You stimulate and encourage us to do our very best. You help us in every way. We thank you truly for your coming, and wish you all the joy possible, and hope that year after year you will meet with us. You will always be greeted with a hearty welcome.

To our gentlemen friends: We trust you will also feel a hearty welcome, and be at home with us. We see before us quite a good many familiar faces, some of you friends for many years: some of you we meet perhaps for the first time, yet in business to most of us you are not strangers. As we meet then, as friend with friend, let each of us endeavor to deepen and broaden that friendship, that wholesome regard and brother feeling between us as manufacturers and jobbers, that should exist always between man and man. We all came here for a purpose. We expect to get something. What we get will depend largely upon ourselves. If we expect good fellowship, we must give good fellowship. If we expect to make friends, we must show ourselves friendly. If we expect to have a good time, we must make others have a good time. We cannot expect something for nothing. Then let us all enter into the exercises of the hour in a spirit of good will and friendship, and a hearty hand shake, with a determina-

Digitized by Google

tion that we shall know every one in the house. We hope everybody will feel he is a component part of this meeting, and feel a personal responsibility for the success of the hour and occasion.



Organizations are grand things, if their purpose be good. In the organization of our Association, the chief aim was to create and cultivate a spirit of friendship and good-will between ourselves as competitors, as set forth in our constitution. Before our organization, perchance we did not know our competitors in the nearest neighboring city, and when we heard anything of them that was not truly bad, we always took it with a grain of allowance; the bad things we heard, we accepted as true. How much like human nature!

We are happy to-day to tell you these things have changed—all the result of organization—and particularly so of our annual meetings. It is here we learn that our competitor is just as smart, just as well liked, just as honest and as much of a gentleman as we are; and we have learned that we do not only like our competitor, but learn to respect and love him as a brother. These conditions are direct results of annual conventions. We mention these things to emphasize the importance of our members particularly attending every annual convention. We regret we should have one single member absent. We have, therefore, invited you—our manufacturers and other friends present—to come and partake with us of the love feast, so to speak.

If it is good for competitors to be friends and have fellowship, we cannot see why the same good feeling and friendship should not exist between manufacturers and jobbers. Our interests are mutual. As manufacturers you cannot do without the jobber; as jobbers, we cannot do without the manufacturers; therefore our interests are mutual. To further this end our executive committee thought it wise not only to invite the manufacturers, but to set apart a half a day for a joint meeting of the manufacturers and jobbers, at which time we could discuss the relations existing one to the other, and to this end we shall have at least two papers from either side; and from the character, reputation and known ability of the gentlemen to read these papers, we can assure you we have something rich in store for you. This joint meeting will be held this afternoon. This is a very deep and broad question, full of thought and interest to us all, and we hope every one present—member and visitor—reception committee as well—will feel perfectly free to express your views. We want the discussion to be full, free and frank. We feel that much good will come from the discussion of this subject. We all need counsel and education on this line of thought. We fear that most of us come short of that true standard of measure expected of the Hardwareman. If, then, after we have discussed the subject fully and you prove to us as jobbers we have fallen short of that high standard, then we must get up on that true standard expected of the Hardwareman.

As Hardware manufacturers and jobbers we should feel proud of our calling, or profession, for such it is. We represent a branch of commerce that stands pre-eminently at the top, so known and admitted the world over. We represent a profession that requires more patience, more hard work, more close attention, more detail, more forethought, more figuring, more capital, more sagacity, more real ability and, I might add, more common sense, than any other known business. We represent a profession that has less failures, less of things that are small (in men), less of trickery, less of dishonesty. We represent a profession known as the barometer of commerce—the index finger pointing us to better times or worse. We all remember the boom of 1879. The great iron and steel industries of our country were the first to warn us of what was coming; so likewise in recent years as we saw decline after decline in the products of our mines and rolling mills, we saw and sadly experienced the trying times through which we have all passed. What of the future? Can we not all imagine we see once more glimpses of the silver lining of prosperity? Although our country is just now engaged in a little unpleasantness, we all have the confidence and ability in our country with its vast resources and the patriotism of our people to feel we shall not suffer materially, but that we shall soon come out victorious—things improved and continue to improve until we shall see better days.

I would like to add just here that we should all feel grateful for the way in which the President of our united country has handled the great question now before us. To my mind he has acted thoughtfully, discreetly, wisely, courageously, patriotically, nobly, well becoming the exalted position he holds. Some have thought differently. He was in possession of all the facts and condition of things. I was not, therefore I have been and am still willing to trust our President's good judgment and patriotism to do the right thing at the right time and at the right place. War at best is full of horrors and should be avoided if possible—honorably, however. Since it is upon us, can we not see some unmixed evil in it? We stand to-day as a people re-united as we have never been. We may differ in politics, we may differ on the money question, we may differ as to whether we should have gone to war with Spain, we may differ on any or all internal questions, we may differ even on the prices and terms on Hardware, but when it comes to country, we know no difference; we know no East, no West, no North, no South, we know but one Country, one Flag, one People.

PRESIDENT G. W. BARNETT.

The final sentiments of the president's address were received with hearty and vigorous applause.

The call of the roll was next in order, and showed that a goodly numbers were present.

The reception committee then distributed the badges to the members and their guests. These were some five inches in length, made of white corded silk ribbon, with a red and blue bow at the top, attached to which was a small American flag. A fringe of heavy gold braid was attached to the bottom. Printed upon the badge, in plain gold letters, was the inscription found upon a reproduction of the badge elsewhere.

The report of the reception committee was tendered by Irby Bennett, chairman, whose address was informal and full of fun, and who brought down the house with his witty hits. The president then called upon the following gentlemen for impromptu speeches, which were of the

Digitized by Google

same tenor as that of Mr. Bennett: William W. Supplee, president of the National Association, Samuel Disston, of Henry Disston & Sons, Philadelphia; T. James Fernley, secretary of the National Association; Jas. D. Moore, of the Moore & Handley Hardware Co., Birmingham, Ala.; Richard R. Williams, of the *Iron Age*, and James H. Kennedy, of *Hardware*, New York.

THE AFTERNOON SESSION

of Wednesday was a joint gathering of the manufacturers and jobbers, and was called to order at 3 P.M. It was devoted to the presentation of papers, written from the position of both of these important lines of trade.

The first two were upon the subject of "The Manufacturers' Relations to the Jobbers." The first one read had been prepared by James B. Oliver, of the Oliver Iron & Steel Co., Pittsburg, and in his absence, was read by H. B. Lupton, of the Oliver Wire Co., Pittsburg. It was as follows:

ADDRESS OF JAMES B. OLIVER.

While the invitation of your worthy president confines me to the above subject, and by inference debars me from the converse proposition of the jobbers' relation to the manufacturers, I find that the mutual rights and duties of the two classes are so interwoven that it is next to impossible to consider one without giving some thought to the other. I will, therefore, take the liberty of to some extent wandering from my text, and considering not only the relation of the manufacturer to the jobber, but their mutual relations to each other.

The manufacturer owes to the jobber certain duties, the chief of which are as follows:

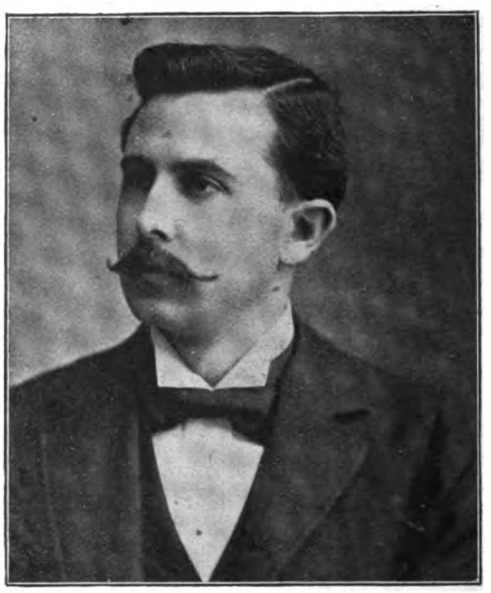
First: He should furnish goods of standard quality, and as a means to this end should avoid the use of a low order of either raw materials or labor.

Second: In small details, such as the size and style of packages, manner of packing, etc., he should conform as far as practicable to the wishes of the jobber, who is one step nearer to the consumer than he, and is therefore presumably better able to judge what will please the public.

Third: He should protect his jobbing customers, either by refusing to sell at all to dealers and consumers or by selling to them only at such advanced prices as will enable the jobber to fairly compete with him. The large jobber is the very best ally that a manufacturer can have. He saves him an enormous expense in the way of traveling salesmen, and through his agency the manufacturer finds it possible to introduce his wares into territories where, otherwise, they would never be heard of. The jobber is fairly entitled to this trade, the result of his industry and enterprise; and the manufacturer is bound by all the rules of honesty and fairness to avoid seeking it.

Fourth: He should not overload his order books to such an extent as to be unable to fill orders in a busy season with a fair degree of promptness.

Fifth: If he should be so unfortunate as to sell goods to a jobber at a low price on a rising market, he should take his medicine like a man and not set aside such orders in favor of orders taken afterward at higher prices.



Sixth: He should at all times and under all circumstances give 2000 pounds to the ton.

While there may be some exceptions, I think all jobbers will confess that the manufacturers as a rule adhere with a fair degree of strictness to the lines above laid down, with the exception, perhaps, of the fourth proposition. It must be confessed that many manufacturers are prone to accept more orders than they can possibly fill within a given time, causing thereby, in some instances, considerable embarrassment to their customers as well as to themselves. This custom, however, is largely the fault of the jobbers themselves, many of whom enter into contracts for the purchase of goods of which they intend to take only a part unless the market turns largely in their favor. If, therefore, the manufacturer lives up to the above rules of conduct, the jobber certainly in return therefor owes to him certain duties, for business is not based upon sentiment, and no man in these degenerate days is willing to give something for nothing. I would enumerate the following as the principal duties which the jobber owes to the manufacturer:

First: He should not buy more of any article than he needs, and when he does buy it, he should specify for it at the times and in the manner provided for in his contract of purchase, and take it whether his trade demands it or not. When the manufacturer contracts for his raw material he is compelled to take it whether he wants it or not, and there is no reason whatever for making the jobber's contracts more elastic or less iron clad than the manufacturer's.

Second: He should pay for his goods promptly in accordance with his contract, and if he aims to discount his bills he should always remember that ten days means ten days, and if he cannot raise the money within that time he should allow the entire sixty days to run and waive the discount.

Third: If he has a man about his establishment whose duty it is to work up fictitious claims for shortage, dam-

C. B. CARTER, SECRETARY-TREASURER.

aged goods, etc., he should at once save expense and discharge him. The habit of some few jobbers of making such claims is well known to the manufacturers, and I think I am safe in saying that in the long run these men pay dearly for indulging in such questionable practice.

Fourth: The relations between the individual manufacturer and the individual jobber should be as close and intimate as possible, and to accomplish this it seems to me that it would be infinitely better if each jobber would look after the purchase of his own goods, and not parcel this duty out wholesale through the medium of so-called syndicate buyers. There must, of course, be some advantage in method of buying, otherwise it would not be followed by so many houses whose standing is of the highest and whose business acumen is a matter of common remark, but its advantages are, to my mind, more than overbalanced by its drawbacks. In the first place it throws all the buyers in any one syndicate into a common herd, and gives to the jobber whose business is limited and whose credit is questionable, the same advantage in buying, and to a great extent the same prices and terms, as are enjoyed by the strongest and best in the syndicate. I am aware that this statement will be questioned, and that the represensatives of the syndicates will assert that they divide their clients into classes, and that all are not entitled to the same privileges, etc., but human nature is the same all the world

Digitized by Google

over, and it is only fair to suppose that all the knowledge absorbed by the syndicate buyer will eventually find its way into the offices of all his clients. I personally know of a number of the largest and best manufacturers in Hardware lines, who absolutely refuse to give any prices to syndicate buyers, and of others who never under any circumstances will name them their best prices, reserving these only for those jobbers who act for themselves.

The relation between the manufacturer and the jobber is one of mutual interdependence. The large manufacturer would find it next to impossible to market his goods without the assistance of the jobber. On the other hand the large jobber is dependent on the manufacturer for his supply of staple articles, and to a certain extent is compelled to rely on the forbearance and good faith of the manufacturers in the protecting of his trade. Mutual fair dealing should, therefore, be the rule on both sides. Neither one should attempt to make too much out of the other, but a fair conservative profit should be divided between them. Above all their intercourse with each other should be marked by courtesy and kindness, and this, with a desire for fair dealing on both sides, will invariably insure the maintenance of both pleasant and profitable relations between them.

I regret exceedingly that I have been unable to present this paper in person, and hope that at an early meeting I may have the pleasure of meeting with the members of the Southern Hardware Jobbers' Association.

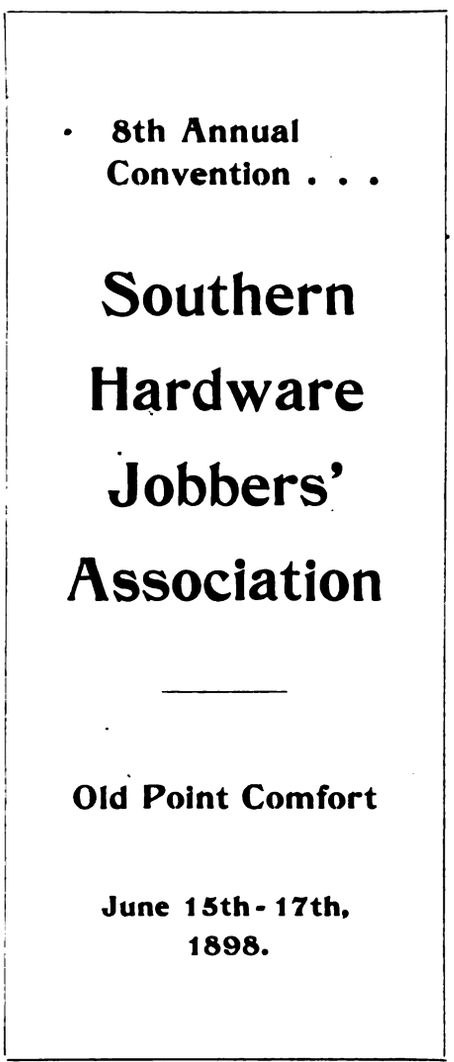
The second of these dual papers had been prepared, and was read, by James D. Foot, president of the Kearney & Foot Co., New York, and was, in full, as follows:

ADDRESS OF JAMES D. FOOT.

Gentlemen of the Southern Hardware Jobbers' Association: While I look upon the request of your president, that I should read this paper before you as a body, as one of the important incidents of my life, I must frankly admit that I do so with some trepidation, fearing that unintentionally in making the argument for the manufacturers, I may say some things which on their first reception may not meet with your approval. But I sincerely believe that in a representative body of this kind, frankness will go farther than flattery, and I am willing to take my chances on this understanding, to merit your careful attention in what I have to say.

Some years ago the relations between the manufacturers and jobbers were somewhat strained, each being inclined to meet the other at swords' points. It is now my belief, and I am glad to state it, that a far more liberal feeling for each other exists, as is witnessed by this present assemblage.

There is no question but what the manufacturer must recognize the jobber as his best medium for disposal of stock; still it will not do for the jobber to feel, that through him only can the manufacturer do business.



Entering upon the subject for consideration, I would ask what constitutes the jobbers, and on what basis shall the manufacturer treat the jobber as to price? I will assume a firm or company employing a certain amount of capital, say $100,000, this being the minimum, and the largest sum above this is to be the maximum, say $300,000. Between these two extremes are perhaps the majority, with a capital of perhaps $200,000. Now, gentlemen, I am confronted by your Association, made up of these classes. Tell me, is a firm of small capital entitled to the same prices as a firm of large capital, and if extremes should not govern the decision? Is he to make a price to the firms of average capital, and have that price apply to all?

Am I not right in asserting that whichever position the manufacturer takes, it would be contested by all three grades, as unjust to each particular class?

Will you decide this question for the manufacturer, or if you cannot formulate a plan satisfactory to all, then at least be lenient with the manufacturer, who tries his best to equalize for all. I leave this question and points bearing on it for your digestion.

In many ways manufacturers are tried in their loyalty to the jobbers, by the tendency of some of the latter to use questionable methods, both with the manufacturer and his fellow jobbers in trade, thereby gaining temporary pecuniary advantages for themselves.

To elaborate this statement necessitates my referring to one method. The dealer desires to purchase a certain line of goods on which he has limited sale at the lowest prices, which necessitates a quantity purchase. What will he do? He has several resources, all of which injure some manufacturer or some brother jobber. He will either act through some syndicate buyer, or purchasing the quantity, unload

THE MEMBERS' BADGE.

his surplus at a small margin of profit in some other jobber's territory.

Some jobbers may combine to buy the quantity necessary to command the lowest prices, but if knowledge of their transaction becomes public, the manufacturer is condemned for allowing such a deal on his goods. I would ask the jobber to supply a remedy for these abuses.

Again, on special lines of Hardware, manufacturers, through the competition of others in their line, sell direct to the large consumers. They would rather their jobbers took this order, but find two obstacles to contend against: the competitor in their own line who will cater to the consumer on small margin of profit and the consumer who claims his orders are large, his cash as good as any, and a firm decision that there can be no middleman in his deal. Under these conditions, is the manufacturer to step aside, and in loyalty to the jobber, let the other manufacturer have it? He should hardly be called upon to make these sacrifices, and many of our best manufacturers in builders Hardware decline to do it.

Digitized by Google

I am forced to contend that competition between jobbers does more to reduce prices than does the competition of manufacturers with each other. How familiar all manufacturers are with the first question asked when they come together to sustain prices and increase them: "How are stocks in the hands of jobbers?"

Too often they have seen jobbers break the market instead of selling from the stock on hand at advanced prices for a good profit. Manufacturers have been the best of friends with jobbers in the past, by trying to meet every cut they have made, by a little further reduction in prices. This has been done by reduction in cost of labor, material and the introduction of labor-saving machinery.

But the point has now been reached, where it is impossible to further curtail the cost of production, and it is imperative that the jobber should now hold for a living profit on his stock, otherwise he must go to the wall or join the retailers. He is beyond further help from the manufacturer, in the way of lower prices, for that gentleman "has troubles of his own," and self-preservation is heaven's law.

Every manufacturer recognizes the fact that jobbers are put to large clerical expenses by having travelers on the road. This in contra-distinction to a large retailer who may have the same amount of capital in business as the jobber and yet dispose of it by direct sale over his counter, but at no expense for traveling salesmen. Some might say that this was the retailer's good fortune, but probably the majority of manufacturers will agree that if jobbers are put to special expenses through travelers to dispose of the manufacturer's wares, they therefore are entitled to better prices than large retailers, to protect them against this additional expense of travelers.

Changes of position between the manufacturers and the jobbers have been quite marked in the past few years, through the establishment of jobbers' sectional associations throughout the United States. It is now possible for the manufacturer, by putting himself in connection with these associations, to come much closer in touch with the requirements of the jobbers, and if conditions necessitate it, he has that very formidable and important body, the National Association, to which he can refer for guidance and assistance for properly protecting his interests and those of the jobbers as against each other.

I cannot too strongly commend the establishment of these associations, which tends to broaden the sphere of the jobber and materially assist the manufacturer. Let me make this a point for your consideration. Manufacturers will be naturally more prone to assist such jobbers who take a vital and close interest in manufacturers' product, than they would with such jobbers who look merely upon the manufacturers in any special line as a base of supply which they can draw upon if so inclined, and change off to some other, through any whim or fancied wrong.

The jobber must learn to believe that in order to get the best results from the manufacturers, he must try and place himself so close to the mauufacturer that each will work in the other's interest. If his efforts are spread out too thin by trying to represent several manufacturers on one line of goods, he will be apt to get only mediocre treatment from any of these manufacturers.

Manufacturers expect and believe that where they give up a certain territory to a jobber, it is only loyal to the manufacturer that the jobber should *absolutely* devote his attention to the introduction of that line to the exclusion of all others. If the jobber is not prepared to do this, he has not a right to make demands on the manufacturer for exclusive territory or special consideration.

There is much in the nature of special brand that should be attractive to the jobber. If he considers it, two points must be carefully dwelt on:

First—To be assured that the manufacturer will give him in every way as good an article under a special brand as he, the manufacturer, would put out under his own.

Secondly—Has the jobber an outlet for sufficient goods of any one kind to warrant him in asking the manufacturer to make up a special brand for him?

With these two questions satisfactorily answered, the writer is of the opinion that permanent success can be made to follow a trade laid down on these lines.

The great advantage to the jobber is that in working to introduce this brand of his own, he increases sale thereof, and he practically puts so much more capital into his business, for if the brand is trade marked, it in time becomes well known, and if the goods are satisfactory, will be popular. When once the retailer or the consumer finds that a uniformly good article can be obtained under any special brand, he is always prone to ask for it when buying and also speak of it to others. All of this tends to an insidious advertising of the article, and in time the retailer and the consumer are firmly convinced that the jobber is practically the manufacturer of it.

To illustrate: Going back forty five years, when English imported files held the market, a large retail house in New York, under the name of one of its heads, imported a brand of files made by Butcher of England, known as the J. H. White file. Making quality their first consideration, they won such a reputation on this file, that in 1873 or 1874, when English brands of established reputation such as Butcher, Spencer, Jowett & Moss & Gomble were on the wane, and I was busily unloading a stock of over $40,000 of imported files, still, the "White" file had a local market commanding its price and selling to the consumer well up in the thousands, and this last year imported from $500 to $1000.

A jobber equipped with a special brand gets better prices and has an article to sell that competitors can only obtain through him. While speaking on this point, I now have in mind one of the largest jobbers in the United States who takes enough in one line of Hardware to keep one manufacturing establishment of 100 hands busy the year round, and his trade from its inception, of $10,000 a year, is now $75,000, and under this special brand shows a continually increasing growth.

I, therefore, as a manufacturer, commend this argument to the consideration of the jobbers, who are fitted and equipped to properly handle special brands.

Manufacturers owe much to the jobbers in one direction, which was little anticipated by either, when the manufacturer held for prices, and the jobber, through competition, forced them down. By the constant hammering of prices, manufacturers have at last reached a point where they can successfully compete with the markets of the world. Nothing but home competition, aided by the dealers, would have secured these results.

Another question for consideration is, to what extent shall the manufacturer recognize the retailer? In every city of 15,000 inhabitants or upwards is a class of trade not to be defined as jobbers and yet too large to pose as retailers.

Who shall provide these firms with goods? Most of them decline to acknowledge loyalty to the jobber. At present most of their stock is being supplied by the manufacturer, it being the consensus of opinion by that body that they should supply the trade.

It would appear to me that the manufacturer must count on the jobber for the distribution of the bulk of his stock, but in doing so has a right to demand and expect the strongest support from the jobber—their relations should be close, I might say almost on a partnership basis. Jobbers are already acting as retailers, virtually occupying a dual position. Is this right?

To my certain knowledge there are several jobbers who not only have retail stores in the city where they are located,

Digitized by Google

but also special travelers on the road, securing the consuming trade of the State in which they do business as jobbers.

As a manufacturer, I sincerely wish lines could be clear, defining the absolute position of the manufacturer to the jobber, and true definition of a jobber, but after making use of my previous arguments, familiar to you all by actual experience, I can draw but a few conclusions:

First—Jobbers must agree on an absolute definition as to what constitutes a jobber. If this is done, then the manufacturer, by a decision of the jobber, should agree on a certain percentage of profit to this class of trade.

Second—An understanding must be obtained by these two bodies as to which shall supply the large retailer and very large consumer, who now protests and declines to acknowledge any middleman between them and the source of supply.

Third—With the position of jobber defined, with it must come an agreement from the jobber, as a guide to the manufacturer, if, to the jobber, one price shall govern all, or shall prices be graded by amount of purchase? Then the manufacturer will know how to act and be better controlled. Those are hard nuts to crack, all of which I submit to your Association for a solution.

I am aware of the fact that what I have to-day read before you, if only read in part by the casual observer, a wrong impression might be received as to the position I occupy, but if read as a whole, I think you must all admit I have tried to treat the subject justly and expose weaknesses which, if corrected, will only tend to strengthen relations between both jobber and manufacturer.

And for this reason I personally wish to state that I fail to remember a single instance where I or the company I represent have been called to account for unfair treatment of the jobber. Nor can a jobber point to a single instance where I have attempted to go by him and sell to any of his legitimate trade.

Trusting that you may soon be well progressed beyond that contented look, and that prosperity will perch for years on the golden boughs of your Association, I will resume my seat and listen with interest to what those on the opposite side of the question may present for consideration.

The next feature was the presentation of the same subject from the view-point of the jobber, under the general heading of "The Jobbers' Relations to the Manufacturers." The first paper was read by its author, O. B. Barker, of the Barker-Jennings Hardware Co., Lynchburg, Va., who spoke as follows:

ADDRESS OF MR. BARKER.

Mr. President and Gentlemen of the Southern Hardware Jobbers' Association:

This problem, when properly solved, will not only remove one of the most serious difficulties which now confronts our trade, but will relieve the friction which exists between the two branches of the business, which should, in the natural order of events, work harmoniously together.

That the manufacturer is essential to the jobber is a self-evident fact; that the jobber is a necessary medium for the collection and distribution of the vast and various products of the mills and manufactories of the country is equally as evident to every thoughtful man conversant with the intricacies of our trade. Doubt can exist only as to the extent and degree of importance of the jobber to the manufacturer. The mere existence of the many vast and important jobbing Hardware establishments throughout the country is an evidence of their necessity as the legitimate and most economical means available, as a whole, for the proper distribution of the various wares embraced in our line.

"Necessity is the mother of invention." As truly can it be said that well-established institutions of trade are the outgrowth of the demand of the business with which they are allied. The jobber is not an accident, but the outcome of a necessity which cannot be ignored. He is here to stay. His position is indispensable. His future possibilities are co-equal with the growth and development of this great country.

Such being the case, Mr. President, I submit for the thoughtful and intelligent consideration of our friends and manufacturers, should they not accord us all the rights and render us all the assistance in their power not inconsistent with their own interests? The "bone of contention" between the two branches of the trade is the disposition on the part of so many manufacturers, while availing themselves of the jobber as a necessary medium of distribution, at the same time depriving him of his legitimate profit and robbing him of customers rightly his own, by selling direct or through local brokers to the retail trade.

We are all familiar with the various methods by which this is done, the evil effect of which is one of the many difficulties which we are called upon almost daily to overcome. I am glad to say that there is a disposition on the part of many manufacturers to recognize the rights of the jobbers on this point and accord them reasonable protection, while there are others who, in answer to complaints on this score, either present flimsy and insufficient excuses or else justify themselves on the ground that they have protected the jobber by making a nominal and inadequate difference in price against the retailer.

Very frequently, as we all know, manufacturers will furnish a retailer with quotations on a single car or case of goods as low as have been made to the neighboring jobber who will buy during a season from ten to twenty times the amount of the retailer's purchases. Even when a differential of five or ten per cent. is made in favor of the jobber, it is well known by us all, and should be known by the manufacturer, that this difference, except on a few staple articles, is not protection enough to guarantee us against actual loss, besides the demoralizing and harmful influence of such transactions upon our customers and salesmen.

In this free country of ours it is for no man to say how his neighbor shall conduct his business, so long as he does so within the limits of the law. We demand this privilege and cheerfully accord it to others. Manufacturers unquestionably have the right to dispose of their product direct to the retailer or even to the consumer if they so elect, but I hold that there is a high moral obligation on the part of every reputable manufacturer catering for, and enjoying the patronage of the jobbing trade, not to enter the field of competition with his own customer and trusted agent, the jobber. This tendency is so manifestly unjust that it can only be accounted for by a selfish ambition from which, unfortunately, business competition is not easily rid.

That the jobber is the most economical, and in the long run the most profitable, channel through which the manufacturer can reach the retailer is apparent to every close student of the situation, and has been time and time again demonstrated by actual experience of manufacturers. I state it as a fact, which time will prove, if it is not already so accepted, that the additional cost to the manufacturer of selling goods direct to the retailer or consumer, over and above the expense of disposing of his product entirely through the jobbers, is more than the average profit made by the jobber. If this proposition be true, our friends, the manufacturers, must admit our value to them as distributing agents, and in doing so, can they justify themselves in any reasonable manner in interfering with our trade and profits, by quoting prices direct to retailers or consumers?

I will only cite one instance of the many occurences of this nature which have fallen under my observation. Some time since, a jobber with whom I am acquainted, sold a customer a breech-loading gun for twelve dollars, and in

Digitized by Google

shipping the same inadvertently left the tag with the manufacturer's address on it. The retailer immediately wrote the manufacturer for quotations, and received a prompt reply soliciting his order, and quoting the gun to him at nine dollars, which was exactly the price paid by the jobber, plus the freight. Upon his attention being called to the matter, his excuse was that he was overstocked with this particular style of gun, and as the retailer had a good rating, he felt justified in making him the quotation. Now, the facts are, that this was a small country merchant, some forty miles from the railroad, carrying a stock of general merchandise not over one thousand dollars; his rating being based on a landed estate and not upon his mercantile assets. The result of this transaction is obvious: the retailer lost faith in his long-established friend the jobber, and the manufacturer gained nothing, as the party only wanted the one gun, which he had already bought.

I am not unmindful, Mr. President, that there are obligations due from the jobber to the manufacturer. I will not discuss this phase of the question, but will leave it to the gentlemen to whom that duty has been assigned, and who are so much better fitted for it than I. Suffice it to say, however, that the object of this Association is not only to relieve the jobber of the burdens and difficulties which are abundant in our business, but to elevate the standard of trade to the highest possible plane and encourage, on the part of our associates, an ever-constant recognition of what is due to manufacturers and others with whom we deal.

In summing up the situation, Mr. President, we find two branches of our great trade: one having for its object the widest, safest and most economical channel for the distribution of its products; the other seeking sources from which to supply its wants, affording a profit commensurate with the capital employed, the energy and enterprise required and the risk assumed. To the former, the jobber, in my humble judgment, furnishes the solution of the question; to the latter class, of which we are the representatives, it is for us to cultivate friendly and cordial relations with the manufacturer, endeavoring in every way to facilitate the distribution of his products in a manner which will be not only acceptable but profitable, but, failing in this effort to secure such consideration and protection as we are entitled to, it seems to me that the only course open to us is, where possible, to bestow our patronage upon such manufacturers as consider our interests, and withhold it from those who are seeking to use us and abuse our rights at the same time.

JAMES D. MOORE'S ADDRESS.

James D. Moore, of the Moore & Handley Hardware Co., Birmingham, Ala., presented the second paper upon the same subject. He said:

It is difficult to predict the result of an influence once set in motion.

Some years ago in the Island of Cuba the natives, bound down by oppression, sought to free themselves from the tyranny of Spanish rule and bondage; the world looked on for a long while and thought comparatively little of it, but the influence continued to grow and widen until the sympathies of the Uuited States were thoroughly aroused and the result is that we are at war with Spain, once among the greatest powers on earth and so weak now as not to be able to control her own subjects on the Pearl of the Antilles; this influence has not yet reached its end and may involve the destinies of nations. It will most surely change the policy of our own Nation. Only a few months ago there appeared to be a slight prospect of the annexation of Hawaii, but this has now become to be thought of the utmost importance as a war measure. The acquisition of the Philippine Islands was of little thought two months ago, and now the United States flag floats over the island. This event will perhaps start the United States on a period of colonization, and relegate somewhat the Monroe doctrine to the rear. We are inaugurating a small influence here to day by having a joint discussion between the jobbers and manufacturers, which so far as I know is the first time such a discussion has taken place; this apparently is a small beginning. Who is able to say what the ultimate results shall be? We trust that only good shall come of it. We have felt that since the jobbers and manufacturers are so closely allied and have to deal with each other so constantly, that it would be well to come together and to reach some definite conclusion, to cultivate closer friendship and have a well defined understanding as to the relations of each other. We have invited you in the spirit of investigation for the truth and justice to all concerned. Commerce, which is the underlying basis of our topic, is the fore-runner of civilization, and has a large influence in shaping the destinies of nations. I am reminded that about three hundred years ago colony which had been sent out by a trading company in London, entered Chesepeake Bay and gave the names of Charles and Henry to the Capes on the entrance to the bay and sailed up the river, then called Powhattan but now James, and selected a spot where old Jamestown now stands as a place to plant their colony. It was the desire of trade relations and to be the first to control the commerce of the New World that caused these people to sail over the wide ocean, and to brave the dangers of the hostile Indians in the extension of trade. What Great Britain did here she has repeated in all parts of the earth, and the influence that it has had upon her people and upon her law-makers, has caused her to take the lead in the establishment of a sound financial system which has made her metropolis the gateway of the monies of the world. The merchant and the manufacturer stood as the strongest battlements in our recent financial struggle to continue our country on a sound financial basis. Their business naturally leads them beyond their surroundings and brings them in contact with the world in such a way as to give them broader and more comprehensive views.

We trust that the small beginning we are inaugurating here to-day in the way of a joint discussion between the jobber and manufacturer may have a wide influence for good, which shall unify them more closely than ever. The spirit of the age seems to be grasping the idea of the necessity of co-operation and concentrated effort, and we are beginning to learn that competitors may be friends. We see this spirit illustrated in the Hardware Association and manufacturers' Associations, and even though they do not always succeed as well as they would like, yet the idea is not abandoned and the effort is continued.

Perhaps it would be well at this point to define what we mean by a jobber and manufacturer; as conditions are changing, so the significance of these words has changed from their original meaning to some extent. When Webster was writing definitions he defined the jobber under consideration as one who imported goods and sold them to the retailers. This definition is still correct, thongh not comprehensive enough, for under the conditions of to-day he may or may not be an importer. The Century Dictionary, which was written later and even quite recently, defines the jobber as one who purchases goods in bulk and re-sells them to small dealers, "a middleman." We have seen another definition of jobber which more nearly fits our case, and that is one who purchases goods in quantities, carries them in stock, and is located in a jobbing centre, travels at least two salesmen and sells not less than one hundred thousand dollars' worth of goods per annum. A broker may purchase goods in quantities and sell them again to the retailer, and yet we would not term him a jobber, since he does not carry them in stock and does not employ traveling salesmen.

The manufacturer is a term originally derived from two Latin words, *manus*, "a hand," and *facoe*, "to make," which

Digitized by Google

signifies a person who made something with the hand. The Century Dictionary defines a manufacturer as one who is in the business of manufacturing; manufacturing is defined as the act or process of making articles for use; therefore a manufacturer is one engaged in the process of making articles for use. This term is of a recent date, and is comprehensive enough. You will notice that it is not necessary for him to engage in the jobbing business in order to be a legitimate manufacturer. We would gather, then, from the definitions which we have given that it is the duty of the manufacturer to prepare the articles for the market, and it is the business of the jobber to distribute them to the retailers located near the point of consumption. We find in the actual condition of affairs that these theoretical positions are not always maintained, and that the conditions are not the same at all points, and that the obligation is left to the wisdom of the manufacturers and jobbers as to the best methods to be observed under the peculiar circumtances which exist. We believe that the jobber is the most economical medium through which the manufacturer can reach consumption, which is in the end to be obtained. Let us see about this. It is quite desirable on the part of the manufacturer to have a stock of his goods in the locality near the point of consumption. The only way to obtain this is either for the manufacturer to establish warehouses at all of these various points, and to employ a force of men to attend to the distribution of the same, or to have a merchant carry this at or near the point of consumption referred to. For the manufacturer to establish these numerous warehouses would require too great an outlay of capital, and would get his business so badly scattered, and so remote from himself, as not to be able to give it that personal attention which is essential to success.

We will abandon this idea as an impractical one, and take it for granted that no manufacturer would undertake to place his goods upon the market in this way, and we will therefore proceed upon the other hypothesis, that the true theory is to have a merchant carry his stock at the point nearest to where they are wanted; or perhaps you will reason that these goods may be distributed from the factories to the retailers without the aid of the jobber. Let us see how this would work. The retailer as a rule, at least in our section of the country, is a man of limited means, surrounded quite often by small consumption and must necessarily order in small quantities. Besides he would not be able to obtain even the assortment desired in a very small order, as it is customary for the manufacturers to confine themselves to the manufacture of a small variety of things, and no one of them would be able to furnish the retail merchant with the assortment he would want. Let us take an example. Suppose he wants to purchase an outfit for a blacksmith, and the necessary material for operating his shop. He would want a forge or bellows, anvil, vise, set stock and dies, rasp, sledgehammer, farriers' knife, drawing knife, anvil tools, twyer iron, tire shrinker, drill press, set of drills, brace and bits, horse and mule shoes, horse nails, bar iron, wagon tire, both steel and iron, wagon wheels, spokes, rims, hubs, shafts, tire bolts, carriage bolts, carriage springs, shaft leather, shaft couplings, axles, axle clips, borax welding compound, skeins, carriage cloths, wagon iron and other articles. You will observe that the articles mentioned have been gathered from thirty-six different factories, and that some of the items themselves, such as cast anvils and wrought anvils or different quality of stocks and dies, would have to be drawn from different factories according to the quality desired; now if it required a personal visit from each of the different factories to take his order, then at least thirty-six different salesmen would have to undergo the expense of a visit to see the merchant, or if the transaction be carried on by the mails, it would require that he write to thirty-six different factories and have thirty-six different shipments arriving all at different times. You can readily see that it would be a vexatious matter, even with a small order. Having fallen upon the illustration of the blacksmith outfit the case is not exaggerated in the least, for the retailer in making out his daily wants is liable to call for any of the numerous articles that go to fill a large Hardware catalogue containing one thousand to twelve hundred pages.

Let us see how this would operate, provided the jobber has accumulated a stock in the vicinity of the retailer, and a traveling salesman from the jobber calls upon the retailer he is prepared to take his order for all the articles wanted, and have them in stock and does not have to wait for them to be made after the order is received, involving long delays, as is the case with many of the factories, but is liable to ship them perhaps the next day, or at most a few days after the order is taken. All of these articles being assembled together, go as one shipment and as one invoice, and the business is thereby very much simplified and the retailer is accommodated, and the manufacturers are all benefitted from the fact that speedy deliveries will very often increase the consumption and enlarge the trade. The jobber, as it were, becomes the syndicate salesman and distributor of perhaps two hundred or more different manufacturers, and the retailers would readily see the force of so large a number being represented in one salesman. We will take it for granted then that it is made plain that the jobber is a convenience to the retailer and a great benefit to the manufacturer, inasmuch as he carries their stock near the point of consumption and furnishes his own capital to do this, and to employ the necessary force for attending to it promptly, guarantees all losses, pays his own insurance, and the manufacturer is relieved of all of this heavy expense incurred in the carrying of the stock, soliciting business and incurring the other necessary expense incident to same. Then should not the manufacturer do all he can to encourage the jobber and help him out, and to see that he obtains a fair return in the way of ample protection on his part, in order that he may have the necessary funds in hand when bills mature or to discount his bills before they mature, thereby eliminating the risk on the part of the manufacturer on short returns for the goods with which he has entrusted him? We think he should. We think he is protecting his own interest when he does. We do not think he should become his competitor and come to his next door neighbor who happens to be a responsible retailer, and offer him goods at the same price that he does the jobber who buys in much larger quantities, and who is compelled to make his living by making a profit on his sales of which he is deprived very often by having the very man who has furnished him supplies, as his competitor; no jobber of course can compete successfully with the factory which furnishes him with supplies without a just differential between the jobber and the retailer. Perhaps when the manufacturer goes to his retailer who is a customer of the jobber he thinks he is thereby increasing his trade, when he is only curtailing the purchase of the jobber just to the extent that he supplies the jobbers' customers with his products, for if the order had not come to him through the retailer, it is quite probable that it would have come to him through the jobber. And this is not the only injury done to the jobber, inasmuch as the retailer who has obtained about the same price, makes a correspondingly low price to his customers, and through them the information spreads and the jobber must either reduce his price to a point beyond which there is not a sufficient profit left, or see his trade leave him.

We are glad to say there are many manufacturers who are not guilty of such practices; to all such we feel the jobbers should confine their trade and encourage them in the support they are endeavoring to give. Just here I fear that the jobbers are often at fault themselves, inasmuch as they will patronize some manufacturer or manufacturer's agent who, after he has stocked up his customers, then comes to

Digitized by Google

him and gives him a slight cut in a very confidential way. We should make it a practice to refuse to patronize all such, and to confine our orders to manufacturers who will give us due protection.

We will readily admit that the manufacturer has the right to market his goods in whatever honorable method he may choose. If he thinks it more profitable to him to seek the distribution of his goods through the retailer than through the jobber, then he has a perfect right to that method, but all such practices tend to decreasethe legitimate profits of the jobber and he should refuse to buy goods from a dangerous competitor who is bringing about a method in trade which makes it hard for him to earn a legitimate profit. These practices are most frequent about railroad centres and very near the door of the jobber, since these are points that are easily reached, and the salesman who engages in such practices can solicit the business without extra expense, but if he were not patronized by the jobber and was forced to go into all the highways and hedges in order to find a sufficient outlet for his products, he would soon demonstrate for himself that he had selected a very expensive method of reaching the consumer. The manufacturer who relies on the jobber can by making only a few points in each state reach the entire consumption of the state, inasmuch as he secures the services of all the traveling salesmen of the jobber who goes into all points where trade is to be found and solicits orders for his goods. The manufacturer who has one hundred jobbers for customers will perhaps get the benefit of one thousand or more salesmen who are soliciting orders for his goods at every available point continuously, and in this way the territory is more thoroughly and more effectively covered than in any other way. Suppose the manufacturer undertakes to market his goods through a local broker, then he works under the disadvantage of having to carry all of the stock himself, and of long delays in delivery which are incident to factory shipments; he also works injury to the jobber, inasmuch as the broker has very little expense and sells goods at a margin upon which no jobber can live and carry his stock and employ a corps of salesman. This local broker will frequently quote prices, and his customers instead of giving him the order they will go to the nearest jobber, and offer him the business, using the broker's price in order to beat him down below a legitimate profit which the jobber feels compelled to do, since the customer is in possession of the cost of the goods and is not willing to pay a sufficient profit incident to the carrying of stock and the distributing of same. This also works an injury to the manufacturer, inasmuch as the jobber since the price beat down below the legitimate profit, enters complaint to the manufacturer from whom he draws his supplies and asks for a lower price, which he often obtains, thereby bringing an influence to bear which breaks the market and robs everybody concerned of their legitimate profit to which they are entitled.

Theoretically, the broker is expected to confine his business to soliciting orders frem the jobber, but he soon sees that this will not often take care of his moderate expense, and ambitious to increase his orders he goes direct to the consumer; failing to realize that the consumption of the territory covered is not increased by his furnishing the retailer or consumer any more than if the same distribution had taken place through the jobber.

Another practice by some of the brokers in the large centers, is that of getting up a circular which goes to all of the names represented in Dun or Bradstreet, thus scattering the manufacturers' lowest prices to the largest jobber broadcast throughout the land. These fall into the hands of the jobbers' customers, and are used by them to force the jobbers to sell below a legitimate profit. We are glad to say that so far as our locality is concerned, that the broker has been of a temporary character, and has not been able to run long; in the more populous towns it may be different, but with us we think this significant that this method of placing goods on the market has not been a success, and we find the broker ready to change his occupation so soon as something else is offered that promises a living. We conclude that the broker is not a benefit to the manufacturer who employs him, and that he tends in no way to increase the consumption, or help the jobber to increase trade, and we shall be glad to see the day when the manufacturers, if they shall persist in employing him, and if he shall persist in seeking the retailer and consuming trade, that they will give him such prices as the trade he solicits are entitled to, and which will leave a proper differential between the jobber and the retailer.

To conclude this by recapitulation, we would say that the jobber is the most economical medium through which the manufacturer can reach the consumer, and that if he will confine his distribution to this channel, he will prevent much confusion and materially benefit the conditions of trade. We think the relations between the manufacturer and jobber should be of the most cordial and friendly nature, and that they should co-operate in every possible way. We realize that in a community where there are only two or three jobbers and where there are ten or fifteen manufacturers of the same line of goods, all seeking representation, that the question is somewhat difficult to solve, so that all shall be properly represented when there are only two or three men to represent ten or fifteen competitors, for it is said that no man can serve two masters, and perhaps if the same man should undertake to represent two or more competitors that he would find it hard to please them and represent them fairly. Perhaps the manufacturers can give us some good solution of a case of this kind. Those who are not represented in that particular locality will feel a great temptation to go direct to the consumer or retailer; or perhaps this same man who is seeking the retail trade in this locality and feels well satisfied in that direction. We believe that most of the manufacturers would prefer to be represented by a jobber rather than have to rely on this other method, since the jobber is the most economical medium through which to reach the retailer and consumer.

Of course, we are looking at these things somewhat from a jobber's standpoint, and our views are made up in consideration for the smaller territory. The manufacturer has different conditions to contend with in seeking trade in all parts of this vast country, and is enabled to recite more of the difficulties with which he comes in contact along this line, and for this very reason we have sought to have a discussion with you to enable us to look at it from your standpoint in order that our views may be broadened, and that by co-operation we may relieve some of the difficulties that now appear to stand in the way; and if we shall have accomplished something in this direction, good will come of our meeting together here to-day.

At the conclusion of Mr. Moore's paper, the president announced that the subject was open for discussion. Charles L. Meade, of the Stanley Rule & Level Co., New York; Lewis W. Klahr, of the Enterprise Mfg. Co., Philadelphia; J. J. Mandlebaum, of Fones Bros, Little Rock, Ark.; Charles A. Ireland, of the Odell Hardware Co., Greensboro, N. C.; Webster R. Walkley, Peck, Stowe & Wilcox Co., New York; and W. W. Supplee, Supplee Hardware Co., Philadelphia, participated, and their addresses were brief, pertinent, and listened to with close attention.

ENTERTAINED BY THE MANUFACTURERS.

The manufacturers who were present at the convention, held an informal meeting on Wednesday noon, and formulated a plan by which they could show their appreciation of the invitation extended to them by the jobbers. Arrangements were made for the procuring of a steamboat, upon which the members of the Association and their friends, the manufacturers, and the other guests, were to be given a moonlight excursion on the evening of that day,

Digitized by Google

but when the hour approached the condition of the wind and wave was such that it was thought advisable not to make the trip. Notice to that effect was posted in the office of the Chamberlain, and it was further announced that from 8 until 9 P. M. an instrumental concert would be given by the Artillery School band in the reception hall of the hotel, with dancing in the ball room after the hour named. This programme was carried out. The ladies who were in attendance in large number were present in full force, and the occasion was one of great pleasure to all concerned. Refreshments were served, and the manufacturers certainly proved themselves most generous and admirable hosts.

THURSDAY'S SESSIONS.

The convention was called together at ten o'clock on the morning of Thursday, the 16th, with President Barnett in the chair. The first paper upon the programme was one prepared by F. R. Boocock, Secretary of the National Association of Credit Men, entitled "Laws, Customs and Ideals of Business." It was a very able and admirable article, in which the whole question of credits as applied to business was discussed. Space will not permit the reproduction of this paper in this issue, but reference will be made thereto at a later date.

The next paper was entitled "A Delinquent List of Accounts," prepared by W. A. Parker, of the Beck & Gregg Hardware Co., of Atlanta, Ga. At the conclusion of this paper, the question box was opened, and a number of questions of interest were discussed, among which was that touching prices published in trade journals, on Hardware goods. Following this came an executive session of the Association, at which the annual address of the president and the reports of the secretary-treasurer and of the various standing committees were presented. This occupied the full day, and the programme which had been arranged for the afternoon session was carried out in the evening. This included the reading of a paper entitled "Hardware Jobbers' Ethics," prepared by Frederick Orgill, of Orgill Bros. & Co., Memphis, but read in his absence by J. C. Sproull; and also a paper upon the same subject by Charles H. Ireland, of the Odell Hardware Co., of Greensboro, N. C.

While the gentlemen of the Association were engaged in the work which had brought them together on the afternoon of Thursday, the ladies were treated to a ride upon Hampton Roads and the ocean on the yacht *Sallie*, which had been sent to Old Point for this special purpose by the Old Dominion Iron Co., of Richmond, Va.

SESSIONS OF FRIDAY.

The meeting of the Association on Friday was also of an executive character, at which several papers were presented. One of these was entitled "Our Unprofitable Goods, and What Shall We Do With Them?" by John Donnan, of W. S. Donnan & Co., Richmond, Va.; and "How to Make the Hardware Jobbing Business More Profitable," by J. J. Mandlebaum, of the Fones Bros. Hardware Co., Little Rock, Ark.

ELECTION OF OFFICERS.

The most important portion of Friday's session was, naturally, the election of officers for the ensuing year. The decision of Mr. Barnett not to permit his name to be used for re-election was received with regret, and compelled the Association to seek for an executive head in another direction. The search was successful, and resulted in the nomination and election of a president and officers who are ably qualified in every respect to fulfil in a most efficient manner the duties of their offices. A list of those elected is as follows:

President: James J. Mandlebaum; Fones Bros. Hardware Co., Little Rock, Ark.

First vice-president: O. B. Barker; Barker-Jennings Hardware Co., Lynchburg, Va.

Second vice-president: R. E. Bell, Weathford, Tex.

R. E. BELL, SECOND VICE-PRESIDENT.

J. J. MANDLEBAUM, PRESIDENT.

O. B. BARKER, FIRST VICE-PRESIDENT.

Secretary-treasurer: C. B. Carter, formerly of Knoxville, Tenn.; Atlanta, Ga., and more recently of Montgomery, Ala., but who will now be located in Little Rock, Ark.

Executive committee: W. E. Gibbins, of W. W. Woodruff & Co., Knoxville, Tenn.; W. A. Parker, Beck & Gregg Hardware Co., Atlanta, Ga.; Fred. Orgill, Orgill Bros. & Co., Memphis, Tenn.; James Maroney, Maroney Hardware Co., Dallas, Tex.

These gentlemen are all prominently identified with the jobbing trade of the South, and have been in the past active and efficient members of the Southern Association.

Mr. Mandlebaum, president-elect, is the secretary of the Fones Bros. Hardware Co., of Little Rock, Ark., which was established by D. G. Fones in 1859, who commenced business with a small stock of tinners' supplies. In 1865 he added Hardware to the line, and at a later date, J. A. Fones, and still later, A. T. Fones, became members of the concern, which was thereafter known as the Fones Bros. Hardware Co. In June, 1888, the company was reorganized as a stock company under the name of the Fones Bros. Hardware Co., with a paid-up capital of $100,000, the stockholders being D. G. Fones, president and treasurer; James A. Fones, vice-president, and James J. Mandlebaum, secretary. Mr. Mandlebaum has been a most efficient member of this organization, and will most ably fill the office of president.

O. B. Barker, of the Barker-Jennings Hardware Co., Lynchburg, Va., is a young man, but very efficient in the

Digitized by Google

conduct of the concern of which he is the head. Mr. Barker is president of the company, and has been actively engaged in business for over twenty-two years, the entire management being in his hands. The company do strictly a wholesale business, and have made a very great success among the mercantile interests of that section of the South.

The second vice-president, R. E. Bell, of Weatherford, Tex., is numbered among the oldest of the Hardware merchants of the South, and as he has been in the business since 1847, he has already passed his golden wedding, if we may so speak, in this business, of which he has been so prominent a member. In 1847 he became apprenticed to a general storekeeper, and was assigned to the Hardware department. He began business in Weatherford in 1866, where, by the efficient aid of his son, he still carries on a large and successful Hardware business.

W. E. Gibbins is a member of the firm of W. W. Woodruff & Co., Knoxville, Tenn., which was organized in February, 1865. Mr. Gibbins became a member of the firm in January, 1870, since which time there have been no changes in the partnership. Mr. Gibbins served through the recent war in the Union army, and long since became one of the prominent and best known Hardware dealers of the South.

W. A. Parker, secretary and treasurer of the Beck & Gregg Hardware Co., Atlanta, Ga., is a very young man for the position he occupies as the practical general manager of the concern. He entered the employ of this company as an office-boy in 1882, and in time became chief bookkeeper, and on the death of Mr. Gregg, was elected to the high position which he now holds. He is very active, not only as a Hardwareman, but also as a member of the Southern Association.

Fred. Orgill is a member of the firm of Orgill Bros. & Co., Memphis, Tenn., which commenced business as early as 1847. In 1855 Edmund Orgill entered the firm, which became known as Lownes, Orgill & Co., and in 1859, when Mr. Lownes retired, the name was changed to Orgill Bros. & Co., which has continued until the present time. Fred. Orgill began his career in the Hardware business with the Wiebusch & Hilger Hardware Co., in New York City, in 1876, where he remained until 1882, when he entered the employ of Orgill Bros. & Co., becoming a member of the firm in 1886; being made general manager in 1891. His enterprise and energy have contributed much to the success of this firm.

James Maroney is the founder of the Maroney Hardware Co., of Dallas, Tex. He was born in County Clare, Ireland, and was brought to this country by his parents in 1851. They became residents of Richland County, Wis., and after receiving a thorough education, and serving for some time as overseer of improvements in the service of the government, Mr. Maroney removed to Dallas, where he bought an interest in the firm of Maroney & Co., which was then owned by his brother. He became possessor of the entire concern in 1884, and in 1886 converted it into a corporation under the name of the Maroney Hardware Co.

VOTE OF THANKS.

The convention was regarded as a success by everybody, and much of the credit of this was due to the efforts of the reception committee and others to make the stay of the delegates and their guests as pleasant as possible. The feeling in the minds of the delegates was best expressed by the adoption of the following resolutions at the session on Friday:

Resolved, That we hereby tender to Mr. A. B. Clarke, president of the Old Dominion Nail & Iron Co., and to Mr. Waite, the traveling representative of the company, and through them to said company, our sincere thanks for the use of their sloop so generously donated to the pleasure of this association and its guests during this meeting;

Also, To the arrangement committee for the elegant surroundings provided for the comfort of this association; to the reception committee and manufacturers for their untiring zeal and labor in doing what they could for our comfort, and especially to Col. Irby Bennett and Sergeant-at-Arms H. H. Beers for their untiring labor; to Mr. V. A. Moore for obtaining the privilege of ourselves and guests visiting the Newport News shipyard, to the hotel management for their elegant entertainment; and last, but not least, to the fair ladies for their presence in brightening up and cheering the dull routine of the business sessions and thereby making the social feature of this meeting one which shall long be remembered by us as one of the pleasantest in our history.

THE MEETING PLACE FOR 1899.

No formal action was taken in regard to the time and place for holding the meeting of 1899. Invitations were received from Detroit, Mich., Texas and New York. Asheville, N. C., was also suggested, but this matter will be left entirely to the executive committee.

OTHER ENTERTAINMENT FEATURES.

On Friday evening the members of the association, the ladies and other guests were entertained with music and other exercises in the capacious ball room of the house. Songs were sung by Capt. Greenwood, of Richmond, Va., and others, and an original poem was recited by Webster R. Walkley, of the Peck, Stowe & Wilcox Co., New York, and his hearers were so well pleased that they recalled Mr. Walkley, and compelled him to give yet another recitation. On Saturday morning the jobbers and their friends visited Newport News Navy Yard, and spent a very pleasant time in looking over the various sights.

A LIST OF THE MEMBERS PRESENT.

The following is a list of the members of the Association who were present:

J. C. Sproull, Anniston Hardware Co.
C. E. Thomas, May & Thomas Hardware Co.
J. D. Moore, Moore & Handley Hardware Co.
G. W. Barnett, Teague, Barnett & Co.
Wm. M. Teague, Jr., Teague & Sons.
Clayton T. Tullis, Tullis Hardware Co.
M. R. Jemison, Allen & Jemison Co.
J. J. Mandlebaum (proxy). W.W. Dickinson Hardware Co.
J. J. Mandlebaum, Fones Bros. Hardware Co.
N. V. Jackson, Athens Hardware Co.
H. L. Anderson, Anderson Hardware Co.
W. A. Parker and W. M. Crumley, Beck & Gregg Hdw. Co.
C. L. King, King Hardware Co.
F. I. Stone, F. I. Stone & Co.
R. C. Carson, Charlotte Hardware Co.
Chas. H. Ireland, Odell Hardware Co.
W. B. Gillespie, Mitchell, Powers & Co.
N. C. Gladding, E. C. Atkins & Co.
W. E. Gibbins, Woodruff Hardware Co.
H. S. Bettes, H. S. Bettes Hardware Co.
C. U. Roberts, Roberts, Hardwicke & Taylor Co.
R. E. Bell, R. E. Bell.
D. B. Barker, Barker-Jennings Hardware Co.
J. H. Watters and A. A. Martin, Watters & Martin.
Paul R. Howard, Paul R. Howard.
Charles Leonard, Charles Leonard.
John Donnan, W. S. Donnan & Co.
Chas. H. Watkins, Watkins-Cottrell Hardware Co.

NEW MEMBERS.

The following are the names of new members of the Southern Hardware Jobbers' Association whose names have been added to the list since the preparation of the programme with its list of membership, found in an earlier page of this report:

Allen & Jemison Co., Tuscaloosa, Ala.
Speer Hardware Co., Fort Smith, Ark.
Knight & Wall Co., Tampa, Fla.
Tom Fritts Hardware Co., Chattanooga, Tenn.

THE MANUFACTURERS PRESENT.

The following are the names of the various manufacturers who were present as guests of the Association:

Samuel Disston, Henry Disston & Sons, Philadelphia, Pa.
B. A. Hawley, Russell & Erwin Mfg. Co., New York.
W. H. Matthai, Matthai, Ingram & Co., Baltimore, Md.
James R. Kelly, Kelly Axe Mfg. Co., Alexandria, Ind.
W. R. Walkley, Peck, Stow & Wilcox Co., New York.
W. D. Mounger, Michigan Stove Co., Detroit, Mich.
Geo. H. Harper, Matthai, Ingram & Co., Baltimore, Md.
Lewis W. Klahr, Enterprise Mfg. Co., Philadelphia, Pa.
D. M. Walke, Keen & Haggerty Mfg. Co., Baltimore, Md.
Joseph M. Hottel, G. & H. Barnett Co., Philadelphia, Pa.

Digitized by Google

Fred. S. Seeley, Wiebusch & Hilger, New York.
F. H. Forman, American Steel & Wire Co., Louisville, Ky.
Frank Guildner, Sargent & Co., N. Y.
C. L. Meade, Stanley Rule & Level Co , New York.
James Surpless, Surpless, Dunn & Co., New York.
Chas. H. Wier, American Axe & Tool Co., New York.
T. H. Gossett, John H. Graham & Co., New York.
Edmund D. Fisk, Nicholson File Co., Providence, R. I.
Arthur B. Clarke, Old Dominion Iron & Nail Works Co., Richmond, Va.
Robert D. Carver, Cincinnati Barbed Wire Fence Co., Cincinnati, Ohio.
J. O. Whitaker, Whitman & Barnes Mfg. Co., Akron, Ohio.
A. R. Sullivan. Towers & Sullivan Mfg. Co., Rome, Ga.
E. M. Converse, Withington & Cooley Mfg. Co., Jackson, Mich.
C. H. Parsons, P. & F. Corbin, New Britain, Conn.
O. C. Mead, representing T. Rowland's Sons, Millers Falls Co. and other manufacturers, New York City.
Chas R. Wilcox, National Supply Co., Baltimore, Md.
Banks Rucker, Russell & Erwin Mfg. Co., New York.
C. L Campbell; Peck, Stow & Wilcox Co., New York.
H. B. Lupton, Oliver Wire Co., Pittsburg, Pa.
A. H. Potter, E. C. Atkins & Co , Indianapolis, Ind.
James D. Foot, Kearney & Foot Co., New York.
A. W. Bond, Bond & Tabb Bros., Baltimore, Md.
John Hoen, Henry Keidel & Co., Baltimore, Md.
C. T. McKinnie, Stanley Works, New York.
E. Forrest Cooper, Henry Disston & Sons, Philadelphia, Pa.
W. S. Dorman, Maryland Hinge Co., Baltimore & Sutherland Plow Co.
G. W. Brown, Columbus Iron Works Co., Columbus, Ga.
F. P. Wright, Crescent Works, Maxmeadows, Va.
J. H. Grubb, Hussey, Binns & Co. and Pittsburg Gage & Supply Co., Pittsburg, Pa.
F. C. Wheeler, Hermann Boker & Co., New York.
E. E. Paine, B. F. Avery & Son, Louisville, Ky.
C. M. Fouche, Park Bros. & Co., Knoxville, Tenn.
Newton Kelsey, Evansville, Ind.
George B. Durell, Harriman Hoe & Tool Co., Harriman, Tenn.
O. V. Ball, Landers, Frary & Clark, New Britain, Conn.
W. M. Merriam, Boston, Mass.
J. Lewis Alnult. T. N. Motley & Co., New York.
W A. Chenoweth, Birmingham, Ala.
H. L. Smith, Novelty Mfg. Co., Jackson, Mich.
Farmville Mfg. Co., Farmville, Va.
W. B. Sutton, United States Leather Co., New York.

Among the other visitors present was Thomas E. Oliver, of Oliver Bros., New York, as a representative of that important branch, the Hardware syndicate buyers of the country.

PHOTOGRAPHING THE CONVENTION.

An invitation was extended to the Convention by Prince, the well-known Washington photographer, who has branch offices at Old Point Comfort, to assemble on one of the porches of the hotel, immediately after adjournment, for the purpose of having a photograph taken. The invitation was accepted, and many of the members and their guests assembled in response to the invitation. The result is shown very effectively in the full page illustration in this issue.

SCATTERED NOTES.

The presence of the ladies at the convention was a taking card. They were not in the way when business was to be transacted; and it was very pleasant to have them around when business had been disposed of. One speaker told only the truth when he said: "I have often heard that the most beautiful women are to be found in Kentucky. Looking over this assemblage, I am led to one of two conclusions—that all the ladies present are from Kentucky, or that the other Southern States are her peer in the production of beautiful women."

Irby Bennett, chairman of the reception committee, was indefatigable in his endeavors to make it agreeable for members and their guests. He was always on hand when wanted, and kept things moving at a lively rate. He was ably seconded by other members of the committee.

Old Point Comfort is a place for seeing things. On Wednesday evening a burning vessel sailed in and out with the tide, wrapped in a sheet of flames, and was blown up by a mine in full sight of the hotel. On Thursday morning a fishing vessel was overturned by the wind and sunk right in front of the hotel windows.

VISITORS TO NEW YORK.

A number of the members of the association took occasion to extend their travels so as to include a visit to New York, and it is needless to say that they were made at home in the headquarters of the Hardware Club. Among these visitors were the following gentlemen: H. S. Bettes, Paris, Texas; C. H. Ireland, Greensboro, N. C.; C. E. Thomas, Birmingham, Ala.; D. V. Hale, Atlanta, Ga.; C. N. Roberts, Sherman, Texas; J. D. Moore, Birmingham, Ala.; W. A. Parker, Atlanta, Ga.

New England Iron & Hardware Association.

The annual meeting of the New England Iron & Hardware Association was held at Young's Hotel, Boston, on Tuesday, June 21st. A dinner was given to the members of the association, and reports were made by the various committees covering heavy Hardware, shelf Hardware, metals and bureau of credits and collections. Reports were also received from the treasurer and clerk.

The next thing in order was the election of officers for the coming year, and the following nominations were made by the committee, of which S. A. Bigelow was chairman:

Treasurer: C. H. Breck.

Clerk: J. T. Boyd.

Directors: H. C. Bangs, J. T. Boyd, H. C. Dodge, H. L. Doten, C. E. Dowse, A. J. Chase and William Chamberlain.

These gentleman were all unanimously elected, and at a subsequent meeting of the board of directors the following president and vice-president were elected:

President: H. C. Bangs, of Providence, R. I.

Vice-president: H. L. Doten, Boston, Mass.

The president-elect was introduced by the retiring president, Leon C. Carter, and made a brief but pointed address, which was received with marks of favor. Addresses were made by other members of the Association. It was decided to omit the meetings for July and August, and the question of an outing was left with the directors of the Association.

Several Hardware Associations.

It was intended to hold a midsummer meeting of the Wisconsin Retail Hardware Association in July, but that intention has been abandoned because of other important occurrences in the State.

The Texas Hardware Jobbers. Association recently held a session in Waco. The retailers were the guests of the Association, and it was decided to call a meeting of retailers to be held at Waco on June 28th, for the purpose of organizing a State Retail Association.

At a recent meeting of the Board of Governors of the Hardware Club ot New York, the following gentlemen were unanimously elected to membership:

Harvey Hubbell, Bridgeport, Conn.
George A. Lewis, Naugatuck, Conn.
Edward L. Young, No. 10 Wall Street.

Sale to the Boston & Lockport Block Co.

The assignees of the Bagnall-Loud Block Co. (a Maine corporation, organized in 1894, Robert M. Barnard, president, and Herbert Loud, treasurer) have sold to the Boston & Lockport Block Co. all the stock of the Bagnall-Loud Block Co., manufactured and in process, machinery, patterns, etc. The Boston & Lockport Block Co. is a New York State corporation. The finished stock will be at once transferred to the store of the Boston & Lockport Block Co., No. 142 Commercial Street, Boston, and the balance to their factory at East Boston. The sale was effected through Albert D. Bosson, president of the Boston & Lockport Block Co., and Myron H. Tarbox, treasurer, who also constitute a majority of the executive board of the same company.

Review of the Markets.

Hardware: The season's business now being brought to a close, will find the six months traffic making an admirable showing, considering the adverse questions seriously affecting its steadiness, which at times affected the wholesale trade. The volume of the season's business will stand comparison, and be found encouraging. Prospects for the coming season are very good, and should the war be brought to a sudden termination by overtures for peace, which is among the probabilities, there will be the largest fall trade result, that we have seen in years. Prices continue too low to anticipate much in the way of concessions to stimulate early orders; the prospects being that as the season progresses advancing quotations and less abundant supply, will become unavoidable conditions.

Wire Nails: The wire nail market shows no improvement over previous report, the conditions remaining the same and the demand continues normal without any element of speculation or of more than ordinary interest. The mills are accumulating more of a stock than is required for the usual "shut down" during the summer, but no effect on quotations is felt in consequence of this increased supply, as it is regarded as certain that the opening of the next season's trade will find the market in a healthy condition. The carload price to retail buyers, of $1.35 f. o. b. factory, is firmly held. New York prices being held as previously, carload lots on dock $1.45; smaller lots from store $1.55.

Cut Nails: The cut nail market may be said to hold its own, at quotations previously noted, trade being quite moderate and prices continuing low. New York prices are: For carload lots on dock, $1.17½@$1.20. Smaller lots from store, $1.25@$1.30.

Files: Business continues good; it is announced that a meeting of the File Manufacturers' Association of the United States, was held at the Astor House, New York, on June 15th when it was unanimously agreed, owing to the advancing tendency toward increased costs in labor and material, to hold a meeting of the Association in New York, on August 3d, next, for the purpose of considering the advisability of advancing prices. It was decided to maintain existing prices for the present.

Barb Wire: The season for this active staple has been a remarkably good one, being well sustained throughout. The large export trade which has been a prominent feature of the season's business, having had the effect in keeping the home markets in short supply; orders even now being still in process of completion, mills having a good promise for future business. Prices still continue at $1.70 to $1.75 for carload lots of 4 point galvanized at mill. Painted barbed wire being held at $1.40 to $1.45 for same quality.

New York prices are as follows: Four point galvanized in carload lots on dock $1.85@$1.90; smaller lots from store, $2.

Smooth wire: Prices remain the same as previously named, $1.15 at mill for carload lots, base sizes. Business is reported good and the market is in a firm condition, being held well in hand by the influences now controlling it.

Shovels and Spades: The business of this industry is practically controlled by the associated manufacturers who, since our recent issue, held a meeting in this city for the purpose of discussing the desirability of an advance in prices for the fall trade, some of the members thinking it a good time to entertain a movement of this character. But in view of the satisfactory conditions at present surrounding this important industry, it was decided to be unwise to change, and present prices were confirmed until October 1.

Shot: Tatham & Brothers name, under date of June 18th, the following advanced prices for shot:

Drop Shot, sizes smaller than B, 25 lb. bags,	$1.25	per	bag;	5 lb. bags,	30c.	per	bag
" B and larger sizes...	"	"	1.50	"	"	"	35c.	"
Buck Shot	"	"	1.50	"	"	"	35c.	"
Chilled Shot.....	"	"	1.53	"	"	"	35c.	"
Dust Shot	"	"	2.00	"		"	50c.	"

Terms—Net cash 30 days, or 2 per cent. discount will be allowed for cash remitted within 10 days of invoice date. Discounts on ton lots as usual. Prices are subject to change without notice, and are not guaranteed against decline. Freight is equalized with Philadelphia and Baltimore, and no orders are binding, until accepted.

Sheet Zinc: The lately announced quotations for sheet zinc referred to in a recent issue were advanced on June 15 to $7 per 100 pounds, f. o. b. mill, when furnished in casks of 600 pounds. This applies to thicknesses between Nos. 9 and 15 inclusive, and in widths between 32 and 46 inches, and of the lengths between 84 and 90 inches. Extras remaining as previously reported.

Cordage: Manufactures of sisal and manila hemp continue to advance in price with each recurring week, and even at the extreme quotations now ruling the markets, it is reported a fair business is being done by the mills. Carload prices on cordage are announced at the present time as follows, the usual advances being made for smaller quanties:

Manila, 7-16 inch and larger	per pound,	10¼	cents.
" ⅜ inch	"	10¼	"
" ¼ and 5-16 inch.	"	11¼	"
Sisal, 7-16 inch and larger.....	"	9¼	"
" ⅜ inch	"	9¼	"
" ¼ and 5-16 inch..... ..	"	10¼	"

Binder Twine: The highest prices so far named for binder twine are those prevailing at the present time. A satisfactory movement is being made in this important line of business, now that harvesting has already begun. It is not thought the extreme limit has even yet been reached, the demand being an unusually large one throughout the country. We quote as follows for carload lots, f. o. b., Eastern factories, with the usual advance for smaller quantities:

White Sisal, 500 feet to the pound	per pound,	12½	cents.
Standard, 500 feet to the pound	"	12½	"
Manila, 550 feet to the pound.....	"	13½	"
Pure Manila, 650 feet to the pound.....	"	14½	"
Travers Ex. Hemp, 500 feet to the pound ..	"	9	"

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 45 cents per gallon; in lots of 5 barrels or more, 44 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE PHILADELPHIA TRADE.

While the bright weather has caused a decided increase in the number of orders, and a noticeable scarcity in seasonable goods, such as fly wire, poultry netting, window and door screens, etc., the most direct feature of the present situation is the hopefulness that prevails everywhere in regard to the future. A marked increase has been noticeable for some weeks in the demand for tools, and already in some lines it is difficult to get tools fast enough to fill orders. This is a most hopeful sign, showing that work is plenty and better times probably ahead.

While it is true that wheat has made a break owing to the collapse of Mr. Leiter, the price is still high as compared with previous years, with prospects of an enormous crop and further shortages abroad. Such being the case, the farmers of the country having used last year's surplus to pay off outstanding indebtedness, will now be in position to spend money for improvements, and trade looks brighter in consequence.

Changes in prices during the last two weeks have been few in number. While one or two items, such as shot, glazier points and copper rivets and burrs, have advanced, and are held at higher prices, most of these advances were not unexpected, and others may naturally follow.

A most remarkable feature is the small demand for nails, both wire and cut. Last year, when nails were worth about $3 per keg and the country in the depth of hard times, nails were in active demand and a surprisingly large quantity was sold, To-day, with nails at about $1,65 a keg, and farmers with more money than they have had for several years, the demand is exceedingiy light and, so far, we have not met anyone who can explain why this was so.

Collections are undeniably better. Money is coming in quite freely, and it is hoped that the country merchants who have recently been in rather tight situations, are now feeling the results of better times and gradually escaping from their difficulties. BIDDLE HARDWARE CO.

THE KANSAS CITY TRADE.

As we write, the sun is shining. This is not a new thing, but it is quite rare enough here on the edge of Kansas and Missouri, to be made mention of.

Talk about "drouthy Kansas"! As sensible as talking about dry water.

Such another spring, for moisture and big wheat crops in our immediate territory, has never been equalled as a whole.

In fact, rains have been so persistently plentiful and wet in their character, as to considerably hinder farming. As a consequence, business has been more or less "spurty"—dependent on the fact whether or not a salesman went by boat, rail or balloon, Also whether or not the farmer could

Digitized by Google

get "to town" to buy goods, and thereby compel our retail trade to stock up.

We are pleased, however, to report a very satisfactory trade on the average. Staple goods have held a remarkably even run of prices for the last three months. It is the opinion of the writer that this very condition has proven an inducement to the retail trade to buy much more freely than they would otherwise have done. Nails and barbed wire have moved freely: smooth wire has had a big right of way in our trade. Seasonable goods were held in check by the very wet, cold, gloomy season now just between spring and summer.

There is an unusual demand this month for grain cradles. Doubtless, the large wheat crop now being harvested in the Territory and southern Kansas, with central and western Kansas to follow, will result in a heavy traffic in cradles later on, of another kind. Along with the boom which the furniture dealer has reason to anticipate, we hope to sell his same customers our line of baby buggies, dinner buckets, husking pegs, clothespins and borax. Be it understood that this remark applies to the fellow who handles a "mixed stock."

We are certainly of the opinion that fall prospects are exceedingly flattering. The writer expresses his personal views only in this letter, and in saying that the present war has had as little baneful influence upon trade in this section of the country as would the sneeze of a cat affect the ocean tide, he states what the Eastern trade can scarcely believe.

Few changes occur in business. Failures are very rare. Collections are good. Should Kansas harvest 75,000,000 to 100,000,000 bushels of wheat in the next four weeks, the jayhawker alone could feed the United States army its bread, and furnish enough money from its surplus deposits to pay all its war expenses for sixteen months, more or less, to come.

GILLE HARDWARE & IRON CO.

THE PITTSBURG TRADE.

One of the modern ideas connected with jobbing Hardware is to carry in stock a much larger variety of goods than formerly. While it was the tendency to specialize some years ago, dividing the business into smaller lines, now all these lines are carried under one roof, and the retailer can find everything germane to Hardware in one place. This is a convenience to the retailer, and while adding to the amount of business done by the jobber, entails the use of larger warehouse capacity, more capital, etc. There is such an improvement yearly in many kinds of goods, that the merchant must be alive to all these changes and keep "up to date." There is no room for "mossbacks" in the Hardware trade at present, and our experience is that there are very few of them to be found in it now. June business is very good, an active demand for all seasonable goods, and stocks running short before the demand is supplied.

LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

Every merchant has more or less trouble with fakirs, bankrupt sales, farmers' clubs, department stores, etc.

When one of these starts, the resident merchant should at once learn the brand of goods being offered, and give his jobber a list of them, stating his object in getting them, and the jobber would be glad to co-operate with him and let him know the prices at which they can be purchased. The jobber will take pleasure in getting them for him at the lowest price, so that he can sell them lower than his competitor.

Some of the jobbers that you deal with can get for you the same brand; when the goods are received, mark the prices in plain large figures and set them out in conspicuous places where they are sure to be seen. They are usually a low grade of goods and not a large variety. Donate your profit on them and your jobber will do the same, giving so much to rid the town of fakirs

Do not pretend they are cheap, but tell your customer that the quality makes the price; that you cannot recommend them, but are compelled to keep them to meet the price. Most of your customers will buy better goods.

Most of the people appreciate having a merchant located carrying a stock of goods in the town and do not regard him as preying on the people, and are not in sympathy with any attempt to prevent his success.

A store or two, a blacksmith shop, a tin shop and a wagon shop are a great convenience in any town, and the people generally realize this.

Action is much more effective than talk, and you can certainly sell the goods as low as others if you push things as suggested, and the jobber will gladly aid in protecting legitimate trade.

Do not talk about it or indicate that you are disturbed, but act quietly, keeping your own counsel, saying if your customers want that kind of goods, you can furnish them as cheap as any one; and your trouble will soon end, and the confidence of your customers will be increased, as it will be a practical demonstration of your ability to supply them what they want; but you treat them best when you sell them the best goods.

Business continues good. The heavy advance in manila and sisal goods has shown that goods can advance, and, after years of steady decline, this is refreshing.

The dissolution of partnership between wheat and silver has punctured some faults in political theories and we are feeling our way out of despondency.

It is some gain to be assured that a general decline has halted. The war may force us into a world's partnership, and we may find the meaning of it to be an alliance of the English-speaking races for the promotion of liberty and justice. We may learn that altruism is a condition of national as well as individual development.

LOCKWOOD-TAYLOR HARDWARE CO.

THE MINNEAPOLIS TRADE.

Business continues to be fair, gradually growing better, we think, in all lines. Jobbers are very busy, and find themselves obliged to work Saturday afternoons. They usually close at 1 o'clock Saturdays during the summer months. In the retail trade, locally, there is some improvement, a little more building being done, and of a somewhat better class.

The recent break in price of wheat makes no particular difference, as the farmers and elevators had marketed all the grain that could be spared from seeding. Those that did not sell at the high price prevailing ought to lose if they were not satisfied with the price they could get for it. Without a doubt all the wheat in the elevators here will be needed for milling purposes before the new crop is in suitable condition to make into flour, and while the crop

Digitized by Google

prospect as a whole is excellent for a large yield, there is no doubt that high prices will prevail.

The sawmills have been closed for some little time on account of high water, and a large log jam that has prevented the logs getting to such mills that were not affected by the flood. The water has gone down some now so that they can work breaking the jam, and we imagine the mills will have no further difficulty. There is every indication of a good fall business.

W. K. MORRISON & CO.

THE ST. PAUL TRADE.

We have no marked changes to note in this market since our last letter. Business continues to be active, all kinds of seasonable goods being in large demand, with, perhaps, the exception of refrigerators, which, owing to the absence of very hot weather, are not moving as we would like to see them.

Haying and harvesting tools are selling freely. There is a good demand for builders' Hardware.

The crop outlook remains unchanged, and farmers and country merchants are continunig to feel hopeful. The volume of business for June will show a handsome increase over last year. C. W. HACKETT HARDWARE CO.

THE PORTLAND TRADE.

Seasonable goods are now in good demand, making up for the slow sale of two weeks past.

The caution caused a short time ago by the fear we might be visited by Spanish ships seems to be wearing off, and business appears to be picking up.

The advance in price of sheet zinc and cut nails has aroused our merchants to the fact that everything is very low, and with a war revenue bill going into force in a few days, the prospect is better for advances than for depreciation in values, and while no great change has taken place, there seems to be less hesitancy in buying than has been manifested for some time.

The war news of late has not been of a nature to arouse much enthusiasm, but we know our government is gradually closing in upon the Spanish forces with an irresistable power that in the end means their complete defeat. The rumors of sending some of our swift cruisers to the coast of Spain will tend to keep what few ships they have left at home.

We feel the outlook is brighter, and that business will soon assume its usual proportions. Collections are fair.

The EMERY-WATERHOUSE CO.

TRADE TALK: GRAPHITE, INCIDENTALLY.

As to business, that can be summed up in a very few words. We are running on our various lines from eighteen to eighty-one per cent. ahead of the corresponding time last year. We would say that our vice-president, general manager and treasurer *are* going to Europe were it not for the fact that those three offices are filled by one very competent and hard-working man, John A. Walker. This is not Mr. Walker's maiden trip, as he has been abroad several times, and is a well-seasoned traveler; but this is the first time that he has been obliged to tread the deck of a foreign vessel, Heretofore he has always gone abroad on the *Paris;* this time he goes on the *Umbria.*

We believe that these business letters to *Hardware* might be made more interesting and more helpful to manufacturers and jobbers if the writers would depart a little from simply chronicling business matters and drop occasionally into "shop talks," as it were, as the Logan Gregg Hardware Co. did in the issue of June 10th.

As manufacturers we always aim to protect the jobber. We avoid, as much as possible, selling to the small trade. We invariably steer small dealers to their nearest jobbers. We coax and woo and court the jobber as we would our best girl. We supply him with sample cases of our goods, circulars imprinted with his name, and do all we can to please him, but at the same time we are conscious that the jobber is not in business for philanthropic purposes, and we find it quite necessary to keep a close eye upon him, lest he depart from us in search of goods similar to ours on which he can make more profit.

We also find that he is human in every respect and is sometimes led to lose some confidence in our goods because of the mighty plausible tales told him by our competitors. Sometimes he writes and asks us to brace him up with a letter. Sometimes we get there in time to find him more or less dispirited and uncertain whether to send an order in to us or to place it elsewhere.

Then again, and this is about the worst we can say, the jobber is, unfortunately, getting to that point where he wants his own name on all of his goods; he wants his firm name upon his lead pencils and upon all the goods that he carries. To such an extent has this become, that the manufacturer almost feels as though he was running his factory simply for a syndicate of buyers.

Then again, the manufacturer would like the jobber generally to adopt the fashion of the lamented and late A. T. Stewart, who, when he had bought goods in a little larger quantity than he found a ready sale for, never asked to have them returned or exchanged, but disposed of them at a bargain, which usually resulted in some advertising for A. T. Stewart and the disposal of goods a little shopworn or out of date. Too many jobbers, however, do not seem inclined to dispose of over-bought stock in this way, but want them returned; and such goods when returned are almost a dead loss to the manufacturer, as they cannot be put on the market as new goods without much attention, and sometimes not at all.

That is a good letter written by the Lockwood-Taylor Hardware Co., which also appears in *Hardware* of June 10th. We imagine that it would carry great offense to a man claiming shortage, to ask him to verify his statement by oath, but at the same time we think that if a man knew he must verify his statement by oath, he would be very much more careful in making his claim.

By this we mean that lately we have had several claims for shortage where we were very certain there was no shortage, and where our customer was manly enough a little later on to write us that the goods had been found. At the same time we had been disturbed, and in turn had very much disturbed our packing and shipping department, and our customer must certainly have been annoyed in finding that his own clerks had made an error, to say nothing of being obliged to apologize for them

As a rule, we think all manufacturers are very careful in checking up all shipments with the desire of being specially accurate in count, etc. We also agree with the Lockwood-Taylor Hardware Co. that "when a buyer desires extension in time of payment, he should notify the seller before it becomes due and ask it as a favor if he cares for a high

With leaky hose? Leaks flow from pin holes or cracks. **What Causes Pin Holes?** Particle of foreign matter in cheap, heavily adulterated rubber. The high-grade rubber which we use in Double Diamond, Oxford and Carbon hose contains so small a percentage of foreign matter that the chance of pin holes is practically wiped out. **What Causes Cracks?** Poor rubber again—unelastic rubber—rubber that does not respond to the bending, stretching and twisting which hose receives in service. Double Diamond, Oxford and Carbon rubber is full of life and elasticity—bending, stretching and twisting does not rupture it. Send for booklet, samples and prices.

SOLD BY ALL HARDWARE DEALERS.

grade of credit." Unfortunately, however, too many buyers think that a bill of thirty to fifty dollars is so small that a large manufacturer should never give it a thought, but should be willing to permit it to run until the seller gets ready to pay it. Unfortunately, however, the wealthiest manufacturer cannot afford to carry very many such accounts, and it is only justice that the buyer should, for his own credit, be prompt and careful about all money matters.

We will add that on the western coast of Africa there is now a slight local demand for Dixon's Stove Polish. The native ladies use it as a cosmetic. We won't crowd your columns any more this time.

JOSEPH DIXON CRUCIBLE CO.

THE COLUMBUS TRADE.

Trade continues good, and the outlook for a continuation of the same is flattering. The prospects for a large wheat and hay crop were never better. Some farmers contracted their wheat at $1.00 per bushel as soon as it is threshed. It looks now as though it was well sold; but we think wheat will bring $1.00 without any trouble later on. One dollar per bushel for wheat as soon as threshed is better than $1.10 a few months later, as it will shrink at least 10 per cent. in weight when it goes through a sweat.

Prices remain pretty stationary, with the exception of rope and twine. It looks very much as though somebody had control of the sisal and manila hemp, and proposes to make dollars while he can. We all know who controls the manila hemp, and think it would be a good idea to start a "Dewey" twine factory on the Philipene Islands. What catchy brands for goods are now available! Dewey, Sampson, Hobson, &c.

Yesterday, the 16th, was Dewey Day here, and a glorious demonstration it was. We were a little late, but it was a grand success.

THE SMITH BROS. HARDWARE CO.

On the Way to Financial Greatness.

A boy about ten years old stood by the side of a penny-in-the-slot machine in one of the elevated railway stations the other morning weeping bitterly.

"What's the matter, son?" asked a man on his way to the upper platform, stopping a moment at the doorway.

"I put a cent in this slot," blubbered the boy, "and it was the wrong slot. I didn't g-get any gum!"

"Is that all, my lad?" said the man. "Show me the right slot and I'll drop one in for you."

"I'd ruther d-drop it in myself!" sobbed the urchin.

The sympathizing citizen gave him the coin and hurried up the stairway.

And when the sympathizing citizen came back from down town, ten hours later, that boy was still standing by the side of that penny-in-the-slot machine, with his pocket full of one-cent coins and still blubbering.—*Exchange.*

About 30,000 bales of cotton are booked for shipment to Japan this winter from the single port of Seattle. This is said to be 50 per cent. more in value than the value of all American exports to Japan during the season of 1894-5.—*Exchange.*

The new power station and car house being erected by the Spencer, Warren & Brookfield Street Railway Co., Brookfield, Mass., will have steel roof trusses and covering furnished by the Berlin Iron Bridge Co., East Berlin, Conn. The dynamo and engine room roofs of this building will be lined with the Berlin Co.'s patent anti-condensation roof lining, which is now almost universally used for roofs of this nature throughout the country. It prevents the condensation of moisture from the underside of the roof covering, which, if it should collect and drop upon the machine beneath, would cause considerable damage.

Kind Lady—If you need clothing I can supply you with an old suit of my husband's, but they'll be about four sizes too big for you.

Tramp—Never mind, mum, I'll wear 'em. I'd rather be mistook for an anglo-maniac than freeze.—*New York Weekly.*

Giving a Receipt.

"Uneducated people sometimes have a happy knack of coming to the point, says an exchange. Dan and Mose, neither of them noted for erudition, were partners in an enterprise which is needless to specify. One morning a customer called to settle a small bill, and, after handing over the money, asked for a receipt.

"Mose retired to the privacy of an inner room, and, after a long delay, returned with a slip of paper on which were written these words:

"'We've got our pay. Me and Dan.'"

When I was in the jobbing Hardware trade we used to have a German firm of iron workers, located on Long Island, I think at Breslaw, which supplied us with "rolled blind hinges" and "rolled plate hinges," then carried in regular stock for shutters and blinds. Will call the concern "Kreutzer & Co.", although that wasn't the name. When they first commenced to supply us they were new in the business, and cash transactions were essential. We ourselves had to make out the bill for their delivery of hinges, and on this initial occasion my partner, Harris, called for a "receipt in full," on handing them the money. It would have made a philosopher smile to see that receipt. We kept it for quite a while on exhibition as a curio. Down at the bottom of the bill, in pretty tough chirography, was noted the fact: "I ish full. Kreutzer & Co.' But it "filled the bill"; there was no room for anything more to say. HOP.

The value of the merchandise entered last month for consumption in the Dominion of Canada was $9,887,256, and the duty collected was $1,786,572. The value of the free goods entered was $3,799,267. The total exports amounted to $10,614,210 of which $9,583,539 worth was the produce of Canada.—*The Canadian Manufacturer.*

"There is nothing like a yacht," he said,
As on the beach they stood.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Albany, N. Y.—The Burleson Hardware Co. to deal in general Hardware in the city of Niagara Falls; capital, $15,000. The directors are William E. Burleson, Mary C. Burleson and Max Amberg, all of Niagara Falls.

Bardolph, Ill.—S. D. Moody & Son.

Biwabik, Minn. — Calvin & Robb, the lumbermen, have opened a Hardware store here.

Britt, Iowa.—F. B. Rogers & Son, Hardware, have opened new store, and are handling sporting goods, etc.

Gaylord, Mich.—H. E. Blodgett, Hardware, will open new store in the Smith building, corner of Main and Centre Streets.

Milwaukee, Wis. — The Dixon-Malone Hardware Co., of Racine, has been incorporated.

Richmond, Va.—The White Hardware Co. has been incorporated with James White, president; C. A. Mottley, secretary; F. H. Jones, treasurer; for the purpose of conducting a wholesale and retail Hardware business. Capital stock not less than $3000, nor more than $10,000.

San Leandro, Cal.—The Arcade has established a Hardware store in the Masonic building on San Lorenzo Avenue.

Trenton, N. J.—Commercial & Mfg. Co., to deal in Hardware; capital stock, $30,000. Incorporators: William J. Fawcett, G. G. Watts and Richard Harrison all of Pittsburg.

Changes and Improvements.

Berea, Ohio.—F. Brown, dealer in Hardware, stoves, etc., is building a new store, which will be 32x75 feet in size, two stories high, with basement. This is on the site Mr. Brown has occupied for the past twenty-five years.

Carson City, Mich.—A. B. Loomis, Hardware, succeeded by the Loomis Hardware Co.

Chattanooga, Tenn.—The Magill Hardware Co. have moved into the storeroom, No. 624 Market Street, which is next door to their former place, No. 622 Market Street. The new place has about twice as much space as the old, and to secure this was the purpose of the removal. A great many improvements are being made in the stock and store of the company. New departments are added and all departments are enlarged.

Crete, Ill.—F. W. Reed, one of our Hardware merchants, is moving his stock to Grant Park.

Davenport, Wash.—A. W. Turner, the Hardware merchant, will erect a new brick block this summer on the corner of Morgan and Sixth Streets.

El Campo, Texas.—A. Fahrenthold, Jr., Hardware, succeeded by A. Fahrenthold & Co.

Eleva, Wis.—G. H. Snoyenboss, Hardware and agricultural implements, succeeded by F. J. Hartman & Co.

Elkton, Ky.—Harry C. Miller, implements and Hardware, has sold out his business to Charles Cartwright, who will continue the business.

Emaus, Pa.—H. W. Jarrett, Hardware, sporting goods, etc., is building an addition to his store.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements. etc , will be gladly received, and promptly published.

New Companies, Etc.

Albany, N. Y.—A certificate of incorporation has been filed with the Secretary of State by the Delaney Forge & Iron Co., with a capital of $100,000 paid in. The company are to make and deal in iron forgings. The place of business is at No. 300 Perry Street, Buffalo. Directors are: Joseph Howard, John Slott and William A. Robbins, all of Buffalo.

Brooklyn, N. Y.—H. C. Harney & Co. has been incorporated by E. S. Bosworth and others; to manufacture metal castings. Capital stock, $10,000.

Brooklyn, N. Y. — W. H. Lundequist Co.; to manufacture Hardware. Capital, $1600. Directors: Frederick Moran, William Lundequist and Elizabeth A. Lundequist.

Columbus, Ohio.—The Patton Mfg. Co. has been incorporated with a capital of $25,000, to deal in hollow ware and other castings of aluminum. The incorporators are A. G. Patton, L. L. Rankin, N. B. Abbott, Thomas E. Knauss and M. G. Patton.

Hastings, Mich.—International Seal & Lock Co. has been incorporated, with a capital stock of $60,000.

Meridina, N. Y.—The A. L. Sweet Iron Works has been incorporated by A. L. Sweet and others. Capital stock, $200,000.

Montreal, Can.—The Montreal Hardware Mfg. Co. has been incorporated with C. E. Delorme as manager.

New York, N. Y.—Seamless Metal Ware Co.; to manufacture all kinds of metal ware. Capital stock, $150,000. Directors: Erneste G. Fabbri and Allessandro Fabbri, Scarborough, N. Y.; Adolphe E. Bowie, Benoni Lockwood, Jr., and Edmund L. Zalinski, New York City.

San Francisco, Cal. — Houghton Lock Co. has been incorporated by Douglas S. Watson, Warren Olney, Jr., Donzel Stoney, Raymond K. Sherman and Robert M. Price.

St. Louis, Mo.—The Griffiths Iron Works Co. have been incorporated by George Griffiths and others. Capital stock, $5000.

Tecumseh, Mich.—The Tecumseh Malleable Iron Co. has been incorporated with capital of $25,000.

Changes and Improvements.

Akron, Ohio.—Large orders for war material have been received by Taplin, Rice & Co. The orders so far consist of large castings for eight sets of coal hoists for coaling stations and war vessels. These orders are being filled by the Brown Hoisting & Conveying Machine Co., of Cleveland, which at present has more work than it can handle.

Aurora, Ill.—The Wilcox Mfg. Co. has decided to enlarge its plant. There will be an addition to the main building, which will be of brick and two stories high. The track shop will be extended, doubling its capacity, and a new building will be put up for holding the raw materials.

Cincinnati, Ohio.—The Addyston Pipe & Steel Co. has arranged for practically doubling its foundry capacity, and some of the contracts for the work are already let. The foundry floor space will be exactly doubled, and work on the construction of the buildings will begin in the near future. When completed, the plant will be one of the largest of its kind in the United States, The company will spend about $30,000 in new appliances. Electric cranes, each with a capacity of 50,000 pounds, have already been contracted for with the Morgan Engineering Co., Alliance, Ohio.

Connersville, Ind. — The Connersville Blower Co. has contracted with the Muncie (Ind.) Bridge Co. for the erection of an iron building to replace the foundry recently destroyed by fire. The new building is to be twice as large as the old one, thus giving the company twice the capacity it heretofore had.

Dallas, Tex.—The Southern Rock Island Plow Co. will erect a large building at the corner of Elm and Houston Streets, which will be four stories in height, constructed of pressed brick, stone and iron, and of the most modern architectural design. The Southern Rock Island Plow Co. will use the building exclusively as southwestern headquarters.

Indianola, Iowa.—The old brick and tile works have been converted into a factory for the manufacture of axe and pump handles, single and doubletrees, yokes, etc.

Middletown, Pa.—The American Tube & Iron Co.'s plant is busy on some large orders for trolley poles.

Newark, N. J.—The entire plant of the Hansell Spring Co. will be removed to Ambler, Pa., in a short time, where a larger factory and increased facilities will be utilized. The company will add considerable new machinery.

Pittsburg, Pa.—The Pennsylvania Tube Works Co. has begun the manufacture of boiler tubes, for which quite a number of orders have already been secured.

Roanoke, Va.—The Norwich Lock Co.'s works have been purchased by S. Hamilton Graves for $6700, who will put same in operation.

St. Louis, Mo.—The Pleuger & Henger Mfg. Co. is adding a tinning plant to its equipment, for tinning in both grey and malleable iron, and at the same time is putting in a galvanizing department.

St. Louis, Mo.—The St. Louis Screw Co. will increase its capital stock from $30,000 to $60,000.

Toledo, Ohio.—The plant of the Brewer Steel Tubing Co. has been sold to the Shelby Tube Co. The price paid is said to be $125,000. The Brewer Co. went into the tube combine a year ago, and since then has been practically idle.

Wheeling, W. Va.—The La Belle Iron Works will build a new tin house, an addition to the present structure. It will be of the same dimensions as the old one, being two stories in height, built with brick, with massive stone foundation.

Recent Embarrassments.

St. Catherines, Ont.—The failure of McMillan & Haynes, large manufacturers of saws, has been announced. An assignment has been made of the firm's affairs to J. M. Wallace, of St. Catherines, and a meeting of the creditors has been called.

Recent Fires.

Nicetown, Philadelphia, Pa.—The tack factory of Philemon Roberts, Wayne and Roberts Avenues, has been destroyed by fire, entailing a loss of about $4000; insured.

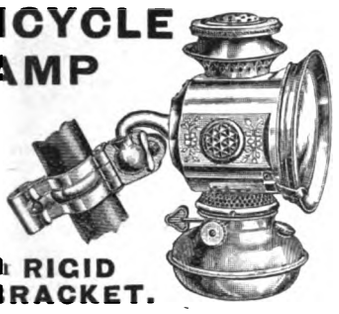
Trenton, Mo.—The Trenton axe-handle factory has been burned to the ground, entailing a loss of about $15,000; insurance, $5000. The fire was undoubtedly of incendiary origin. The factory was one of the largest of its kind in the State, and a large force of men was employed.

Trumansburg, N. Y.—The Gregg Iron Works plant has been destroyed by fire. Loss, $50,000. The Morse Chain Works were also destroyed. Loss, $50,000; insurance, $25,000.

Miscellaneous.

Akron, Ohio.—At a meeting of the stockholders of the Frank, Laubach & Nutt Co., they reelected the old board of directors. The board elected the following officers: W. J. Frank, president; W. F. Laubach, vice-president; G. W. Clemmer, secretary and treasurer.

Chattanooga, Tenn.—The annual meeting of the stockholders of the Chattanooga Hardware Co. has been held and the following officers elected for the ensuing year: Directors: R. K. Carter, of New York; A. M. Johnson, J. W. Johnson, J. W. Cavendar and J. L. Davies, of Chattanooga. President, A. M. Johnson; vice-president, J. W. Johnson; secretary and treasurer, J. L. Davies. The company determined at this meeting to retire from the retail business and confine their operations entirely to the jobbing interest. They will dispose of their retail stock at once in the most judicious and expedient manner, and rent their Market Street store. The jobbing business will be conducted from their large four-story building, No. 14 East Seventh Street.



Fremont, Ohio.—Work on the new cutlery factory is going forward rapidly. Brick laying has progressed above the first story and the second floor joists are being laid. The factory building will be much larger than was first contemplated. Four large wings have been added and the structure will be three instead of two stories high.

New York, N.Y.—The Union Nut & Bolt Co. have just received another contract from the Government for a large quantity of nuts and bolts. These will be shipped to the Brooklyn Navy Yard, where they will be used in the repairing of several Government vessels now at that place.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Aberdeen, S. D.— Albert Stratton has opened a bicycle and repair shop in a building on Second Avenue.

Belt, Mont.— D. J. Dolsen has erected a building which he will use as a bicycle shop. He will both rent and sell wheels.

Belleville, N. J.—The American Dunlop Tire Co. has located its factory and main offices at this place. It is stated that an increase in business, calling for more facilities than the former site afforded, necessitated the removal.

Britt, Iowa.—F. B. Rogers & Son.

Brooklyn, N. Y.—The S. Mass Co. has been incorporated by Aaron Mass and Moses Nussbaum; to manufacture bicycles. Capital stock, $3000.

Detroit, Mich.—The Ives-Rapp Mfg. Co. has been incorporated by M. G. Ives, Samuel N. Rapp, Wm. Ives, Mary Ives Cowlan and Ellen Esther Ives; for the manufacture and sale of bicycles. Capital stock, $8000.

Kokomo, Ind. — The Haynes-Apperson Co., incorporated to manufacture motocycles. Capital stock, $25,000.

New Haven, Conn. — Beecher Folding Bicycle Stand Co. has been incorporated by Frederick Kinsley, Lyman A. Holmes and Hyman S. Fisher. Capital stock, $800.

Pittsburg, Pa.—Chris Hauch, jeweler, has taken the agency for the Eclipse bicycle.

Pittsburg, Pa.—W. J. Johnson & Co., jewelers, have taken up bicycles.

Portland, Me. — International Rubber Tire Co. has been organized with Eleazar Kempshall, president; Henry Tolman, treasurer; for the purpose of manufacturing and dealing in tires. Capital stock, $500,000.

Portland, Me.—The Elastic Bicycle Boot Co. has been organized at Portland, Me., to manufacture Hill's patent elastic riding or bicycle boots. The officers hail from Lynn, Mass.

Raleigh, W. Va.—The United States Ball-Bearing Co. has been incorporated by John J. Hemphill, Creed M. Fulton, Blain W. Taylor, James D. Richardson, Claude A. Swanson, S. B. Cooper and W. A. Jones. Capital stock, $1,000,000.

Changes and Removals.

Boston, Mass.—Park Cycle Co., dissolved.

Buffalo, N. Y.—At a meeting of the creditors of W. C. Boak, held recently, it was decided to take the property out of the hands of the assignees and place it in charge of a committee of the creditors. It is confidently expected that the estate will yield a dividend of from 40 to 50 per cent.

Buffalo, N. Y.—Robert Nixon & Co., dissolved, Mr. Nixon continuing the business.

Chattanooga, Tenn.—J. W. Thompson has removed his bicycle repair shop from No. 905 Georgia Avenue to No. 18 Whiteside Street.

Chestertown, Ind. — Quick & Lindahl, sporting goods, Hardware, etc., succeeded by Frank Quick.

Chicago, Ill.— Continental Financial & Investment Co have certified to a change of name to the Cantilever Cycle Mfg. Co.

Chicopee Falls, Mass.—The Victor Sporting Goods Co., which has been organized to continue the sporting goods business of the Overman Wheel Co., will remove its factory and offices from this place to Springfield. The company has a capital stock of $20,000, with the following officers: F. J. Faulkner, Lynn, president; C. B. Whitney, Springfield, secretary and manager; A. E. Taylor, treasurer.

Eureka, Kan.—H. L. Stoddard, sold out.

Groton, S. D.—H. R. Bartlett, Hardware, sporting goods, etc., business purchased by W. W. Rounds.

Hartford, Conn.—J. E. Leitz & Co., bicycles, succeeded by Leitz & Grant.

Lancaster, Pa.—Martin & Herr, bicycles, succeeded by Omar E. Herr.

Los Angeles, Cal.—Stephens & Hickok, bicycles and sundries, succeeded by Pope Mfg. Co.

Montreal, Que. — Choquet & Lemieux, Hardware, sporting goods, etc., have dissolved partnership. Succeeded by H. R. Lemieux.

Pomona, Cal.—Martin & Patterson, succeeded by H. M. Martin.

Portland, Me.—South Portland Enamel & Bicycle Repairing Works, purchased by J. Dyer, Manager H. Bessy.

Richmond, Ind.—The Richmond Bicycle Co., receiver has sold the plant for $13 000. The company will probably be reorganized.

Worcester, Mass.—The creditors of the Speirs Mfg. Co. have decided to continue the business under the direction of the assignees. At a meeting of the creditors held several days ago a committee was appointed, consisting of F. A. Reed and Wm. H. Inman, of Worcester, and J. H. Wiggins, of Boston, who will investigate the condition of the company's affairs and report at a later date.

Recent Embarrassments.

Janesville, Wis.—Frank Randall, bicycles, reported to have made an assignment.

New York, N. Y.—Justice Lawrence has granted a motion to appoint a receiver for the partnership formerly carried on by Alcott & Vultes, under the style of the Eastern Wheel Works, at No. 90 Chambers Street, in a suit brought by Edward H. Alcott against Henry V. Vultee for an accounting. They dealt in bicycles and supplies. The firm was formed March 1, 1897, and was dissolved November 16, 1897, at which time they had good assets of $4149 and liabilities of $1133.

Philadelphia, Pa.—The Bicycle Supply Co., No. 928 Arch Street, have made an assignment for the benefit of creditors to the Commonwealth Insurance & Trust Co.

Richmond, Va.—E. H. Clowes & Co., bicycles, reported to have made an assignment.

Rock Island, Ill.—Hansen & Mintz, bicycle repairers, reported to have made an assignment.

Shelby, Ohio.—Cramer & Co., bicycles, bicycle sundries, etc., reported to have made an assignment.

Washington, D. C.—The bicycle firm of Larrimore & Ridenour, composed of William K. Larrimore and Henry E. Ridenour, have assigned to Edward L. Gies and William M. Offley. The liabilities are placed at $5509.48 and the assets estimated at $5801 62.

Westboro, Mass.—Ariston Mfg. Co., bicycles, reported to be in bankruptcy.

Recent Fires.

Detroit, Mich. — The Wheeler Bicycle Saddle Co., bicycle saddles, damaged by fire at a loss of $40,000.

Ithaca, N. Y.—The works of the Morse Chain Co. were destroyed by fire recently, together with the plant of the Gregg Iron Works. The combined loss was $100,000, partially covered by insurance. It is said the fire will not materially interfere with the business of the Morse Co.

Newark, N. J.—The factory of the Stockton Mfg. Co., manufacturers of bicycle parts, at No. 55 N. J. R. R. Avenue, has been destroyed by fire at a loss of $20,000. Insured.

Miscellaneous.

Canton, N. Y.—The legal controversy between Drury & Sims, of this place, and James E. Plew, of Chicago, over patent rights to the soft-nosed bicycle saddle, is reported to have been satisfactorily settled, and in a way to permit each party to continue to make and market the saddles.

Chicago, Ill.—President Coleman, of the Western Wheel Works, is reported to be interested in the manufacture of a rapid-fire gun, which may add to his fame and fortune.

Elmira, N. Y.—The Eclipse Bicycle Co. reports that hundreds of letters are received at the factory daily concerning the automatic pedal brake it is using on its wheels this season, invented by Superintendent Morrow of the factory. The inquiries include a number from foreign countries.

Fitchburg, Mass.— W. O. Johnson, the youngest son of the late Iver Johnson, founder of the Iver Johnson's Arms & Cycle Works, has recently joined his brothers, Fred I. and J. Lovell, in the management of their vast business interests. Mr. Johnson has acquired a technical education and made a study especially of mechanical construction, which will prove of great advantage to him in his new work.

Northampton, Mass.— Assignee Spaulding, of the Northampton Cycle Co., has been visiting the numerous agencies of that company in several States. He reports the chances are very good for disposing of the various assets of the Warner estate in a way which will be satisfactory to the creditors.

APPLE PARERS.

Since 1864 the making of apple parers has been an important feature of our business; and, as we are constantly looking for improvements, and making use of them, too, our present line, which consists of nine different machines, although not all new, may be said to be the culmination of thirty-four years of practical experience.

The illustration here given represents the WHITE MOUNTAIN PARER, COREER and SLICER. It has been imitated (not once or twice), but never equalled, and is to-day the most durable, substantial and satisfactory low priced Parer, Corer and Slicer for family use; and, we may also say, the one most widely known and used.

We have made it a point to supply every need in the line of apple parers for homes, hotels, restaurants, bakeries and evaporating factories.

Our new machine, THE TURN TABLE "'98" (it pares and knocks off the apple) is meeting with wonderful favor. We verily believe it has more good points to the square inch than than any other parer we ever saw. If you hav'n't seen it, you should. Most jobbers are selling our parers. Catalogue free. . . . . .

Reasons Why it is the Best.

The DOUGHTY Perfection Automatic Bicycle BELL.

Made of best Bell Metal, highly polished and nickel-plated, Anti-rusting The only Automatic Bell always ready for instant use (fast or slow speed.) No loose parts to rattle and get out of order. Does not roll on tire—only press thumb lever on handle bar—throws little rubber tip in contact with spokes—Bell does the rest. The only Bell with a clear electric ring without a battery. You will pronounce it the Perfection in Bell ringing. **Price $1.00 each.**

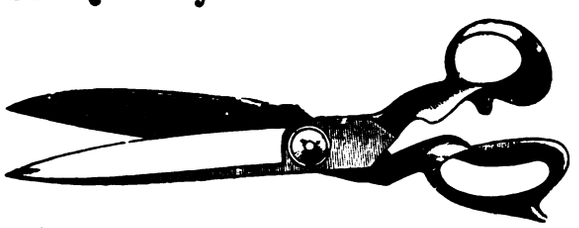
MANUFACTURED BY J. DOUGHTY & CO.,
Pat. Jan. 11, '98. 1025 Arch St., Philadelphia, Pa.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.



We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

THE BURR PATENT
STEEL
Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block.
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of." J. C. DEBES,
Supt. of the C. & G. Cooper Co.,
Mt. Vernon, O.

Adopted by the Penna. R.R. Co.

"EVERYTHING IS COMING UP."
BUSINESS IS BETTER AND THERE WILL BE
A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

IS A GOOD ONE.

Morgan & Wright, Chicago Ill. [*Bicycle Tires*]: There can be no question about the advisability of using the Hardware trade as a means of disposing of bicycles and bicycle parts, and as to the efficiency of HARDWARE, we can only say what we would say in reply to an inquiry from any other publisher, i. e., we have no direct means of knowing whether our "ads" do us good or not. If we insert an "ad," it is on our judgment that the publication is a good one.

IRON ROOF
FOR SALE.

Width of building, 155 feet out to out, divided into a center span 66 feet, with a wing on each side 43 feet 6 inches; total length of the building 350 feet. This building is designed with brick sides and gable walls, with Iron Roof Trusses and Iron Supporting Columns; originally built for an Iron Foundry, but owing to the failure of the purchaser is now offered for sale at a bargain. Is admirably adapted for a Foundry for light or heavy castings, Machine Shop, Car Barn, or for any other general manufacturing purposes. We guarantee the iron work as good as new, building never having been used.

"Bright and Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

HARDWARE

VOL. XVII. JULY 10, 1898. NO. 7

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The extreme warm weather prevailing during the past two weeks, together with the national holiday, and assisted daily by war news of an important character, have made considerable difference in the volume of business transacted in the various trade centres to which Hardware interests are tributary.

The satisfactory business done generally during the season just passed, notwithstanding being handicapped by the war, inspires the merchants and manufacturers with the firm conviction that a fine trade for fall supplies will naturally result, and which will prove to be a full, steady and profitable demand for standard goods and labor-saving specialties.

Business in builders' Hardware has already shown signs of improvement that are gratefully welcomed by the makers of the extremely handsome and artistic products which form the popular features of this advanced industry. The tastes of the consumers engaged in constructing new residences are becoming more and more exacting, and the same is true of the requirements of the architects in the finer details governing their demands. Hardware now plays such an important part in the artistic execution of an architect's plans and designs, that more attention than ever is paid to the general effect in its relation to natural woods which form so large a part of modern architectural development. The natural result follows that dealers are compelled to carry in stock a line of ornamentally designed locks, knobs, butts and escutcheons, possessing a relative harmony in symmetry of design and finish, and creating a distinctive excellence that gives assurance of progress on artistic lines for a long time to come.

The victories of our army and navy at Santiago and Manila have enthused both merchants and manufacturers with hopes of an early fall trade, and preparations are being entertained having in view improvements that will follow the close of hostilities, possibly without the necessity of reducing Havana to a rubbish heap, which is an anticipation of the near future. New enterprises, held in abeyance during the last three months, extensions to present plants contemplated early last spring, but not pushed to completion owing to a slackening demand, will now be progressed under the belief that the greatness of our country will be more manifest than ever before.

The lessening number of failures in business reported by Bradstreets and R. G. Dun, when compared with the same months since 1892, exerts a hopeful influence on trade at the present time, when the tendency toward an extension of credit by dating ahead, is becoming more than usually prevalent, owing to increasing products and aggressive competition.

The Western States, especially those whose prosperity depends upon a profitable market for the cereals they grow so largely, have scarcely felt any of the retarding influences of the present war upon general business, that have been prevalent in the East and along the coast, commencing at the outset of our naval operations and continuing through the season. It is noted that the high-water mark of 1892, when American exports of agricultural products amounted to $799,323,212, is likely to be surpassed in the fiscal year closing June 30th, when it is possible the exports will reach nearly $840,000,000. This will prove to be the first time our exports of agricultural products ever reached $800,000,000, and will show upon comparison to exceed those of the fiscal year of 1897 by $150,000,000, and of 1896 by $250,000,000.

Aim at the Bull's-Eye.

The remark of Fighting Bob Evans of the *Iowa*, at the destruction of Cervera's fleet, that "God and the gunners were on our side," has a wider application than seems apparent at first sight.

It teaches the fact that it is an American characteristic to follow a plan of operations with a straight aim backed by a persistent effort. Satisfied with nothing short of the "bull's-eye," the object at which a practised aim is utilized, the American hammers away until he conquers his opponent and accomplishes his purpose. He realizes the importance of never letting up, if you expect success to crown your efforts.

This is especially true of trade journal advertising. You have before you the combined forces of intelligent buyers in the trade toward whom the gunners should direct their heaviest batteries, energetically, uninterruptedly and forcibly. The aim should be the straightest that an accomplished eye can take; the powder should be the dryest, and consequently the most effective; the shot and shell of persuasive argument, meritorious products and seductive quotations, should be of such a character that complete capitulation may be predicated when the bull's-eye is reached, and the acknowledgment is made that "God and the gunners were on our side."

Southern Industrial Development.

The organization of a new steel company recently that will build a plant at Ensley, Ala., six miles west of Birmingham, possessing a capital stock of $490,000, and authority to issue $1,100,000 of bonds, marks a

Digitized by Google

new era in a part of the country which is destined, if this is successfully established, to become the center of the steel production of the world.

The new company will be known as the Alabama Steel & Shipbuilding Co., and is identified largely with the Tennessee Coal, Iron & Railroad Co., through which it is understood all the stock and bonds have been subscribed.

No industrial undertaking of the year is of comparative importance as bearing on the destinies of the Birmingham district of the South, or that will prove of such value in the development of this section, adding to its present prestige as an iron producing region which is second to none.

The parent company, of which this promises to be the healthy offspring, being fully satisfied with the success attending the production of pig iron suitable for basic open-hearth steel production proposes by the formation of this company to engage in the manufacture of the steel on its own account; and has arrived at this conclusion only after the disposal of fully 150,000 tons of the basic metal in this country and on the Continent of Europe. It is estimated that when the immense plant which is contemplated shall be in full operation, it will have a daily output of 1,000 tons.

A new plant, which will comprise additional blast furnaces, ore mines and limestone quarries, with its coke ovens and coal mines, will necessitate the employment of over 5 000 additional workers; this alone would insure an undoubted success, but when it is considered how many other important industries may be gathered around it, benefited as they would be by the economic advantages of so strong a centralization of force, it would prove of incalculable importance, especially to our export interests, now so carefully fostered and encouraged, making it the grandest step in advance possible to conceive for the section of country sought to be benefited and its influence upon the expanding productions in the fields of Southern industrial development.

An Old New Yorker.

Just opposite Russell & Erwin's, on the City Hall side of Chambers Street, the Consolidated Gas Co.'s men are running a trench. On the afternoon of July 5th, at a depth of about four feet, they unearthed a full complement of those bones that go to make up a well equipped man. As no papers were found on the deceased, opinion is divided as to whether it represented all that was left of one of Russell & Erwin's competitors, or was a litigant in the adjacent courts, worn out by long waiting for a deferred decision.

An old resident, however, suggests that it might be the disturbed remains of a poor old pauper of the last century who was supposedly laid to rest in what was then the "Potter's Field" of our early municipal history. Poor fellow! let us hope he finds a rest in the other world denied to his *disjecta membra* in this.

A Lost Line.

Lost: On or after April 21, 1898, between Maryland and Pennsylvania, one Line, bearing the name of the makers, Mason & Dixon, and used for some years past to divide two parts of our country. It is supposed to have been surreptitiously removed south of Key West, or to have been stolen by the Spanish, to bind a raft on which to get home. No reward will be paid for its return, as its former owners have gone out of the division business.

Some Barbed Wire Points.

A sudden call for 2600 No. 10 King's Pliers by the Army Quartermaster last week required all the available stock in New York City to meet the demand. Smith, Lyon & Field contributed 1800, Russell & Erwin sent 200, and John Wanamaker furnished the remaining 600. These tools are used by Shafter's men in cutting the barbed wire trocha built by the Spaniards across the island, and the largest size plier is necessary.

A barbed wire fence, as an impediment to army movements, does not assume to the layman's mind difficulties of an insuperable character, and yet the trouble which this apparently flimsy fortification has caused, both to our men and to the Cubans, is worth noting. The trocha is simply a fence of the kind we meet every day, made of barbed wire, only a trifle higher, and having more wires. Everyone knows the amount of care and dignity required to climb such a fence, and the undesirability of sitting on it. The difficulty is, of course, increased in proportion to the number of men; so that army evolutions are impossible with a barbed wire fence in the road. History contains no record of the scaling of an embattlement composed of barbed wire. It is, therefore, necessary to cut it, and even then the wire has to be rolled up and carried out of the way or sunk in the nearest water. Altogether, this is a slow and tedious job, accompanied by many an ugly scratch from the barb, and exposing the operators to the enemy's sharpshooters. It would probably take longer to dispose of such a fortification than it would to storm an intrenchment of sand or stone.

The moral of all this is, that while the fighting mind is constantly planning heavier armor for our ships and thicker walls for our forts, together with bigger guns to smash them both, we are, perhaps, overlooking some apparently lesser points (not necessarily barbed wire ones) that would present many more difficulties to the attacker.

English As She is Spoke in Canada.

Among the letters sent out by a Canadian file company, soliciting the home trade on files of their make, the following, in French-English, was received and noted with humorous comments:

Gentlemen: We are presently making the files very good, with temper and tooth sharp. We will make you circular as the alone merchants wholesale on your place, which is the inclose on this paper, if you send us the order or must we hope after inquiring into.

We remain, yours respectfully,

THE FULL MOON FILE CO.

P. S. I will come at your city and make visit on you soon.

Waste Opportunities.

Compelled to be an involuntary listener to a large amount of laudation lavished on a becoming shirt waist "Hop" remarked that it reminded him of the old saying of "Pike speak or bust."

"May be you could handle the subject better," remarked one of the fair damsels, with cutting sarcasm.

"What subject?" asked "Hop."

"Why, shirt waists," said the fair one.

"Not empty," cynically answered "Hop," with unnecessary emphasis.

A Southern jobber was lunching at the Hardware Club, the other day, during his vacation visit to New York, and ordered cold lamb and mint sauce. When the meat was set before him, the jobber looked about, and then called out, "Waiter!"

"Yes, sir."

"Where's the mint?"

"In Philadelphia, sir."

Digitized by Google

JOBBERS, AND THE EXPENSE ACCOUNT.---II.

Are Pursuing This Plan.

Editor Hardware: Referring to the article of Logan, Gregg Hardware Co. as to "How Often Shall Salesmen Call?" would say their ideas coincide with ours exactly; in fact, we are ourselves pursuing this plan.

We find it beneficial in this respect: It encourages more inquiries and voluntary orders, lessens competition and materially decreases the expense account. It is also an aid to collections. For instance, a travelling man calls on a merchant and sells him a bill of goods on sixty days' time; he visits the same merchant again within thirty days and sells him again. He gets around again in thirty days more and solicits another order. The merchant says to the traveling man, "I have just received a statement of my account that is due from your house and I prefer not to buy anything more until I pay the bill that is now due." The traveler in his eagerness to secure orders is inclined to make it appear that his house is in no special hurry for the bill that is due, and smooths the matter over by telling his customer to remit at his convenience, but to be sure to give him an order while he is there, which possibly he does, buying the goods at less than regular prices because they are almost forced on him. When the merchant is again reminded of his past due indebtedness, he says to himself, "Those people are in no special need of their money or they would not have sent a man here to so earnestly solicit my trade when I owe them a past due account."

We think this close traveling by so many traveling men is one cause of so many past due accounts and such short profits, and we believe the hearty cooperation of jobbers along this line would help bring better results.

Yours very truly,

MAGILL HARDWARE CO.

Chattanooga, Tenn. W. T. Magill.

Will Never See Realized.

Editor Hardware: The scheme as presented in the pamphlet referred to in your columns, is in our opinion, one of those Utopian theories which we can write and talk about, and perhaps wish accomplished, but will never see realized.

The limits of any market cannot be set by arbitrary rules or agreements, but are fixed by the natural laws of trade, and by the results of efforts made by the producer or the distributor of merchandise in extending the area to which he desires to sell his wares.

No house with an honorable reputation knowing the trade and its requirements and carrying a stock adapted to the particular section in which it seeks business, will be satisfied with any other restraint upon its efforts than what is imposed by time and distance and expense necessary to conduct its business in territory seemingly not its own.

No buyer will be satisfied to be assigned to any one city, as he claims a right, most naturally, to buy where he sees or believes it most to his interests and according to his own preference.

Who would fix the limits or boundaries to be construed as the sole property for any jobbing point and would not the competition between the several houses in one city in a limited area be just as great as that from many points in a more extended field?

Possibly some of our friends may be induced to believe that the evils of trade are not so great in other lines and be induced to abandon the unpleasant features and hard work attending the Hardware business, but it reminds us of the story concerning the little boy and girl who were both riding the same hobby horse, He says "Sister, if one of us were to get down there would be more room for me." You can apply this anecdote to the trade in any other market which contends for the same customer after whom we are looking.

Yours truly,

Baltimore, Md. CARLIN & FULTON.

About Time to Investigate.

Editor Hardware: "How Often Shall Salesmen Call?"

When a large body of representative Hardware jobbers get together and compare notes as to the per cent. of expense in total business done, and find that amount from five to eight per cent. more than the gross profits on a very large volume of the business done, is it not about time to investigate and see wherein this large expense is incurred?

Unfortunately, I believe there is nothing truer than the old saying "A fool is born every minute," and in the natural course of events some of them get into the jobbing Hardware trade, and as fast as they get out, there is a new one to take his place. That the great expense of doing a jobbing business is our travelers, no one can deny.

A retailer of Hardware, doing a business of —— thousand dollars per annum, will not do a dollar more whether he is waited upon by two travelers a week or twelve travelers a week. He is overfed with commercial men, and in some cases, I regret to say, he does not seem to appreciate the efforts made to educate him up to a plane of "lower prices."

Volumes can be written upon this subject, I would advocate an agreement to the effect that no house should call upon their trade more often than once in sixty days. I believe it better for the retailer, better for the jobber, better for the ("not the order taker") but the salesman.

Yours,

Elmira, N. Y. IRVING D. BOOTH.

A New Belt Dressing.

There has been a growing demand among belt users for a more convenient form of belt dressing than the paste. The Joseph Dixon Crucible Co., Jersey City. N. J., are now placing on the market a solid belt dressing in round bars, about 8 inches long and 2 inches diameter. It makes a package convenient to the hand, and easy to apply even to fast running belts. The company does not claim that the solid dressing is as good a preservative of the life and elasticity of the leather as the Dixon paste, but it is quick to apply and quick to act, and that is what is wanted by the general run of belt users.

McMurray & Co., No. 2415 Ridge Avenue, Philadelphia, Pa., dealers in cutlery, tools, general Hardware and housefurnishing goods, have completed an addition of 38 by 20 feet to their store, which enlargement was made necessary by their increasing business. They will add to their stock a line of glues, oils, varnish and painters' supplies, and would be pleased to receive catalogues and prices from jobbers and manufacturers.

A valued correspondent forwards us the following letter which he recently received, and is here quoted verbatim: "please send me one Smith & weston Pistle by male Registerd letter I will pay you withine Ninty days if you will send it to me one those termes send me one woorth a Bout five dolers & a Box of bolls."

Digitized by Google

Mid-Summer Observations.

Editor Hardware: There was a traveling salesman for a New York Hardware house—we don't say "drummer" any more—up here the other day, and in the course of his conversation, let fall a bit of wisdom that I believe is worth preserving. Said he, "If you want to get a man interested, and to draw him out, talk about something he knows all about."

"Perhaps that's so," I answered cautiously.

"Perhaps! Of course it is. Let me illustrate. I went down home the other day, and found that my uncle, from Philadelphia, was there. 'I don't believe he has a tongue in his head,' said my mother. 'He never has a word to say, but sits about as glum as a funeral.' 'What's his business?' said I. 'What has he done all his life?' 'Nothing but make bricks.'

"With that, I set out to open the old man up. We took a walk. I turned the conversation around to bricks, and aired a choice lot of misinformation. Uncle looked dazed, and then grew interested. He began on the brick question, and as we walked on, he grew eloquent. He told me more about bricks than you could find in all the books; he piled up information of various forms; he went into the history of brick making from Babel to United States; he oozed statistics. He kept it up all the while I was there, and would come up to my room at night to talk bricks. Yes, it's a good plan—but it can be overdone!"

This Spanish war is responsible for a lot of blanked foolishness, one way and another. Every man who comes into my store must unload or burst. Says one: "Hello, Oldman, remember the rebellion?"

"Yes."

"Forget it, and remember the Maine!"

Says another: "Do you know why they have ordered Sampson's fleet north?"

"I don't."

"Too expensive to keep it in Florida water."

The next idiot shouts: "Heard how they intend to bottle up the Spanish fleet?"

"I have not."

"On the Schley!"

Only an hour ago there was a salesman for a rubber house in here, and this is the way he introduced himself:

"Say, Oldman, heard the latest about Dewey?"

"I hope so."

"Well, you want to hear this:

"They say that Dewey is a dude.
Well, if the story's true,
What glorious deeds, when duty calls,
A Yankee dude'll do!"

He claimed that this was original with himself, but I knew he was lying.

Then he went on in his reckless way: "Too bad they have relieved Schley of his command."

"Is that so?" asked old Haines, from the top of the nail keg, "what for?"

"For bottling without a license, in Santiago harbor."

The latest one was sprung on me by our postmaster.

"If we cut up DeLome and Weyler," he asked, "what do we have?"

"Fresh Spaniard."

"Nit. We have De Wey. See?"

I know a Hardware manufacturing concern which numbers among its members a Bishop, a Parsons, a Dean and a Prior. This accounts, perhaps, for the high business morality which is accounted one of the company's most precious assets. A. N Oldman.

There are 2300 miles of telegraph line in the island of Cuba, with 153 offices.—*Ex.*

Recent Trade Publications.

Barron, Boyle & Co., Nos. 128–130 W. Court Street, Cincinnati, Ohio, have recently published a very useful pamphlet under the name of a "Net Window Glass Price List," based on the official list of window glass adopted this year, and showing every size of glass figured in various discounts, in single lights or whole boxes, all of A quality. It enables the dealer to mark the discount showing price desired to be used for sales at retail; and also to make the discount for contractors or similar larger buyers. This insures a uniform selling price for every salesman in a store without the necessity for making any difficult calculations, any one of which may be susceptible of error. In its compilation, when several lights have the same list price only the largest is given. The figuring in the book it is claimed is absolutely correct, and the pamphlet is copyrighted to prevent any infringement. It is certainly a very useful publication, is bound in stiff manila covers, having leather backs to ensure preservation, and is sold at 50 cents per copy, with a discount allowed when sold in lots of three or more.

In this age of fancy catalogues, where too often the real information is hidden away amid literary and artistic embellishments, the latest "little business book" of the Union Metallic Cartridge Co. is exceedingly acceptable. In these stirring times this company fills a position of stern need to the Government, and this concise, though complete catalogue, is symbolic of its high standing and excellent methods. It is far from being exclusively a description of munitions of war, however. U. M. C. Loaded and Paper Shells, which have increased so rapidly in popular favor, among shooters of every description, occupy an important place. Cartridges of every kind are so catalogued and classified that each variety can readily be found, even by the uninitiated. Among the new goods are: Grease Proof and Smokeless Card Wads, of improved material, for use over nitro powders. Smokeless powder cartridges in a larger variety of calibres and styles. This exhaustive little book will be mailed to any address upon application to the New York office of the Union Metallic Cartridge Co., No. 313 Broadway, New York.

The Cincinnati Screw & Tap Co., Cincinnati, Ohio, have recently issued their catalogue No. 7, to encourage the distribution of which, among the dealers handling specialties similar to their well known production, they have mailed, stitched together, a number of specimen pages showing in great variety their large line of goods. On the first page of these leaflets they print the following notice: "Catalogue No. 7 is ready for you, write for one. We send it to you free of all costs. Our expense complete, mailed, is 25 cents. We want you to have a copy, and all we ask of you is to write for one. These circulars illustrate the variety of goods you can buy from us. All goods are as represented, and will be invoiced at prices ruling on day of receipt of order, and will be as low in price as is consistent with first-class goods."

The Anthony Wayne Mfg. Co., Fort Wayne, Ind., and St. Louis, Mo., have issued a comprehensive catalogue of their washing machines, tanks and syphons, self-measuring oil pumps, etc. It gives full illustrations and descriptions of the various articles manufactured by them, special attention being called to their new patent malleable iron pinwheel, used in their washing machines, an illustration of which appears elsewhere in this issue. This catalogue will be sent on application.

A grocer and a Hardwareman at Albia, Iowa, are waging war. The grocer gives away a step-ladder with every pound of baking powder bought, and the Hardwareman gives away a pound of baking powder with every step-ladder bought.—*Caxton Caveat.*

LAWS, CUSTOMS AND IDEALS OF BUSINESS.

It is a privilege, highly esteemed, to meet and greet this Association, organized, equipped and conducted for the advancement of trade and the higher principles of business. The pleasure with which I address you is augmented by the realization of that splendid commercial record which, as Southern business men, you have made during the last quarter of a century. With constant admiration and gratification has America noted your perseverance, enterprise and capacity as difficulties have been surmounted one by one, and that astonishing and magnificent reconstruction conducted with ever-increasing zeal and achievements. The West has had its record of development and growth that indeed has been wonderful, but the course of progress in that section of our Republic has been constant and uninterrupted. The record of the South has been more phenomenal still, because with indomitable pluck, discouragement has been overcome, paralysis conquered and entirely new conditions created upon the ruins of the old. No wonder that the world stands in awe of such a marvelous exhibition of development and power. With a country whose commercial prosperity is restricted to no one territory and to no one industry, with democracy as the ruling spirit, and freedom the battle cry, with a patriotism firing every heart and pulsating through every fibre of national life, with resources that know no end, a power irresistible, and a will that ever conquers, it is not surprising that the governments of the world are seeking to clasp our hand in friendly alliance.

Amid our strength and our prosperity, it is wise, sometimes, to inquire the source of our power; to examine the component parts that create the gratifying whole, and to test and strengthen every link in order to withstand the ever-growing strain.

America's greatness lies largely in her commercial industry. Her natural resources are wonderful, but her genius to develop is greater. Her population is enormous, but her ability to employ is still vaster. Her trade is prodigious, but her skill to supply is equal to more exacting demands. Commerce has been the foundation stone upon which has rested our national power, and upon which still vaster greatness is to be built. If our foundation stone is commerce, the superstructure is credit. If commerce is the source of our strength, credit is its consummating medium. To such an infinitesimal degree does money enter into trade that it might be said with seeming propriety that our entire business intercourse rests upon credit. Shake credit and you upset the wheels of industry, and make stagnant commerce. We have passed through one political campaign devoted to money. Our next should be devoted to credit.

* * * * * * * *

Equally as important to the proper protection of business as just and efficacious laws is established principles of credit and advanced system for their execution. There can be no question but what unintelligent and indiscriminate credit is injurious alike to the morals of the people and the stability of trade. Hitherto there has been too little attention given to the philosophy of credit, and consequently we have suffered from the application of unknown laws. You cannot expect an inherently dishonest man to be just in all his transactions. It is ridiculous to anticipate a man without the slightest grain of experience to enter into a complex business and be successful. It is impracticable to believe that five thousand dollars capital will conduct an enterprise of one hundred thousand dollars annual business. It is unsafe to sell a man who declines to keep books and to intelligently comprehend his condition. While these are recognized facts, they are continually unobserved to the financial loss of creditors, the injury of the local trade and the demoralizing of business generally. Every failure exercises a certain percentage of damage to business conditions. In ordinary times that percentage is scarcely recognized, but when the percentage rises above a certain degree a panic is apparent and the wheels of industry are clogged. A closer observance of the cardinal principles of credit would regulate and restrain failures within reasonable bounds. Experience has taught us that in credit as in insurance it is practical to establish a "Mortality Table."

If I were asked to name the first important basis for credit, I should say Character. A short time since, Mr. James G. Cannon, vice-president of the Fourth National Bank of New York, and president of the National Association of Credit Men, said, in an address, that the three component parts of credit are Character, Capacity and Capital—these three, but the greatest of these is Character. Absolutely true! Capital may be borrowed or stolen. Character, never. Character is the inherent quality which recognizes and enforces the right. What our business world needs now, and always, is men—in that broader and more significant sense in which man means all that is honorable and noble. Our ranks of commerce are far too crowded with individuals who seek opportunities for financial aggrandizement that cannot be approved by the law of ethics or morals. The last few years of commercial depression have witnessed thousands of unnecessary failures, which have occurred simply because the opportunity was propitious for their perpetrators to profit by a transaction that the condition of the times would palliate and make reasonable. Business is a most honorable occupation, and America proudly boasts, not in her lords and dukes, but in her business men; not in her castles and palaces, but in her commercial institutions. Most jealously, therefore, should we guard the ranks of business from being entered by the irresponsible and corrupt, in order that we may protect the honor and integrity of our calling. Every failure having about it the slightest taint of irregularity and dishonesty should serve as the motive for the retirement of the perpetrator. We have been too lenient in dealing with such transactions in the past.

* * * * * * * *

In the second place, I assert that credit should be largely dependent upon the financial condition of the application for such accommodation. This knowledge should be accurate and detailed. Estimation and gossip are not reliable sources of information. A debtor is the only one who can best indicate his own financial condition. As an applicant for credit it is only equitable and reasonable that he should make a detailed statement of his affairs, and as a bestower of credit it is only business-like that you should demand this information. We are rapidly forsaking the position so long and tenaciously held that a request for information was a reflection upon a merchant, and as such was equivalent to an insult, which any debtor should rightfully resent. A better conception of the relationship between debtor and creditor is gradually taking place. Sentiment is giving way to the logical law of business. Goods are now considered

* From an address delivered June 16, 1898, at Old Point Comfort, Va., before the Southern Hardware Jobbers' Association by F. R. Boocock, Secretary of the National Association of Credit Men.

Digitized by Google

as money, which, parted with upon credit, is equivalent to the investment of capital with the party trusted. This is a partnership relation in which the prosperity of the business is the investors' concern.

After character, a detailed property statement is rapidly becoming the true basis of credit. Educational work among retailers, as well as the practice of progressive wholesale houses, is popularizing statement asking and giving. Uniformity in statement blanks, as being agitated by the National Association of Credit Men, is certain to enlarge and clarify this conception. The custom of many houses to decline credit in the absence of a detailed statement has done much to establish this principle of credit. Many concerns decline, also, to grant extensions, without a detailed showing of debtor's affairs. Very rapidly are we advancing to that point when only bankrupts and those dishonestly inclined will hesitate to give a statement to those so entitled. A cardinal principle, to be effective and respected, must be reasonable, equitable and sound. Such is the principle that "Trade depends upon credit, and credit upon confidence. Credit cannot exist where there is doubt. By stating facts, doubt is removed. By removing doubt, confidence is established. By establishing confidence, credit is secured." The exaction of statements from customers is reasonable and beneficial.

Having once opened an account, it is business like to insist upon a complete and ready observance of your terms of sale. There is far too much fickleness displayed in the treatment of open accounts. A note is respected and honored; an open account, seldom. Goods are sold on thirty days' time; payment is made at the option of the debtor. The length of your patience is frequently the duration period of an account. This condition has been established because of the carelessness and permissiveness of creditors. Business houses have been too diffident in enforcing their rights, thus creating a custom that trespasses upon business ethics.

What is the remedy for this evil, and what the accepted medium for dealing with modern conditions? Simply a more careful observance of the functions and mission of the credit department. An intelligent, conservative, affable, conscientious and capable credit man is a valuable adjunct of any business. But a credit man without a liberal allowance for the maintenance and proper equipment of his department is a mistaken policy. A credit man without freedom of action will measure his failure by the amount of the interference with which he is afflicted. No credit man should be asked to assume the responsibility of his office, and be subject to the caprice and decision of others. No department of a business must be so absolutely free from dictation as that devoted to credit. A credit man must be given sole jurisdiction over his department. His record will attest his capability. If unsuccessful he will willingly submit to the consequences, but to achieve good results he must be free to follow his impressions, and to execute his decisions. Given such authority he will save the expense of his department several times over during the course of the year.

Correct methods in the credit department must be recognized and observed. Suitable cabinets for filing purposes, and a convenient and methodical record of every account is imperative. Proper channels for gleaning information must be provided and ready mediums of action established. No competent credit man will permit an account to escape his constant vigilance after becoming due until paid. Promptness in collections will oftentimes regulate the volume of business that is transacted. A customer whose account is paid is more ready to order than one whose account is past due. Prompt collections is the most modern method of business building. Houses seldom lose desirable trade by courteously insisting upon a strict observance of their terms of sale. Those who are lenient suffer most from their own customers, as well as from the undesirable patronage which the independency and business principles of other houses have driven to make purchases elsewhere.

An advanced credit man will never permit a desirable account to grow stagnant for lack of activity in purchases. It is as much the prerogative of the credit man to sustain and magnify patronage as it is to check orders. His thoroughness, which is one of the characteristics of a good credit man, will evolve that system which will immediately record a drop in purchases by any customer below the ordinary amount, while his constant aim will be to stimulate salesmen to greater efforts along such channels as to increase the volume of trade. Unfortunately many people imagine that the work of the credit department is constantly defensive, and that its influence is destructive. This is absolutely incorrect. The credit department should be offensive and creative.

The credit man should be in constant touch with salesmen, and such a confidential relationship should be established that the interest of one should become the interest of the other. The credit man should continually advise the salesmen when and where to push for business and by many methods within his grasp endeavor to increase the salesmen's trade. The salesmen in return will endeavor in every way within their power to save the credit man a loss.

No credit man should attempt for a single moment to exclusively rely upon his own conceptions and experience. The aggregate trade know infinitely more than any one individual. A policy of fraternity between competing credit men is mutually advantageous. Of course, if any house is pursuing a system of "Preferences" they very naturally will decline to entertain cordial relations with the "trade," and the "trade" with them. Nothing so clearly creates isolation as selfishness. The trend of the world's thought is towards co-operation rather than individualism. This is encouraged by the general experience that the "preference" practice is inimicable to commercial stability. Insist upon all sharing alike in case of misfortune, and there will not be so many impulsive actions forcing debtors into bankruptcy. On the contrary, every device will be exhausted to save the debtor, the assets and the account.

The best thought of the best minds is being devoted to the creation of that condition when honest failures will be unnecessary and dishonest ones so dangerous as to scarcely warrant the risk. Why should an honest man fail? At present largely because of the jealousy and fear which his creditors entertain of each other, and which results the minute a debtor gets in tight circumstances in a shrewd competition as to which one will be the first to secure an attachment and secure his claim. The conditions which operate in bringing about that state of the debtor's affairs which call for surgical operation of his creditors, are mainly of three characters: Lack of capacity, lack of capital or lack of patronage. In the first case it is possible to find a competent manager to save the business; in the second case, capital can be supplied; in the third case, a change of policy or location can be effected. A proper spirit of co-operation existing among creditors, and a conscientious desire to be fair on the part of the debtor, is all that is essential to save our records from numerous failures.

Faith, says Mr. Moody, is the foundation for business. It is an essential asset to every bank and mercantile house in existence. Many a thriving business and successful enterprise has been carried in through dark days of reverse on no other capital; and without such capital the markets of the world would soon come to a standstill. I have known men whose ruin has been brought about by some little insinuation relative to their credit—the business equivalent for trustworthiness. The loss of public faith has brought the darkest reverses to the richest of corporations, and even nations have felt the ruin which it entails.—*Ironmongery.*

AN APPLICATION FOR A POSITION.

Many a man wonders why his repeated efforts at securing an advertised position meet with no results. Notwithstanding the fact that his experience is comprehensive, and his references of the best, his letters go unnoticed, until he becomes thoroughly disheartened and disgusted; and resolves to confine his future efforts to personal application. He concludes, in his misanthropy, that the whole postal service is arrayed against him to delay his letters until the advertiser has already filled the position; that his luck is bad; that the number of men out of work, and consequently doing the same as he is, swells the number of letters to such an extent that the chances are one in a thousand of his own letter ever being read. In fact, he imagines that every hand is turned against him, and that all things conspire to thwart his efforts.

This is a mistake. While there is no question about there being many applications for advertised positions, which only one man can get, there is no good reason why in nine cases out of ten, an applicant should not get his letter read, and thus equal his chances with the best; providing of course that his qualifications are of the first order.

What is absolutely necessary in a written application, and, we may add, what is usually lacking, is distinctiveness—something to make it stand out by itself; some feature that will impress the employer-to-be with its sincerity, its merit, or its originality. We once knew a man whose fertility in expedient to secure a position was equalled only by his ability to lose his "job." This man wrote his application, setting forth his many virtues, wrapped the letter up carefully in tissue paper, put it in a box, and directed it to the advertiser; marking it personal. This doubtless achieved its object, and secured a hearing on account of its originality. Whether it bore fruit or not is another question; as it is more than likely that the prospective employer, expecting to find a 3kt. diamond or some other little memento from an admiring acquaintance, and finding only a request for employment, would get mad and consign the whole outfit to the waste paper basket.

However, the applicant was on the right track. He desired that his case should be sure of attention; and sought to ensure this by making it stand out in sharp contrast from the bulk of other letters. His error lay in using false pretences.

As an example of neatness, comprehensiveness, and general excellence, we reproduce herewith, an application recently received by a Chambers Street house, New York. The position advertised was that of a factory superintendent; and the only reason of the failure of Mr. Brown to secure the position was that his letter arrived too late. This was, perhaps, due to the care and time expended in drawing up the original; but as he can have copies of it made and kept ready, he may reasonably hope for better luck next time. The application was as follows:

FULL NAME OF APPLICANT: William Brown.

ADDRESS IN FULL: Room 6, No. 800 West 23d Street, Chicago. Ill.

AGE: 27 years.

BIRTHPLACE: Chicago.

AGE QUIT SCHOOL: Quit school at my sixteenth year, after putting in one year at high school. For two terms of ten months each I pursued the study of mechanical drawing, physics and higher mathematics at night classes of Chicago Athenaeum. Third year after leaving school I took a business course, including bookkeeping and commercial law, at Metropolitan Business College.

WHAT LANGUAGES DO YOU SPEAK? English, German and French.

ARE YOU A COMPETENT BOOKKEEPER? Yes.

FIRST WORK, SECOND WORK, AND SO ON, STATING NATURE OF WORK. (More detail the better.) First work was at the bench and lathe in model-making shop, where I remained for two years, learning the trade of model maker and machinist.

Second work; was employed as draughtsman, and later designed special machinery.

Third; was given the correspondence to attend to.

Fourth; owing to ill health of employer took management of business for two years.

Fifth; after decease of employer I purchased his business and have conducted the same ever since.

Work in latter years consisted in making contracts, soliciting and attending to financial ends, as well as the endless number of things devolving on a proprietor.

CAPACITY AND LIKING FOR SAME IN EACH PLACE: In construction department, during my experience, I preferred superintending and erection; while in the business department, selling and purchasing was my preference.

SALARY AND REASONS FOR CHANGING: Two thousand, and away from Chicago $2500. Field too small and not permitting of sufficient expansion in business.

PRESENT OCCUPATION: Managing establishment for manufacture of models and light machinery.

PREFERRED LINES OF WORK: To represent a responsible house either in Chicago or elsewhere.

PREFERRED RESIDENCE: Chicago.

MARRIED: Not yet.

PREFERRED RECREATIONS: In summer, excursions in the country; horse-back riding and occasional visits to the German summer gardens; while during the winter I attend theatres and lectures.

SOCIAL ATTAINMENTS, MUSICAL, ETC., RELIGIOUS: Owing to clo er attention to matters of a sterner nature my social attainments are not as extensive as they would otherwise be. Have, however, a large circle of acquaintances in Chicago, although I am not a member of any lodge or club now.

Musical; Execute on the violin, having spent some four years studying on that instrument while attending school.

Religious: Was educated in the Lutheran faith and am still a member of the same church.

KIND OF READING DONE: Daily papers, and look through a scientific paper and a number of trade journals. Selected articles in the magazines, some of the popular books of the day and the standard works in literature and authentic writing on all subjects.

KIND PREFERRED: Romantic, scientific, historical, philosophical. Being broad-minded I enjoy books in all the above classes and change to break the sameness.

READING ANYTHING NOW: WHAT? Just finished a history of Richard III, and am now reading Hugh Wynne by Mitchell.

LIKE ARITHMETIC OR STATISTICAL WORK: Prefer statistical work.

EXTENT OF TRAVEL: HOW FAR EAST, SOUTH, WEST, NORTH? In the States have traveled East to New York, South to Virginia and Kentucky, West to Colorado and New Mexico, and North to Wisconsin and Michigan. Have spent nearly eight months in foreign travel; covering the Isles and all places of interest in Europe excep'ing Russia; extending as far South as Turkey and Greece; touching Smyrna in Asia and going 850 miles up the Nile; a cru se on the Mediterranean, and departing from Gibraltar.

NAMES AND REFERENCES OTHER THAN FORMER EMPLOYERS AND RELATIONS: Wm. A. Harding, Esq., of the Harding Harvester Works; John I Burwen, of Burwen Bros. Banking Co.; J. R. Bruce, of the Bruce Bridge & Iron Works; H. L. Brackett, of Brackett, Comstock & Co., attorneys; all of Chicago.

HEIGHT: 5 feet, 11 inches.

WEIGHT: 160 pounds.

ANY DEFECT IN SIGHT, HEARING, SPEECH OR LIMB? No.

IS YOUR HEALTH GOOD? Yes.

The whole statement occupied two sheets of foolscap—one side only being used—and was neatly typewritten. Each heading with its information was a paragraph by itself; and the whole seems to answer every possible question which would suggest itself, and even some that one

Digitized by Google

might hesitate to ask. It is graphic, and shows that the bump of order or system is thoroughly developed. The impression is made that this same sense of system would be rigidly applied to any duties entrusted to the applicant; and that the smallest detail would receive its due attention. This in its turn inspires confidence; and having gained these points, the problem resolves itself into a question of comparative merit—a test to which every fair minded man is willing and anxious to submit.

Buildings With Glass Sides.

In the designing and building of modern manufacturing plants one of the most important questions to be considered is the lighting of the interior of the building. Manufacturing plants at the present time are located, generally speaking, in large cities or at least in regions where the population is somewhat dense, so that a great deal of loss is experienced by the owners on account of the help watching people passing by, or by occurrences taking place in the adjoining streets. On the other hand, the importance of thoroughly lighting the interior of a shop is so great that this fact takes precedence over all others. Why not combine the two? Why not have a well lighted interior and at the same time have the sides of the building so constructed that the employees are unable to have their attention attracted by what

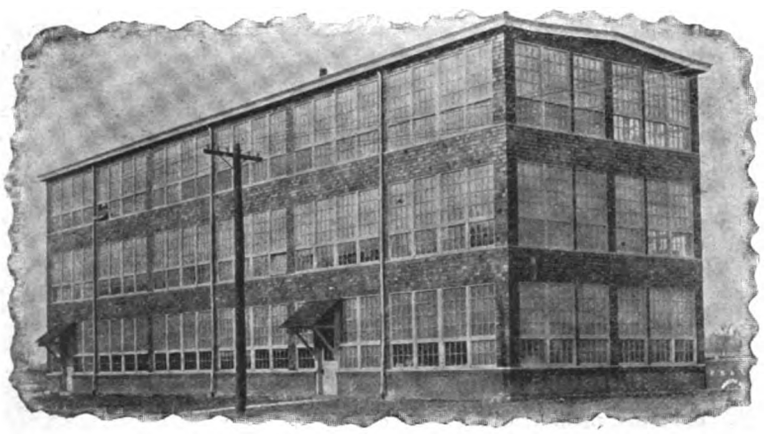

FIG. 1.

is taking place in the surrounding streets? We illustrate herewith a machine shop designed and built by the Berlin Iron Bridge Co., East Berlin, Conn., for the Veeder Mfg. Co., Hartford, Conn. The Veeder Mfg. Co. are noted for the excellence of the Veeder cyclometer. The mechanism of these cylometers is very fine and in the different processes of manufacture it requires the best of light in carrying on the various operations. The business of the Veeder Mfg. Co. being largely on the increase, they decided to build an entirely new plant, and the illustrations herewith show their new machine shop both externally and internally.

The first illustration shows the exterior of the building, which is of a somewhat novel construction. The supporting framework is entirely of steel, the greater portion of the construction being steel and glass. It is three stories in height, the exterior presenting a very ornamental appearance from the unique character of the construction. It is 30 feet in width, 110 feet in length, the three floors giving nearly 10,000 square feet of floor surface, every inch of which, owing to the well diffused light in the interior of the building, can be occupied with manufacturing purposes.

Fig. 2 shows the interior of this building, the photograph from which this illustration was made being taken in the second floor showing the supporting girders of the third floor above and the truss work forming the supporting girders for the sides of the building. The interior is heated by hot air forced into the interior of the building from an adjoining boiler room by means of ducts located and made a part of the supporting columns of the building. This peculiar feature of the building was designed by C. H. Veeder, the president of the company, and adopted by the Berlin Iron Bridge Co. in their design.

Particular notice is called to the sides of the building

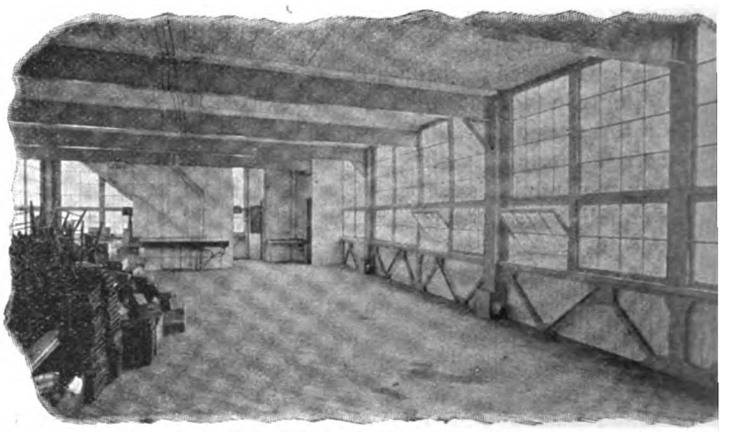

FIG. 2.

which are made almost entirely of glass, but arranged in sections so that they can be easily opened and closed, thus securing plenty of fresh air. A great many people have an idea if the sides of a building are made of glass that the nterior in warm weather will be insufferably hot the same as a greenhouse. The facts of the case are exactly opposite. Owing to the superior ventilation secured by means of every other panel of the glass swinging on a center pivot, perfect ventilation may be secured, and thus instead of being exceedingly hot in warm weather it is extraordinarily cool, and pure clean air from the outside is furnished for the workmen.

Fig. 3 is also taken from a photograph and shows the interior of the upper floor of the building. This floor is entirely clear of columns, the roof trusses being of sufficient capacity to support not only the roof loads but also to carry the shafting, pulleys, hangers, etc. Particular attention is again called to the lighting of the interior of this portion of the building. A large amount of glass admits and diffuses the light so thoroughly in and through the interior of the building that the very fine work of the Veeder cyclometers can be carried on in the center of the

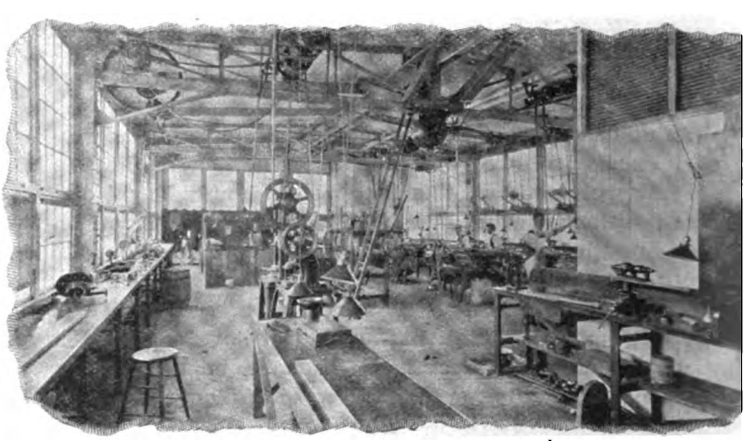

FIG. 3.

building as well as on the outside. The building is a credit to the designers, the Berlin Iron Bridge Co., to whom we are indebted for the illustrations.

The irony of Fate reached its height when our war vessels blockaded Santiago De Cuba, clad in a sheathing of steel which had but recently been taken from that vicinity in the shape of iron ore.

ONE OF UNCLE SAM'S NAVY YARDS.

A visit to a navy yard in these piping times of war, is likely to be attended by a rapid succession of sensations, particularly if the visitor be a man of peace.

There is a vague something in the makeup of American character, that seeks to sink—or rise—to the level of a plain citizen. This extends even to our soldiers and sailors, and is responsible for the fact that we see little or nothing of the gay apparel of war, except on an occasional parade, or the dedication of some public monument.

Imagine, then, the startling transition after a trolley ride through the streets of Brooklyn, to suddenly find oneself halted by a fierce-looking sentry, armed for business, and alert for anything suspicious, and made to give a reasonable excuse, for one's visit to "Your Uncle's" workshops.

"Three blocks ahead, and two to your left," are the directions, and as *Hardware's* representative started onward, there was a strong impression made by the meeting of armed sentries everywhere, that he had best count those blocks carefully and avoid mistakes, lest the inability to explain his presence on some forbidden ground might lead to a scare head account in the yellow journals of the capture of a supposed Spanish spy, accompanied with a faithful cut of the prisoner. This impression was fortunately transitory, and was succeeded by a lively interest in the conduct and plan of so large an establishment.

The grounds occupy about a mile of the river front in the form of a crescent, around Wallabout Bay, and are shut off from the land side by a high wall on the south, and an iron fence on the east. They are divided by regular streets, those running north and south being indicated numerically, while the cross streets are named after various prominent figures of our naval history, such as Warrington, Farragut, Decatur and others.

Fronting on these streets are numerous capacious storehouses and workshops. In the former are to be found tier upon tier of almost every description of article used in the makeup of a modern war vessel, or required for the equipment and maintenance of the crew. A constant stream of trucks is adding to what appears already like an inexhaustible supply. A question as to what articles were supplied by the Hardware trade elicited the laughing reply that the navy used everything that was used ashore, and a heap of things that could be used only afloat; in all, about 15,000 different articles were on the list.

A cruise through the storehouses emphasized the statement. In one is found the stock of a well equipped lumber firm, in another is enough iron and steel in all forms to start a shipyard, in a third are to be found in endless quantities, all the parts and fittings of the different varieties of engines used on the many types of vessels, and so on through the stores—manila rope, steel cable, iron chain, bolts and nuts, tools of all descriptions, agate ware, ammunition, guns, small and large; clothing supplies for the men, and canvas for hammocks; in fact, almost everything to be found in the stores of a large city.

In the workshops, the buzz of saws and the ring of hammers tell their own story of the rush of work made necessary by the war. There is a popular impression among civilians that to work for the government is to take life easy, yet one finds no loiterers here. Every man is working, and working hard. The public spirit of enthusiasm seems to have entered his soul; and he feels that in fashioning a ventilator or welding an anchor chain, he is doing his part against his country's enemies. But despite the rush, no work is carelessly accomplished. All must pass inspection and come up to the standard. What may appear an unimportant detail, may, by careless workmanship, lose the lives of a hundred men at the crucial moment.

From the docks, comes the tap-tap of hundreds of hammers on the steel sides of the vessels lying there. First in importance is the cruiser *Columbia*, whose recent collision made a visit to the yard necessary. The ominous muzzle of a 6-inch rapid firing gun shows through an open port, while a number of 6 and 4 pounders, as well as smaller machine guns, intimate that she has good teeth as well as clean heels. Next come the protected cruisers *Chicago*, *Atlanta* and *Topeka*, each of which is being overhauled, and will soon be out scouting the northern coasts. In addition to these fighters, there are a number of small yachts recently acquired by the government on account of their speed, and destined for use in the mosquito fleet as soon as the necessary changes can be made. Hundreds of men are employed in this work, laying plates, laying and caulking decks, scraping, painting, loading supplies, passing coal, and hurrying here and there like the inhabitants of a vast human ant hill.

Before leaving, a visit to a small circular plot of ground near the western side, is worth making. Enclosed in a small circle by a low chain fence, are a number of cannon taken from differant enemies at various times. Chief among them are a number of guns taken from the British frigate *Macedonian* by the gallant Decatur on the U. S. S. *United States*, Oct. 25th, 1812. The prize was towed to New York and dismantled. A small boat howitzer and a yacht gun are relics of blockade runners during the civil war, while in the centre of the plot stands the wrought iron 12 inch gun "Peacemaker," made in 1834, with a sample of steel plates pierced by her shot. Near this enclosure, standing by itself, is the ram of the Confederate ship *Mississippi*. This massive piece of iron is shaped like a V, the point being about eight inches in thickness and four feet in height, while the arms run back about twelve feet, and vary in thickness from about three feet at the point of contact with the vessel's bow, to six or seven inches at the ends.

Altogether the visit is interesting from first to last, and will do more than any argument to dispel the idea that the government motions are slow and cumbersome. It is merely the dignity of enormous transactions that sometimes excites the ire of the layman to protest that things would be different if he had the running of them.

A New Heated Term.

We have a little four year old tot at our boarding house named Teddie, who daily enlivens his parents with some original speech or other, with which of course the boarders are regaled at meal times; the latest, was listened to this morning at breakfast. A local pain made the application of a hot water bag desirable and when it began to cool, Teddie said:

"Papa, won't you 'hotten' this up again?"

"And did you?" asked "Hop."

"Certainly," the happy father made reply.

"Well, don't keep it up," said "Hop," "or you'll make a 'hotten' tot of that cherub."

To run a bill is not so bad,
But when the thing comes due,
Oh, me, Oh, my! it's very sad
To have it chasing you.—*L. A. W. Bulletin.*

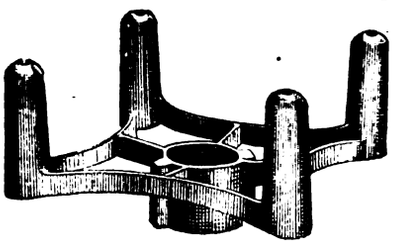
NEW GOODS AND SPECIALTIES.

Warren's Patent Hardware Cabinets.

The engraving herewith represents the Warren system of Hardware Cabinets, manufactured by the J. D. Warren Mfg. Co., Nos. 152–158 Lake Street, Chicago, showing cases drawn out from cabinet and packed on floor of the storeroom in order to illustrate more comprehensively their capacity for holding goods. The drawers as shown were taken from a cabinet 8½ feet in length and less than 8 feet high, so it will be seen at a glance that the space inside is well utilized. These compartments are made in different sizes for holding various kinds of Hardware specialties, such as bolts and nuts, screws, awls, locks, augers and bits, and all articles entering into the Hardware store. A careful study of the illustration herewith will enable the Hardware dealer to form a correct idea of the principle upon which both large and small stores are equipped with the Warren system of shelving.



New Rotary Gear for Washing Machines

The Anthony Wayne Mfg. Co., Fort Wayne, Ind., and St. Louis, Mo., have just completed and are now ready to place on the market, their New Rotary Gear for Washing Machines, which is so arranged, that by a continuous motion of the balance of the wheel in one direction, the dasher inside will reverse and rotate in opposite directions. The same is on all styles of Western Washers, operated by a hand lever movement. The advantages claimed for this

Digitized by Google

gearing over the old lever movement are that "the same will work so much easier, that it is no hardship for any woman to operate the same," and the manufacturers even claim that a child twelve years old can work this machine with ease. The balance wheel weighing seven-

teen pounds, is referred to as being of material assistance, causing the gearing to turn easily. The gearing can be placed on both round or square machines, and is fitted up completely at the factory. All that is necessary is to fasten the same with four bolts to the lid, attach the fly wheel to the shaft and the machine is ready for operation. It is very simple and compact and cannot be thrown out of order or broken by common usage. The company say:

"All of our Rotary Washers are fitted up with a galvanized iron post and enameled pin wheel, the greatest improvement over the old style wood pin wheel ever made, for as the pins are cast into the spider of wheel, they cannot drop out, and the wheel being of iron it will not split, and being enameled it is as smooth as glass and cannot possibly injure the clothes." It is also claimed that "this wheel will do better work than a wooden wheel, for on account of its

weight, it will always come in contact with and engage the clothes whether the machine is full or only partly filled. This is not the case with the wood wheel, which will always swim on top and will not wash unless the machine is well filled."

Hadn't Thawed Out.

They are telling a story now on a well known Hardwareman of Minneapolis. He is a thorough business man and very successful, but is somewhat inclined to coolness of manner. The other day a Hardware salesman called on him and opened up a stock of thermometers. The atmosphere in the office became very frigid and the salesman went away without having effected a sale. On his way South he stopped in Chicago and called on one of the leading jobbers there to see if he would not have better luck with the thermometers. Having talked with the jobber a few minutes, he opened his stock of samples. The jobber took one look, buttoned up his coat and rang for the janitor to turn on more steam. "Say," he said to the salesman, "this is a pretty cold day, isn't it?" and reached for his hat. "Why, I don't know," the traveling man replied. Then he bethought himself to look at the thermometers and a great light broke in upon him. "Look here," he cried, as the jobber was just putting on his overcoat, "the last time I had these thermometers out I showed them to Mr. ——, of Minneapolis, and the blame things haven't thawed out yet!"—*Stoves and Hardware Reporter.*

Micrometrical Mechanism.

The perfection to which micrometrical mechanism and the result of their industrial application are now brought is illustrated in a remarkable degree in the production of certain descriptions of woven wire gauge and cloth, some of these being made with meshes so infinitesimal as to number 40,000 of the latter to a single square inch. The most delicate classes of wire—those which stand related to scientific instruments—are of such fineness as to render their measurement a matter of difficulty; this task, however, has been made practicable, and platinum wire has been drawn one seven-thousandth of an inch and to even greater fineness. Aluminum wire, too, has been drawn as fine as 10,500 yards to the ounce, a size too fine to be measured practically by any gauge or instrument. Iron has also been so attenuated that over two and one-half miles in length weighed only one ounce; but still a more remarkable instance of this class of mechanical manipulation is the drawing of twenty-four grains of gold on a silver wire to 120 miles.—*The Paper Mill.*

In the advertisement of Cushman & Denison, No. 159 Ninth Avenue, New York, in this issue, a new illustration of the "Perfect" Pocket Oiler gives a sectional view of the automatic action and demonstrates how the oiler is kept neat and clean. From this it may be seen how the flow of oil is regulated by each depression of the tip, and how it is impossible for it to leak when the self-closing valve is shut. The illustration also shows the extra metal washer that they have added to the packing. When valve is closed there is no possibility of any oil leaking, but as an additional security and also to protect the user from any oil which through carelessness might collect on the outside of the spout, a cover is furnished which fits over the spout, thus allowing the oiler to be carried in the pocket with perfect safety. This oiler is heavily nickeled and takes up very little room. In spite of the reduction in high grade wheels it is still used with the leading makes; those that are looking for the best in everything, the oil-can included.

James Knox, one of the most popular salesmen of the Bissell Carpet Sweeper Co., who promptly responded to the first call for troops in the State of Michigan, and who has always been a very ardent militiaman, has just received his appointment to the office of major.

The lowlands of Cuba are extremely rich in lime and phosphate.—*Ex.*

RETAIL HARDWARE ASSOCIATION OF TEXAS

On June 6, as has already been stated in *Hardware*, W. H. Richardson, a dealer in Hardware at Austin, Texas, after consultation with others interested in the same subject, issued to the dealers of that State a circular letter, which is as follows:

To the Hardware Dealers of Texas: The Railroad Commission of the State of Texas, on May 5, 1898, made an order changing the loading of cars of goods in our line, as follows:

1. Nails, iron or steel, straight car loads or mixed with staples.

2. Fence wire, smooth or barbed, in straight or mixed car loads or mixed with staples.

3. Hay bale ties, in straight car loads.

4. Staples, in straight car loads or mixed with nails or fence wire, as provided in items 1 and 2 above.

Note.—It is understood that the rates on woven wire field fencing, and wire other than fence wire, in straight or mixed car loads, will remain unchanged.

5. Stoves, straight car loads.

6. Stove furniture and hollow ware, as now provided in current classification, with sheet iron excluded from the item, shall be shipped in straight or mixed car loads.

7. Sheet iron, plain, all kinds (except Russia or planished iron), in straight or mixed car loads.

8. Sheet iron, corrugated, in straight car loads.

From this ruling but one result must follow: loss of business and all the consequent evils. How many of us can afford to order stove furniture and hollow ware in solid car lots or bale ties in solid car lots? And, too, forced at any and all times to ship a solid car of nails, a solid car of wire, or a solid car of flat iron.

It has been possible previous to this to ship direct from the factory to our places of business, in mixed cars, the product of the plant, viz.: Nails, barb wire, bale ties, netting, &c.; or stoves, stove vessels, pipe, &c., in a mixed car; thereby doing away with the jobber and middleman at either end of the line, enabling us to furnish our customers (the people of Texas) at the lowest possible price. Now we must change our business and be tributary to a few men in the State, who are alone benefited.

If ever there was an opportune moment for a State organization now is the time. Important changes in the laws governing our trade interests demand concentrated action for mutual protection. This late Railroad Commission outrage will be followed by others. There are many other matters of vital importance demanding an organization of the Hardwaremen of Texas.

If you think the time has arrived for a meeting of the Hardware dealers of Texas for the perfecting of an organization for our mutual benefit you will please so designate by return mail, that all may be represented. A determined position taken by such an organization can but be felt. Say at what time and place you prefer to meet and we will cast up the responses and notify you through the daily papers of the place and time so selected.

Believing that an urgent necessity exists for this step, you will pardon the presumption, but the necessities of the hour demand prompt action. We would suggest that a meeting be held in the next thirty days.

Numerous responses were received to this call, and a meeting of the Hardware and implement dealers of Texas was therefore held at Waco on June 28 and 29, at which a State association was organized under the name of the Retail Dealers' Hardware & Implement Association. A list of those who were present on this occasion was prepared, and is as follows:

THOSE WHO WERE PRESENT.

O. M. Pate, Sulphur Springs.
J. S. Leachman, Dallas.
W. T. Herrick, Whitney.
W. Bradshaw, Dallas.
W. M. Tatum, Corsicana.
F. L. Doke, Hubbard City.
B. A. Bowers, McKinney.
J. L. Wilson, Belton.
W. A. Brady, Temple.
T. L. Hollingsworth, Temple.
W. S. Allen, Calvert.
W. J. Stephens, Moody.
H. B. Sones, Dublin.
A. J. McWilliams, Atlanta.
J. A. Nelson, Round Rock.
W. H. Richardson and W. H. Richardson, Jr., Austin.
Fred Grimm, Comanche.
L. H. Booch, St. Louis.
W. G. Mancill, Cisco.
David L. Harris, Dublin.
L. T. Fuller, Calvert.
H. W. Thornhill, Dallas.
A. M. Maloney, Dublin.
G. A. Stuart, Dallas.
J. A. Tarver, Rosebud.
C. L. Trice, Lott.
James G. Blaine, Taylor.
S. D. Davis, Granger.
Geo. L. Miller, New Orleans.
C. B. Spencer, Jr., Marlin.
N. B. Sims, Temple.
H. B. Rutherford, Mount Vernon.
J. H. Boothe, Gonzales.
H. Whitener, Belton.
W. H. Kokernot, Gonzales.
F. B. Wood, Corsicana.
F. M. Thompson, Bonham.
G. W. Woosley, Whitewright.
C. B. Marsh, Hubbard City.
W. T. Finn, Groesbeeck.
O. S. Potter, Waco.
J. L. Rich, Thornton.
H. C. Meyer, Rockdale.
Chas. C Ramsey, Columbus.
Geo. Henne, New Braunfels.
G. N. Austin, Belton.
Theo. Bering, Jr., Houston.
H. Y. Robinson, Huntsville.
W. E. Watkins, Kaufman.
E. Jarvis, Hubbard City.
Lee Clark, Rockdale.
C. R, Stephens, Hutto.
H. H. Ingrahen, Mount Calm.
J. P. Smith, Waco.
T. W. Lake, Fort Worth.
H. S. Wilson, Cleburne.
C. Dickson, Cleburne.
W. McB. Smith, Belton.
A. B. Welch, Bartlett.
J. Desenberg, Mexia.
Townsend Longbottom, Wortham.
J. Allen Myers, Bryan.
W. H. Howard, Lott.
S. L. Erwin, Honey Grove.
J. H. Hancock, Paris.
J. C. Duke, Dallas.
R. P. Lowe, Weatherford.
R. W. Fort, Weatherford.
W. M. Gunnell, Marlin.
John P. Hart, Dallas.
A. L. Smith, Hillsboro.
T. J. Woody, St. Louis.
J. W. Walker, Forney.
F. S. Cronk, Waxahachie.
J. C. Rugel, Mesquite.
J. R. Thompson, Hillsboro.
J. W. McManus, Waxahachie.
T. E. Tomlinson, Hillsboro.
William Enders, St. Louis.
W. H. Miller, Fairfield.

The meeting was called to order on the 28th by W. H. Richardson, who was elected temporary chairman. Charles B. Smith, of Belton, was made temporary secretary, and an address of welcome was made by J. F. Brinkerhoff, who represented the Mayor of Waco. A recess was then taken, after which Chairman Richardson delivered the following address:

ADDRESS OF PRESIDENT RICHARDSON.

We have met for the first time as an organization of retail Hardwaremen. We are driven to this step by recent events in a legal way. We are not in politics, but we are here for business. We are here to assert our rights as citizens and to protest against a recent action of the Railroad Commission, a legally constituted board composed of the servants of you and me. If we have not the manhood to resent this, we should continue to be thus trampled on. When this matter was first suggested I believed it would be presumptuous in me to go to the Commission and ask it to rule on a question regarding interstate rates, and went to Commissioner Storey and showed him a letter I had. His reply was, as I supposed, that the Commission had nothing to do with interstate matters. This is a matter that means money to us. It means 32 cents on a keg of nails and 32 cents on a spool of wire. The Commission found a way out of it. Judge Reagan said it was an agreement between the business men and railroad men. What business men had authority to represent us?

Digitized by Google

We can do nothing individually. We had as well try to straddle a Texas broncho and charge Morro Castle with a six-shooter as to sit at home and plead with the Commission. We must go to that body with our organization backed by the consumers of the whole State and demand our rights—not upon bended knee, but with the power that is in us. They say this meeting was inspired by the St. Louis jobbers; that we hadn't the manhood to do this ourselves, but must go to St. Louis to get our inspiration and documents. Gentlemen, I have bared my breast to bullets in years gone by. We are pioneers in this State. We have made civilization possible in Texas, and we must enjoy the fruits of it. We cannot allow our rights to be involved without a protest. We are not subservient to a political body, and we must show it. We must also say where the Hardware dealer begins and ends.

They have robbed us of the buggy business, they have robbed us of the stove business, and now the jobbers and railroads of this State have taken the balance of our rights. Why don't they leave us to the tender mercies of the railroads? We got along all right with them. If there ever was a time for the retail men to act, it is now. The people who are responsible for this move will find out that we can strike back, and we will do it.

At the conclusion of the chairman's address the following gentlemen were appointed a committee on constitution and by-laws: W. E. Watkins, James G. Blaine, C. Dickson, W. McB. Smith, S. L. Erwin. Mr. Richardson was also added to the committee.

A committee on permanent organization was also appointed, consisting of the following gentlemen: T. L. Hollingsworth, R. P. Lowe, T. W. Lake.

At the afternoon session this last committee reported as follows, and the report was adopted, and the gentlemen named declared elected to office for the ensuing year: The officers shall consist of a president, a vice-president, a second vice-president, a secretary, a treasurer and an Executive Committee consisting of five members, together with the president and secretary, and we recommend the following for permanent officers to hold for the ensuing term:

President: W. H. Richardson, of Austin.

Vice-president: J. R. Thompson, of Hillsboro.

Second vice-president: S. L. Erwin, of Honey Grove.

Secretary: C. B. Smith, of Belton.

Treasurer: C. Dickson, of Cleburne.

We further recommend that the president select and appoint five members of this body as its Executive Committee.

Resolved, That we extend a cordial invitation to all legitimate retail Hardware and implement dealers to join this association.

The Committee on Constitution and By-Laws made the following report:

1. The name of the organization shall be the Retail Dealers' Hardware & Implement Association of Texas.

2. The object of this association shall be to promote the interest of and secure the friendly co-operation of the retail Hardware and implement dealers of Texas.

3. Any person, firm or company who is engaged in the retail Hardware or implement business, carrying what is generally conceded to be a full and complete line of Hardware or implements, or Hardware and Implements, shall be eligible to membership in the association, and may by subscribing to this constitution and paying the annual dues, on the recommendation of the Executive Committee.

4. In the election of officers each firm is to have one vote.

5. The annual meetings to be held annually on the third Tuesday in June.

6. An investigating committee to be annually elected, the duty of which is to investigate all complaints.

The by-laws recommended provide that the admission fee to membership be $5 in advance, carrying all dues for the first year; $3 per year thereafter.

The matter was fully discussed and the constitution adopted as presented. The following committees were also appointed:

Executive Committee: R. P. Lowe, of Weatherford; L. T. Fuller, of Calvert; James G. Blaine, of Taylor; H. S. Wilson, of Cleburne; W. E. Watkins, of Kaufman.

Investigating Committee: W. S. Allen, of Calvert; J. W. Walker, of Forney, and A. L. Smith, of Hillsboro.

To draw up a memorial addressed to the Railroad Commission of Texas, stating fully the grievances of the retailers: W. H. Richardson, chairman; W. M. Tatum, J. H. Hancock, W. M. Gunnell, J. R. Thompson, J. W. McManus, J. C. Rugel, J. S. Wilson, T. L. Hollingsworth, S. L. Erwin, H. S. Wilson, H. G. Robinson, Theodore Bering, Jr.; J. H. Boothe, S. D. Davis and W. McB. Smith.

An evening session was given up to the discussion of various subjects, and on convening on the morning following, a resolution was adopted to the effect that all men traveling for Hardware and implement houses would be admitted to membership on the payment of the annual dues, but with no power to vote. The following standing committees were then appointed:

Membership: Theodore Bering, Jr.; J. W. Walker and A. L. Smith.

Transportation: T. L. Hollingsworth, W. S. Allen and Theodore Bering, Jr,

Amusements: J. H. Boothe, H. Y. Robinson and R. W. Foat.

Reception: J. W. McManus, J. C. Rugel and A. L. Smith.

Printing and Badges: T. W. Lake, C. B. Spencer, Jr., and Mr. Steibler.

The Committee on Resolutions made their report as follows, and the resolutions were adopted in full:

THE RESOLUTIONS ADOPTED.

Resolved, That it is hereby made a part of the duties of the Executive Committee of this Association to keep a constant watch upon the proposed rulings of the State Railroad Commission and the tariffs and classifications of the various railroads running into the State, and to take such action as circumstances seem to require to protect the members of this Association, a full report of such action to be made to this Association at its next annual meeting.

Resolved, That whereas we, the retail Hardware and Implement dealers of Texas, by the recent rulings of the Railroad Commission, in effect June 1, are forced to give up certain lines of our business or considerably advance the cost of the same to the consumer, hereby enter our protest against such ruling and ask its immediate repeal and a restoration of the freight rates and classifications in existence prior to that time.

Resolved, That, whereas the Texas consumer is vitally interested in the restoration of former rates and classifications, as well as the retail dealers of the State, the Executive Committee is hereby instructed to prepare and furnish to the members of this Association at as early a date as practicable a petition to the Railroad Commission, asking for a restoration of the rates in force prior to June 1, and that the members of this Association secure signatures to said petition from their respective customers throughout the State, and that the Executive Committee present same to the Commission with as little delay as possible.

Whereas, Under a recent decision of the Court of Criminal Appeals of our State, certain lines of goods which we handle are being brought to the State and peddled out to our people by outside parties without the payment of any occupation tax whatever; and

Whereas, The present occupation tax laws of our State as they now exist and are construed are a gross imposition upon the merchants of our State; therefore be it

Resolved, by this Association, That its Executive Committee be instructed to proceed at once to prepare data and take such steps as may be necessary to secure the enactment of a just and equitable occupation tax law and one which will put a stop to unrestrained piracy in our State.

Resolved, That in case the Railroad Commission of Texas

Digitized by Google

fails to repeal Circular No. 619, the Executive Committee of this Association be instructed to prepare and file an appeal with the Interstate Commerce Commission setting forth the injustice and illegality of said Circular No. 619.

Resolved, That the thanks of this Association be extended to the Waco Commercial Club, the railroads, the local and State press, the Mayor of Waco and all others who have extended so many courtesies to this Association.

A memorial to the Railroad Commission of Texas was then adopted in full as follows:

THE MEMORIAL.

WACO, TEXAS, June 29.

To the Honorable Railroad Commission of Texas, Austin, Texas:

GENTLEMEN—The Retail Dealers' Hardware & Implement Association of Texas was organized at Waco, June 28-29, 1898, the officers and Executive Committee for the ensuing year being as follows: President, W. H. Richardson, Sr.; vice-president, J. R. Thompson; second vice-president, S. L. Erwin; secretary, C. B. Smith; treasurer, C. Dickson. Executive Committee, R. P. Lowe of Weatherford, L. T. Fuller of Calvert, James G. Blaine of Taylor, H. S. Wilson of Cleburne and W. E. Watkins of Kaufman. Said Association comprises persons, firms and corporations doing a retail Hardware and implement business in Texas and has now a membership of 110. Among other towns and cities represented by one or more dealers, as members of the Association, are the following: Waco, Hubbard City, Austin, Comanche, Cisco, Dublin, Dallas, Rosebud, Lott, Taylor, Granger, Quanah, Marlin, Temple, Belton, Mount Vernon, Gonzales, Corsicana, Bonham, Whitewright, Sulphur Springs, McKinney, Calvert, Moody, Atlanta, Round Rock, Groesbeeck, Thornton, Columbus, Rockdale, New Braunfels, Houston, Huntsville, Kaufman, Hutto, Mount Calm, Fort Worth, Cleburne, Bartlett, Mexia, Wortham, Bryan, Honey Grove, Mesquite, Waxahachie, Fairfield, Weatherford, Hillsboro and Forney.

At the meeting of the Association referred to above, among others the following resolutions were adopted:

"*Whereas*, Circular No. 619 of May 6, 1898, issued by the Railroad Commission of Texas, changing the classifications upon a number of staple articles handled by the retail Hardware dealers of Texas, seems to have been the result of an agreement entered into between certain railroad officials and jobbers of Texas, and only concurred in by the Railroad Commission, rather than an order issued by said Commission; and

"*Whereas*, The result of said Circular No. 619 has been to make radical advances in interstate freight rates, discontinue mixed carloads permitted in other territories, and thereby increases the cost of such articles as wire, nails, hay bale ties, sheet iron, stoves and hollow ware, tin ware and galvanized iron ware, and other staple articles, not only to the retail dealers of Texas, but to the consumers as well; therefore be it

"*Resolved*, That the Executive Committee of this Association is hereby instructed to prepare and present in the name of this Association a memorial to the Railroad Commission of Texas, requesting the immediate cancellation of said Circular No. 619, and that no similar order be issued in future until after a full and complete hearing of the retail dealers and their customers, the consumers of Texas.

"*Resolved*, That in the event the Railroad Commission refuses to cancel said Circular No. 619 until after a hearing, it be asked to set the earliest date possible for such hearing, and that the Executive Committee of this Association is hereby instructed to prepare and present such evidence as may be needed to show the gross injustice of the present rule."

Based upon the foregoing we, the Executive Committee of the Retail Dealers' Hardware & Implement Association of Texas, respectfully ask:

1. That Circular No. 619, issued by your honorable Commission on May 6, 1898, and made effective by the railroads June 1, 1898, be rescinded and the railroads interested be instructed to restore their rates, rules and classification upon articles named therein to basis in effect prior to June 1, 1898, and that such restoration become effective not later than July 15, 1898.

2. In the event you should decide said Circular No. 619 cannot be canceled without a formal hearing, we respectfully ask that said hearing be set for the earliest possible date it can be legally done, and that this committee be promptly advised of such date. So grievously are we and our customers injured by conditions as now in effect that we cannot afford to permit any greater delay than absolutely required by law.

3. Believing it is the intention of your honorable Commission to treat all interests fairly and equitably, to permit no class to prosper at the expense of another class, and it is your desire to secure full information on subjects that may be presented to you, we know you will waive any lack of legal formality in this petition and will take such prompt action as if presented in legal form.

4. We respectfully request that correspondence on this subject or others wherein the retail Hardware and implement trade of Texas is interested be addressed to the President of this Association, W. H. Richardson, Sr., of Austin, Texas. Respectfully submitted,

R. P. LOWE, Chairman.
J. G. BLAINE, Secretary.
H. S. WILSON,
L. T. FULLER,
Executive Committee.
W. H. RICHARDSON, SR., President.
CHARLES B. SMITH, Secretary.

It was decided that the next annual meeting should be held at Dallas, Texas.

This association places the retail Hardware dealers of Texas in a central and compact organization, and adds one more to the many associations of this character which are performing such able work in the Hardware trade in all parts of the country, and the jobbers of the State already have a successful and effective organization of their own.

Why She Favored Dewey.

Over in Chicago the council has just changed the name of Bissell Street to Dewey Avenue. The fight made for and against the change was long and bitter, and it is said by the Chicago papers the victory for the Deweyites was won principally through the efforts of one woman. As she marched triumphantly out of the council chamber, a friend who knew of her great efforts in the good cause, said, "I didn't know you were such a great admirer of Dewey."

"Oh, I guess the Dewey is a good ship, all right, but they could have named it Simpson, Schlitz or any old thing, for all I cared, just so they changed it."

"But I thought you just wanted to honor Dewey," said her friend in surprise.

"I should say not," responded the other. "What I want is to get that name changed so that every time I speak of the street on which I live I won't think of sweeping day, house cleaning and carpet sweepers. I haven't anything against the Bissell sweeper, but I do object to dragging it all over town with me and having it haunt me whenever I ask a friend to call or order anything sent to the house." Then as the patriotic aldermen who had heard her gasped in amazement, she disappeared down the stairs.—*Chicago Chronicle.*

Our faith in the sobriety of that noble animal, the horse, received a severe shock, when we discovered that the Brooklyn Bridge authorities found it necessary to post a sign that "*loaded* teams must keep to the right."

Oh, the bicyclene is passing fair
And her charms we must admire;
She can ride all day with a tireless air
But not with an airless tire.—*L. A. W. Bulletin.*

Review of the Markets.

Hardware: The vacation season being in full operation, the sales of general Hardware are of but little significance. Most of the large buyers contemplating the possibility of fall trade, are going through their stocks and making preparations for what will doubtless be the most encouraging season's trade that has been at the command of jobbers and manufacturers in many years.

While war conditions will prevail for many months yet, the prestige given the United States in the successful prosecution of the present campaign, will be of immense benefit to us as producers, and create a feeling of confidence in our ability in fields of national effort that will be felt for many years to come. It will behoove our merchants to profit by the lessons of the spring trade, when supplementary demands on the manufacturers were met by short supplies, and many sales were lost by lack of goods. Early orders based on confidence in future business should prove the rule, that manufacturers may know what is required of them, and take the necessary steps to supply promptly every item needed under the pressure of an unprecedented demand, for the coming season begins with every promise of unusual commercial importance.

Wire Nails: But little if any change in the quiet conditions surrounding the wire nail market, has been noticeable since our previous issue; but little impetus has been felt in the usual amount of traffic relied on to keep in a state of progress during midsummer. Semi-annual readjustments of stock are taking place, and a better demand may be anticipated in the early future for this important line, in a general reassorting of current stock requirements. The market is represented as being steady and firmly held at the quotation of $1.35 f. o. b. factory, Pittsburg or Cleveland, applying to carload lots to retail buyers, larger specifications for the jobbing trade meeting with the usual slight concession for the increased quantity. Business being reported very moderate, New York prices are as previously given: Carload lots on dock, $1.45; smaller lots from store, $1.55.

Cut Nails: Business in this line is devoid of interest, and but slow in its transactions. Prices remain as quoted previously for nails delivered in New York. Carload lots on dock, $1.20 base; smaller lots from store, $1.30. At these quotations business is held firmly, transactions being limited.

Copper Rivets and Burrs: U. T Hungerford, No. 121 Worth Street, New York, the representative of the principal manufacturers of copper rivets and burrs, has issued, dated July 1st, the following revised price list, which is subject to a discount of 50 per cent, on rivets and burrs and 40 per cent. on burrs only. Terms 60 days or 2 per cent. discount for cash in 10 days, with freight allowance of ½ cent per per pound on the net weight of goods, f. o. b. factory or New York:

COPPER HOSE AND BELT RIVETS AND BURRS.

Numbers	3 to 7 incl.	8	9	10	11	12	13	14	15
	Cents per pound.								
In bulk	49	50	52	54	56	58	60	65	70
Uniform lengths, packed in 1 or 4 pound boxes.	49	50	52	54	56	58	60	65	70
Uniform lengths, packed in ½ or ¼ pound boxes.	52	53	55	57	59	61	63	68	73
Uniform lengths, packed in ⅛-pound boxes.	55	56	58	60	62	64	66	71	76
Assorted lengths, ⅜ to ¾ inch, packed in 1-pound boxes	52	53	55	57	59	61	63	68	73
Assorted lengths, ⅜ to ¾ inch, packed in ½ or ¼ pound boxes	55	56	58	60	62	64	66	71	76
Assorted lengths, ⅜ to ¾ inch packed in ⅛-pound boxes	57	58	60	62	64	66	68	73	78

Tinning Rivets or Burrs net additional 2 cents per pound.

Coil Chain: The trade in this department of heavy Hardware shows but little signs of improvement at the present time, but prices are favorable for future transactions and a good fall and winter demand is anticipated. James McKay & Co., Pittsburg, Pa., send quotations as follows: for large specifications, subject to the usual advance for more limited quantities:

PROOF COIL CHAIN.

Size	3-16	¼	5-16	⅜	7-16	½	9-16
Price in car load lots	5 75	4.00	3.00	2.65	2.50	2.40	2 30
Price 1000 lbs. or over (each size)	6 00	4.25	3.25	2.90	2.75	2.65	2 55

Size	⅝ & 11-16	¾ & 13-16	⅞ & 15-16	1 & 1 1-16	1⅛	1¼ to 1⅜
Price in car load lots	2.20	2 15	2.10	2.05	2.00	2.00
Price 1000 lbs. or over (each size)	2 45	2.40	2.35	2.30	2.25	2.25

Extras above Coil Chain prices.

B. B Crane Chain ..... ¼ cent per pound.
B B. B. Crane Chain ..... 2½ " " "
Crown Crane or Dredge Chain. ..... 4¼ " " "

Prices on steel and stud chain quoted on application. They do not make coil chain over one inch. For twist link chain 3-16, ¼, 5-16, ⅜, 7-16, add 20 cents per cwt. For coil log chains add 25 cents per cwt. Freight allowed to New York. Proof coil chain will always be sent self-colored unless ordered blacked, and other grades will be sent blacked unless ordered self-colored. For dimensions of links, weight per foot, tests, etc., see catalogue. Terms, 30 days net cash. Prices subject to change without notice.

Sheet Lead, Lead Pipe, ete.: The prices on lead products, owing to present conditions in the metal trade, have been advanced as follows, under date of June 28th:

Sheet Lead..... 7 cents per pound.
Lead Pipe ..... 6 " " "
Tin Lined Lead Pipe..... 12½ " " "
Block Tin Pipe..... 22 " " "

Prices are subject to the customary trade discount of 20 per cent.

Cordage: The usual dullness as affecting summer trade, has called a halt on advancing prices, and the conditions of the market are the same as given in our previous issue as affecting present quotations, the following carload prices being still fairly well sustained, smaller quantities being held at the usual advance:

Manila, 7-16 inch and larger ..... per pound, 10¼ cents.
" ⅜ inch ..... " 10¼ "
" ¼ and 5-16 inch. ..... " 11¼ "
Sisal, 7-16 inch and larger..... " 9¼ "
" ⅜ inch ..... " 9¼ "
" ¼ and 5-16 inch..... " 10¼ "

Binder Twine: The waning of the season creating a lessening demand, has had the effect of keeping the market on binder twine in the firm condition noted in our previous issue, but without continuing the advancing quotations formerly prevailing. We quote as follows for carload lots, f. o. b. Eastern factories, with the usual advance for smaller quantities:

White Sisal, 500 feet to the pound ..... per pound, 12 cents.
Standard, 500 feet to the pound..... " 12 "
Manila, 550 feet to the pound..... " 13 "
Pure Manila, 650 feet to the pound... ..... " 14 "
Travers Ex. Hemp, 500 feet to the pound ... " 9 "

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of June 28th, quote as follows: In lots of less than 5 barrels, 42 cents per gallon; in lots of 5 barrels or more 41 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE CLEVELAND TRADE.

The ambition for bigness is a disease that men commencing business are peculiarly liable to and that older business men are sometimes afflicted with, greatly to the detriment of themselves and others.

The business of a section, State or nation becomes Leiterized by it. A man should be sure that he is larger than his business, and try to keep so. The desire to be esteemed a large dealer has inflated and engulfed many men.

Contentment and happiness, as well as success in business, requires that one be satisfied to *be*, and not *seem*. Small beginnings where experience is lacking is much the safest, letting experience and business grow together. Frequent and small purchases are recommended; ambition to succeed should smother ambition for bigness. To over-

Digitized by Google

buy for the sake of reduced price is a habit often urged and should be avoided.

No jobber who has any interest in the success of his customer will attempt to induce over-purchases. To nag a purchaser because his orders are for a small amount is a good excuse for changing houses.

Nearly all the men of wealth commenced in a small way, while hundreds have been wrecked by ambition for early bigness. Investments outside of one's business, while the money is needed in the business, is a danger to which all business men have many invitations.

Do not be tempted by any "ground floor" plan offers until you have a surplus not needed in your business, and then it is safer to seek your own investments.

Since it must be so for a large majority, it is well to be content in the middle class. Happiness is most likely to be found there. The elation of success, and despair from failure of speculation tend to impair business ability.

Everything indicates that it will pay in the next few years to give exclusive attention to the business one has in hand, that all the ability and resources can be properly employed, and the steadily increasing prosperity promises ample compensation.

The following business rules should be observed by all houses who would command the respect of manufacturers:

1st. Goods sent according to order must not be returned without consent of seller.

2d. Any claim for damage to goods received while in transit, must be made upon the transportation company and not upon the shippers, which responsibility ceases when the goods are delivered to the transportation company.

3d. Traveling salesmen may investigate and report upon claims against the house, but are not authorized to make any settlement without special instructions.

4th. No contract for the purchase or sale of goods can be cancelled without the consent of both parties.

Orders from traveling salesmen begin to show that the dull season is approaching. July, as usual, will be spent in recreation and planning for the fall campaign.

The increasing dullness in the price of iron and steel is an anomaly not easily explained. With an unusually large demand, the price is weak and tends to decline. Never in the history of lake navigation was the outlook so discouraging; notwithstanding these conditions, trade for the first half of the year has been very satisfactory.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE OMAHA TRADE.

There appears to be considerable activity in the Hardware market, and one peculiar feature of it is that in spite of a large and active demand for goods, there appears to be no disposition to advance prices in the least. Manufacturers complain of the small margin on which their business is handled, and in some cases, complaint is made that the returns are not sufficient to earn an interest on the invested capital, and yet in spite of the large movement on goods, it appears to be a practical impossibility to get more money for goods. The trade on season goods has been unusually active, and on barbed wire there has been a large demand, most of which has been used for fencing cattle ranches throughout the Western territories. Wire cloth, steel goods, and screen doors, have been in active demand and somewhat scarce. Binder twine has also been in large demand, and while no great scarcity exists, the rapid advance in price has, undoubtedly, to some extent, stimulated the demand. Many dealers have made a very handsome thing out of the advance on twine, and others, unfortunately, have taken early orders in excess of their purchases. On his account, they are losers rather than gainers on the advance. Collections are good. RECTOR & WILHELMY CO.

THE PITTSBURG TRADE.

The glorious war news of the glorious Fourth eclipses everything else for the time being. We sincerely hope bloodshed will soon be over and that peace will reign, with the results accomplished for which we entered upon this war. That our country will emerge with honor and increased respect from the European nations seems assured. That our maritime power both in navy and mercantile marine will be greatly increased seems also assured. If the most sanguine are correct we will enter upon a new era of expansion and enlarged commercial prosperity beyond our largest dreams.

Locally a good business is doing for this season, mills well employed and merchants busy. Season goods are well sold out, vacations are in order this month and preparations making for the opening of Fall trade in August.

LOGAN-GREGG HARDWARE CO.

THE BIRMINGHAM TRADE.

Our June trade was above the average, and we feel encouraged to anticipate a good trade the coming months.

The most important event in the business world for our city is the definite announcement that the organization of the Alabama Steel & Ship Building Co. has been completed, and that work will proceed upon it at once. We anticipate that this will, in a few years, add not less than 25,000 population to our district. This will make it easy to get other plants which will come to work up much of the raw materials, and make this a centre for steel and iron and their products.

The first of July is the beginning of new contracts with the laborers, and we are glad to note that all is harmonious between labor and capital and that a general advance in wages has been made, which will give an increased pay-roll

and result in the distribution of more money throughout the district, and which we accept as an evidence of more prosperous times.

The news from the seat of war continues good and makes the result more certain and the end closer at hand, and when the sword has been laid aside, we will have learned many valuable lessons and be prepared for a new era of greater activity.

We take courage and press on to greater achievements.

MOORE & HANDLEY HARDWARE CO.

THE PORTLAND TRADE.

Business continues to show a healthy increase. Seasonable goods are having an unusual sale, and in some instances are hard to get, manufacturers being all sold out.

The season is very favorable to harvesting the hay crop, which is very abundant, and our farmers are proportionately good natured. Every kind of vegetation is growing finely.

Our orchards have been infested with canker worms, but it is not thought it will seriously affect the fruit crop.

THE EMERY-WATERHOUSE CO.

THE DAVENPORT TRADE.

There are now some two thousand to twenty-five hundred workmen employed at the United States Arsenal here, with a monthly pay roll of one hundred and twenty-five to one hundred and fifty thousand dollars. Our other factories are running full time. The crop prospects could not be better. Weather delightful, and all of these things conspire to give Davenport an air of prosperity seldom seen in mid-summer.

The most remarkable event in trade has been the rapid changes and always advancing prices of rope and binder twine. Sales in these goods have been large and have increased the sales footings far above an average for the month of June for many years. The season for selling barb wire has passed and there is very little demand for nails at the decline in price of five cents per keg. Collections are satisfactory.

SICKELS, PRESTON & NUTTING CO.

THE ALBANY TRADE.

With "Old Sol" and "Humidity" doing their level best to drive men away from business promptly on July 1st, to seek inviting retreats not invaded by commercial travelers or trade papers, the "Stay-at-homes" are expected to furnish information regarding the state of trade of late in their respective territories.

The war is being so successfully handled in true American style by our gallant army and navy (even now to the satisfaction of some captious newspaper man) as to take all care and anxiety from the mind of the patient Hardwareman who can now calmly look back and review his business for the first half of the year 1898.

The results may be quite safely stated as increased business in most lines, a falling off in nails and wire fencing and a slightly increased percentage of profits, on the whole very satisfactory as compared with the corresponding months of 1897.

Trade has been remarkable in "season goods"—scythes, snaths and hay tools are entirely wiped out of the jobbers' hands, even to "leftovers" of a decade past on which good prices have been realized. Lawn mowers and ice cream freezers have had a heavy call, and hand and machine implements for cutting and breaking ice which now have an important place in the Hardware store, have had an unprecedented sale, together with fruit presses, berry hullers, etc.

Cut nails appear to be toning up a little in price and begin to show some increase in sales. Wire nails are suffering

RULE & LEVEL CO.
New Britain, Conn.

SOLD BY ALL
Hardware Dealers.

STANLEY'S
IMPROVED BUTT GAUGE.

A Metallic Butt Gauge, having one bar with two steel cutters fixed upon it. When the cutter at the outer end of this bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the back of the jamb. The other bar has a steel cutter to accurately gauge for the thickness of the butt.

The form of this Tool is convenient for carrying in the pocket. It is so constructed that the bars cannot fall out of the stock

No. 95. Nickel-plated Butt Gauge, one in a box, $0.75

slightly from the disturbance caused by irregular prices in a certain quarter where capacity is yet an unknown quantity, but it appears to be sufficient to check the firmer prices and large purchases that the consolidation was expected to bring about.

Activity is beginning to materialize in sheet iron, coal hods, stove boards and elbows for fall trade. Low prices are the rule, and no doubt astonish to quite an extent many buyers. Horse shoes and horse nails, which have excellent sales at this time of year, are moving rapidly and with lively competion on favorite brands.

Indications in all lines point to a large volume of trade for the coming season, and no doubt many houses are buying very freely.

Collections in this section are reported to be excellent. Many who have said to be somewhat slow in the past, having "squared up" very punctually just before July 1st.

With such encouraging conditions, vacations can be undertaken by the hard-working Hardwareman with keener relish of anticipated enjoyment.

ALBANY HARDWARE & IRON CO.

THE GRAPHITE TRADE.

With reports from the commercial agencies relative to business, that no one, even in the hottest weather, should find fault with; with exhilarating news, and with sales and outlooks in one's own business especially invigorating, there is no reason why we should worry about business, and every reason why we should sit around on our barrel heads, nail kegs, chairs and soap boxes, and talk over business matters in a social and sociable way.

We think that *Hardware* is quite a paper, and that very likely much good may come by carefully and freely discussing matters therein mentioned, even if we do not settle any special question.

Salesmen are like soldiers. It needs the most rigid discipline to hold them in, and we do not believe that even if the principals and proprietors should agree as to when salesmen should call, that it will prevent salesmen from occasionally slipping ahead of their towns or doing their best to get ahead of rival salesmen. We ourselves occa sionally take our salesmen in hand and accuse them of being on the side of the jobber and dealer rather than on our side and in a naive way they give us to understand that it is the jobber and dealer that it pays them to tie up to; that in

THE CHANCE OF A LIFETIME.

A company already organized, standing well in the community and doing a successful business, being desirous of greatly extending their field of usefulness by increasing sales, are willing to dispose of an interest to several salesmen of sufficient calibre to guarantee new business. . . . . .

The company already have in their possession a stock of Cutlery valued at $40,000, consisting of Pocket Knives, Scissors, Shears, Razors and Razor Strops, etc., including the finest line of Manicure Goods in the market, and numerous Specialties of kindred importance. All of this stock was purchased under the old tariff, well selected by expert buyers, every pattern possessing selling merit.

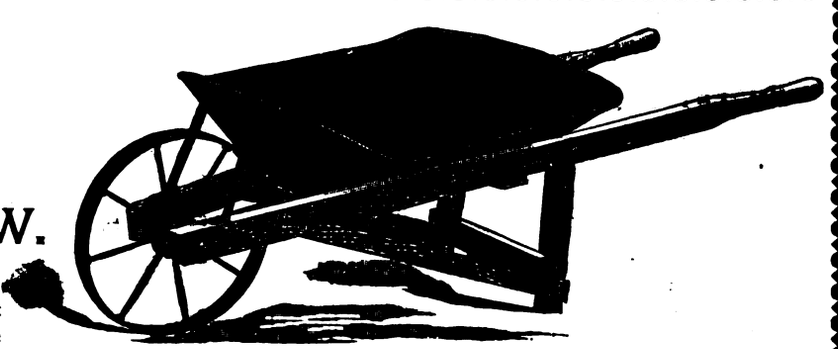
Traveling salesmen with experience able to purchase an interest in this lucrative business and continue on the road in the employ of the company, will find this an opportunity for investment of rare occurrence. Address, giving own name, and references,

ALPHA & OMEGA,
Care "Hardware," No. 143 Chambers St., New York City.

reality it is their customers that pay the salary, even if it does come from the Dixon Co.; that if they did not keep on the right side of their customers, they would not get the trade, and if they did not get the trade the Dixon Co. would not want them, all of which is very likely true. Therefore, it will ever be the motto of the salesmen to hustle for all of the trade in sight and to break all strings that tie him, if he possibly can do so.

It is, indeed, as the King Hardware Co. puts it, "a survival of the fittest," and no salesman will keep "off his neighbor's grass" if there is anything to be gained by going thereon. JOSEPH DIXON CRUCIBLE CO.

"'Twixt Love and Honor."



The Cleveland Stone Co., Cleveland, Ohio, seem to have a faculty for turning out first-class work in every department of production. This applies not only to their quarries and stone-yards, but also to their artistic and advertising departments. These two departments are grouped together, because all the advertising matter which they send the trade is artistic in the highest degree, and fetching in every sense of the word. The latest production is in the form of a hanger entitled "'Twixt Love and Honor," showing the state of mind in which the young business man finds himself to-day when deliberating between the emoluments of business life and the patriotic demands of his country. The centre-piece is devoted to both the cavalry and infantry arms of the government service, where two stalwart specimens of young America are side by side, one of whom is astride a noble war charger, and the other carrying a gun. On one hand is Cuba and on the other the office desk, and the state of mind in which the boys find themselves has been most graphically illustrated. Surrounding this centre-piece in colors are views of the yards and products of the Cleveland Stone Co. Underneath it all is this sentiment: "'Twixt Love and Honor. Whatever the decision, there will be enough of us left to assure for your orders the same care, quality and promptness as of yore."

In a circular letter recently issued by the company, we also find these stirring words: "This is the season of hurrahs and hot-shot. American grit is everywhere showing to advantage, and as we personally own whole quantities of it, our commissary department is well worth reconnoitering. Our strategy board has mobilized great quantities of carefully selected grindstones, which are now thoroughly dried and seasoned. In this condition any defects in texture or firmness are easily detected, and we are in a position to guarantee perfect goods and prompt delivery. whether the orders come in squads or squadrons."

The July meeting of the New England Hardware Dealers' Association will take the form of an excursion to Hotel Nantasket, Nantasket Beach, on Wednesday, July 13th. Dinner will be served on the arrival of the boat, at 1:30 P.M., and the return to Boston will be made in the evening. All the arrangements are in the hands of a committee consisting of D. Fletcher Barber, George J. Mulhall and John C. Holden.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Delray, Mich.—The Delray Hardware Co. have opened store on River Street. They are successors to E. M. Alexander & Son.

Mariposa, Cal. — C. E. Kocher, Hardware, stoves, etc., has opened new store at Merced.

Quincy, Mich.—A. L. Lytle, Hardware, will open store.

Salt Lake, Utah.—Mayor Boyle, who has decided to engage in the Hardware business, has taken the room on Washington Avenue formerly occupied by the Boston meat market.

Urbana, Ohio.—Howard Townsend.

Changes and Improvements.

Alvin, Tex.—Pridman & Kimmins, Hardware, have dissolved partnership, J. R. Kimmins purchasing the interest of J. T. Pridman.

Beemer, Neb.—Mr. Middlestead, of Norfolk, has opened a branch Hardware store here with Frank Prawitz, of Wisner, as manager.

Bel Air, Md.— T. J. Price, Hardware dealer, trading as R. H. Gorsuch & Co., has erected a new store building, 72x18 feet, with cellar, including vaulted pavements and glass front, that gives him three times the floor and wall space of the old building.

Bridgewater, S. D.—Wm. Savage, Hardware, reported sold to Meek & Scott.

Calman, Iowa.—Megorden Bros., Hardware, etc., succeeded by J. D. Becker.

Clearwater, Neb.—G. W. Rankin, Hardware, succeeded by J. H. Smith.

Chattanooga, Tenn.—F. H. Woodworth & Co. have established a branch store at Chickamauga Park near the Dyer House, where they are carrying a full stock of Hardware, tinware and general military camp supplies. The firm, on account of the immense trade they have received from the army, found it necessary to establish this branch store.

Columbus, Wis.—The Hardware business of the late G. C. Stevens has been purchased by L. Berdoll, of this city, and Wm. Radtke, of Watertown, the style of the new firm to be Berdoll & Radtke.

Detroit, Mich. — Jacob Darmstaetter & Co., Hardware, reported to have sold out.

Devils Lake, N. D.—T. A. Galbraith, Hardware, succeeded by B. S. Estes.

Elkin, N. C.—Hubbard & Roth have sold their stock of Hardware, implements, etc., to the Elkin Hardware Co. E. F. McNeer and Will. M. Bill are the members of the new firm.

Eureka, Kan.—H. L. Stoddard, Hardware, sporting goods, etc., has been succeeded by M. Evans.

High Springs, Fla.—Ira J. Carter, Hardware, sold to Higdon Bros.

Johnstown, Pa. — G. Bantly, dealer in Hardware and builders' supplies, has moved from No. 134 Clinton Street to his new store, corner of Main, Bedford and Levergood Streets, where he has six times the floor space he had in the old store. He has added stoves and ranges to his line.

Kensett, Iowa.—Eckert & Williams have sold their Hardware store to Arndts & Sayre.

Lorimor, Iowa.—Jackson Hardware Co., Hardware and agricultural implements, succeeded by J. H. Parks.

Marshall, Mich.—Cook Bros., Hardware, stock has been purchased by Leedle Bros., of Fowlerville, who is now in possession.

McDonough, Ga.—McDonough Hardware Co., succeeded by C. W. Strobhar under same style.

Milwaukee, Wis.—The Mathews Sporting Goods Co. have sold out to Skidmores.

Northville, N. Y.—Wilson & Ressequie, Hardware, succeeded by C B. Ressequie.

Oblong, Ill.—Bottenfield & Bottenfield, Hardware, etc., succeeded by W. R. Bottenfield.

Rantoul, Ill.—Crane & Gulick have sold their Hardware store to Frank M. Connor for $3750 cash.

Rose Hill, Iowa.—L. M. Bacon, Hardware, has sold his business to Archibald Wymore.

San Antonio, Tex.—A. Heusinger, Hardware, stoves, etc., has sold and transferred his stock of goods to the Heusinger-Basse Hardware Co.

San Pedro, Cal.—B. B. Brentner & Co., Hardware, reported sold to John Lloyd.

Shelby, N. C.—C. H. Shull has sold his Hardware store to A. C. Miller, and Mr. Miller in turn sold the entire stock to T. K. Barnett within a few hours.

Snyder, Neb. — Wolsleger & Eckroat, Hardware, agricultural implements, etc., succeeded by W. J. Wolsleger.

Sparta, Wis.—Simpson & Schmidt, Hardware, succeeded by C. E. Simpson.

Springfield, Mass.—The Victor Sporting Goods Co. have begun moving from Chicopee Falls to the new quarters on Lyman Street in this city.

Stark, Kan.—J. A. Lowe, Hardware, etc., reported to have sold out.

St. Petersburg, Fla.—J. R. Morse, Hardware, etc., sold to Stoner & Son.

Utica, N. Y.—McLean & Frey, stoves, etc., succeeded by C. S. McLean & Co.

Westchester, N. Y.— Bowne & Ferris, Hardware, etc., out of business.

West Concord, Minn.—Charlton & Wright, Hardware and agricultural implements, succeeded in Hardware by J. L. Brink.

West Superior, Wis.—Monck & Relihan, Hardware, succeeded by B. L. Monck.

Yale, Mich.—The Hutton Hardware Co. has been removed to the McKenna Block.

Business Embarrassments.

Brockton, Mass.—C. C. Keith, Hardware, reported to have made an assignment.

Boston, Mass.—J. P. Wescott & Co., Hardware, reported to have gone into voluntary bankruptcy.

Canton, Ohio.—Barber Bros., proprietor of the Racket store here, assigned recently for about $12,000, with preferred creditors for $10,000, naming R. W. Mosby assignee. The assets are said to be $5000.

Holton, Kan.—W. D. Green, Hardware dealer, has made an assignment to J. F. Purvis. The total liabilities amount to $7087.44

Weimar, Tex.—A. F. Rose, dealer in Hardware, etc., has made an assignment, naming Albert Rose as assignee.

Burglaries in Hardware Stores.

Alma Centre, Minn. — Ringrose & Co., $150.

Butte City, Mont.—Butte Hardware store, $300.

Centreville, Iowa.—Goss & Sons, $250.

Clio, Mich.—Deyo Hardware store, $84.

Dresden, Mo.—W. E. Steele, cutlery.

Detroit, Minn.—John H. Smith & Co., $100.

Intercourse, Pa. — Hostetter & Hill, cutlery.

Lanes, Ill.—Lane & Davison, revolvers.

Lawrence, Kan.—The O'Brien Hardware store, burglarized, and a quantity of goods stolen.

Leaf River, Ill.—P. T. Sprecker, $30.

Lehighton, Pa. — Lehigh Coal & Hardware Co., $150.

Toledo, Ohio.—Biddle & Buzzards, small loss.

Recent Fires.

Altoona, Pa.—J. S. Waltz, damaged by fire at a loss of $1500.

Charlotte, Iowa.—G. P. Gollman's Hardware store has been destroyed by fire.

Dana, Iowa.—Siggels' Hardware store has been destroyed by fire.

Deshler, Ohio.—Warner & O'Dell's Hardware store destroyed by fire.

Halifax, N. S. — The Hardware and chandlery establishment of Crowell Bros. has been badly damaged by fire. The loss is estimated at about $15,000, partially insured.

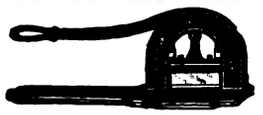
Park City, Utah.—Charles A. Tewksberry, Hardware, destroyed by fire; insured for $1700.

Portage la Prairie, Man.—A. B. Ashdown's Hardware store has been damaged by fire to the extent of $3000.

Pulaski, Iowa.—O. E. Ten Eyck, Hardware and agricultural implements, damaged by fire at a loss of $4400; insured for $6000.

Millville, N. J.—A. Branduff's Hardware store, damaged by fire.

Quincy, Mass.—G. B. Bates' Hardware store has been damaged by fire to the extent of $3000.



Wellsboro, Pa. — Webster's Hardware store has been destroyed by fire.

Winnipeg, Man.—The warehouse of Geo. D. Wood & Co., wholesale Hardware merchants, has been damaged by fire. The loss will be several thousand dollars, principally by water. The place was fully insured.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Etc.

Bridgeport, Conn.—The Union Metallic Cartridge Co. are building a one-story brick structure as an addition to their factory. The new building will be 186 feet long and 18 feet wide and will be built of fireproof material. It will be used as a storeroom, as the space taken up by stock in some of the other buildings is required for manufacturing purposes.

Buchanan, Mich.—The machinery of the Michigan Cutlery Co.'s factory is being packed for removal to Fremont, Ohio. They contemplate leaving the first of July.

Charleston, W. Va.—The West Virginia Grubber & Tool Co. has been chartered. The principal offices will be in Charleston. Capital stock, $100,000. Incorporators: G. W. Atkinson, W. S. Laidley, H. C. McWhorter, J. A. de Gruyter and Fred Gardner, all of this city.

Cleveland, Ohio.—The Cleveland Ball & Screw Co. was incorporated recently by Leo. Mayer, Wm. Greenbaum, Henry F. Klein, H. Franke, F. G. Caldwell, Sol. Bamberger, T. Epstein and G. J. Bailey. Capital, $10,000.

Columbus, Ga.—W. H. Young will establish a plant for the manufacture of terracotta sewer pipe, drain pipe, etc. Equipment of machinery is now being negotiated for.

Detroit, Mich.—The Detroit Air Brake Co., Ltd., was incorporated recently. Capital, $100,000.

Kansas City, Mo.—The Home Comfort Sad Iron Co. have filed articles of incorporation with the recorder of deeds in the sum of $30,000. The stockholders are: Charles E. Jordan, M. J. Cordray, John C. Cruikshank, B. C. Smith and A. E. Cordray.

Louisville, Ky.—Falls Chain Works, manufacturers, moved to Jeffersonville, Ind.

Montreal, Can.—The Montreal Hardware Mfg. Co. has been incorporated with C. E. Delorme as manager.

New Haven, Conn. — The Henry G. Thompson & Son Co. has been incorporated to manufacture saws.

Richmond, Va.—The Virginia Mfg. Co. has been incorporated, with capital stock of $150,000, to conduct machinery works, deal in machinery, etc.: R. A. Lancaster, president; Wm. H. Lucke, secretary-treasurer; W. H. Palmer, Clay Drewry, R. A. Lancaster and Wm. H. Lucke, of Richmond, and Percy L. Block and J. E. Mastin, of New York, directors. The company succeed Talbott & Sons' Co.

Changes and Improvements.

Peekskill, N. Y.— The Peekskill Stove Works have been sold to the William M. Crane Co. This has been one of Peekskill's largest foundries for the last thirty years, and was formerly known as the Montross & Lent foundry. The new company was formed recently with $250,000 capital, $200,000 being paid in. The officers are: President, William M. Crane; vice-president, Charles F. Terhune, both of New York City; secretary and treasurer, George H. Warner, Roselle, N. J., and Charles D. Shepard, superintendent, Peekskill. The William H. Crane Co. have purchased the complete stock, plant, books and accounts of the stove works, and have taken possession. The purchase price is withheld. Mrs. Sarah E. Lent, the widow of Cornelius C. Lent, former president of the stove works, retains control of the real estate.

Changes and Improvements.

Albany, N. Y.—Nelson Lyon and Edward J. Scopes, who jointly manufactured and sold a patent egg-beater, at No. 52 Green Street, have dissolved partnership.

Ashland, Ky.—The Ashland Steel Co. have now under construction as an addition to their large Bessemer steel plant a wire rod mill (Garrett type) of 350 tons capacity daily, also wire drawing plant and continuous train for making sheet and tin-plate bars. All the machinery has been contracted for.

Buffalo, N. Y.—The name of the McKinnon Dash & Hardware Co. has been changed to McKinnon Dash Co. The company have manufacturing plants at Buffalo, N. Y.; Troy, Ohio; Cincinnati, Ohio; Syracuse, N. Y., and St. Catherines, Ont. They are manufacturers of carriages, dashes, fenders, roll-up straps and prop block washers.

Deckertown, N. J.—The United States Wire Nail Co. have leased the Kilmer Works at Newburg and will take possession July 17th, when it is expected the plant will be worked to its full capacity.

Detroit, Mich.—The Buhl Stamping Co.'s tinning plant, near the corner of Third and Larned Streets, which has been destroyed by fire, will be rebuilt immediately. The entire damage is estimated at $15,000 and insurance amounting to $12,500 is held on the stock and machinery.

Cleveland, Ohio. — The Union Rolling Mill Co. will not close down their mill entirely, during the hot weather, as is unsually done, because of a large number of unfilled orders. Manager Fuller states that each department will be shut down for a few weeks in order to make the necessary repairs, but at no time during the summer will the mill be closed down entirely.

Louisville, Ky.—The O. K. Stove Co. have completed their new foundry, built to replace the one recently burned; will employ 190 men and have capacity increased 25 per cent. over the plant destroyed.

South Connellsville, Pa.—The Slaymaker-Barry Co. have determined to rebuild the lock works at once. Workmen have been employed preparing the site for the new buildings, and plans and specifications were completed a few days ago. The contracts will soon be let.

Recent Embarrassments.

Chicago, Ill.—The Chicago Stamping Co. failed recently and confessed judgment, in the Circuit Court, in favor of Frank Sturges for $244,340. The company was founded by Mr. Sturges more than twenty years ago, and manufactured tinware, chiefly dairy supplies. It was subsequently incorporated as a stock company, with a capital of $350,000, and a bicycle manufacturing department was added. This involved the company in financial disaster. The factory's value, with that of its contents, is thought to be sufficient to satisfy the judgment in favor of Mr. Sturges.

Recent Fires.

New York, N. Y.—A fire broke out June 29th, in the building, Nos. 15-21 Cliff Street, occupied by the Lalance&Grosjean Mfg. Co.; Phelps, Dodge & Co., the Ansonia Brass & Copper Co. and the Ansonia Clock Co. The two upper floors were burned out completely and the remainder of the building was seriously damaged by the immense volume of water which it was necessary to pour into it. The admirable sample room which the Lalance & Grosjean Mfg. Co. had just finished is referred to by them as being a loss greatly regretted. They will at once duplicate it and rebuild the damaged premises.

West Point, La.—The American Handle Works have been totally consumed by fire. No insurance.

Miscellaneous.

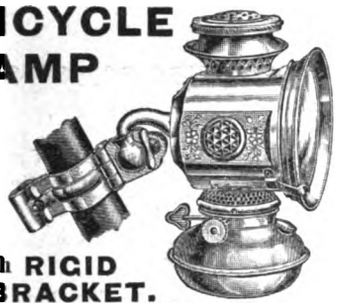
Clarksville, Tenn.—A. G. Schellenberger, of Bloomington, Ill., has made a proposition for the establishment of a plant in Clarksville, for the manufacture of brass art goods, tools, machinery, etc.

Kansas City, Kan.—About thirty novelties are manufactured by the Novelty Mfg Co., comprising dish washers, step ladders, fire ladders, an adjustable shade hanger, and many others.

Kansas City, Mo.—The Kansas City Bolt & Nut Co.'s plant, located in the east bottoms, cover the western half of the United States in the distribution of their varied lines of iron products.

Meriden, Conn.— The Meriden Cutlery Co. have a government contract for 100,000 army knives.

Nashville, Tenn. — The Turner, Day & Woolworth Mfg. Co., of Kentucky, have leased the Nashville Spoke & Handle Co.'s plant, located on Adams Street, for a period of five years, at an annual rental of $3000. In addition to the plant in Nashville, the lessees also get the use of three mills, one of which is located at Theta, Williamson County, another at Allgood, Putnam County, and the third at Pulaski, Giles County.



New Britain, Conn.—George Ashley has been granted a patent on a combined door closer and check.

Terryville, Conn.—The Eagle Lock Co. have erected a flag pole on top of the Ogden factory and recently raised a handsome silk flag over 100 feet in the air. On the top of the pole are the four cardinal points over which rests an immense gilded eagle weather vane, which with the flag commands a view from every street in the town.

Recent Fires.

Menominee, Mich.—A. Dudley Mfg. Co., damages not exceeding $100.

Norfolk, Neb.—A defective brazier was responsible for a blaze in the back room of Conley's bicycle works.

Philadelphia, Pa.—May Bicycle Works, No. 628 North Fifth Street, slightly damaged by fire.

Youngsville, Pa.—J. A. Sagerdoll, bicycle repair shop, damaged by fire at a loss of $1500; insured for $400.

Miscellaneous.

Chicago, Ill.—The first woman's safety in this city was the Dart, manufactured by the Smith Co., of Washington, D. C. It was ridden by Mrs. L. M. Richardson, the wife of the manager of the Monarch Cycle Mfg. Co., who began riding a safety in 1888. The machine had 26-inch front and 28-inch rear wheels, and weighed about sixty-five pounds. Mrs. Richardson was one of the first women in the United States to take up cycling, beginning on an English Harvard cycle in Milwaukee in 1880.

Detroit, Mich.—The Park Commissioners have at last decided upon building a bicycle shelter on Belle Isle. The structure is to cost in the neighborhood of $9500, and will be greatly appreciated.

London, Eng.—According to the latest reports from the British Patent Office last year there were 30,958 applicants for patents, of which 6000 were for inventions connected with cycling. These figures are 765 (or 2.5 per cent.) higher than in 1896, when the record was established by an excess of 5131, or over 20 per cent., as compared with the previous year. America contributed 3084 of the number.

Philadelphia, Pa.—The Lake Ball Bearing Co. now control all the patents on bearings taken out by E. B. Lake The bearings are used in bicycle construction.

APPLE PARERS.

Since 1864 the making of apple parers has been an important feature of our business; and, as we are constantly looking for improvements, and making use of them, too, our present line, which consists of nine different machines, although not all new, may be said to be the culmination of thirty-four years of practical experience.

The illustration here given represents the WHITE MOUNTAIN PARER, COREr and SLICER. It has been imitated (not once or twice), but never equalled, and is to-day the most durable, substantial and satisfactory low priced Parer, Corer and Slicer for family use; and, we may also say, the one most widely known and used.

We have made it a point to supply every need in the line of apple parers for homes, hotels, restaurants, bakeries and evaporating factories.

Our new machine, THE TURN TABLE "'98" (it pares and knocks off the apple) is meeting with wonderful favor. We verily believe it has more good points to the square inch than than any other parer we ever saw. If you hav'n't seen it, you should. Most jobbers are selling our parers. Catalogue free. . . . . .

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

AGENCY JOSEPH RODGERS & SONS, LTD.

THE BEST IS EVER AND ALWAYS CHEAPEST.

The merchant can recommend with confidence.
The consumer will report superiority.
Excellence will insure enlarged demand.
Satisfaction will leave no ground for complaint.

Why, then, sell inferior Cutlery when THE VERY BEST can be had at a small advance over poorer QUALITY?

FOR CENTURIES THE WORLD RENOWNED HOUSE OF
JOSEPH RODGERS & SONS, LTD.,
SHEFFIELD, ENGLAND,
Has had neither equals nor superiors in the manufacture of

CARVING KNIVES and FORKS,
TABLE CUTLERY,
SCISSORS,
RAZORS,
HUNTING and BOWIE KNIVES
POCKET CUTLERY, &c.

Its Corporate Mark

Is among the oldest, and now over 200 YEARS old. It is known the world over as a guarantee that all articles so stamped are absolutely superior to all others.
We are the sole agents in the United States for JOSEPH RODGERS & SONS and carry a full line of their manufactures in stock.
If you cannot procure goods of their make from your jobber we shall be pleased to supply full information on application.

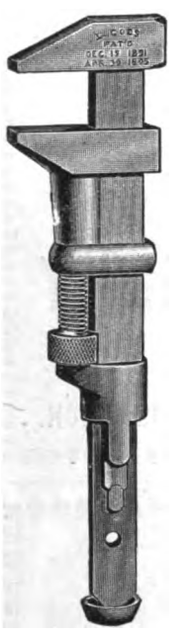
"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR



Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

IRON ROOF
FOR SALE.

Width of building, 155 feet out to out, divided into a center span 66 feet, with a wing on each side 43 feet 6 inches; total length of the building 350 feet. This building is designed with brick sides and gable walls, with Iron Roof Trusses and Iron Supporting Columns; originally built for an Iron Foundry, but owing to the failure of the purchaser is now offered for sale at a bargain. Is admirably adapted for a Foundry for light or heavy castings, Machine Shop, Car Barn, or for any other general manufacturing purposes. We guarantee the iron work as good as new, building never having been used.

"Bright & Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

HARDWARE

VOL. XVII. JULY 25, 1898. NO. 8.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The improved conditions surrounding the movements of our army and navy at Santiago, predicating as they do the possibility of an early, peaceful settlement of the war, are exerting a beneficial influence upon the plans already formulated for the fostering of a better trade this fall, and the necessary preparations so essential to undertake, when the possible demands for current requirements are fully understood.

In the minds of many leading manufacturers the business of the coming season is destined to be a large one. Preparations are being made on every hand to have goods in stock for immediate delivery when required upon early orders; but while every attempt will be made to meet the views of jobbers in regard to fuller and more complete supply than was possible last spring, it should not be forgotten that the day is passing when the manufacturer can be expected to carry in his warehouses full requirements of stock, the greater part of which should, through anticipatory orders, be on the shelves or in the storehouses of his customers, the jobbers.

This season's trade will be a favorable one to encourage the change from the methods prevailing for some years past. Everything points to a trade of increasing activity. Crops of every description will be found large and abundant and consequently fully as profitable on the whole, as last year's exceptional product.

We should not expect the export of grain to equal last year, but as the European demand continues fairly good, prices will doubtless be maintained on a satisfactory basis. The fine showing made by exports of manufactured goods for the fiscal year just closed which were heavier than ever before, was in keeping with the exhibit made in other respects, where the exports doubled the imports and left a trade balance in our favor double in amount of any previous record.

Already the pushing characteristics of our countrymen are following up advantages gained by the success of our arms. As fast as the American flag waves over a country subjugated by the fortunes of war, our hustling merchants are ready to find new fields for commercial effort, and seek the necessary facilities for the encouragement of traffic. Already proposals for National banks in Honolulu, Porto Rico and Manila, have been submitted to the comptroller of the currency and there can scarcely be a question of the great impetus that will be given to commercial prosperity at the moment that the white dove of peace appears in sight and the flutter of its wings approaches within hearing distance.

A largely increased number of buyers is already noticeable in the city, and is being added to daily. The conditions so far have been of a character which has not changed the conservatism previously prominent. As in almost every case reports of an anticipated good fall trade are dwelt upon, the influence upon the prospects has a better effect upon our local jobbers than would be encouraged by current demands.

Trade still continues dull in the Eastern States, which are usually the latest to feel the quickening impulses of a revival; but in the West it is reported fairly active and for a midsummer trade remarkably so, comparisons with previous summers conveying a very hopeful feeling to the dealers.

No radical changes in prices of staple products are reported, and until trade is fairly under way and movements of merchandise in the way of purchases are features of encouraging importance any stiffening of quotations liable to affect sales can scarcely be apprehended.

When the War is Over.

At the close of this war it is just possible that conditions will follow which have no parallel in our Nation's history. The fact will have become established that a standing army of 100,000 men and a navy of commensurate importance will from henceforth be a part of our national policy, and instead of unloading this large body of workers upon the labor market, as was the case at the close of the rebellion, they will continue in the service of their country, becoming consumers only, for whose welfare the whole country will be called upon to contribute.

An increased demand for productive labor will be felt throughout the land, and opportunities for advancement will be offered our young men just developing into manhood, that under the conditions of the past few years would have been almost impossible of achievement. Skilled labor growing scarce under an increased demand, will stimulate to the utmost the ambition of our young artisans, and with each succeeding year there will result a noted advancement in all the channels of ambitious employment. This will bring to the front American principles, native genius and adaptability, and that restless energy and definiteness of purpose which characterize the Yankee character wherever known, eventually making its way with no uncertain development and finally becoming the beacon light of intelligent labor throughout the world.

Fortunes in embryo are lying among the fertile plains of those possessions now occupied by our forces, and

Digitized by Google

long under the rigid rule and undeveloped advantages of the existing Spanish government. It will remain for our industry-creating people to push to the utmost opportunities such as these, and reflect fully the wealth-making resources possible under modern methods in our captured territories; wealth that will find good American citizens ready to create, enjoy and fructify without the fear of a tribute to Hidalgo demands that will absorb 50 per cent. of it, which has previously limited the efforts and handicapped the energies of a population without the ambition to lead the world so prominent in the American character.

Everything Seems Favorable.

Our manufacturers have become accustomed to the knowledge that large transactions and small profits form the basis of our future industrial strength, and every possible achievement that can convince the buyers in the markets of the world that our ability to compete must be successfully recognized, will establish a prestige of power on solid lines of growth, which we shall never see degenerate in the manner so inseparable from former methods—that of our becoming indifferent to progress in the foreign markets we had captured, when influences of a healthy character developed nearer home.

In our home markets it is no longer necessary to rely upon the idea that large crops should be followed by a business boom of uncertain duration. Labor interests are well protected in all sections, work seems to be plentiful at fair wages and harmonious relations between labor and capital brings in its wake remunerative employment for the willing worker and with no fear apparent that any change detrimental to industrial interests need be apprehended at the close of the war or the inauguration of a promised peace.

The solid foothold gained by Great Britain in many countries where her merchants and manufacturers have previously held undisputed sway, has been built up by an indulgent system of long credits and unequalled facilities under the sheltering wings of which sales have been consummated with but little competition on the part of our own industrial development, but which now demands recognition from intelligent buyers who have been educated in the belief that American skill is difficult to overreach and that we shall hereafter demand our share of all the good things within the power of foreign markets to bestow.

New Members of the Hardware Club.

At a meeting of the board of governors of the Hardware Club of New York, the following gentlemen were unanimously elected to membership:

Charles B. Castle, manager B. F. Goodrich Co., No. 66 Reade Street, New York.

F. A. Larkin, manager Edward P. Allis Co., No. 26 Cortlandt Street, New York.

A correspondent asks for information as to where Stone's Patent Coat Collar Springs are made. We have been unable to find this article or its maker. Possibly some of *Hardware's* readers can tell us.

"Father, what does 'Morro' mean?"
"A bluff, my son."
"Isn't that what the Spaniards put up?"
"It is, my son, it is!"

Pacific Coast Hardware & Metal Association.

The fourth annual convention of the Pacific Coast Hardware & Metal Association opened its session in the Board of Trade rooms, San Francisco, Cal., on Thursday, July 14th. The leading merchants of the Hardware and metal business from various points upon the coast were present. The annual reports of president Brace Hayden, secretary W. C. McCloskey, and the finance committee showed that the association was in a flourishing condition. On Friday, the 15th, the discussion of various topics of interest was carried on through the day, and the following officers were elected to serve for the coming year:

President: Brace Hayden.
First Vice-President: W. Honeyman.
Second Vice-President: C. C. Reynolds.
Third Vice-President: William Schaw.
Treasurer: John F. Merrill.
Secretary: Frank L. Brown.
Assistant Secretary: W. C. McCloskey.
Executive Committee: W. R. Wheeler, A. A. Watkins, Wakefield Baker, E. F. Selfridge, A. L. Scott, C. F. Tay and A. A. Wigmore.

The usual standing committees were appointed by the president, which are practically the same as those of last year. At noon the delegates were entertained at lunch by Mr. Brace Hayden, at the Cosmos Club, and in the evening a banquet was given at the Palace Hotel.

As a means of stimulating the usual sluggish trade of July, and in order to brighten things up a little, the Bissell Carpet Sweeper Co. on the 15th of this month sent a postal card to their customers which read as follows: "To our customers: At this hot season of the year what could you present to a customer that would be more appreciated than a Japanese fan? We have a limited quantity of these fans, and while they last we agree to supply 100 gratis with each dozen Bissell sweepers, part of which must be 'Cyco' bearings ordered prior to August 15, 1898. You can put your name on the fans with a rubber stamp and thereby carry your advertisement into a hundred homes or more without having it cost you a cent. Remember, first come, first served."

John S. Kirby, the junior partner in the firm of Vance & Kirby, wholesale Hardware dealers, at Chattanooga, Tenn., died on the afternoon of July 6th, at Urbana, Ohio. The immediate cause of death was stomach trouble, from which Mr. Kirby had suffered many years. He was 58 years of age at the time of his death, and for twenty-seven years has been a member of the above firm, during which time no change in the firm has occurred. While Mr. Kirby was a resident of Urbana, Ohio, his interests were largely with those of Chattanooga, and he did everything within his power to assist in the up building of the city.

The latest output from the publicity department of the Troy Nickel Works, Albany, N. Y., is a series of "Hard Facts for 1898." This shows that not only are the Alaska goods "Always Cold," but illustrates and describes the line so that anyone can see at a glance just the kind of goods that are offered, with the prices attached. This includes all their pokers, lifters, shovels, tack hammers, stove-pipe dampers, Electric ice picks, fire-sets, soldering iron handles, etc. This useful publication will be sent on application.

Mayaguez, a town in the western part of Cuba, facing the Mona channel, has 20,000 population, the majority white, and an excellent climate—the temperature never exceeding 90 degrees. Its average annual export of coffee is 170,000 hundredweight, and it imports each year 50,000 bags of flour from the United States.—*Exchange.*

HARDWARE NOTES BY THE WAY-

A business trip embracing territory west of the Alleghenies impressed me very favorably with conditions now prevalent. The volume of trade is good, and while merchants complain of slow collections, this defection will be wiped out as soon as the farmers can realize on their new crops. Travelers covering Western territory, especially in the cereal belt, take a hopeful view of the outlook for autumnal movements, crops being generally abundant and market prices higher than for many years. The retarding influences of the war, so evident in other industrial channels, have not as yet cropped out in the iron and Hardware branch. Take, for instance, structural Hardware. Contractors throughout the West are complaining of an inadequate supply. Many structural iron concerns are working night and day, and yet a prompt delivery of orders is almost an impossibility. This speaks volumes for the activity in the building industry.

The war tax levies have not disturbed the trade. Every one is willingly paying his tribute. Calamity cries have been superseded by patriotic acclaim; and the final passage of the bankruptcy act has stiffened the backbone of the trade considerably. Even the anti-war element of the trade stands now ready to offer a vote of thanks to Congress, and accept the bankruptcy law as a *quid pro quo* for the new war tax imposts.

Not an unusual activity, but a good, steady demand, has characterized summer lines thus far. The cycle trade has been a little slow, it is true, but the volume is representative. The bargain fever struck this trade earlier than usual, and standard wheels are now quoted at remarkably low figures. But this move has put an embargo on cheap makes, with the result that the market is now glutted with non-standard wheels.

The Arcade File Works, through an agency, have received some very effective advertising in a simple but taking window exhibit. Arrangements had been made with a locksmith to practically demonstrate the superiority of the Arcade files by comparative tests. The window was used as the workshop. There was nothing to explain the purport of the "show" but the subscription on the window plate: "Save time—The Arcade Files will do it." A man at the door invited the public to "file in" and attend the only "file show" on earth. Each onlooker was presented with a card with the text: "Snide files are running riot now. So does the hot weather. If time is worth money, it's worth money to save time. This is a hot weather exhibition given to help you save time. The exhibition is free, but Arcade Files cost money. But the time you save using them pays the bill. See the profit lesson?"

If you have tried every other thing in your window displays look over your faucet line and bring it out. A faucet display is actually interesting. A very attractive one might be had thus: Assemble every faucet you carry about a barrel of molasses to which has been fitted one of the measuring faucets made by the National Specialty Mfg. Co. or any other concern. Of course, this exhibit may draw flies, but then you have a chance to trot out your fly catching devices at the same time. As a dog-day's advertisement this isn't a bad idea.

"The Imperial wheel, the go-lightly kind. But don't leave it in a dark alley unattended," is an advertising trick recently come to notice.

If you can convince the householder that the washing machine is a necessity and the public laundry merely a convenience, washing machine sales would be far larger than they actually are. It still needs a lot of introductory work to popularize these machines among the masses and the manufacturer must share in the expense. As it is, Hardware merchants seldom care to handle a machine that is not advertised. It's essentially such things as a washing machine that receive direct benefit from the use of printer's ink.

While visiting a soldier's camp in the South I noticed the prevalence of Sargent & Co's steel coat and hat hooks. They were fastened everywhere—about the tents, on posts and trees. How did they get there? An outpost informed me that a foraging party had discovered a box filled with these hooks at a railroad embankment, and considering it as a war prize had appropriated it to the use and comfort of the camp. Well, if the goods were lost in transit, the advertising and gratitude the manufacturers or shippers will get out of the loss will more than indemnify them.

If you can't be a "Sampson" in competition get in on the "Schley." "If you can't Dewey't, surrender or bust," is the heroic motto discovered in a Cleveland business office.

Here's a curiously worded illustrated advertisement perpetrated by Withington & Cooley Mfg. Co., of Jackson, Mich.: "He missed a buzz saw, only to step into a corn hook. He is now plus a hand but minus a foot. But it wasn't our fault. Our hooks are made to cut corn, not feet. But if they can cut feet, they can cut corn." Some enterprising specialist might "trim" an excellent window display out of this ad.

Cleveland, July, 1898. J. B. REINDFLEISCH.

A Heated Protest.

Editor Hardware: We are long suffering and slow to wrath. We prefer to return words of kindness for evil deeds, and seek to cultivate a spirit of sweet forgiveness under all circumstances; but there is a limit to our endurance, and that limit has been reached. During the past week of sizzling heat we have been compelled daily to pass the office of a railroad ticket agent, who seeks to persuade the unwary to tempt fortune in the Klondike. He has as an accomplice, a weird, uncanny semblance of man, who occupies a position at the front door. This fiend, this ruthless torturer of feelings, wears throughout the long day a complete Klondike outfit—wools, furs, leggings, mittens, capote and the rest—and actually *looks cool* through it all.

We have tried to forget him and remember the *Maine;* have skulked past on the opposite side with averted eyes; have gone around the block to avoid his cold sneering gaze, all to no purpose. He still confronts us in our disordered mind. We even have re-visited his haunt after nightfall; when the weary business man, exhausted by the heat of town, and unconsolable by his family's absence, is trying to gain a few moments' rest at Coney Island or the uptown roof gardens. Alas! the carefully concealed club was useless. The phantom has retreated inside the locked and barred door, and grins in cold, unholy joy from the fetid, gas-heated atmosphere of the office. Our only hope is that our last despairing cry, as we seek eternal seclusion and rest in some friendly beer-stocked refrigerator, may awaken a thrill of remorse in his wooden legs and papier mache breast. R. ED. HOT.

In Cuba, cheese, coal, fish, flour, iron, jerked beef, lard, meat, olive oil, provisions, rice, soap, tobacco (manufactured), vegetables and wine, are the principal imports, amounting in value, for 1895, to $8,500,000.—*Exchange.*

Good Locks.—No. III.

We have given in previous issues an outline of the origin of the Yale lock and of the important elements of the inventions which it embodies. We now show the evolution of that lock in what is perhaps its most popular and best-known form, namely, the Yale Rim Night Latch. The earliest form of this lock naturally followed, in external

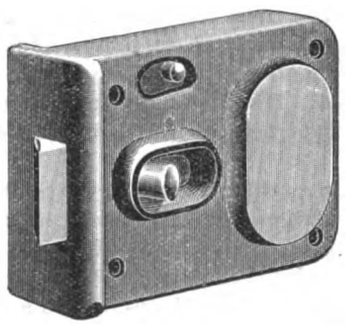

FIG. 1.

appearance, the general practice of the trade which obtained at the time of its introduction, namely, about 1867, and is shown by Fig. 1. Even at that early day the makers of the Yale lock undertook to supplement the radical advance it embodied in security and mechanical excellence by equal improvement in external appearance. Locks as then made were universally of plain, and usually of crude design and appearance. Viewed from the present stand-

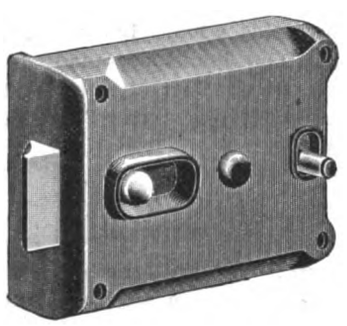

FIG. 2.

point, the first efforts at improvement appear crude, but they show unmistakably the effort to introduce better principles of design. Fig. 2 shows the first move in this direction. This design was introduced about 1870, but was quickly followed by that shown in Fig. 3. The latter marks a distinct advance, and its inherent merit is best evidenced by the fact that the design proved immediately popular, was retained by the makers for many years and finally was

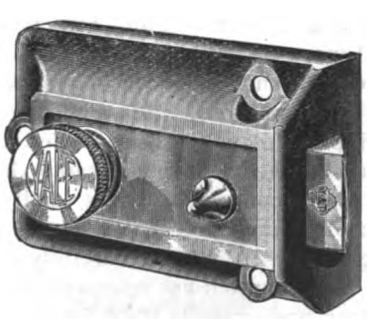

FIG. 3.

copied in appearence by substantially every other American manufacturer of locks. A glance at Fig. 1 and 3 will indicate the marked advance of the latter over the former in good designing.

Fig. 4 shows the 1897 model and thus represents the Yale No. 42 Night Latch in its latest form, which includes not only the evident improvement in external design and appearance, but also the still more important improvement in security embodied in the paracentric key and cylinder described in our issue of January 25th.

The bit of history embodied in the above illustrations is interesting not only with reference to an American inven-

FIG. 4.

tion which has become famous throughout the world, but as illustrative of the progress in artistic directions which has become so marked a feature in American industries and

FIG. 5.

in which the Yale & Towne Mfg. Co., in the industry with which they are identified, have long held a position of recognized leadership.

Science Utilizes All the Ox.

In an article on the "Wonders of the World's Waste," William George Jordan, in the October *Ladies' Home Journal*, details how science at the present day utilizes the ox. "Not many years ago," he says, "when an ox was slaughtered, forty per cent. of the animal was wasted; at the present time 'nothing is lost but its dying breath.' As but one-third of the weight of the animal consists of products that can be eaten, the question of utilizing the waste is a serious one. The blood is used in refining sugar and in sizing paper, or manufactured into door knobs and buttons. The hide goes to the tanner; horns and hoofs are transformed into combs and buttons; thigh bones, worth $80 per ton, are cut into handles for clothes brushes; fore leg bones sell for $30 per ton for collar buttons, parasol handles and jewelry; the water in which bones are boiled is reduced to glue; the dust from sawing the bones is food for cattle and poultry; the smallest bones are made into boneblack. Each foot yields a quarter of a pint of neat's foot oil; the tail goes to the soup; while the brush of hair at the end of the tail is sold to the mattress maker. The choicer parts of the fat make the basis of butterine; the intestines are used for sausage casings or are bought by gold beaters. The undigested food in the stomach, which formerly cost the packers of Chicago $30,000 a year to remove and destroy, is now made into paper. These are but a few of the products of abattoirs. All scraps unfit for any other use find welcome in the glue pot or they do missionary work for farmers by acting as fertilizers."

Postal Card Duns.

Postal card duns are mailable, it is claimed, provided a threat of placing the account in a collector's hands does not accompany it. For instance, the following is mailable:

"Please call and settle account which is long past due, and for which our collector has called several times, and oblige."

And the following is unmailable:

"You owe us $150. We have called several times for same. If not paid at once, we shall place with our law agency for collection."—*Exchange.*

MICHIGAN HARDWARE ASSOCIATION.

There were unusual signs of activity about the Hotel Cadillac, Detroit, Mich., on the afternoon of Wednesday, July 13, on the occasion of the third annual gathering of the Michigan Hardware Dealers' Association. This Association, a history of which was fully given in our special edition of April 10, 1898, has grown steadily in power and influence during the past year, largely due to the persistent endeavors of the officers, and especially to the labors of Charles F. Bock, its president. The attendance was good, and all who were present seemed specially interested in the proceedings, giving close attention to the business transacted. A list of those who were in Detroit on this occasion is as follows:

A LIST OF THOSE PRESENT.

C. M. Chamberlain, Kalamazoo.
C. L. Frizelle, Hancock.
H. B. Gunniss, Algonac.
J. Stahl, Lansing.
J. L. Capen, Detroit.
S. W. Winchester, Jackson.
G. M. B. Towner, Flint.
Edwin D. Foote, Flint.
Arthur J. Scott, Marine City.
John Popp, Saginaw.
Joseph F. Wolf, Saginaw.
Porter A. Wright, Davisburgh
D. L. Lazelle, Caro.
G. J. Shaefer, Dundee.
J. E. Ceury, Cheboygan.
J. J. Post, Cheboygan.
C. E. Pipp, Otsego.
A. R. Barrett, Union City.
W. F. Garretson, Detroit.
Alex. Lemke, Detroit.
J. S. Patterson, Detroit.
C. Gartner, Wyandotte.
F. R. Kedzie, Pittsford.
Chas. E. Moore, Saginaw.
C. E. Lawrence, Hillsdale.
Edward W. Morley, Saginaw.
Geo. N. Smith, Hillsdale.
Chas. F. Bock, Battle Creek.
H. C. Minnie, Eaton Rapids.
D. E. Quirk, Dexter.
T. L. James, Dexter.
F. M. Brockett, Battle Creek.
F. S. Carlton, Calumet.
F. A. Turner, Caro.
T. J. Martz, Detroit.
E. L. Smith, Lansing.
J. H. Temmink, Detroit.
Casper Hoffman, Detroit.
E. F. Achard, Saginaw.
G. W. Bruske, Saginaw.
C. W. Casper, Marshall.
J. L. Schneider, Detroit.
R. E. Brackett, Lansing.
Allen Crawford, Jr., Springport.
R. H. Reed, Carsonville.
Geo. E. Dean, Albion.
A. L. Young, Albion.
O. H. Gale, Albion.
W. E. Brosley, Marshall.
T. F. O'Leary, Marshall.
A. G. Rice, Detroit.
Geo. W. Hubbard, Flint.
E. S. Decaw, Sanilac Center.
A. H. Dane, Detroit.
T. T. Crandall, Detroit.
Chas. Campbell, Detroit.
J. A. Weston, Detroit.
S. Hunt, Detroit.
H. C. Weber, Detroit.
W. H. Wixson, Coleman.
F. H. Gibbs, Sturgis.
Chas. A. Strelinger, Detroit.
Fred. A. Stendel, Detroit.
W. J. Boyce, Port Huron.
H. B. Auger, Detroit.
J. W. Thorn, Owosso.
A. F. Wixson, Marquette.

THE OPENING SESSION.

The opening session occurred at 2:30 P. M., with Mr. Bock in the chair. After the call of the roll a committee on credentials was appointed, consisting of Messrs. F. J. Martz, of Detroit; L. B. Brockett, of Battle Creek, and E. F. Achard, of Saginaw. After a short period these gentlemen reported that all who were present had proper credentials and had a right to take part in the proceedings of the convention. The minutes of the last annual meeting were read by Henry C. Minnie, secretary, who also read the record of the proceedings of the Executive Committee, who met in Detroit in March last. Then followed the annual address of President Bock, who spoke as follows:

ADDRESS OF CHARLES F. BOCK.

It is with great pleasure that I welcome you all, but especially the many new faces I see before me, to our third annual session. I am glad, very glad, to congratulate you on the manifest interest in our association by the best and most progressive Hardware dealers in Michigan, with the healthy growth of our organization and the satisfactory trade conditions of our State. If there has ever been a doubt as to the future usefulness of this association, that doubt can safely be dismissed. We are here to stay and able to extend the benefits of our efforts to every Hardware dealer in Michigan.

We are entitled to and are receiving respectful recognition from the best and most substantial manufacturers and jobbers in the United States.

With wideawake efforts on the part of our new officers and members, our membership can be materially increased during the next twelve months. A majority of the dealers should be included in the membership. To make sure of this, I would suggest that if we cannot afford to employ a suitable canvasser, we might adopt the Minnesota plan of appointing a county organizer or solicitor in nearly every county. With the many intelligent men in our ranks, none should be excused from writing a paper on any subject when requested to do so by the Executive Committee.

Since our last annual meeting I have attended the meeting of the Indiana State Association held in South Bend last February; have attended the meeting of the Executive Committee in Detroit last March; have visited the trade in twenty-one cities and towns during my administration—viz.: Detroit, Ypsilanti, Ann Arbor, Jackson, Albion, Marshall, Kalamazoo, Dowagiac, Niles, Bellevue, Olivet, Charlotte, Lansing, Flint, Lapeer, Monroe, Adrian, Hillsdale, Grand Rapids, Muskegon and Eaton Rapids.

I have greatly enjoyed my trip and feel well paid for the time spent, and I have been cordially and respectfully received by all, have learned much about Hardware, and have formed some very pleasant acquaintances. I am indebted especially for assistance and time given me to Messrs. J. Stahl, Lansing; George Hubbard, Flint; George Wilcox, Adrian; Thomas Chamberlain, Detroit; C. M. Chamberlain, Kalamazoo; S. F. Stevens, Grand Rapids, and our faithful secretary, H. C. Minnie. Our association was peculiarly fortunate in having an efficient secretary from the start. Mr. Minnie is the right man in the right place. I find that the Hardware merchants of Michigan as well as in other States, are intelligent, substantial, progressive and honorable citizens, interested in the growth and welfare of their city and State. No class of men in any walk of life enjoy the confidence of their neighbors to a greater extent than do the dealers in Hardware.

Now, to maintain the dignity and pride of our calling, it behooves us to treat our customers at all times as we ourselves desire to be treated. We should deal in good, reliable goods and sell at reasonable prices; never allow ourselves or our employees to misrepresent. If an article sold proves defective or not as represented, make it right.

We cannot afford to ignore the trade journals. An hour or two every week spent in reading them will prove profitable to employer and employee. Every one of us can be instructed and learn something from the able paper presented by H. C. Wiseman, of the Ohio Hardware Association. After a careful survey of our business in Michigan, I am convinced that the subjects of syndicate buying and the exclusive cash system are not practical with the majority of our dealers, owing to the varying conditions of location. I am pleased to see the growing disposition to lessen the daily hours of labor of both proprietor and help by early closing. A good up to date salesman will accomplish as much now in nine or ten hours as formerly required twelve to fourteen.

In the word Hardware there are included a greater number of articles and there are more frequent names of

Digitized by Google

inventions added thereto than any other word in the English language. It requires a keen, observing intellect and a good memory to keep informed on the subject of Hardware.

To bring the work and usefulness of our association to a still higher standard, the Executive Committee should meet at least twice a year, and after carefully considering timely subjects, issue a circular letter to all members. At each annual meeting there should be selected one or two members to represent the association at other State meetings and bring to us subjects of interest and instruction. It will also be a step in the right direction to encourage the organization of a National Retail Hardware Dealers' Association.

Our association was largely instrumental in securing the passage of the fairest and best known lien law for the benefit of both laborer and dealer. This seems to be appreciated by all classes.

One more law needs amending for the benefit of honest laborer and accommodating creditor. I refer to the garnishee law of our State, which, with its $25 clause, shields unscrupulous debtors after having induced us by fair promises to let them have goods necessary for the comfort of themselves and families, enabling them to take advantage of the accommodating merchant. Where a laborer has not suffered by sickness of himself or family, has not lost employment or met with other misfortune, he should be compelled to meet his obligations for necessities, not luxuries. This amendment is quite essential to the future ability of our merchants to pay their debts, and as the general welfare of our State is measured and influenced by the prosperity of the Hardware and iron industries, a committee should be appointed to take charge of this matter and bring it to the notice of our next Legislature.

With the large increase in our membership, I deem it no longer necessary to keep the annual dues at $3. I recommend that they be changed to $2. After consulting with several members, I find them unanimously in favor of this change.

As an association we are justified in continuing to insist that manufacturers and jobbers of Hardware shall sell their wares only to the legitimate trade. We have much less cause for complaint on this subject than previous to our organization.

Gentlemen, I will weary you no longer, but again thanking all for the many courtesies received at your hands, I am ready to turn the office over to my successor, wishing you all abundant prosperity and success, and that you may live long to enjoy the good things which your well-directed efforts deserve.

The address of the president was listened to with close attention and vigorously applauded.

After some preliminary announcements the regular business of the association was taken up, which was opened by the reading of a paper by Charles G. Jewett, of Howell, Mich., whose subject was "Special Leaders at Special Prices; Special Sales Days as a Means of Advertising." He said:

ADDRESS OF CHARLES G. JEWETT.

The ethics of the Hardware business are distinct and recognizable from the ethics of all other businesses and professions, but it takes genuine genius to distinguish them after all. We in the Hardware business are looking eagerly for what others are looking for with no less eagerness—namely, profits. We are not in business as a matter of recreation or convenience, but to make money.

We might dissimulate and say that we are philanthropists, that we are doing business for the benefit of others, but even the ten-year-old school boy has been taught to look upon such sort of protestation as being of the nature of a broad humor, and we must forego the employment of the convenient subterfuge to save ourselves from being the objectives of twiddling fingers poised uncertainly on the terminals of impudent noses. The ethics of our business are the ethics of every other gainful profession or profit bearing enterprise. Why try to conceal it?

The progressive tendency of the times has converted every man, even the evangel, into a money-getter. Why try to make our fellow men believe what we ourselves do not believe by lifting the veil of ethics to cloak our real purposes?

The ethics of our business are to get business, just as the ethics of the medical profession or the clerical profession are to get business, and to get business we must make known to our fellows that we have business to do with them.

How can we establish, each for himself, a bureau of publicity and promotion that will give notice to the people of the respective communities in which we live that we are in business and want to do business with them, and after that get them to do business with us?

It is possible that the best answer is that the man that can conceive and execute such an enterprise successfully can command a salary exceeding that of the United States President, and at once assume a rank of importance that the world's benefactors have never dreamed of for themselves.

But if that is the best answer, it is not a satisfactory answer. What we want to know is how best we may use our resources and facilities to command trade and patronage that would not come to us by natural gravitation.

The resources and facilities of the trade are not common and universal. The Hardware merchant in villages and small cities does not command the sources of publicity that merchants in larger towns and cities command, and hence no general rule of publicity will apply to all localities with equal force.

For illustration, a merchant in the country may place a plow and a bag of fertilizer before his store, and that will announce to his zone of trade that he has plows and fertilizers for sale, and incidentally would imply that he had other staples in the Hardware line.

But the city merchant would announce himself a freak and also run the risk of getting himself into trouble with the constituted health authorities if he placed on the walk in front of his place of business a plow and a bag of fertilizer.

That would not advertise effectively to the city trade that he dealt in kitchen utensils, fishing tackle, screen doors, hammocks and lawn mowers. In short, it wouldn't be anything more than a suggestion that he was too lazy to take his farm supplies in out of sight.

Having this distinction in mind—namely, that what would be admissible advertising in the country might be absurd non-advertising in the city—we come at once to the question propounded by the subject assigned me.

Special leaders at special prices on anything in a sparsely settled region would be abortive, for the reason that with trade at its best the merchant must have normal profits on all goods sold, or else he cannot do business.

Special leaders at special prices on special sales days in large towns and in cities must depend largely on the originality, enterprise and popularity of the merchants making them—a gigantic success in one place might prove a lamentable failure in another, although the attractions are identical.

The measure of success that attends a special sale is not determined so much by the price of the article offered for sale as upon the reputation of the house offering it for sale. Let me make this clear: Suppose Jones offers a high grade lawn mower for $5, claiming that the regular price is $9 Ordinarily that kind of an offer, if generously advertised, ought to attract a large trade.

But Jones has the reputation of dealing in cheap goods.

Digitized by Google

The public has been drawn to his store by cheap prices, only to learn his goods are cheap. Therefore his sale of lawn mowers turns out to be a chilling frost. He gets no more trade than he would had he advertised his special sale price. He has fooled the people once or twice, and that settled it.

Now, let Brown advertise a lawn mower worth $7 for $5 on a day named, and in the season when lawn mowers are in demand. The public knows that Brown can be relied upon. He sells a score or more of lawn mowers at $5 and saves himself from loss. The people believe that what Brown says is true. You catch the idea, of course. Jones made a failure; Brown made a success. Brown sold his mowers at cost and enough other goods to pay interest and running expenses.

Brown succeeded in his undertaking—namely, he advertised himself, and added to his sales the other goods purchased by the people who came to buy mowers, but would not have been sold or seen except for the special sale.

But will special sales of special goods out of season attract trade and prove profitable? No. No merchant can ever expect to make money by giving goods away. He must sell to make a profit. If he cannot do that, he would better get out of business before the Sheriff visits him.

The first condition of business prosperity is confidence, the kind that establishes belief. The merchant must be believed nowadays in order to get trade. The time when people liked to be humbugged and laughed over deceit in trade is long way past. The early theory of Barnum would not be popular now, as is proved by his opposite method in later life and the excellence of the show that now bears his name and the excellence of the shows of his competitors.

In speaking with an advertising writer on this subject a few days ago he said to me: "Our aim in advertising is not to win a reputation for printing sharp repartee, which might be our own or borrowed from another, but to state plain truths about things to wear in a plain way. We want our 'ads' read at the breakfast table along with our news of the day and commented on by the members of the family. We have special sales; some of them look surprising, but back of every inducement we put is the reputation of our house. We make our label the synonym of value; when we say $15 suits for $5, we mean that we are offering for sale suits that we ought to sell for $15, and our patrons know it is so. Our sacrifice! Some of the suits cost us $12. But if they would not sell for $15 this year they would not sell for it next year. Then there is the interest and per cent. at least to be added besides, and in the end sold at a discount. The value of these suits sticks out like a sore on your nose, and while we lose on the special sale, we always sell hats, furnishing goods and other things for profit enough usually to make the sale save us." J. Michell, the man whose success in business is amazing to all other merchants, is positive and outspoken about special sales. Said he: "First, I believe in telling the truth in my ads; tell it strongly and offensively if need be, but nevertheless tell it, and I do it in and out of season. If I find myself loaded up with a line of unsalable goods in my department, I charge them up to loss. My concern about them is to sell them at any price that will not demoralize prices on other goods of like nature. We do cultivate special sales." J. L. Hudson believes in special sales, but his special sales are on a large scale, and embrace whole stocks of goods instead of separate articles." T. B. Rayl is one of the cleverest individual advertisers in Detroit, having something special for every day and saying something about it in a specially clever way. H. C. Weber carries the most genial face of any man in Detroit. He is a firm believer in special sales at special prices on special days, but his hard common sense, coupled with his devotion to established principles in business, leads him to advise scrupulous adherence to truth in advertising such sales.

I gather from my observations, experience and conversation with the trade that special leaders on special days are all right, provided you know how to do it. You must have originality and adapt your sale to the field you have, or you can hope to do but little. Having these, use your windows artistically, your newspapers judiciously, and your common sense prodigally, and you cannot fail to get good results from special leaders at special prices and special sales days.

A discussion of this paper followed, which was participated in by Messrs. Weber, of Detroit; Carlton, of Calumet; Achard, of Saginaw; Popp, of Saginaw; Chamberlain, of Kalamazoo, and others.

A brief address was delivered by George W. Hubbard, of Flint, on "Advertising in Its Up-to-Date Phases." This was well received, and was followed by an address from Hon. William Alden Smith, member of Congress from the Grand Rapids district, who spoke on the expansion of American trade and the dissemination of American ideas.

THURSDAY'S SESSION.

The regular proceedings were opened on Thursday morning by the reading of a paper by J. L. Capen, of Detroit, who spoke on the following subject: "An Honest Hardwareman the Pride of the Michigan Hardware Association." In the course of his remarks the speaker said:

There is, first, a legal honesty—that is, an honesty which is just honest enough to keep out of the hands of the law. To this class belongs the closed front door of the saloon, while the alley door is wide open; the one-quarter off sale that is not a quarter-off sale and whose figures, from which a customer is to get the 25 per cent. reduction, are a lie and a cheat; the misfit clothing, in which the only thing misfit is the name and which has never been any nearer to a custom tailor store than the ordinary politician comes to telling the truth; the bankrupt sale in which the only bankruptcy that has occurred is in the truth-telling capacity of the so-called agent or trustee.

Do we, as a body, live up to this standard—low as it is? When this subject was first assigned to me I asked our worthy and well posted secretary if any of our members had ever been in jail or the house of correction, to which he replied on his honor as a gentleman that he had never heard of a Hardwareman in his life who had ever been detained a single minute as an inmate of such a place. This question, therefore, it is needless to argue. Seriously, however, if you will look around you in whatever city or town you chance to be in, you will see far less of this deceitful style of business among the Hardware stores than in any other line of business.

There is, second, the man who is honest because that is the best policy. Of this class Bishop Whately said: "Honesty is the best policy, but he who acts on that principle is not an honest man." I once heard the Rev. Dr. Reid, of the Southern Methodist Church, say, with an emphasis I shall never forget: "*Policy*—that catch word of the devil to lure his victims to their destruction."

The merchant who will not misrepresent his goods to a wealthy or influential customer because of his influence, but who will tell a poor man anything to make a sale, belongs to this class, and I shall leave it to you without argument as to whether he is an honest man.

Do we, as a body, live up to this standard of honesty? Candidly, I believe that there is less misrepresentation—or over representation—in our line than in almost any other; that there are more instructions given to clerks by Hardware merchants to tell a customer exactly what a thing is than in most of the other lines. Is that not your experience?

Passing over various other definitions or grades of hon-

Digitized by Google

esty, we come to good, sturdy honesty—that kind that is honest for honesty's sake; that kind that does not feel like going out of the back door when some deceived customer comes in at the front door; that kind that meets a customer and looks him squarely in the face; that kind that goes home pleasant and cheerful at night knowing that if business has gone wrong there are at least no sins of deceit at his door; that Mr. Jones has not been told that the pocket knife he has bought from the 25-cent case is a genuine Wostenholm; that Mr. Brown has not been assured that the 50-cent square he bought is correct and accurate, or that the coffee pot which Mrs. Thomas insisted on buying as cheap from you as from your curbstone neighbor has not been deceived in thinking that she got a first and not a half dipped cull.

Are we, as a body, sturdily honest? I take my answer from some of the foreign letters which it has been the pleasure of our firm to receive, in which our correspondents say that they know when they get an engine, a machine, an agricultural implement, an electrical invention or a tool of American make, they know that it is honestly made and will do the work for which it is intended; they also know that if there should be a defect it will be remedied without a growl or a kick. They, therefore, pay more for tools and implements of American manufacture than for those of other makes, feeling sure that after all they are not paying too dearly for what they actually get. I might also take my answer from the honorable roster of Hardwaremen—the Ducharmes, the Buhls, the Fosters, the Standarts, the Morleys, the Blacks, the Bocks—but I might keep this up indefinitely and not name one the history of whose success was not epitomized in that one word "Honesty."

But, gentlemen, why go on? My teacher at school taught me that an axiom was a self evident truth, so why not say that my subject, "Honest Hardwareman—the Pride of the Michigan Hardware Association," is an axiom, and let it go at that?

The committee appointed on the president's address reported with a recommendation "that the executive committee correspond with other State organizations relative to forming a national organization of retail Hardware merchants and that a committee of three be appointed to secure new and improved legislation relative to the power to garnishee; they do not concur in the proposed reduction of annual dues, believing it safer for another year at least to continue the present dues, and they refer the matter of county organizers to the incoming executive committee."

On motion, the report of the committee was accepted in full.

ELECTION OF OFFICERS.

The following gentlemen were appointed a committee on nominations of officers for the coming year: C. M. Chamberlain, B. A. Wright and W. J. Boyce. They recommended the election of the following gentlemen, all of whom were chosen unanimously:

President: C. G. Jewett, Howell.

Vice-President: W. J. Boyce, Port Huron.

Secretary and treasurer: Henry C. Minnie, Eaton Rapids.

Executive Committee, two years: J. B. Sperry, Port Huron; G. W. Hubbard, Flint.

Investigating Committee: T. Frank Ireland, Belding; S. P. McDonald, Bay City; Jacob Stahl, Lansing.

Transportation Committee: H. C. Weber, Detroit; F. M. Brockett, Battle Creek; S. F. Stevens, Grand Rapids.

President-elect Jewett was called to the chair, and accepted the honor conferred upon him in a neat and brief speech.

It was agreed that the next annual meeting should be held at Detroit.

One of the pleasant features of the convention was the presentation to ex-President Bock of a handsome gold-headed ebony cane as a testimony of the high honor in which he was held by the members of the Association. After the appointment of an entertainment committee for the coming year, consisting of W. Smith, F. J. Martz and H. C. Weber, of Detroit, the convention adjourned, with a vote of thanks to all who had done anything to make the convention a success.

On Thursday afternoon a steamboat excursion on the Detroit River was tendered the guests by the following Detroit concerns: Michigan Stove Co.; Buhl, Sons & Co., Fletcher Hardware Co., Standart Bros., Detroit Stove Works, Wm. Reid, Boydell Bros., Freeman, Delamater & Co., Peninsular Stove Co., Acme White Lead & Color Works, H. D. Edwards & Co., Peninsular Lead & Color Works, Detroit White Lead Works, Art Stove Co. and J. T. Wing & Co. It was a success in every sense of the word.

LIST OF MEMBERS OF THE ASSOCIATION.

The following is a complete list of the present membership of this Association:

The Jennison Hardware Co., Bay City.
McDonnell Hardware Co., Bay City.
Sawyer & Havens, Bellevue.
T. Frank Ireland, Belding.
D. M. Hunter, Burt.
Carlton Hardware Co., Calumet.
Jas. McNamara, Calumet.
Lazelle Bros., Caro.
Reed & Harver, Carsonville.
H. C. French, Cassopolis.
French & Hayden, Cassopolis
F. H. Gibbs & Co., Coleman.
C. E. Baird, Colon.
Munger & Jennings, Charlotte.
Barber & Spencer, Charlotte.
J. L. Collisi, Charlotte.
Taylor Bros., Adrian.
Wilcox Hardware Co., Adrian
Austin & Smith, Albion.
Geo. E. Dhan, Albion.
O. H. Gale, Albion.
D. C. Allen & Co., Coldwater.
M. E. Mann, Clio.
Casper, Gnau & Co., Detroit.
A. Lemke, Detroit.
Chas. A. Strelinger & Co., Detroit.
Henry C. Weber & Co., Detroit.
J. W. Drury, Detroit.
Casper Hoffman, Detroit.
J. Gottfield, Detroit.
D. S. Phelps, Detroit.
T. B. Rayl Co., Detroit.
J. G. Patterson, Detroit.
F. Marriott, Detroit.
Geo. J. Sexauer, Detroit.
Hunt, Roehring & Noah, Detroit.
W. P. Kutsche, Grand Rapids.
Rutka-Hamilton Hardware Co., Grand Rapids.
F. Alberts Hardware Co., Muskegon.
F. A. Turner. Caro.
F. J. Martz & Co., Detroit.
J. S. Stendel, Detroit.
Geo. J. Schiefer, Dundee.
Quish & Olsaver, Dexter.
T. S. James, Dexter.
Wright Bros., Davisburgh.
G. E. Bishop, Dowagiac.
John Schmitt, Dowagiac.
W. M. Vroman, Dowagiac.
E. F. Knapp, Eaton Rapids.
Minnie & Bromeling, Eaton Rapids.
E. Olson, Escanaba.
W. W. Oliver, Escanaba.
J. H. Whitney, Merrill.
Casper Czizek, Mt. Clemens.
R. C. Ullrich, Mt. Clemens.
E. S. Martin, Morrice.
O'Leary Bros., Marshall.
Casper Hardware Co., Marshall.
W. E. Bosley & Son, Marshall.
Geo. Vernier, Jr. & Son, Mendon.
Frank D. Pratt, Middleville.
The M. R. Manhard Co., Newberry.
A. M. Southworth, North Lansing.
Price & Smith, North Lansing.
John Montague, Niles.
O. H. Heath & Son, Ithaca.
Loeser & Lehr, Jackson.
Barnard, Smith & Co., Jackson.
The Edwards & Chamberlain Co., Kalamazoo.
Eberbach Hardware Co., Ann Arbor.
James E. Harkins, Ann Arbor.
Prindle & Larned, Kalamazoo.
Henry Rennier, Niles.
H. M. Post, Owosso.
H. E. Easton & Co., Petoskey.
Harvey Shook, Pinconning.
M. Connor & Son, Plymouth.
J. B. Sperry, Port Huron.
S. L. Boyce & Son, Port Huron.
H. B. Seagraves, Pontiac.
Stoddart Bros., Reed City.
Saginaw Hardware Co., Saginaw.
Morley Bros., Saginaw.
Geo. Walz & Co., Saginaw.
Emil Jochim, Saginaw.
Popp & Wolf, Saginaw.
G. W. Bruske, Saginaw.
Solms Bros., Saginaw.
Tower Hardware Co., Muskegon.
H. B, Gunniss, Algonac.
C. E. Pipp, Otsego.
J. J. Post, Cheboygan.
J. E. Cuery, Cheboygan.
John C. Smith, Saginaw.
McDonald Bros., South Lake Linden.
P. M. Church & Co., Sault Ste. Marie.
Wood & Thoenan, Sault Ste. Marie.
H. P. Evert, Stockbridge.

Zimmerman Bros., Marine City.

Brass Goods Mfg. Co.'s New Catalogue.

The Brass Goods Mfg. Co., Nos. 86 to 92 Third Street, Brooklyn, N. Y., with New York office, No. 117 Chambers Street, under the management of W. F. Brainerd, have just issued, under date of July 15th, the most elaborate and handsome catalogue of their varied production which they have ever published. It forms an attractive pamphlet of 120 pages, bound in stiff covers, the contents of which are fully illustrated throughout, and embraces their entire production in brass and bronze Hardware, including builders', cabinet and refrigerator Hardware, and chest and box trimmings in greater variety than ever before exhibited in previous publications. The construction of this volume enables the company to convey an idea of the increased line of "special goods" made by them for a long time, of which they claim to make the largest and most complete assortment of any manufacturer with whom they acknowledge competition.

A complete price list of twelve pages accompanies the volume, in which list prices are given covering every finish in which the goods are produced, and including dipped brass, polished brass, bronze metal, nickel-plated and old copper.

The catalogue is carefully indexed under 150 headings and is well worthy of the attention of the up-to-date Hardware dealer, who has only to make the request to have it added to his working library.

The attention of our readers is called to the announcement on page 34, of the Cary Mfg. Co., having reference to the sustaining by Judge Lacombe of their letters patent No. 403,247, relating to "Reels of Box Strapping," they having been compelled to protect themselves against parties offering goods similarly made, which they claim infringed their well-known patents.

Herr Oil—Haf you heard dot dog of mine ate a tape measure und died?

Herr Kut—I suppose he died py inches, nicht var?

Herr Oil—Aber nit; he vent oudt in der alley und die py der yard.—*Columbia Spectator.*

Two "Business" Letters.

Sometimes we receive an order from a man who has no credit rating and about whom we can find little or no information. To such a man we send a bill in advance and mention the fact that we are unable to obtain any information about him, and that as he is an entire stranger to us and has not sent any reference, we are obliged to ask cash in advance, with the hope that he will accept our letter in the spirit that it is sent and make remittance, deducting cash discount. Nine times out of ten such men get mad, cancel the order and tell us to go anywhere except to some comfortable place. Sometimes there is a pleasing exception, as per the following letter, place and signature omitted:

"Josif Dixon Crucibal Co.

Gentlemen. Yours of the 24th at hand and contents noted. you did rite in sending your bil in advance of your shipment and the same is agreeabal to me you will find inclosed a cashiears check for the amount 17.60 and i wish you to ship the graphite at once from pier 36 east river as that will get it here in the shortest time and I am in a great hurry,

I furnished the brad street co Boston with a statement of my afairs they are not very good but i think you will bee pleased to doo bisnes with me when you get aquainted. If I have good sucess with the paint could i not make arrangements with you to controol this section of the country no one handles it hear but if i work up a traid thare is always some who wants to jump in and spoil it.

remember if the goods are all rite and like sample I had just as soon pay before as after.

Yours. Respectfully."

His letter shows that he is not exactly a college graduate, but he more than makes up by his good nature and horse sense for his want of education.

Quite a number of the firms who write letters for *Hardware* and whose advertisements appear therein, do an extensive export business. We wonder if they are always careful to get the very best translators possible? If they do not, then their catalogues and circular letters may have the same effect upon foreigners as some of the efforts of foreign translators have upon us. Witness the following, signature and place omitted:

"We call your attention relating to the principal articles of our extent of business, about which you can deign to take annotation, in order to send us your recommendations, which we wish to preserve with the preciseness, activity and energy what are of our character.

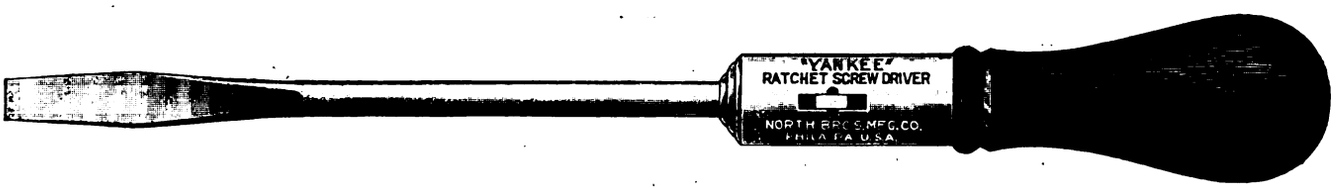
We export: Pine-apples, planes, cocoas, pelts, tobacco, aguacates, chocolate nuts, coffee, dyeing woods, pearls and fine shells, Mexican antiquitys and curiositys, and all class of tropical products and national manufactures.

We import: Set of tools and iron works for husbandmen and manufacturers, movable goods, bicycles, typewriters, fine perfumes, and soaps, sew machines, paper and writing materials, tapestry, lamps, public places machines, wines, alcohols, drugs, conserves, metallics roof tiles; cotton, wool, linen and silken cloths; leathers, hats and robe, carriages, boats, musical instruments, oils, fotografers' materials, printers' effects, purse, table and wall watchs, etc., etc.

If you have Remainders and Castigated Effects, we can take it for sale, with a reasonable discount.

English and Spanish correspondence."

Jersey City, N. J. JOSEPH DIXON CRUCIBLE CO.



Strange mistakes, clerical and otherwise often come under the notice of a manufacturer. In these days of stenography and typewriting it is not unlikely that they may increase, judging by the following. A manufacturer got an inquiry from abroad for a number of sundries, and among other items was one for a certain quantity of "14 in. raw tacks." Here was a poser, but suddenly it dawned upon the manufacturer that it was intended for "14 oz. wrought tacks," and this turned out to be correct. The inquiry had been dictated to a shorthand writer, who had converted it into the extraordinary jumble quoted above.—*Exchange.*

NEW GOODS AND SPECIALTIES.

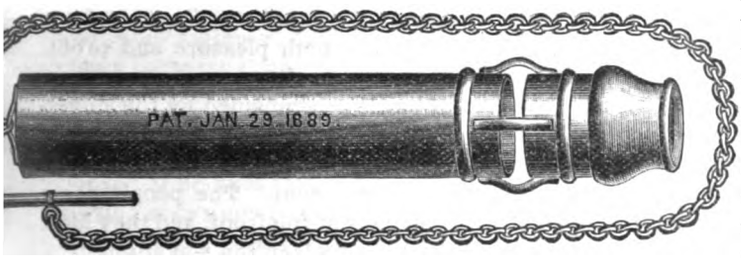
"Yankee" Ratchet Screwdriver.

When the North Bros. Mfg. Co., Philadelphia, Pa., place anything upon the market, it can be taken for granted that it is just what it is represented to be, and that it is first-class in workmanship and the other essentials. These remarks fully apply to their "Yankee" Ratchet Screwdriver, No. 10, for right and left hand. The makers call attention to the fact too often ratchet screwdrivers possess one very serious drawback in practical use—that the friction in ratchet mechanism is so great that unless a screw is first made tight in wood by some other means the ratchet screwdriver turns the screw out in its backward movement as fast as it is driven in by the forward movement of the driver. "The screw is simply turned in and out, no progress made in getting it to its place. The blade of driver, instead of remaining at rest during backward movement, is carried back by the excessive friction of ratchet and pawls, and the screw with it, except the screw is first driven tight enough in wood to outbalance this friction." These ratchet drivers are described as quite noisy in their operation and unhandy to change from right to left. They add: "The Yankee Ratchet Driver overcomes all these faults. The friction in ratchet mechanism is so slight as to be hardly felt; the backward movement is as easy as in a good stem-winder and just as noiseless. When a screw is screwed in it stays where put, and is not screwed out when handle is turned back. The construction of ratchet and pawls is such that neither can bend or break, wear or get out of order, and permits a very compact arrangement, making the tool more convenient in size and shape, of less weight, and also the making of smaller sizes of tools than have heretofore been made. The adjustment for right or left hand is exceedingly simple. For right hand or to ratchet a screw in, push the slide to end of slot towards bit; for left hand or to ratchet a screw out, push the slide towards handle of driver. If the slide is placed midway between ends of slot, the blade is held rigidly and the driver can be used as an ordinary screwdriver with fixed blade. The materials and workmanship are of superior quality in every detail. The drivers are strong, durable, handsomely finished, and sold at interesting prices. Made in the following sizes, packed one-half dozen in strong paper box: 2, 3, 4, 5, 6, 8, 10, 12 inches."

"YANKEE" RATCHET SCREWDRIVER.

The "Yankee" Spiral-Ratchet Screwdriver.

We also call attention to the North Bros. Mfg. Co.'s "Yankee" Spiral-Ratchet Screwdriver, No. 30, an illustration of which is shown in this connection. The great advantages which it possesses, as pointed out by its manufacturers, are simplicity, compactness, strength, durability, and the fact that it can be used as a rigid screwdriver in any part of its length, as well as to push or ratchet screws in or out. The change from right to left hand for either push or ratchet is made by simply moving the slide to either end of the slot. When the slide is moved towards the bit it works right-handed, either to push or ratchet the screw in—pushing the screw in as far as it will go—and without removing the hand from the driver or making any change whatever, turn the handle forward and backward and the screw is ratcheted into its place. "When slide is moved to end towards the handle it works left-handed, either to push or ratchet the screw out. When screw to be removed is tight in wood, use ratchet movement first and when loosened draw up handle and push down, thus withdrawing the screw. The ratchet movement can be used in any part of the length of tool for either right or left hand. When slide is placed in centre of slot the rod is held rigidly and tool can be used as an ordinary screwdriver, and this at any point in length of rod. When extended, this gives a very long screwdriver. The feature of using as a ratchet or as a rigid screwdriver at any part of its length, is not found in any other tool of this kind." The makers call further attention to the fact that the construction of the ratchet and pawls permits of a very compact arrangement, making the tool convenient in size and of light weight, yet of strength in these vital points. They continue: "Neither pawls nor ratchets can bend, break or get out of order. The friction in ratchet mechanism is so slight as to be hardly felt; the backward movement, like our Yankee Ratchet Driver, is as easy as in a good stem-winder, and quite as noiseless. The nuts working in spiral are of brass, and with the spiral grooves in rod, are so designed that the wear has been reduced to a minimum. A long-continued test in our factory shows that after driving fifty thousand screws with one tool there is no perceptible wear in the nuts. The chucks for holding the bits is simple in construction and positive in its hold on bits. When the sleeve of chuck is pulled down towards handle the bits can be put in, and when released it moves back to its place, holding bit fast. This sleeve is loose on chuck, so this end of tool can be readily held when in use, the chuck revolving inside of sleeve. Three bits are included with each tool. The extreme length of tool with bit in chuck is 13½ inches when closed, and 19¼ inches when extended."



"YANKEE" SPIRAL-RATCHET SCREWDRIVER.

Springfield Single Tube Whistle.

C. Rogers & Bros., Meriden, Conn., manufacturers of bicycle sundries, are placing on the market the Springfield Single Tube Whistle, shown in this connection. It carries

its own explanation, and is described as finely finished, useful, made in a workmanlike manner, good seller, and guaranteed to be all right in every respect.

Recent Trade Publications.

"Graphite as a Lubricant" is the title of a publication, of which the sixth edition has just been published in a revised form, by the Joseph Dixon Crucible Co., Jersey City, N. J. This treats of graphite scientifically and practically, showing its value as an accessory to engineers and machinists. In a note of introduction, the publishers say: "The development of high speed and great power machinery of the day has made the question of successful lubrication more serious than ever before. The compound engines, the great motors, the heavy shaft lines and gears, now so common in the large power plants and mills, present many new questions of friction and lubrication. With superheated steam and high pressure there is difficulty in properly lubricating steam cylinders and valves. Under these conditions pure flake graphite has solved so very many of the problems that it would seem to be the key to solve many others. A prominent engineer once said, 'The more solid the lubricant that can be used in any place, the better the lubrication;' and Dixon's Ticonderoga Graphite is a solid flake graphite of marvelous smoothness, toughness and endurance. It greatly increases the life and lubricating value of any oil, tallow or grease to which it is added. During the past few years the sale of this particular graphite has more than doubled. It has been thoroughly tested on locomotive engines, stationary engines, marine engines and pumping engines, with results surprisingly satisfactory to even the strongest advocates of graphite lubrication. We are confident that the following pages will prove convincing evidence to the careful reader. It must be borne in mind at all times that the difference between a perfectly pure graphite and one almost pure, but still totally unfit for lubricating, cannot be detected by either sight or touch; the buyer's only guarantee of the purity is the name and reputation of a responsible manufacturer."

The Stowell Mfg. & Foundry Co., South Milwaukee, Wis, have shown considerable good taste in the preparation of their "Stowell's Booklet," which has just been published. It is very artistic in appearance, having a red cover, with the title in embossed silver, while the inside pages are pure white and printed in blue ink. This comes about as near to a patriotic demonstration in favor of Old Glory, or the Red, White and Blue, as the pamphlet of a manufacturing concern could well issue. On the first page is a handsome portrait of Hon. John M. Stowell, president of the company, while on the other pages are views of their extensive works at South Milwaukee, their door hangers, steel rails, door stay roller, shoe lasts and stands, tackle blocks, hot air registers, etc.

Up to date, the Westinghouse Air Brake Co. has equipped 650,000 cars and 30,000 locomotives with the new quick-action brake, and has orders for many more.—*Ex.*

Review of the Markets.

Hardware: Preparations are being made by the travelers for an early resumption of their paths of traffic. Vacations have been the order of the day throughout the trade and the season with its successive weeks of abnormally hot weather has afforded a good reason why an abstention from too close attention to business might reasonably be entertained. The dullness usually the most noticeable feature of a summer's traffic, has not known this season that entire suspension from trade influences which have characterized previous summers for several years, but have had indications manifested that the encouraging outlook will be followed by a healthy resumption of traffic.

Wire Nails: The market on wire nails keeps fairly well sustained in price considering that enquiries are becoming more frequent having reference to possible requirements of a month later. Manufacturers are not disposed to weaken the market by making lower quotations than have prevailed for some time past, although it is believed large specifications for immediate shipment might meet with a more encouraging response. Production being limited on account of annual factory changes and cleaning up generally, keeps the market from the necessity of working off an accumulated overstock, although stocks on hand are good enough to encourage prompt shipments when required. It is believed the retail stocks throughout the country will be run down to the lowest limit and that a large general demand will be the feature upon the opening of the Fall trade. Present prices may be quoted at $1.30 f. o. b. mill, on large specifications to jobbers, carload lots to retailers being held at $1.35. New York prices are as previously noted, $1.45 for carload lots on dock, and $1.55 for smaller lots from store.

Cut Nails: The market on cut nails remains in about the same slow and sluggish condition recently referred to, and probably awaits the general spirited movements of trade due some weeks later, the demand at the present time being even lighter than usual. We quote New York prices as being without change. Carload lots on dock, $1.17½ to $1.20. Smaller lots from store, $1.25 to $1.30.

Door Check and Spring: John Toler Sons & Co., Newark, N. J., W. H. Quinn & Co., No. 103 Chambers Street, New York, agents, announce the following list prices on Toler's liquid door check and spring, just placed upon the market. Tho discount to the trade is 40 per cent.:

Letter O.	For telephone booths, screen doors, etc	$3.00
" A.	For light inside doors less than 3 feet wide	4.00
" B.	For light outside, or inside doors less than 3 feet 5 inches	5.00
" C.	For heavy inside or outside doors less than 3 feet wide	6.00
" D.	For doors less than 3 feet 0 inches wide	7.00
" E.	For heavy storm and outside doors	8 00

Binder Twine: Nothing especially new to report. Prices remain steady and without speculative interest, as the stocks in the hands of jobbers are being rapidly disposed of and the season is nearing an end. Factory quotations remain without noted change and are still ruled by the prices now current for some time. We quote as follows for carload lots, f. o. b. Eastern factories, with the usual advance for smaller quantities:

White Sisal, 500 feet to the pound	per pound,	12 cents.
Standard, 500 feet to the pound	"	12 "
Manila, 550 feet to the pound	"	13 "
Pure Manila, 650 feet to the pound	"	14 "
Travers Ex. Hemp, 500 feet to the pound	"	9 "

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of July 20th, quote as follows: In lots of less than 5 barrels, 38 cents per gallon; in lots of 5 barrels or more 37 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE CHICAGO TRADE.

There has been no decrease in the number of our orders thus far, though July is usually a slow month in Hardware.

Digitized by Google

We noticed a slight lessening of business two or three days after the Fourth, but since then have kept full of orders.

The trade in snaths, forks, scythes, corn knives, freezers, etc., has been reasonably good this summer, and goods in the main, while cheap, are going at steady prices; in fact, with the increased expenses for doing business, owing to war taxes, goods cannot be offered at our present low prices.

A few of our employees are on their annual vacation. Our traveling salesmen report splendid prospects for crops, a contented, cheerful and confident attitude displayed by their retail customers, and the expectation of doing at least double the business next Fall that we had in 1897.

With the largely increased business we have had this year, (one month over 100 per cent. increase), and the difficulty at times in securing goods enough to fill our orders, it seems strangest of all that retailers continue to order in such small quantities so that we are absolutely unable to gauge their requirements. It is true that they re-order and re-order again and again, but with the prosperous times we are now experiencing, it would seem to us wiser to make their first orders in full large quantities. This insures less trouble and expense in getting out their orders, more prompt shipment, and a stock on hand at the proper moment when consumers call for the goods.

Wells & Nellegar Co.

THE PHILADELPHIA TRADE.

Midsummer is not a time favorable to vigor or energetic trade reports, and trade of that nature is not to be expected. As yet, jobbers have hardly recovered from the holiday quiet, although salesmen are now being fitted out for the road, and in a few days we should see the beginning of fall trade Anticipations of hope are everywhere heard, that the fall trade will be very satisfactory, and prophets are not lacking in predicting higher prices, and it is to be hoped their predictions will prove true. Certainly there has scarcely ever been a time when indications were more hopeful, and, unless all signs fail, we can soon see more than a fair demand for goods.

Changes in prices in the last few weeks have been very uneventful—everyone is waiting for developments—and prices fluctuate but little.

The new stamp tax is working very satisfactorily, and it gives us pleasure to state that dealers throughout the country seem mindful of their obligatious in this respect, and checks, drafts and notes are cheerfully stamped in order to give "Uncle Sam" the wherewithal to carry on the war. We hope, however, this war will be pushed so energetically that decisive results will soon bring about a return of peace, when we feel trade will quickly respond.

Biddle Hardware Co.

THE CLEVELAND TRADE.

Business associations cannot be useful unless confidence in each other is maintained, and each member must suspect himself before he does others. If competitors are to be regarded as enemies and treated so, it violates not only the moral law, but one of the most important business rules, the result of which is only evil. The moral law is of no use unless it is a practical rule of life, that helps to success.

To tell a man that he ought, or ought not do a thing unless a reason is given, is impertinent. Any business man who fails to do his full share to cultivate friendship with his competitor, makes a serious mistake. If there be a disparity in financial conditions, it is the duty of the one having this advantage to lead in promoting this friendship.

No business man can afford to neglect the amenities of life, for his personal interest will be promoted by having the respect of his competitors; besides his respect among the best men in the community will much depend on his treatment of his competitors, as this is sure to be taken as a measure of his manhood.

It pays to be manly as well as honest. This is a subject well worth discussion in business organizations, as their success will depend so largely upon mutual confidence.

The opinions we hold of our competitors will be improved, the evils of competition modified, and the strain of business lessened, demonstrating that ethics and interest are in accord, as it will result in both pleasure and profit. Arbitration is better than war in business.

Success on the field of battle accompanied by the cheerfulness with which the war taxes are being paid, is a great honor to the country. The express companies seem to be alone in trying to evade its payment. The people seem glad to cooperate with the boys at the front, and they have the money to pay with and also to loan the Government.

This is a goodly land called to a great work, with seventy millions of loyal people ready to dare and die for liberty. The first half of '98 has given business men hope and courage, and trade is remarkably good for July.

The Lockwood-Taylor Hardware Co.

THE OMAHA TRADE.

There is too much weather and too much busiuess, to review the situation philosophically, and in view of the condition of the thermometer and trade, we can only say that we have all on hand that we can take care of, as both business and the thermometer are uuusually active for the time of the year. Rector & Wilhelmy Co.

THE PITTSBURG TRADE.

If the "signs of the times" mean anything, they surely mean a big trade this fall—big crops all over the land, good prices for them, with good demand from foreign buyers, the silver question laid on the shelf, and our money as good as that of any other nation, capital seeking investment as low as 3 per cent. when assured of safety. All these conditions point to an increased sale of goods in the country, and the starting of new enterprises which have been deferred.

Low prices in Hardware continue, and manufacturers seem afraid to attempt any advance, although not getting a living profit. Nothing but a big lot of orders overcrowding the order books will give them the necessary backbone. July business is quite good in a jobbing way, and keeps us well employed. Vacations being in order, the reduced force find all they can do to keep up with orders coming in by mail. Logan-Gregg Hardware Co.

THE KANSAS CITY TRADE.

Since our last letter the unfavorable condition of weather, roads, etc., has greatly improved and the normal condition of business has returned.

Up to July 1st, when the quietness in trade is noted as a result of "harvesting," ourselves and our friends in this particular section have nothing to complain of, justly.

In certain lines of seasonable goods the trade has been of an unusually heavy character. In truth, we can report a very large increase. Our sales of gasoline stoves, refrigerators, wire cloth, screen doors, etc., are not "out of sight," but a "sight" greater than ever before. As an instance, we will cite the late sales in about five weeks, of fully 1000 gasoline stoves.

Kansas City as an industrial, business, manufacturing, social, political, moral and packing-house center is strictly "in it." This is not classical language, but blessings on a language which can mean so much when you use so little!

With each recurring month her wholesale trade advances in all lines. Our dealers in Hardware and allied lines are among the forces, not skirmishers at the front nor skulkers in the rear, but along in the "middle" where it's safest.

The implement business of this town is the world's record breaker, and our large houses are doubling their capacities now.

The prospective returns from the immense acreage of wheat contiguous to this territory are not so flattering as

Digitized by Google

was anticipated four weeks ago. The grain suffered greatly from rust, and other fields from hot weather at the moment when cool was needed, so that the berry is shrunken, as well as the yield. However, if any of the people in the effete East think they are cute enough to out-do his once Napoleonic highness, Mr. Leiter, the farmers will be glad to have them try it on. The Hardware dealers will smile and reap the benefit. Dollar wheat makes the credit man happy, and the traveling man dreams of higher salary and promotion to married life, if single, and a place in the "house," if he likes that work. We suppose there are few traveling men unmarried or unambitious.

There are no changes in prices directly affecting trade. Rope has been "rising" faster than yeast cake ever made your cook's bread "hump." The twine dealers have made an immense profit.

The trade on field fences, poultry netting, etc., holds up late and well. We are stocking up heavier than usual for Fall trade in barb wire.

Our bank clearances you will find each week well to the front, and our patriotism is at 212° any moment.

GILLE HARDWARE & IRON CO.

THE PORTLAND TRADE.

The past six months have been characterized by a very unsatisfactory business in the East, but by a most encouraging trade in the West.

Here we have felt the full force of the depression due to the war, but thanks to our energetic army and navy, this has now given place to confidence, and business for the past month has received much of its old-time swing, keeping jobbers generally well occupied.

We cannot now see any good reason why the last half of the year should not be as good, at least, as the last half of 1897. We shall lose in some lines of builders' Hardware, but we expect this will be more than offset by greater activity in other branches, due to the increased amount of money put in circulation throughout the country.

Our business men were never in better condition to make the most of the advantages gained in our war with Spain, and will be more aggressive than ever in foreign markets, seeking to increase our already large export trade.

The business that will come to us from Cuba alone, when once the people feel safe to take up peaceful pursuits again, will be no small amount. Ravaged by war for the past four years, driven from their homes which have been burned or destroyed, destitute of any tools with which to cultivate their fields again, they must become large purchasers, and the United States will in all probability receive the largest part of their business. They will also, for a time, be very heavy buyers of our food products, owing to the utter destitution that now prevails throughout the whole island.

This, of course, is looking at the case from the selfish side, but in the light of increased taxes for prosecuting the war, we may be pardoned for trying to find some redeeming feature. We most sincerely trust that Spain will soon see the utter folly of prolonging a struggle which can only bring her defeat and loss of both men and treasure.

Summer vacations are now in order, and most jobbers are short-handed, keeping those left in the stores about as busy as they were when business was at its best.

Collections are rather slow, but we do not hear much complaint.

The weather continues favorable for our agricultural friends, and everything points to bountiful crops.

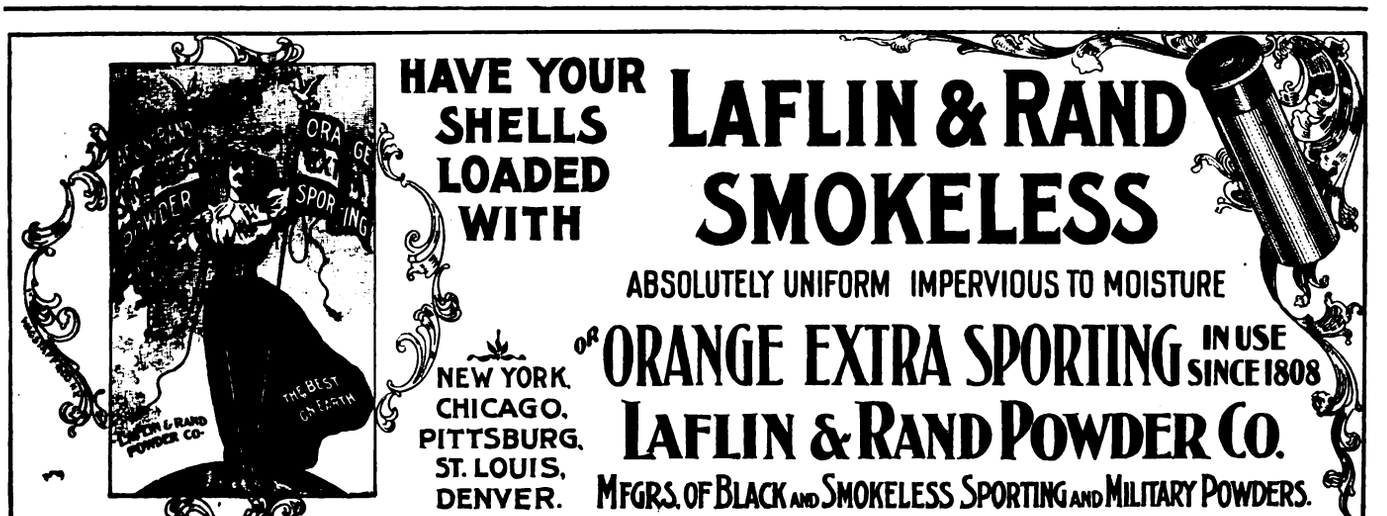
THE EMERY-WATERHOUSE CO.

THE TOLEDO TRADE.

Trade for the last six months, from January to July 1st, has been quite satisfactory in general. Prices, as a whole, have remained about the same at the end of the six months as at the beginning, of course, excepting a few articles, as cordage, etc. Trade at the present time is not very brisk, but no doubt it will soon gather more strength, so that there will be quite a heavy business for the fall months.

The factories in this neighborhood claim that they are all quite busy and have orders for some time to come. Collections could be somewhat better. No doubt a good many farmers will hold back their grain for an advance in price, expecting that they will reap a larger price in holding back.

Prices in general have not changed very materially, although we notice a weakness in tinware, linseed oil and a few other goods. White lead, on the contrary, and all lead products show an advance.



STOLLBERG & CLAPP CO.

Not to the Army, But the Woods.

A Baltimorean had occasion to visit his country property the other day. His colored cook wanted to know "What was de news in town, sah?" The gentleman replied that he thought there would be war, and said jokingly, "I suppose I'll have to be looking for another cook, Bob, for you'll go in the army, of course." "Youse'll have to look for a new cook, boss, dat's sho'; but dis nigger ain't a-goin' in no army, sah. Dis nigger'll go in de woods, and go fur, too."—*Nebraska State Journal.*

We have received from Weaver, Palmer & Richmond, Rochester, N. Y., an evidence of their excellent taste, in the form of a buff morocco card case and stamp-holder. The case is of the best material and workmanship, being intended, we presume, as indicative of the quality of the firm's goods, and the name of the latter in gold letters on the inside adds to its attractiveness.

Manganese deposits in Cuba are abundant.—*Ex.*

A Metallic Butt Gauge, having one bar with two steel cutters fixed upon it. When the cutter at the outer end of this bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the back of the jamb. The other bar has a steel cutter to accurately gauge for the thickness of the butt.

The form of this Tool is convenient for carrying in the pocket. It is so constructed that the bars cannot fall out of the stock

No. 95. Nickel-plated Butt Gauge, one in a box, $0.75

Fighting Preferences.

The legislative committee of the New York Credit Men's Association will take into active consideration the resolutions passed at the convention of the National Association in June. They are as follows:

Believing that preferences are vicious in principle, demoralizing to trade, and their permission conducive to failure and dishonest action, therefore be it

Resolved, That it is the sense of the Association that special efforts should be made, in all of the States of the Union where necessary, to secure the enactment of a law forbidding preferences, excepting for wages covering services rendered during ninety days prior to the suspension.

Whereas, In cases of assignment for the benefit of creditors to be followed by the appointment of an assignee, receiver or other trusteeship, a trust property is created in behalf of the creditors, and

Whereas, In most of the States there is no statute compelling such trust officer to inform the creditors of the trust so created; be it

Resolved, That the local Associations be directed through their law or legislative committees to present to the legislatures of their respective States a bill to be enacted making it compulsory that such trust officer inform the known creditors by mail of the creation of said trust; and

Resolved, That immediately after the filing of the schedules and inventory it be also made mandatory that a copy of the schedules and inventory be mailed to the creditors showing the aggregate of each item of the assets and liabilities, and that a discharge of the trust should be denied unless with the necessary proof now to be filed under the law, an affidavit is filed showing full compliance with the law in this regard.

No doubt they will be approved of as a whole after due discussion and consideration. This will be very important as bearing upon some of the laws of this State, and will be a step towards mitigating some of the troubles that creditors lie under in seeking their rights.

Bristles From Abroad.

Almost all the bristles used in this country in the manufacture of brushes are imported, and notwithstanding the increased production of pork in this country the supply of American bristles is now even smaller than it formerly was. Hogs are fattened and killed young in this country, and with the constant and widespread improvement of the breeds here the hogs have run less to bristles. Some extensive packers collect bristles, but the American supply is probably less than 1 per cent. of the consumption. The longest American bristles are about four and a half inches in length.

Imported bristles come from various parts of Russia, but most largely from Poland and North Germany. Some finer soft bristles come from France. The bulk of the supply comes from cold countries, where the hogs are well protected by thick coats, and many of the bristles are those of wild hogs. The hogs shed their coats as many other animals do, and there are men who gather the bristles of wild hogs, knowing their haunts and where the bristles are to be found. Other bristles are collected in the usual manner when the hogs are killed. The bristles are subjected to various processes of curing and preparation before they become commercial bristles and ready for the market.

Imported bristles range from three and a half to seven and a half inches in length. Various vegetable fibres are now used extensively in the manufacture of cheaper brushes, but for many uses bristles are indispensable and their importation continues steady.—*N. Y. Sun.*

NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

In favor of the

Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.

This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.

Respectfully,

CARY MANUFACTURING CO.

S. C. Cary Pres't.

The Trade Journal.

If you wanted to borrow money of a man, would you go to him when you knew he had it, or when he was dead broke?

If you wanted to marry an heiress, would you "ask papa" when he had a terrible day in the wheat pit, or when he was comfortably filled up with good things to eat and drink?

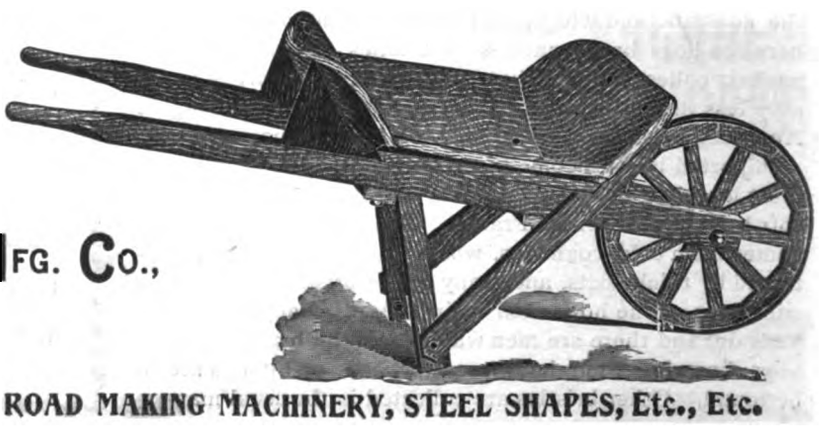
If you wanted to get a man into a "quiet game," would you tackle him when he was alone, or when he was on the way to church with his wife and his mother-in-law?

There's a proper time for all things.

The proper time to make a business proposition to a man is when his mind is on business, when he is right in the thick of just the business you want to talk about.

When a man sits down and commences to read his trade journal his mind is on just the thing you want to interest him in.

The question of what to buy and where to buy it is one of the things he depends upon the journal to solve.



If you have anything to sell him, and your ad. isn't there to tell him all about it, some other fellow's will be.

That's why the other fellow gets the trade—and it's quite reasonable, proper and just that he should.—*Charles Austin Bates' Criticism.*

The chief imports to Cuba direct from the United States are beans and peas, boilers and engines, builders' Hardware, carriages, cars, coal, corn, hog products, household furniture, leather goods, locomotives, lumber, mineral oil, potatoes, saws and tools, steel rails, and wheat flour, valued for 1893 at $15,000,000, and for 1897 at $5,000,000.—*Ex.*

De Haven Mfg. Co.,

50 to 54 COLUMBIA HEIGHTS, - BROOKLYN, N. Y.

Mica is one of the few minerals at present worked to any extent in India, the better qualities of it being exported to England, where it has of late years come into extensive use in the manufacture of electrical apparatus and incandescent lamp chimneys, while the lower grades are used locally for making small lamps for illumination purposes in the marriage processions of the richer Hindus. Mica is also imported into England from Canada and Siberia, but it is stated that the Bengal product, especially the ruby-tinted variety, is highly valued. White mica is rare in Behar. The mica is found lying within huge blocks of stone, and for the blasting of the latter, a cheap gunpowder is manufactured locally. When brought out, the mica yields successive, easily separable layers. The largest pieces are about twenty-five inches long and five inches wide.

The New Haven Gas Light Co., New Haven, Conn., have placed the contract with the Berlin Iron Bridge Co., East Berlin, Conn., for their new fireproof coal shed. The building is 60 feet wide and 500 feet long. The framework is steel, so arranged that the coal cars are brought into the building on a track supported by the roof trusses, the idea being to provide the maximum storage at the least expenditure of power and room.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Baltic, Ohio.—Wyler & Haas have established a plant for the manufacture of wrenches, employing thirty men.

Chicago, Ill.—The Rapid Filter Co. has been incorporated. Capital, $5000.

New York, N.Y.—The Calpperton Matching Machine Co. has been incorporated. Capital, $25,000. Incorporators: D. H. Taylor, R. B. Mackin and W. K. Post, of New York.

Newburgh, N. Y.—The Coldwell Lawn Mower Co. has been incorporated. Capital, $60,000; capitalized in Illinois for $5000.

Pittsburg, Pa.—The Hercules Metal & Mfg. Co., of this city, has been incorporated. Capital, $20 000. James C. Bennett, Samuel H. Bennett, Pittsburg; George V. Milligan, East Pittsburg; M. C. Miller, Turtle Creek; C. A. Rowan, Wilmerding, have been chosen as directors.

Portland Me —The Enos Sheet Holder Co. has been organized for the purpose of manufacturing ship Hardware and specialties, with $60,000 capital stock, of which $150 is paid in. The officers are: President, Elbridge G. Kelley, of Peabody, Mass.; treasurer, Elbridge G. Kelley, of Peabody, Mass.

Southbridge, Mass.—Stephen Richard is building a knife factory, 50x25 feet.

Toronto, Ont.—The Dominion Radiator Co. has been incorporated with a capital stock of $300,000, to manufacture radiators, boilers, etc.

Victoria, B. C.—The N. S. Le Page Glue Co. has been incorporated with a capital stock of $50,000, to make fish glue, fish oil, etc.

Changes and Improvements.

Ansonia, Conn.—The Coe Brass Mfg. Co. have decided to erect an addition to their machine shop. The addition is to be but one story in height, but it will be over 200 feet long by 60 feet wide. It will be built on the east side of the machine shop. This will give 12,000 square feet of floor surface and will enable the company to do a vast amount of extra work.

Ansonia, Conn.—The plant of the Abington Tack & Machine Association has been sold to the Ansonia Brass & Copper Co., who have taken possession. To accommodate this new business, the Ansonia Brass & Copper Co. have converted into a factory the large storehouse situated near the wire mill, which is admirably adapted for the purpose.

Chester, Conn.—H. C. Norton & Co., manufacturing builders' tools, Hardware, etc., business purchased by George W. Cristoph, who will operate the business.

Cincinnati, Ohio.— The American Tool Works Co. report a decided increase in their foreign orders. They have received in the past week orders through almost all of their European offices. Among them, one through their office at Stockholm, Sweden, for ten engine lathes ranging in swing from 14 inches to 18 inches, together with a number of drill presses of various sizes. Their office at St. Petersburg, Russia, secured an order for 25 engine lathes ranging from 14 inches to 30 inches swing.

Duncansville, Pa.—The manufacture of wire nails and rivets is to be begun at the plant of the Portage Iron Co.

Fullerton, Pa. — The Dent Hardware Works are having a new brick addition, 48x50 feet, two stories high, erected.

Hamilton, Ohio.— The Niles Tool Co. have purchased a large interest in the Pond Machine Tool Co., of Plainfield, N. J.

Hartford, Conn.—The Dwight Slate Machine Co. is receiving more orders than it can fill in the regular course of business, and the factory is run every night until nine o'clock.

Niagara Falls, Ont.—The Carborundum Co., of Niagara Falls, N.Y., have purchased ground in this place, and will at once commence the erection of a Canadian plant for the manufacture of carborundum. The company have a contract for 200 electrical horsepower with the Canadian Niagara Falls Power Co. In recognition of its coming to Canada, the aldermen of Niagara Falls, Ont., have exempted the plant from taxation for a period of ten years. Work on the new plant will be vigorously pushed, and in a short time the new abrasive will be made in the Dominion.

St. Louis, Mo.—The Central Lead Co. have filed articles to increase their capital stock from $400,000 to $1,000,000.

Zanesville, Ohio. — Many improvements and additions to the plant of the Brown-Manly Plow Co. are being made during the time the factory is shut down. New boilers are being put in, the switch from the Z. & O. R. is being extended across Main Street, and a new building is being built for a machine and blacksmith shop.

Zanesville, Ohio. — The plant of the Blandy Machine Co. has passed into the control of an organization composed of employees of the old company. It will now be known as the Union Machine Works, and will be operated by the following parties: President, William Haehnlen; vice-president, Frank McCaslin; secretary-treasurer, C. J. Meyer.

Improved Conditions.

Birdsboro, Pa.—The Diamond Drill & Machine Co. has commenced the construction of a new building at this place. This building will be 80x30 feet, in which new machinery will be installed.

Cleveland, Ohio.—The Born Steel Range Co. has begun the erection of its new plant. The building, when completed, will be 656 feet long, 120 feet wide, and one story high. A spur will run into the building, capable of receiving four cars.

Harrisburg, Pa.—The Lalance & Grosjean Mfg. Co. has started up its forge department. This department has been idle for several years. The rest of the plant is in operation.

Milwaukee, Wis.—The new foundry being built by the Northwestern Malleable Iron Co. at this place, is to be equipped with three smelting furnaces, one of which is to replace another one now in use. The building will be 520x70 feet in size, and will have three wings 37 feet long.

Newark, Ohio.—Moser, Wehrle & Co., stove manufacturers, have let a contract for the construction of an additional building. It will be of brick, 120x118 feet, slate roof and sandstone foundation. The work has already commenced and the building is to be completed by August 1st.

Recent Fires.

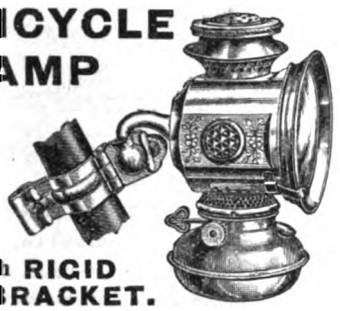
Hagerstown, Md. — The Hancock Tool Handle Works, at Hancock Station, on the West Virginia side of the Potomac River, have been destroyed by fire, entailing a loss of several thousand dollars. It is supposed the fire started from sparks from the engine. The factory consisted of several one and two-story frame buildings, built a year or so ago. The owners of the works were J. A. Rebert, of Berkeley Springs, and W F. Buser, of Martinsburg. The works were insured for $1100.

Portsmouth, Ohio.— Arrangements have been completed by which the Burgess Steel & Iron Works will remain in Portsmouth. A new site has been secured and the citizens will purchase enough town lots to raise the bonus asked.

Wheeling, W. Va.—The rush at the plant of the Wheeling Hinge Co., on Nineteenth Street, continues. One hundred and eighty-five employees are at work constantly, and it is stated that at times the establishment has some difficulty in securing sufficient skilled men this season.

Miscellaneous.

Cleveland, Ohio.—The Cleveland Punch & Shear Works Co. will build a large crane shop on the east side of Wason Street, near the present works. The improvement will cost $7000.



Jersey City, N. J.—At the recent annual stockholders' meeting of the American Steel Casting Co., at Jersey City, N.J., the following officers were elected: Daniel Eagen, president; Wm. B. Wilson, vice-president, and John W. Booth, of Thurlow, Pa., secretary and treasurer. The company's mills are at Thurlow, Pa.; Sharon, Pa.; Pittsburg, Pa.; Alliance, Ohio; Syracuse, N.Y., and Norristown, Pa. All are in operation excepting the last two.

Newark, N. J.—The New Jersey Zinc & Iron Co. have given their men a 10 per cent. raise in wages. They employ nearly 350 hands, and all are included in the advance, which took effect immediately. This action by the company was in no wise solicited by the men.

Philadelphia, Pa. — Howard F. Levick succeeds to the business of Richard Levick's Sons & Co., doing business under same style.

Portland, Me.—J. S. Briggs, Jr., & Co. contemplate building an addition to their Poland mill, which will be used as a bicycle salesroom and repair shop.

Richmond, Ind.—Waking & Bennett have dissolved. Business will be continued by Mr. Bennett.

Roachdale, Ind. — The Tucker Bicycle Wood Work Co. have increased capital stock from $20,000 to $40,000.

Shelby, Ohio.—A largely increased trade has compelled the Shelby Cycle Mfg. Co. to arrange for the erection of a new brick addition to their factory 75x125 feet and three stories high. In the last six months the factory claims to have sold more Ideals than were shipped out during the entire previous twelve months.

Toledo, Ill.—The Maumee Cycle Co., now in the hands of Receiver Thomas F. Huber, expect to resume business in a very short time.

Recent Embarrassments.

Chicago, Ill. — The Chicago Stamping Co.'s extensive plant for the manufacture of bicycles and japanned ware has been closed by the sheriff. The company's assets consist of the factory buildings, the bicycle manufactory, machinery for making tinware, and material for 5000 wheels. The company was organized twenty years ago, and had a capital stock of $350,000. Their assets are thought to be sufficient to satisfy the judgment.

Louisville, Ky.—George L. & Charles J. Martin, the Fourth Avenue bicycle dealers, have made an assignment to A. H. Jackson for the benefit of creditors. The assets and liabilities amount to some $6000 each.

Marion, Ind.—The Marion Cycle Co. have made an assignment. The liabilities are estimated at $60,000. The assets will fall considerably below that figure.

New York, N.Y.—John J. Cruttenden and Samuel W. Rollo, carrying on business under the firm name of Cruttenden & Rollo, dealers in tricycles and sporting goods, at No. 111 Nassau Street, have assigned to L. Stewart Milligan.

Westboro, Mass.—The Ariston Bicycle Mfg. Co. has made an assignment to Thomas J. Hastie, of this place, without preference. The liabilities amount to about $7000, and the assets include the stock and material, among which are 500 wheels ready for market. The company was incorporated with a capital stock of $50,000 and a paid-in capital of $14,200. The president is Henry A. Gilmore and the treasurer, F. B. Bartlett.

Uses of Wire Glass.

For forty years wire glass has been manufactured in this country and in Europe. It is simply ordinary glass in which wire netting has been introduced during the rolling process. This has the special quality of keeping the plate together after it has been fractured by impact or heat. It is rapidly taking the place of iron fireproof shutters, as it not only resists fire, but admits light. In a paper read by Francis Shuman before the Mining and Metallurgical Section of the Franklin Institute, Philadelphia, recently, some forceful illustrations were given of the fire resisting qualities of wire glass. In a series of photographs it was shown that wire glass remained intact after being subjected to a heat, when the walls were cracked, plain glass partly melted, smokestacks had fallen and fusion had taken place on the face of the brickwork. The author of the paper says: "Such rapid strides are being made in perfecting the methods of manufacture that it will not be long before wire glass will be generally accepted as an established commercial product, its process of evolution being analogous to that of steel."—*Exchange.*

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. **"American Hardware Trades Reference Book,"** published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. **"Ladd's Discount Book,"** with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble, and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. **"American Hardware Store,"** with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It i edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

Fill out Order, and address as below:

"THE MOST HELPFUL AID."

Pike Mfg. Co., Pike Station, N. H. [*Whetstones, Oil Stones, etc.*]: We like to keep our name and our wares before the public in a modest way. We have found HARDWARE the most helpful aid toward accomplishing that purpose.

"COULD NOT KEEP HOUSE WITHOUT IT."

Sickels, Preston & Nutting Co., Davenport. Iowa. [*Wholesale Hardware*]: We would not know how to keep house without HARDWARE. The review of the Hardware markets, trade reports and editorials are frequently read before letters are opened that are received in the same mail with HARDWARE.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

"WILL CONTINUE TO USE 'HARDWARE.'"

Monarch Cycle Mfg. Co., Chicago, Ill. [*Bicycles*]: We used HARDWARE last year quite extensively, and as soon as we have our arrangements completed for next season's business, we will continue to use your publication to reach the Hardware trade. We have no hesitation in saying that HARDWARE is one of the best mediums of its class, and the services rendered us by your publication have been entirely satisfactory.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

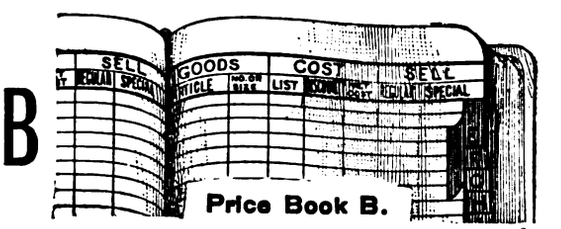
Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

Digitized by Google

HARDWARE PRICE BOOKS.

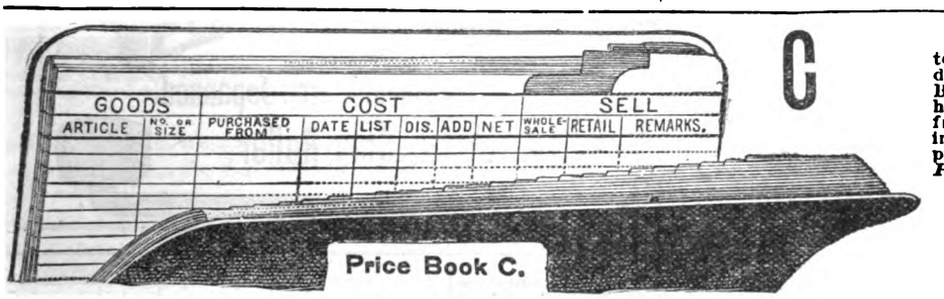
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:



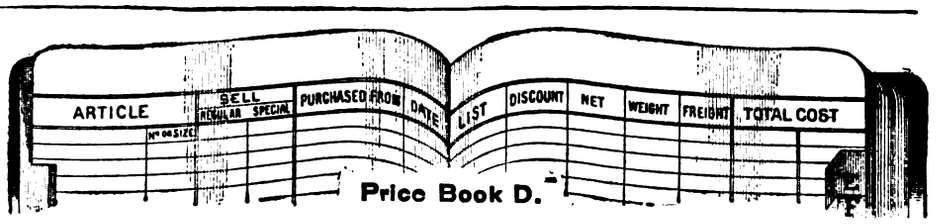
A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



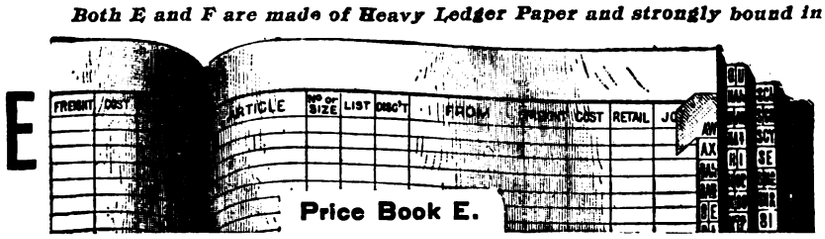
FOUR EDITIONS:

C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

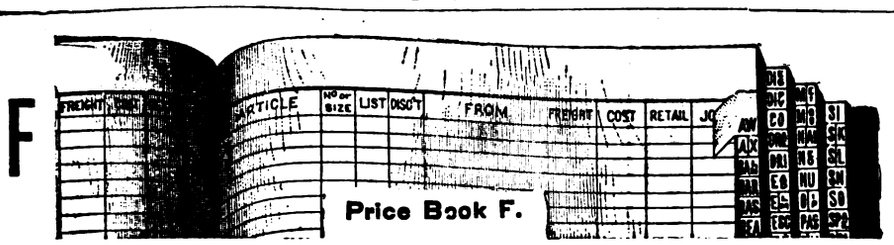
D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2.50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to AU For Chisels, turn to CHI
" Parers, Apple " PAP For Iron, turn to IRO
" Cutlery, " CUT " Irons, " IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

A MATTER OF CONFIDENCE

Buying Solder is largely a matter of confidence. No living man can tell by sight whether Solder is "½ and ½" or whether it is something else. "Straight Solder" looks exactly like Solder which isn't straight. A buyer is wholly at the mercy of the manufacturer. "Straight" Solder is easy to make. No secret about it. Half is tin and half is lead. The "½ and ½" Solder we make is no better than that made by any other reputable manufacturer. Actual quality is what makes price. When a so-called "½ and ½" Solder is offered at a lower price than we ask, the chances are that instead of being half tin and half lead, there is less expensive and less desirable material in it. We never have and we never will resort to deception in order to make prices small.

THE CHANCE OF A LIFETIME.

A company already organized, standing well in the community and doing a successful business, being desirous of greatly extending their field of usefulness by increasing sales, are willing to dispose of an interest to several salesmen of sufficient calibre to guarantee new business. . . . . .

The company already have in their possession a stock of Cutlery valued at $40,000, consisting of Pocket Knives, Scissors, Shears, Razors and Razor Strops, etc., including the finest line of Manicure Goods in the market, and numerous Specialties of kindred importance. All of this stock was purchased under the old tariff, well selected by expert buyers, every pattern possessing selling merit.

Traveling salesmen with experience able to purchase an interest in this lucrative business and continue on the road in the employ of the company, will find this an opportunity for investment of rare occurrence. Address, giving own name, and references,

ALPHA & OMEGA,
Care "Hardware," No. 143 Chambers St., New York City.

"READS ADS. AND ALL."

Fred. A. Welles, Milwaukee, Wis.: I like your paper first rate, and I read the advertisements as well as the rest.

MANUFACTURER OF

Curry Combs and Sheet Metal Goods. . .

Solid Steel Spout Machine Oilers and Roller Skates.

It will pay to write us for samples and prices.

SURPLESS, DUNN & CO.,
SOLE AGENTS.
55 Warren St., NEW YORK.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Tinned Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is bemoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices. It will gather Apples, Peaches, Pears, &c.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price per dozen, $5.00.* *Liberal discount to the trade.*

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

AMES SWORD CO.,

CHICOPEE, MASS.

MANUFACTURERS OF

Endless Silk Sewed Strapping Belts.

Corresponaence Solicited. *Discounts Quoted.*

THE BURR PATENT STEEL

Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block.
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of."

MINING AND BLASTING POWDER Send for Catalogue.

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone: no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

A MATTER OF CONFIDENCE

Buying Solder is largely a matter of confidence. No living man can tell by sight whether Solder is "½ and ½" or whether it is something else. "Straight Solder" looks exactly like Solder which isn't straight. A buyer is wholly at the mercy of the manufacturer. "Straight" Solder is easy to make. No secret about it. Half is tin and half is lead. The "½ and ½" Solder we make is no better than that made by any other reputable manufacturer. Actual quality is what makes price. When a so-called "½ and ½" Solder is offered at a lower price than we ask, the chances are that instead of being half tin and half lead, there is less expensive and less desirable material in it. We never have and we never will resort to deception in order to make prices small.

"Bright and Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

HARDWARE

VOL. XVII. AUGUST 10, 1898. NO. 9.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The enjoyable anticipation of an early peace, which is now the most prominent item of news, will naturally have the most exhilarating effect upon the Hardware markets of the world and stiffen still further the demand for staple goods which has been awaiting some such settlement of the international struggle for supremacy.

After experiences covering year after year of enforced commercial uncertainty, with only last year's improvement indicating a return to prosperous conditions which promise a steady business, with a certainty of "gains for all our losses," we have reached a point where the future seems filled with all the harbingers of successful traffic, making national advancement certain of development. Every business man is imbued with feelings of confidence in our future prosperity, coming to us from all quarters; and in the distribution of profit which will result, all classes of labor will receive a dividend.

Jobbers in almost every section report an excellent continuation of good business, with stocks sold down to the lowest point, leaving empty warehouses. The majority of retailers are paying for purchases more promptly than has been the custom for a long time, and jobbers in all branches of the trade are anticipating the best fall business they have known for years. Where stocks are exceptionally low, the orders are being prepared for speedy delivery, as there is a strong fear prevailing that unless goods are forwarded at early dates from factory, another season of a scarcity of supplies will again be upon us. Vacations will soon be over, and the full tide of preliminary hustling for fall requirements will keep our merchants on the anxious seat until the season's rush commences.

The prestige gained by our victorious army and navy will follow our triumphs of commerce all over the world, inspiring our merchants and manufacturers to a greater degree of activity, resulting in new energies becoming potential and new impulses being shared, in every department of progressive industry.

The fact that quite a number of the large consumers of iron and steel are now running their works day and night, leaves no possible doubt of the expanding domestic consumption, especially as some among them even many weeks ago had their orders booked for material for future delivery, which has not yet materialized, and the non-delivery of which has embarrassed other lines of business to a great degree; surplus stocks having in a great measure disappeared from the warehouses under the continued steady demand keeping up through the usually dormant conditions of a summer season.

Agricultural implement makers, knowing how great a demand will ensue from the sales of this year's crop, are promoting by every possible means in their power the production of special machinery for the making of which the iron and steel is not forthcoming, although on mill order books for months.

Let Peace Prevail.

The closing of the war and the return of our warriors to the numbers demanded by a peace footing, with the added necessity of a garrison for each of our new acquisitions of territory, will give an impetus to industrial and commercial expansion such as the country has not seen in decades.

New enterprises will follow the territorial possibilities, an active emigration of brainy workers and ambitious exploiters will open up to fortune's favors many of the most promising opportunities ever presented to the American people.

The world never until to-day has had such an excellent idea of the progressive character of the ideal American. His bravery and far-sightedness, his active and energetic temperament, combined with a conscientious regard for the future welfare of even the foe whom he has for months been forced to face, will give him a prestige before the nations of the world, that will always be regarded as part of the national supremacy in every field of thought or action.

In our humane treatment of the fallen foe, by feeding his starved stomach and sending his bullet-punctured body back to the fireside from which Spain wrested him against his will, we have set a standard of humanity under barbarous possibilities, that will make future conflicts less cruel when unavoidable, and make diplomacy take the place of force in more than one important contention of the future.

Our New Markets.

One of the most active, energetic forces in the world is Capital. It is restless under inactivity, and tireless in constant effort. It slaves while its owner sleeps, and redoubles its effort under his personal guidance. It constantly seeks new channels and new directions in which to flow.

Notwithstanding the fact that it is only a few days since we captured Santiago de Cuba, there are already many wild rumors flying of contemplated investments for American capital. An elaborate system of drainage is

Digitized by Google

hinted at; an extensive street railway is half negotiated for; plans for modern buildings suited to the climate and requirements, already float in the brain of more than one speculator.

Every American believes that we can and will retain, at least commercially, all that we have taken; that is Cuba, Porto Rico and the Phillipines. What do these countries represent? A combined area of about 200,000 square miles; a total population of nearly 12,000,000 people; and a yearly trade, taking the ante-bellum days as a criterion, of $156,600,000. This amount of business has been done despite the iron hand of priest, soldier and statesman; each of whom, as the colonial history of Spain's possessions so cruelly indicates has ground from the native every wretched *peseta* that superstition and oppression could extract.

What the commercial future of these islands may be under a free, just, progressive, energetic and intelligent commercial policy, such as may be expected from the United States, it would be difficult to say. Aside from climatic conditions, which are the most favorable to prolific production, the natural and totally undeveloped resources are boundless. Each of the countries in question possesses millions of acres of virgin forest, the wood being of the most valuable fine-grained variety, suitable for the manufacture of the finest furniture. It is estimated that in Cuba alone there are 13,000,000 acres of such woodland, to which the axe is a stranger. It is believed, and in some degree proven, that rich deposits of various ores abound. Copper and iron have already attracted American capital to Cuba, and gold and silver have also been found in paying quantities. Porto Rico is credited with gold carbonates, sulphides of copper magnetic oxide of iron, lignite and yellow amber. The mineral wealth of the Philippines is supposed to be enormous. Gold and silver are known to abound in the interior, and the grasping policy of Spain is alone responsible for the jealous reticence of the natives in concealing the source of this wealth.

Who, then, shall predict the future of these islands when freedom and intelligence replace oppression and superstition?

There are virgin fields there for American goods, too. The countless sugar mills are to be rebuilt and equipped with modern machinery. The burned or shot-riddled factories must be replaced and numbers of new ones added to meet the requirements of increasing prosperity. American capital will necessarily be directed by American brains and American labor; and the present excuse for dwellings will be replaced by modern architecture and equipped with modern conveniences.

That the manufacturers of Hardware, tools and machinery of this country will get the bulk of this new trade, there can be little doubt. Having the best goods, the advantages in price, and being so situated geographically as to command it, we need fear no competitors. There is but one more requirement to make the market ours absolutely, and that is to be first in the field.

The Art of Advertising.

At the present time, when the mighty hunters of the almighty dollar are as countless as the shifting sands of the ever-changing sea, the art of advertising is like a blazed path through the trackless forest of the reading public; unless the advertiser blazes his path with consecutive and progressive exploiting, he is soon lost to sight, although dear to memory as a purposeless distributor of accumulated wealth. There are no short cuts. The royal road to deserved success is one long continuous hustle for business, backed by capital and piloted by experience.

A Neglected Market.

United States Consul-General R. F. Patterson, at Calcutta, India, has recently called attention to the Indian Hardware market; and indicates that, while American manufactures have obtained some foothold, the amount could be materially increased with proper attention.

His report states that the importation of butts is particularly large, every variety being used, and the same applies to spring hinges. The demand for padlocks is also very large. The importations cover all qualities, from the lowest grades to the most expensive; the sales of the cheaper being much larger. Rim and mortice locks are also largely used; as well as cabinet, till box, and cupboard locks, of brass.

In referring to lamps, Consul Patterson states that there is a larger demand for every kind, including floor lamps, hanging lamps and bracket lamps, in all grades. America competes with England, Germany and Austria in these goods.

The cotton and jute mills consume a considerable quantity of leather belting; and this trade is almost entirely in the hands of British manufacturers. Sizes up to 6-inches for single and 18-inches for double, are used. There is no duty on this line of goods, but particular care must be taken in packing. The belting should be covered with water-proof paper, and cased in the strongest manner, to stand rough usage.

Shovels are not used extensively, the distaste of the native for exertion making the hoe preferable. Some few of the cheapest grade of stamped steel shovels are imported from America, the "T" headed, round-nosed variety being the favorite. Most of the hoes are imported by the Secretary of State, and naturally these are procured in England.

Cheap American ploughs are used by some European planters; and these must be of light draft.

E. Bissell & Co., auctioneers, Nos. 12 Murray Street and 15 Park Place New York, announce on page 36 of this issue, several important sales in their line of goods. The first will occur on Tuesday, August 16th, at 10 A. M., and will include edge tools, shelf Hardware, hammers, hachets, screw drivers, etc., etc. The second sale will occur on Wednesday and Thursday, August 24th and 25th, and will include a large special trade sale of table and pocket cutlery and kindred goods. Catalogues of these two days' sales will be ready on August 20th, and will be sent on application.

An effort is being made by Edward Fleischer of Chicago, to persuade the Hardwaremen of that section of the country, to seek representation at the South African exposition, which is to open at Grahamstown, Cape Colony, on December 15th. Mr. Fleischer states that South Africa offers exceptional trade opportunities for manufacturers of agricultural implements, machinery, Hardware, tools, bicycles, etc., and is prepared to give all desired information on application to his office, No. 40 Dearborn Street, Chicago, Ill.

J. E. Keyser, a well-known Hardware dealer of Charleston, W. Va., was frightfully burned while repairing a gas pipe some days since. It was the old endeavor to locate a leak in a close room, and the striking of a match, with subsequent developments.

Digitized by Google

THE DANGER OF OVERSTOCKING.

In discussing the question of selling goods, a prominent merchant said recently to a representative of *Hardware*, that most salesmen were "too anxious to sell large orders." He considered that many of the failures could be traced directly to the fact that the retailer had been loaded up with too large a stock, which he had to carry long after it was paid for, or worse still, perhaps, had found it necessary to settle for with notes, which fell due before the stock was turned over.

There can be no question regarding the salesman's feeling on the subject. His object is to sell quantity and make a showing at the end of the year. His position depends entirely upon results. If he is a salaried man and the profit on his yearly business does not warrant the expense his salary is cut down or his services dispensed with. If he is on commission, and does not earn a fair living, he makes other arrangements himself. Therefore he goes forth to make big sales, and gain the sweet smile and gladsome hand of the head of the house, upon his return. His instructions all bear on the same point. The fact is impressed upon him by his employers that he must push sales; and probably the only question he encounters from his house is: "Do you consider this man good for the amount of the order?"

The query as to whether the buyer's business warrants the quantity or the quality of the line ordered is of secondary, or, more often, no importance. "Why," argues the manufacturer or the jobber, "should we constitute ourselves judges of another man's business? Let him be the sole judge of what he requires. He is the one who must pay, and he would very properly regard any interference on our part as an impertinence." All this is true in part, but there is another side to be considered.

In the first place, a far-sighted business man should not be satisfied with the sales of to-day. He must build upon the future, and having secured a customer, he should seek to foster his trade by protecting his interests at every point as jealously as he would guard his own. This is not from any humanitarian standpoint, but is simply and purely good business policy. What stronger claim can be put forth to obtain—and retain—a retailer's custom than the knowledge of the fact by him, that his interests are safe in the hands of his jobber? Cut prices can always be met. Excellence in goods may always be equalled. Friendship in business is a slender reed at best. But when this friendship is fortified by the feeling of identity of interests, in which each participant receives equal consideration, the shock must be profound indeed which will sever such relations.

In the second place, the wholesaler is in a better position to see the general trend of affairs, and to discount future depression. His business is on a broader basis; he comes in contact with trade from a more general standpoint and he has means and ways of obtaining information, and thereby forming accurate conclusions in regard to future business, that are usually denied the retailer. That the latter should in all cases receive the benefit of the greater opportunities of the former, there can be no question. If the retailer, over-persuaded by the plausible salesman, shows an inclination to stock up too freely on any one line, or displays a desire to put in too many goods that are naturally slow sellers, would it not be better to ship part of the order and hold the balance for a little, than to load him up with a stock which will remain on his shelves until the interest eats up his profit?

If he runs short he will not be long in announcing the fact; while if he discovers that his wants are sufficiently supplied by the partial order, he will ask that the remainder be held indefinitely. Some will be inclined to argue that this is a dead loss to the supply house. That is where the mistake is made. Had the retailer received his whole order, and found that the goods did not sell as quickly as he expected, he would be very likely to conceive a prejudice against a good line, and this feeling would soon be transferred to the house selling them. If he had paid for them he would feel that he had suffered a loss. If he has not yet paid for them his inclination will be to put the matter off; and the wholesaler would probably get his second order and the money for it, as quickly as he would get paid for the first.

Some jobbers may argue that during the past few years of depression the trouble has all been on the other foot; that instead of over-stocking, the retailer could not be induced to buy enough. This is also misleading. At no time do the arguments of this article apply more strongly than in dull times. As an example of this, the merchant referred to at the beginning instanced the action of his house, at a time of political uncertainty some few years since. The dealers of a certain section, feeling an overconfidence in the result of a general election, were inclined to order more freely than the conditions warranted in the opinion of the wholesaler. Orders were cut in two by him, and the retailers notified that the balance would be held till required. It was not long before the wisdom of this was seen by the retailers, who wrote instructing the balance to be held indefinitely. The result was that the wholesaler made many friends, and his opinion and advice carried weight in the future. The retailers found that instead of having their shelves filled with slow-selling goods, and the inevitable big bills therefor, their stock was large enough for the demand, and their bills, correspondingly small, could be met promptly.

The whole question resolves itself into one of self-interest. The wholesaler who looks into the future and seeks to build thereon, will seek in every way to foster the interests and good will of his customers; and by so doing build up a constituency that in time becomes the most valuable asset the firm possesses.

An American paper, [*Hardware*,] recently gave good advice when it said, "Never write a letter that will leave a sting." The fact is men too often write in a hasty manner that which they regret soon afterwards. It is a good thing to remember that what is sent in a letter can be brought out at any time and re-read, and by this means old sores are revived. Think well before answering an unpleasant letter in an embittered tone. Business courtesy should be maintained even to an enemy.—*Ironmonger's Chronicle.*

British official reports value the imports of the island of Cuba at $66,000,000, and its exports at $94,000,000, for the fiscal year ending April, 1896. Its total trade during 1896 with the United States was $47,500,000, and with Spain $34,400,000, with Mexico, during the year ending June 30, 1897, $27,063.—*Exchange.*

Convalescent (dictating): Please say to Mrs. Jackson that I thank her, not alone for the brandy peaches that she so kindly sent me, but for the spirit in which they were sent. —*Exchange.*

Death of Rochus Heinisch.

Rochus Heinisch, who has long been identified with the Hardware manufacturing industry of the country in connection with the business of R. Heinisch Sons Co., Newark, N. J., suddenly died of apoplexy at his home in Newark, on the evening of Wednesday, July 27th. He had been ill of Bright's disease for some time, and during the past three months had been unable to attend to business.

Mr. Heinisch had devoted his whole life to the business in which he was engaged at the time of his death. He was born in Newark sixty-one years ago, being the son of Rochus Heinisch, who founded the business of R. Heinisch Sons Co. The elder Heinisch was born in Bohemia, and learned the trade of a surgical instrument maker. Coming to America, he settled in Newark in 1829, and conceived the idea of making shears of malleable iron, faced with steel. He succeeded, and at his death in 1874, left to his sons a flourishing business. In time a company was formed, and Rochus Heinisch, who has now just died, was made its president. He had learned the business in all its branches.

It was under his management that the company's present factory in Thirteenth Avenue was built.

During the civil war Mr. Heinisch enlisted as a private in Captain W. W. Morris's Company A, Twenty-sixth Regiment, New Jersey Volunteers. After the regiment was mustered into the service he was elected a second lieutenant, and while in the field was promoted to be first lieutenant. He took part in the campaign of Fredericksburg, December 11–15, 1862, and in the fight at Chancellorsville in the following May. He also participated in the storming of the heights of Fredericksburg, on May 3, 1863, and of Salem Heights on the same day, and shared in the capture of the earthworks at Franklin's Crossing on June 5th.

Mr. Heinisch was a member of Damascus Commandery, K. T.; Kane Lodge, F. & A. M., and Lincoln Post, G.A.R. He was a large-hearted and genial man, with much quiet dignity, and was very generally esteemed. He leaves a widow, two sons and a daughter.

The funeral occurred on Saturday, July 30th, at Mr. Heinisch's late residence. It was largely attended. The oak casket, with massive silver side rails and handles, was surrounded by large floral offerings. The employees of the Heinisch factory contributed a mound of choice flowers standing nearly six feet high. Lincoln Post sent a Grand Army badge in colors. Kane Lodge, F. A. M., was represented by a piece showing the insignia of the order; Damascus Commandery contributed a large floral offering, and there were many others from relatives and friends. The organizations named were represented by members. The 150 employees attended in a body, and escorted the remains to Mt. Pleasant Cemetery. Rev. Dr. Henry Baker, who came on from Wilmington, Del., and the Rev. Dr. Mackay, of the North Reformed Church, conducted the services.

The regard and affection in which Mr. Heinisch was held by those intimately associated with him is shown by the following resolutions adopted at a special meeting of the R. Heinisch's Sons Co. Employees' Mutual Aid Association of Newark, N. J., held on July 28th:

Whereas, The Almighty has taken from us our esteemed and beloved employer and treasurer, Mr. Rochus Heinisch, in whose death we have sustained an irreparable loss, and

Whereas, His constant and untiring devotion to his employees has won our esteem and admiration, and

Whereas, In his untimely demise we sustain the loss of an earnest and trustworthy employer, whose presence will be missed because of his kindly disposition and regard for his employees; therefore, be it

Resolved, That we, the employees of R. Heinisch's Sons Co., place upon record our deep sense of sorrow at the death of Mr. Heinisch, for whose character and achievements we had the highest respect and whose personal qualities attached us to him;

Resolved, That we extend to his sorrowing family our sincere sympathy in this sad affliction;

Resolved, That we attend the funeral in a body, and that these resolutions be suitably engrossed and presented to the bereaved family.

The Stanley Booklet.

The Stanley Rule & Level Co., New Britain, Conn., and No. 107 Chambers Street, New York, are issuing to the trade a twenty-page booklet having reference to their improved labor-saving carpenters' tools, and including their complete line of Bailey's adjustable planes. To any dealer unfamiliar with the extent and variety of the labor-saving devices with which this pamphlet is filled, an inspection of its contents will prove a revelation. No finer conception of the inventive skill demanded by the up-to-date craftsmen can be shown than in such tools as the adjustable beading rabbet and matching plane, the adjustable dado, fiiletster, plow, etc., the Universal plane, which includes a moulding plane, match, sash, chamfer, beading, reeding, fluting, hollow, round, plow, dado, rabbet, filletster and slitting plane, a tool which, in the hands of an ordinary carpenter can be used for all kinds of work covered by the full assortment of so called fancy planes, which in old times formed almost the entire contents of a carpenter's tool chest. The pamphlet is filled with illustrations of such useful tools as improved marking and mortise gauges, butt gauges, Universal spoke-shaves, core box planes, tongueing and grooving planes, hand beaders, handy router, circular and chamfer planes, etc. In a circular accompanying the booklet the company announce they have added to their regular assortment of Bailey's adjustable planes a No. 5½, including it with the numbers that are furnished with corrugated bottoms, when so ordered. They humorously observe in the same circular: "Two opposite effects often result from a single cause. For instance: The 'better times' of this present year have created with us a greatly increased demand for our high-grade carpenters' tools. And the same 'better times' have caused a falling off in the demand for Pegging Awl Hafts, because farmers, mechanics and others can now afford to buy new shoes, harness, etc., instead of cobbling up the old ones."

Death of Joseph Banigan.

There passed away on July 28th, at his home in Providence, R. I., a man who has had important connections with the Hardware trade, and whose whole career was full of a stirring activity. This was Joseph Banigan, a leading rubber manufacturer, and president of the American Wringer Co., with headquarters on Chambers Street, New York. He had been quite ill for several months prior to his death.

Mr. Banigan amassed a large fortune, and was, in every respect, a self-made man. He was born in Carickadoncey, County Monaghan, Ireland, June 7, 1839. His father's family came to America and settled in Providence in 1847.

Joseph Banigan was sent to school, but he remained for only a year, and then went to work in the factory of the New England Screw Co. After this he learned the jeweler's trade. When he had served his time, he worked as a journeyman in Providence and Attleboro He had made a study of the manufacture of rubber, and when twenty-one he joined with John Haskins in the manufacture of rubber stoppers for bottles. He went to Boston and took charge of the factory there as superintendent. The rubber business interested Mr. Banigan, and he continued to study, and discovered a process for the vulcanization of the substance. This discovery he put into use, and later he organized his business into the Goodyear India Rubber Bottle-Stopper Co., of which he was manager until 1866.

He became interested in the organization of the Woonsocket Rubber Co. The business was started in a two-story building, and Mr. Banigan was buyer, superintendent and manager. The business of this new concern grew rapidly, and the next year it was made a stock company.

Three years ago Mr. Banigan sold out his interest to the United States Rubber Co. for a large sum and accepted the position of president of the United States Co. at a salary of $50,000 a year.

Mr. Banigan's connection with the wringing machine industry dates back to 1878, when he was elected a director of the Bailey Wringing Machine Co., of Woonsocket, R. I., afterwards becoming its president.

In 1891 he organized the American Wringer Co., which was a consolidation of the Bailey Wringing Machine Co., the Metropolitan Mfg. Co., the Empire Wringer Co., and the F. F. Adams Co.; was elected president of the new company and held the position until his death.

Mr. Banigan was progressive in character, and when once convinced of his course, showed an indominable will and determination in its pursuit. He had a keen appreciation of the humorous, and was always quick in repartee. He was a good talker, and to this talent is due to a large measure his success in business. He was proud of his career, and was never ashamed to call attention to the house in which he was born. He had no college education, but was an able business man, as is illustrated in the way he built up his large fortune.

Mr. Banigan was also interested in many concerns outside his rubber interests. His sagacity and ability, together with hard work, gave him a leading place in the busines world, and at the time of his death he was reputed to be one of the wealthiest men in Rhode Island. His reputation as a successful business man had been equaled in his character as a philanthropist. Educational, religious and charitable work of all kinds, without reference to race or creed, had been aided by frequent gifts from him of money and land, which were said to aggregate over a million dollars. In addition to these many gifts to charitable and educational instutions during his life, Mr. Banigan in his will has left about $140,000 to various charities.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed a fireproof boiler house for the Hendey Machine Co., Torrington, Conn.

C. H. & E. S. Goldberg.

C. H. & E. S. Goldberg, whose extensive premises at West Broadway, Reade and Hudson Sts., N. Y., are illustrated in this column, have justly earned the reputation of being the representative house in the Wooden Ware industry; carrying in their full and complete stock the largest assortment of goods in that line, ever seen under one roof. Their commodious quarters, occupying as they do almost the entire block bounded by three streets, afford them ample facilities in sample rooms and storage capacity, to display the products emanating from the 100 factories with which they have established connections, acting as manufacturers' exclusive agents in their line for very many of the specialties, which have already achieved a world wide celebrity. Merchants who add to the attractiveness of their local assortments by a large and varied stock of housekeeping appliances, will do well to correspond with this firm, and from their extensive catalogue learn the large variety of articles, all of which give the retailer a substantial profit, that can be obtained. In baskets alone, the combined product of twenty factories contribute their share. In brushes, the line extends from tooth brushes to floor brooms; in corn brooms, which is usually the foundation of a stock of house furnishing goods, the entire product of several factories are marketed through the dis-

tributing facilities possessed by this progressive firm. In addition to the usual lines common to all stocks of wooden ware, this firm are large importers of China matting, in all the leading styles, and carry large stocks of floor and table oil cloths, linoleum, etc., such goods as are associated with the names of makers like Thomas Potter, Sons & Co. They are large distributors of the Kalamazoo Sled Co.'s childrens sleighs; do a big business in wooden packages, carrying in stock every conceivable style; which, when the location and quantity make factory shipments advantageous, can always be shipped direct at a great saving of freight, etc. Attention is called to their advertisement on page 39.

The Wm. Schollhorn Co., New Haven Conn., have issued a neat and comprehensive catalogue under date of July, 1898, which is well worth the interest and attention of the trade. There is a change in some of the price lists to which attention is called, as this catalogue supercedes all others previously issued. The company in an introductory note call attention to the fact that because of the increased demand for their goods, they have been compelled to enlarge their facilities with improved machinery and tools, thus enabling them to produce high and medium grade goods at low prices. The catalogue illustrates and describes their full line of shears, scissors, plyers, etc., which lines are too well known to the trade to need recapitulation here. Sizes, prices and full description are given of each article. Catalogue will be sent on application.

Good Locks.—No. IV.

It is interesting to trace the evolution of an important invention from its early conception. Where it embodies important principles this process usually carries it far beyond the lines which at first may have seemed to limit its application and scope. This is notably true of the Yale system of lock construction, some of the earlier phases of which have been sketched in previous articles. When first

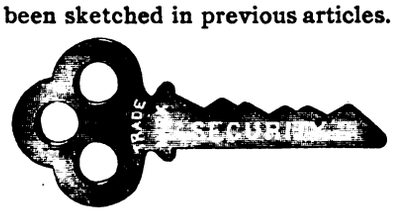

FIG. 1.

introduced the Yale lock was operated by a flat steel key of the type shown by Fig. 1. This key, made from sheet steel, was the earliest key of this type and the precursor of the multitude of imitations which have since been produced, which are commonly but incorrectly represented as, or supposed to be, keys pertaining to Yale locks. Indeed, this fallacy is now so common that any lock having a small flat key is apt to be designated as a Yale lock.

The true Yale lock, however, illustrated and described in our issue of January 25, 1897, is one having a cylinder which contains a rotating plug and a series of pin tumblers, set by the insertion of the proper key, which thus serves to rotate the plug and actuate the mechanism. The popularity and success which followed the introduction of the original Yale lock by its inventor, Linus Yale, Jr., and his partner, Henry R. Towne who, jointly organized, just prior to the death of Mr. Yale, the corporation now known

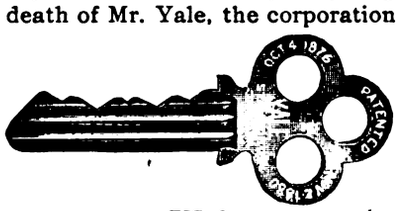

FIG. 2.

as the Yale & Towne Mfg. Co., resulted in the early and steady enlargement of the line of locks constructed on the Yale system, and in a series of improvements and additions thereto, which have continued steadily down to the present time. One of the earliest of these improvements consisted in the substitution, for the original flat key, of the corrugated key, shown by Fig. 2. The peculiar construction of this key, and of the corresponding key-way in the cylinder, added greatly to the safety of the lock, by making much more difficult the picking of the lock, and by practically eliminating the possibility of any key previously made fitting one of the new locks, because of the fact that none of the former could even enter the key-way of the latter. This construction also increases the strength of the key, while adding little or nothing to its weight.

Some years later a still further improvement in this direction was effected by the invention of the paracentric key,

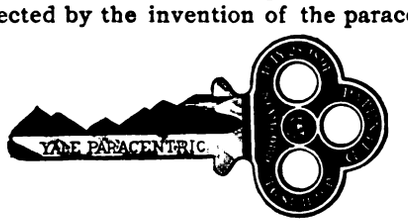

FIG. 3.

shown by Fig. 3, and now used with all the genuine Yale locks.

The Yale system originally was applied to only seven varieties of locks. At the present time the line of Yale locks embraced in the catalogues of the Yale & Towne Mfg. Co., comprise upwards of one hundred distinct types or varieties, many of these made in different sizes and finishes, with an almost infinite variety of decorative metal work in the case of locks intended for use on doors and elsewhere where ornamental effects are desired. The Yale system has thus been extended so as to apply to locks for almost any conceivable use, including doors of every kind for public buildings, residences, etc.; for desks, drawers, and other cabinet work; for bank safes, chests, and safe deposit boxes; for doors of prisons, asylums and other public institutions, including also various forms of padlocks. The product of the Yale & Towne Mfg. Co. now embraces a vast variety of locks of every kind additional to those of the Yale system, but the latter is adopted always for locks of the better grades, and for every use where security is the first requirement. Their variety is now so great that a Yale lock can thus be obtained for any desired place or purpose. Its identity can readily be determined by the facts and the descriptions contained in this and previous articles, and, when established, may safely be accepted as a guaranty of the highest attainments in the art of lock making.

"100 Ads. For $1.00."

The attention of readers is called this issue to the advertisement of J. B. Kessler & Son, Clayton, Mich., who are advertising a booklet known as "100 Ads. for $1.00." This book is on Hardware and implement advertising, and one that will be of interest to the trade.

It was written and compiled by Burtis R. Kessler, the junior member of the firm, who has not only had practical experience behind the counter, but special training in Chicago under one of the best Hardware advertising experts in the country, fitting himself for this work. This series of advertisements were selected from many hundreds used, for the reason that they brought prompt results. No matter how well you write advertisements, these suggestions will aid you as they will enable you to tell your story in a new way. It is one thing to buy goods, and buy these well, and something else to sell goods. Only intelligent publicity will successfully attain this end. One cannot afford to sell at small profits, unless he does a large business, and one cannot expect to do a large business, unless he advertises his bargains.

Successful advertising must be regarded from two standpoints: First, that of the article itself, whose sale it is desired to create or increase; second, the various modes of announcing its existence in the market, and of persuading the public to purchase it as a benefit to themselves. This book is written from practice, not theory, and each and every one of the advertisements was written and used for the purpose of selling goods. We know that these advertisements have brought them business, and also know that they can be serviceable to you.

The Warren Co. in New York.

The J. D. Warren Mfg. Co., No. 152–158 Lake Street, Chicago, have removed their New York office to the elegant building in which the New York Hardware Club have their headquarters, the Postal Telegraph Building, No. 253 Broadway, where they will be represented by H. A. Graef who is well known by a large number of merchants throughout the United States, having been some fourteen years with the Hardware manufacturing firm of Sargent & Co., of New York, and during recent years representing a number of jobbers with headquarters in Chicago. He has seen the Warren shelving meet with great success, and realizing that the Hardware merchant is anxious to adopt reform methods of carrying stock, will devote his attention to this specialty hereafter in the Eastern States and foreign trade, and will be pleased to meet his old friends at his office, No. 253 Broadway, New York.

The population of Habana, Cuba, is about 220,000.—*Ex.*

The Toler Liquid Door Check and Spring.

John Toler, Sons & Co., Newark, N. J., for whom W. H. Quinn & Co., No. 103 Chambers Street, New York, are general agents, are placing upon the market the newest

FIG. 1.

improved door check and spring offered to the Hardware trade this season. We present herewith in this article several illustrations of the same. It is claimed to be entirely new both in style and mechanism, see Fig. 1, and upon inspection will be found strong, simple and effective in oper-

FIG. 2.—INSIDE OF RIGHT-HAND DOOR.

ation, combining in its make up the best achievements of other checks, while possessing a number of valuable features original with the one under consideration, among which may be noted:

It has a vertical case, with openings only at the top. It has no plugs or caps screwed to the cylinder ends. It can-

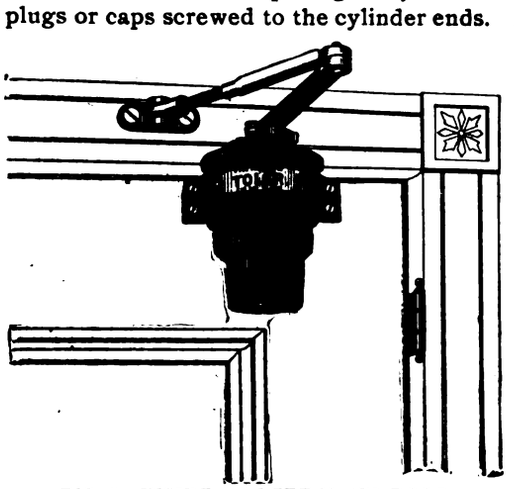

FIG. 3.—INSIDE OF LEFT-HAND DOOR.

not leak. There is no way for the liquid to escape after the check is applied. The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts, being made of the very best of material throughout. It works to perfection, closing the door quickly and gently. It is easily taken apart by anyone; no returning to the factory for anything, this saves time and money. It is a practical machine and very ornamental, see Figs. 2 and 3. When applied to the outside of doors it is necessary to use a bracket, as will be noticed in Figs. 4 and Fig. 5; the bracket being furnished without charge, upon application. They are put up at the factory for right or left hand,

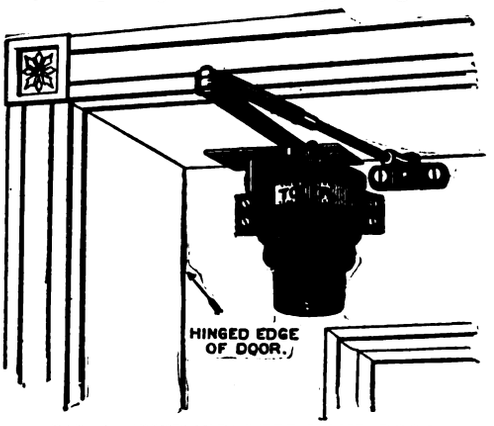

FIG. 4.—(OUTSIDE) LEFT-HAND DOOR.

but when necessary, the hand is easily changed by following simple directions.

It is placed on the market at the following price list. Discount on application.

Letter O.	For telephone booths, screen doors, etc...	$3.00
" A.	For light inside doors less than 3 feet wide.. ...	4.00
" B.	For light outside, or inside doors less than 3 feet 5 inches	5.00
" C.	For heavy inside or outside doors less than 3 feet wide	6.00
" D.	For doors less than 3 feet 9 inches wide.....	7.00
" E.	For heavy storm and outside doors.....	8.00

The regular finish is in gold bronze, but there is no extra charge for silver bronze or dead black when required. It

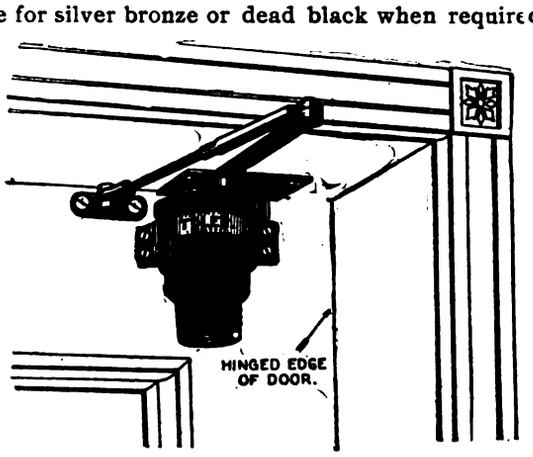

FIG. 5.—(OUTSIDE) RIGHT-HAND DOOR.

is also supplied plated in brass, nickel, copper, or silver, either plain or oxidized, at a slight advance in price for the extra finish, which is made a specialty of. Full information regarding this door check and spring can be obtained on application to either the factory or the general agents as noted above.

Bissell Co. Annual Election.

At the annual meeting of the directors and stockholders of the Bissell Carpet Sweeper Co., held at the general office of the company in Grand Rapids, Mich., on July 21st, the following officers and directors were elected to serve for the ensuing year:

President: Mrs. N. R. Bissell.

First Vice-President, Secretary and General Manager: C. B. Judd.

Second Vice-Prest. and Eastern Manager: T. W. Williams.

Assistant Secretary: Robert E. Shanahan.

Treasurer: Maurice Shanahan.

Dicrectors: Mrs. N. R. Bissell, C. B. Judd, Maurice Shanahan, T. W. Williams, Robert E. Shanahan, W. J. Drew, Henry Idema.

Smile and Fight.

There was, not many years since, a man associated with the Hardware trade of New York, who suffered from chronic pessimism. No matter what the condition, he could see it only from one side, and that was the dark side. When he came down to business in the morning he always accompanied his salutation with an inquiry for your health, and volunteered the information that you "were not looking just right." However well meant this may have been, it was bound to have a depressing effect; and the way this croaker was cured was both expeditious and novel.

Among his associates in business was a young man, since become the head of a large jobbing business, who looked well, felt well and was well; and who, moreover, had no desire to become anything else. This young man decided to try a cure on the gloomy one, and one day, by pre-arrangement, some twenty of the boys each expressed concern regarding the latter's health. What could be the matter? His eyes looked queer, his color was ten shades off, his lips were blue, his hand shook and a hundred other imaginary ills were recalled to him by his solicitous friends.

At first he did not pay much attention to it; then he became interested, and finally alarmed. About the middle of the afternoon he went to the head of the firm and asked to get off as he was not feeling well. His request was granted, of course; and he went to see his doctor, who can always enter into such a joke without being acquainted with the facts. He was advised to rest for a week, take a prescription which was furnished him, and see the doctor about every two days. He stood this for a week, and then decided he was sufficiently recovered to resume work. On his return to the store he was cheerfully informed that the whole thing was a plot, and after a few days of anger saw the joke and wiped the blot from his brain.

How thoroughly this same spirit is applicable to business health as well as the physical, may be seen every day by the observant man. It is surprising how many natures there are that partake of the character of the looking glass, and reflect every object that presents itself. Brown, the head of the firm, comes down in the morning after a bad night, and acts as though he were firmly convinced that the whole commercial world was going to the dogs. His associates and subordinates become imbued with his state of mind; and even the office boy feels like kicking the cat. A business friend drops in and receives the impression that Brown's business must be falling off or he would be more cheerful. A customer comes in and is served in a half-hearted manner that makes him half regret his purchase, and wonder if he really needs the goods; and so on until everybody feels that the only relief is closing time.

How different it is when the moving spirit in the scene is bright and cheerful. Ask the travelling salesman about it. Does he dare enter a customer's store with a long face and gloomy air? If he does, he gets an order for just what he expects—nothing. He must have a cheery word and smile though his very heart be eaten out with private griefs. He must have a bright, cheerful manner that will mpress his prospective customer with the fact that the sunshine of commerce is beaming, and that the outlook is good, or he can sell no goods.

We claim, as a civilized nation, to have reduced the possibilities of infection to a minimum. We have triumphed over diseases of this kind as represented by yellow fever, smallpox, typhoid and many others. Our system of sanitation is perfect. But what protection have we from the nfection of depression spread abroad so sedulously by the pessimist, the croaker, the complainer? Just one, and that is isolation. Shun him as you would a plague. Bar him off by himself until he learns that cheerfulness is to the mind what cleanliness is to the body. Keep smiling and fighting and you may laugh to scorn the darkest combinations that misfortune can array against you. Seek always to impress your fellow beings with the bright side, and both they and you will find the mountains of care and worry gradually dwindling into insignificant mole hills, so easily overcome that the wonder will be why they loomed up so large and ominous in the distance.

Ausable Horse Nails.

The Ausable Horse Nail Co , No. 10 Murray Street, New York, Abraham Bussing, president, report having done an exceptionally well sustained business during the year ending July 1st, and from indications already at hand, the fall business will largely exceed the most sanguine expectations

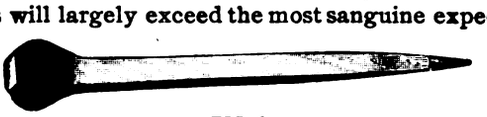

FIG. 1.

of the early spring. The Ausable Horse Nail Co. were the pioneers of the hot-forged and hammer-pointed improvements in horse nails that now so thoroughly prevail in the manufacturing methods of this important industry, the old fashioned hand processes that previous to the advent of

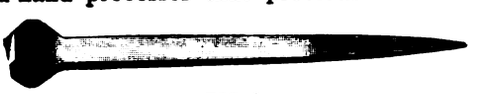

FIG. 2.

this company were deemed essential, having been imitated so successfully, no horse nail can be marketed to-day deficient in this respect. The styles of heads that have been found popular in different sections of this country and abroad are made in great variety, the leading styles being

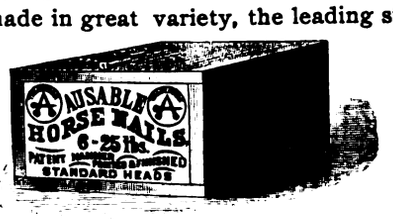

FIG. 3.

shown in the illustrations herewith, which are the standard head, Fig. 1, and the light head, Fig. 2. These horse nails are marketed in boxes holding twenty-five pounds, Fig. 3, the most favorable form for convenient handling for all branches of the trade.

The Wilmot & Hobbs Mfg. Co., Bridgeport, Conn., are making extensive additions to their manufacturing plant, which consist of two large buildings. These buildings are to be used as an engine and plating building, and a machine or manufacturing building. The engine and plating building is about 60 feet wide and 100 feet long; two stories high, steel frame construction, with brick side walls and concrete floors. The machine building is about 80 feet long and 135 feet wide, and three stories high. This building is of steel skeleton construction throughout. The floors are designed for heavy loads and are carried on corrugated iron arches supporting concrete filling. The aim in the designing of these buildings has been to get the most convenient structures possible and the maximum amount of light consistent with stability of structure and with economic construction. The designs of the buildings were made by the Berlin Iron Bridge Co., East Berlin Conn., who furnish and erect the steel structural work.

"Father," said a thoughtful little boy, "how many feet has a dog, if we call his tail a foot?"

"Why, five feet, my son."

"No, father, that isn't right."

"How so, my son?"

"Why, he would have only four feet. You see, calling his tail a foot doesn't make it a foot."—*Modes and Fabrics.*

The Merchant's Bank-Profits.

In these days of close competition and narrow profits the business man, to be successful, must study every detail of his affairs with careful scrutiny. It is by this means alone that he can discover where unnecessary expense can be cut off and where additional profits can be realized without sacrificing liberality toward patrons and without diminishing the popularity of his store.

It is frequently discovered that a merchant, while progressive in most matters, still fails to perceive the profits to be made from discounts. A case in point comes to my mind: Some time ago a customer of a certain house was found to be very tardy in his payments. Investigation of his statements made to the commercial agencies showed that he was in good financial condition, having a surplus of some $20,000 over all indebtedness. He carried a stock of $10,000. His annual sales were about $30,000, which would indicate that he turned his stock three times a year. In other words, with a capital in use of only $10,000, he was doing a business three times that volume in amount. This is an important fact to bear in mind. It was found further, upon investigation, that this merchant, in common with many others, had gained the idea that he could place his money in outside investments to better advantage than would follow from using it in his business.

Finally I had the opportunity to do some figuring for this man. In some lines of goods which he carried he received a discount of 6 per cent. on bills paid in ten days. In other lines the discounts varied, grading down to 2 per cent. for the minimum. The average discount allowed for prompt settlement was 4 per cent. It was soon made clear that, inasmuch as the capital employed, say $10,000, was used for purchases three times a year, and each time by claiming discounts was entitled to 4 per cent., it was possible to make a profit of 12 per cent. per annum upon the investment through this means alone. The merchant at once perceived that a yearly income of $1200 upon a capital of $10,000 is a much better return than he could expect from any outside operations that are absolutely safe.

Such a return for prompt payments will go far toward making any business an unqualified success. One prominent merchant whose annual trade is very large, recently asserted that he is entirely satisfied with the profit from his cash accounts as the net return from the business.

The question arises in many cases, how to take advantage of discounts when ready cash is not at hand. This, however, is a problem of no very great difficulty, provided the business is in good condition and shows by the relation of live assets to liabilities that the merchant is entirely solvent and in possession of a reasonable surplus. Money is plentiful in the banks, and bankers are always ready to lend to responsible borrowers.

The rate of discount at which money can be secured from a bank is rarely above 6 per cent. per annum. Accordingly, the merchant who occasionally borrows from his bank for the purpose of claiming discounts which net him 12 per cent. per annum is enabled to make a clear profit of 6 per cent. upon the transactions. Or where he borrows for all his payments, with a business of the size mentioned above, there is still a gain of $600 in discounts. These facts clearly show that every merchant who does not arrange to discount his purchases is neglecting a very important source of profit.

F. R. Boocock.

Early History of Cast Iron Pipe.

Cast iron was known to Holland in the thirteenth century, and stoves were cast at Elass in 1400. But tradition has it, which an ancient Roman writer records, that the temple of the "Great Mother," at Sparta, is said to have been built by Theodorus, who first discovered the art of casting and making statues in iron. As with the metal itself, so its discovery in the form of cast iron was an accident which occurred at one of the early works in the Rhine Provinces, where a part of the "running" one day was found to be of different texture, and it was a problem for some time what to do with the strange stuff.

The first blast furnaces appeared in the Thuringian Mountains, which were almost identical in principle with the present furnaces, with the exception that hand or tread mill bellows were used for the blast, from which the present mechanical blowers are an evolution. In 1377 the first famous cast iron gun was cast in Erfurt, and the famous Krupp was casting guns in 1818, so that it appears iron was mostly used for destructive and not Samaritan purposes through many centuries of its history In 1685 the first cast iron pipes were used for the water service of Versailles, followed by screwed and flanged pipes. In 1708 the Quaker, Darby, patented the system of box casting, and in the following year started the famous Coalbrookdale Foundry, which in 1780 turned out the first cast iron bridge. The first casting in the United States is said to have been made at Lynn, Mass.—a cast iron pot, which was exhibited at the World's Fair at Chicago.

In the region of Alba Longa, buried by the volcanic eruption which drove the Albans to the present site of Rome, no trace of iron is found, and its absence is still notable in the archaic tombs of Rome. The metal for their implements, of whatever kind, was of bronze, and the early Roman religious sentiment shows such an abhorrence of iron as to make it a profane innovation to use it in almost any form, especially in and around their sacred temples. This superstition continued after the Christian era, even down to the fall of the Empire. In their religious rites, if iron had in any way approached a temple or shrine, sacrifices were instituted to expiate the profanation, so that we can hardly wonder that their attention was not turned to it as a substitute for lead pipe. When iron tools came to be used for engraving, and were so employed on certain altar inscriptions, penitential sacrifices were afterwards offered by slaying a cow or a sheep on the altar. Bronze ploughs were used long after the introduction of iron ploughs. The high priests of Rome would not shave or have the hair cut with iron instruments.

The first mention of iron pipes was in an elaborate system built at Marli, near Paris, and set to work in 1682. The account says: "They drew the water by short suction pipes from the river Seine, and forced it through iron pipes up the hill. They climbed to a height of 533 feet by a series of reservoirs and pumps, but this system came to be known as a 'monument of ignorance,'" probably after cast iron established confidence as a pressure pipe. Agricola makes no mention of cast iron pipes, although he shows three-legged pots of cast iron. Ranselli, about the same period, describes a hand mill of a portable character, whose casing, he says, is made of iron, and its form and ornamentation are such that there is little doubt it was made of cast iron.

Peter Maurice, a German engineer, in 1582 erected, under the arches of London Bridge, sixteen pumps, 7 inches in diameter and 30 inch stroke, driven by a water wheel, and these were of cast iron, flanged at their lower end, bolted to a valve chest.

In 1835 it was estimated that over 1000 miles of iron pipe were in use in the various systems of London waterworks, the first iron pipes having been laid in 1746. Later on we find that cast iron pipes, 9 feet in length and 15 inches in diameter, with ball and socket flexible joints, were laid by James Watt across the Clyde for the conveyance of water to Glasgow, and another of the same size in 1818, and a little later on another of similar construction of 36 inch diameter.—*Mechanical World.*

NEW GOODS AND SPECIALTIES.

New Wood Door Frame Clamp.

E. C. Stearns & Co., Syracuse, N. Y., are placing upon the market a new Wood Door Frame Clamp, shown in this connection. The points advanced in its favor by the manufacturers are as follows: "It is smooth on the bottom, there being no iron jaw or projection in the way, so that the clamp may be moved around on a work bench, table or

other flat surface at will. It is much lighter than the steel clamp. It is easier handled. It may be hung up without the jaw coming off, or can be placed on a frame above the work bench without injury. With the old style steel clamp with the groove or projection on the bottom, there is liability of catching on the corners of the frame work. It requires only one-half turn of the screw to show that the glue and joints are perfectly tight together. It can be handled to better satisfaction in an upright position than the steel clamp. Can be used in place of hand screws. The movable iron jaw can be moved along very easily, requiring no strength to adjust it to any desired position. The clamp is made of perfectly dry air-seasoned hard wood, and will keep its shape under all conditions. The crank is of malleable iron; the screw is of wrought iron with a deep cut thread. The sizes are as follows: 3, 4, 5, 6 and 8 foot. It is especially adapted for use by wood workers, piano makers, and, in fact, is a handy tool for every mechanic."

A New Clamp For Wringers

The Lovell Mfg. Co., Erie, Pa., with a branch office at No. 46 Lake Street, Chicago, Ill., Charles S. Meacham, agent, are putting on the market a new Clamp for Wringers

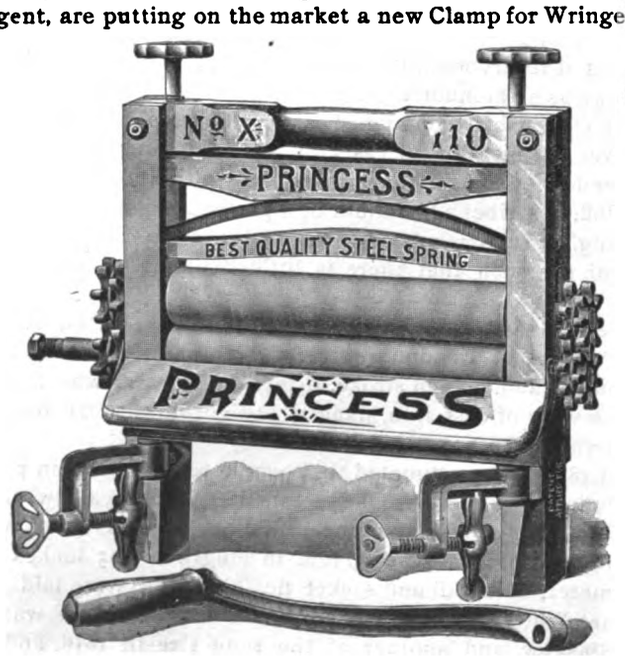

FIG. 1.—VIEW OF CLAMP ON PRINCESS WRINGER.

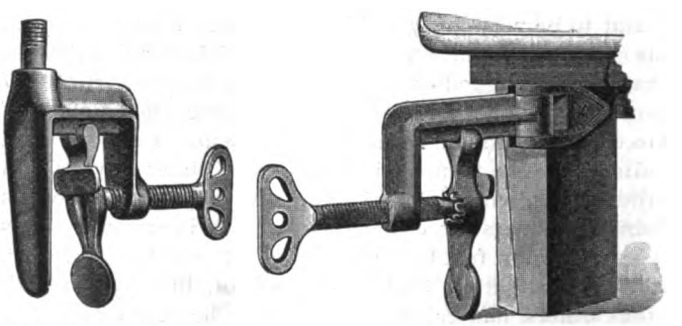
to fasten on to galvanized iron tubs. It is warranted to do this without fail. The bar is made to conform to the shape of the tub, and grips the iron at the top of the tub, which is the strongest part of that article. It will also fasten to a fibre or wood tub. The accompanying illustrations carry their own explanations. Fig. 1 shows the clamp applied to the Princess wringer, manufactured by this company. Fig.



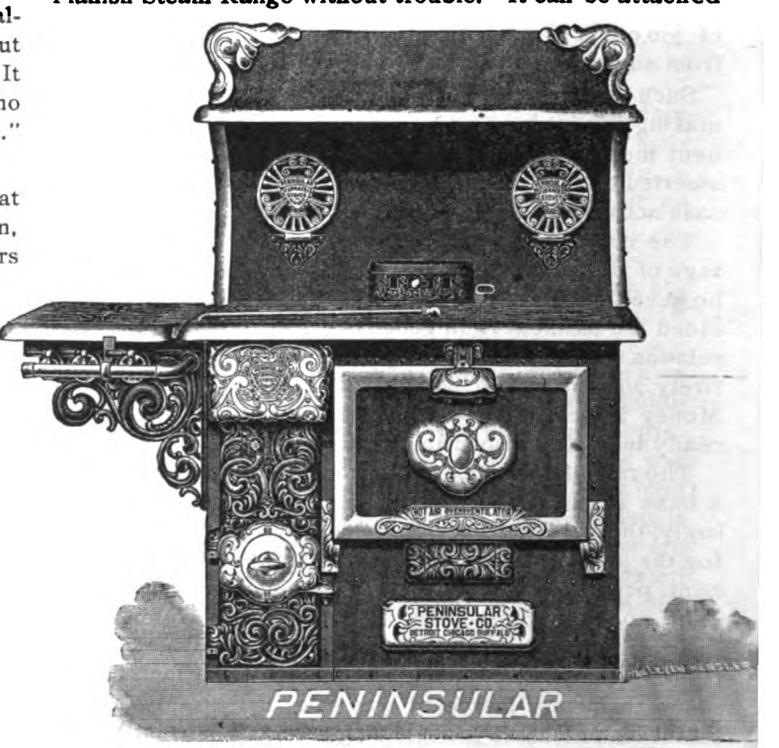


FIG. 2.—VIEW OF CLAMP ON EUREKA STYLE WRINGER.

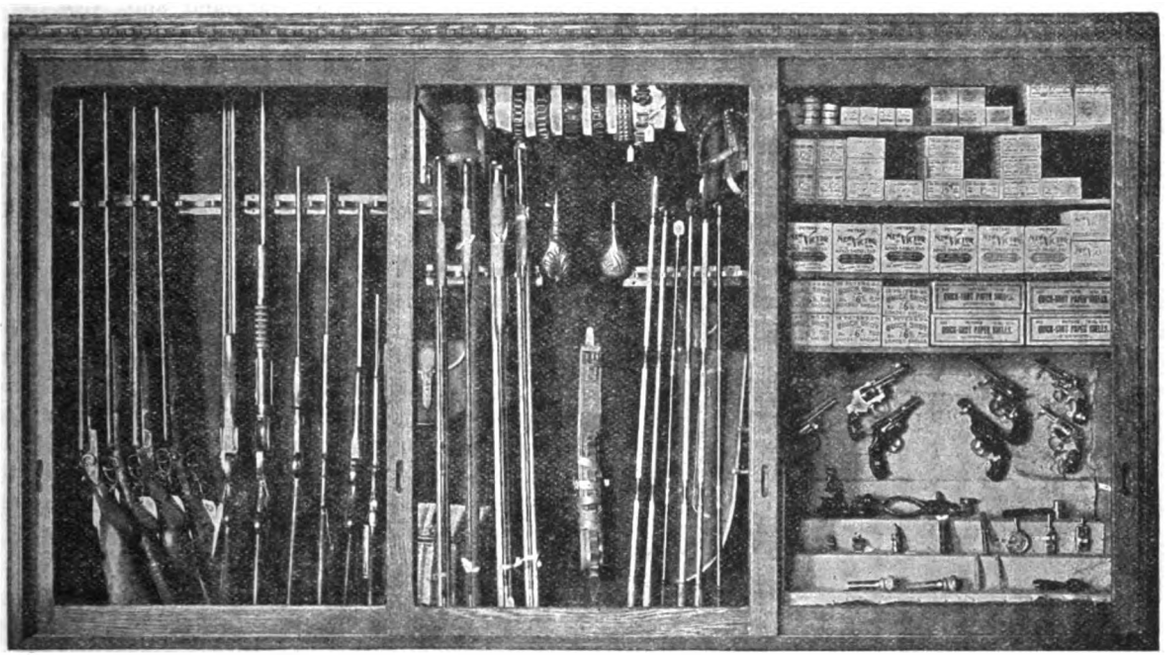
FIG. 3.—VIEW OF CLAMP ON WOOD FRAME WRINGER.

2 is a view of the clamp used on their Eureka wringers, and Fig. 3 when used on wood frame wringers. Detailed information will be sent by the manufacturers if application is made either at Erie or Chicago.

Peninsular Gas Attachment.

The accompanying illustration shows the new planished Steam Range Gas Attachment now being placed upon the market by the Peninsular Stove Co., Detroit, Chicago and Buffalo. They are exclusive makers of this attachment, which, they explain, gives one the conveniences of a gas range at slight expense. It can be fitted to any Peninsular Planish Steam Range without trouble. It can be attached



to either end of the range; has two burners, one large and one giant, also a simmering burner, all of which are fitted with wooden handles and lever valves. The manufacturers state that owing to its very small cost and great convenience, it is much sought for by the trade.

A Gun Display Case.

It is a fact too often disregarded in the Hardware business that articles are left about without giving any particular line its individuality, and this intends to repel instead

Digitized by Google

of attracting the customer's attention. Too much taste cannot be exercised in arranging special and seasonable lines, for it facilitates business and renders them easily accessible. With this idea in view, the J. D. Warren Mfg. Co., of No. 154 Lake Street, Chicago, have brought out their Gun Display Case shown in the illustration herewith, which not only provides a place for this line, but displays it in a most effective manner, the gun brackets at the end being circular so that the sides of the stock are displayed,

thus giving different views. It has a portable shelf stand for the convenience of having an assortment of all ammunition and extras together, which can be instantly removed if desired. It is supplied with the proper hooks, and brackets for the display, also of fishing rods, and the various accessories to this line, and is a specially desirable adjunct to Hardware stores handling these goods.

Bradeen's "Never Slip" Hook.

A new hammock and clothes line hook is being placed on the market by John H. Graham & Co., New York. It is

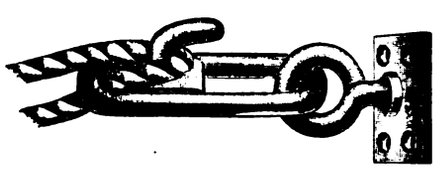


FIG. 1.—WITH PLATE.

called Bradeen's Patent "Never Slip," and as shown in the accompanying illustrations, consists of a slot containing a traveling hook. The principle is simple and effective, ac-

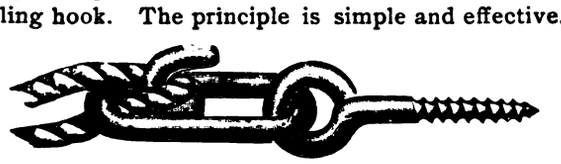

FIG. 2.—WITH SCREW.

complishing all that the name implies, and more, as its adjustment permits the instant release of the cord when desired. The directions are as follows: "To swing a

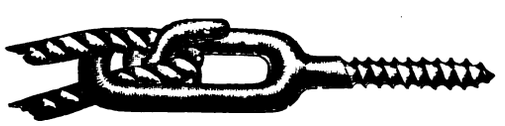

FIG. 3.—CLOTHES LINE HOOK.

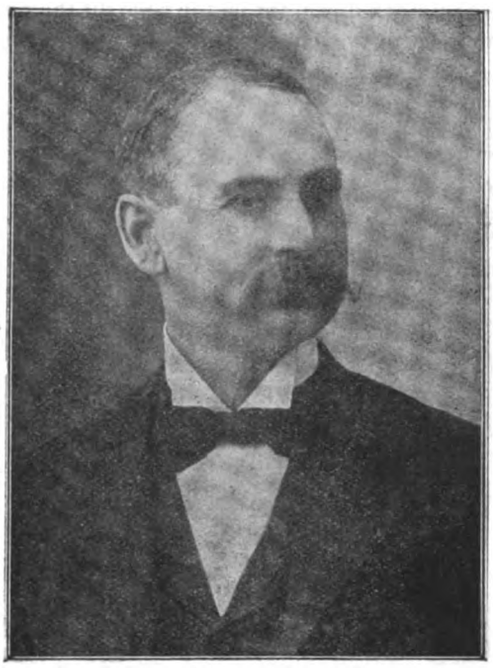
hammock, raise the sliding hook in the link and put the loose end of the rope through the link under the hook, passing the rope itself over the hook, as shown in the illustrations. Or pass the loose end of the rope through the link over the sliding-bar, and back again under the sliding-bar. The weight of the hammock forces the sliding-bar down on the rope, thus holding it securely. The greater the strain on the hook, the greater the pressure of the sliding-bar on the rope, and the firmer the hold. To raise the hammock, simply pull on the loose end of the rope. This permits a quick and easy adjustment to the desired position. To take the hammock down, throw the rope off the hook. The cord is then easily withdrawn from the link. The hooks are made of malleable iron, heavily tinned. They have been thoroughly tested, and may be used with any size rope."

In the Mill River Mud.

It is not often that a Hardware Association gets "stuck in the mud," but such an event occurred to the New Haven Hardware Association some evenings since. Toward evening the members of this Association gaily boarded a yacht and set sail for Branford point, where they enjoyed a shore dinner at the Point House. "'Twas a calm, still night, and the moon shone bright," yet for some unexplained cause, the nose of the yacht ran suddenly upon a bank of mud in Mill River, some fifteen feet from shore. The president called the Association to order, and on motion of one of the leading members, it was decided to stay there for the rest of the season, unless some rescuing craft should show up in time to get the members home to breakfast. Some friendly natives on shore saw the signals of distress which were waving from the mast-head, and put out toward morning and brought the Association to *terra firma*. We are informed by the local chronicler that "the party reached home about 3 A M., somewhat tired, but quite satisfied with the results of their excursion."

Iver Johnson Addition.



The Iver Johnson's Arms & Cycle Works are building another addition to their already large plant in Fitchburg, Mass. This will consist of a two-story building, 120 feet long and 60 feet wide, and will, when completed, afford about 14,000 feet of additional floor space, which will aid them materially in their next year's work. The second floor of the new building will be occupied by the enamelling department, which has outgrown its present quarters. As yet the company have not decided just what the remainder of the building will be used for, but it will all be devoted to the relief of the other crowded departments used in the cycle branch of their business.

The company expect a large business next season, and are making preparations to take care of it promptly.

Goshen Sweeper Co.'s Salesmen.

The increased demand that has been created by the Goshen Sweeper Co. during the past few months for their carpet sweepers has largely increased their territory and compelled them to enlarge their force of travelers. They will go into the field this fall with a fine and complete line

B. M. HAWLEY.

of regular and toy sweepers. Although they have added many improvements and their line is much better than ever before, they intend to offer them this season at their recently reduced prices.

It is our pleasure to be able to present some of their traveling salesmen, who will call on the trade in their interests, and a more congenial, affable lot of hustlers it would be hard to find. Frank D. Greenough, whose office is at

GEORGE H. DESMOND.

No. 564 Washington Street, Boston, Mass., looks after the New England and New York City part of the business. He has been the representative of the Goshen Co. in this territory for a number of years, and the large business that they have in this section is due largely to his efforts. He is very popular with his customers and the large class of trade that he calls upon. He knows a Goshen sweeper from A to Z, and takes pleasure in showing and talking its many good qualities.

B. M. Hawley has been with the Goshen Co. longer than any other of their salesmen, and is considered one of the most successful carpet sweeper men on the road. He has a host of friends among his customers, and commands a very large and high class trade. He looks after Western New York, Western Pennsylvania and Ohio.

George H. Desmond will take care of Eastern New York, Eastern Pennsylvania, Maryland and New Jersey. Mr. Desmond is the youngest man, both in years and service, that the Goshen Co. have, but is particularly well fitted for the position he occupies, having had long experience with the carpet trade. Mr. Desmond represented the Goshen Co. in the East during 1897, but on January 18, 1898, severed his connection to accept a similar position with another company; after six months' absence he returned to his first love.

George W. Thayer, Jr., is well known to the trade in Michigan, Indiana and Illinois, having been with the Goshen Co. for the past four years; has also traveled through Iowa and Wisconsin. He will look after this part of the country. Mr. Thayer has spent many years on the road, and his success is due largely to his ability to make friends, and his pleasant but convincing method of presenting his argument.

The larger cities in the territory traveled by these men are visited about every thirty days, while the smaller towns are made only once in sixty and ninety days.

The Wire Trust Strike.

The American Steel & Wire Co., which was organized some months since, and is known generally to the trade as the Wire Nail Trust, is having trouble with its employes in Cleveland and elsewhere. Large reductions in wages have been ordered by this company, and these have been resisted by the Federated Wire Trades, who formally declared a formal strike in Cleveland on August 2d. The officers of the trades association say that the strike will be extended to every mill controlled by the trust. It is unfortunate that this disturbance in the business should have occurred just now, when everything has seemed so promising for the future, with peace in sight, and a prosperous fall almost certainly promised. The state labor commissioners of Indiana are investigating the matter.

A dispatch from Anderson, Ind., under date of August 6th, says: "The Indiana Labor Commissioners last night received the Wire Nail Trust's ultimatum regarding the strike at this point. There are no qualifications to the ultimatum and it applies as well to the 5000 men out at Cleveland, Findlay and Salem, Ohio, and Rankin and Beaver Falls, Pa., as it does to the 800 men who refused to accept the wage reduction ranging as high as 42 per cent. The Trust says it will not entertain any proposition to reopen the case and that absolutely no concessions will be made. The men can return to their places now or see new men brought in."

It was by superiority of putting up alone that the United States gained the market for tacks in Australia. For a long time the United States makers put their tacks in cardboard boxes, while the British put theirs in paper packages. The former style was and is preferred. Some British tacks are now put up in cardboard boxes, but the market has to be won again. The Americans are now putting tacks in extremely handy turned wooden barrels. It is very probable that tacks so put up will displace all others.—*Am. Exporter.*

An important gathering of manufacturers will be held in Philadelphia on October 19th, 20th and 21st, when for the first time a National Association of Agricultural Implement & Vehicle Manufacturers of the United States, will hold an annual session in the East.

Review of the Markets.

Hardware: The excessive heat and humidity of the past two weeks have had the effect of lessening sales and making local business quiet and without much movement of any kind. Travelers have started in numerous cases to secure orders on the comparative size of which will be predicated the length and strength of the season's business. Few changes in prices are noted, except in the nature of a gradual stiffening of quotations on staples, as the order books become filled with memoranda taken for specified delivery at a later day. Retail stocks will be found in very good shape for additions to be made, especially of specialties adapted to the natural requirements of the season now rapidly approaching.

Wire Nails: The demand for wire nails was only of an ordinary character during July, but an increasing inquiry is noticeable for this month which will result in a larger output from mills that have not been in full supply, having been closed during last month from the usual midsummer causes. Prices are nominally the same as last quoted; specifications for large round lots for immediate delivery could possibly be shaded slightly below the current quotation, which is for carload lots to the large trade, f. o. b. mill, $1.30, smaller quantities being held at the usual advance. New York quotations remain as previously stated: Carload lots on dock, $1.45; smaller lots from store, $1.55.

Cut Nails: The market for cut nails continues to hold its relatively unimportant position. But little business is being done, prices remaining the same. In some sections inquiry is being made having reference to good sales that are possible later in this month. Stocks in warehouses are by no means large, and the New York market prices continue as last quoted: Carload lots on dock, $1.20; smaller lots from store, $1.25.

Bright Wire Goods: The market on bright wire goods has been in a very unsatisfactory state for quite a while, and from the manufacturers' point of view, gives very little promise of a profitable production. The manufacturers would prefer seeing some arrangement that would result in stability being given to the quotations on a line of goods that are so largely represented in every Hardware stock in the country.

Barb Wire: With the exception of a fair demand for export trade, the market on barb wire continues very limited in its requirements; while strikes and other irregularities at factory may serve to shorten the immediate supply, prices continue as quoted, while a large trade in the immediate future is confidently looked for. We quote New York prices as follows: Four-point galvanzed in carload lots on dock, $1.85; smaller lots from store, $1.95; painted wire being quoted at 30 cents less.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of August 1st, quote as follows: In lots of less than 5 barrels, 36 cents per gallon; in lots of 5 barrels or more 35 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE CLEVELAND TRADE.

Every business house should send a statement of account on the first of each month to all dealers having open accounts notwithstanding the fact that occasionally a man is found who resents receiving a statement, misunderstanding its purpose and calling it a dun. Upon its receipt careful comparison should be made with the book account, and if any disagreement is found, immediate attention should be given to get it corrected. Small balances cause great annoyance. If partial payments are made the next remittance should complete the payment of certain invoices, and it should so be stated in the letter covering the remittance.

Neither party should allow unsettled balances to stand for months. Short settlements make long friends, and in the interest of friendship comparison of accounts should be made monthly. The correspondence on both sides should be gentlemanly, and the party indebted should avoid all appearance of being annoyed. Bookkeepers are not always wise, and sometimes annoy customers by persistance, and an unwise reply read by the proprietor who does not see the letter the bookkeeper sent, often makes a bad impression.

Passion and heat should never appear in business correspondence, as it is contagous. Manly letters carry conviction and are much more effective. To impute bad intention without evidence of its existence is impudent and boorish, and characterizes the one who does it. Business men are usually honorable and correspondence should be conducted on the supposition that they mean to act so.

When a customer thinks he has grounds for complaint a personal letter to the managing proprietor will receive careful attention and will be regarded as a friendly act. Misunderstanding is the prolific cause of much of the controversy that arises.

If iron is to retain its kingship, the iron men must have their innings soon. The recent decline in nails and wire results from accumulated stocks and a very limited demand. Surplus product going abroad fixes the home price, so we may not expect high prices for iron or steel. The experience of the nail pool forbids the probability of any attempt to make high prices, and cooperation will tend to steady employment and fair compensation for capital.

No legislation can separate these interests. Cheap living seems assured, plenty of work and fair wages. Judging from the unusually small demands for building material, the war seems to have prevented, for the time being, building, but this will revive when the war is over. We seem to be prepared for peace or war.

The Lockwood-Taylor Hardware Co.

THE PITTSBURG TRADE.

We have had some real Cuban weather lately, and are not pleased with it. Great heat with much humidity and daily heavy rain, is not what we are used to, but we live in hope that it will soon be succeeded by the usual American article.

Statistics made up for the first half of 1898 show the pig iron production of the country to have reached the enormous total of nearly six million tons. Of this Pennsylvania, and especially Allegheny county in which Pittsburg is located, has a very large share, and it is noticeable that the greatest increase is in Bessemer, used for structural steel, rail & etc., our manufacturers seem to be able to capture the big end of the orders in this line and keep the mills running to fullest capacity.

Peace news is eagerly sought for now, just as eagerly as war news was a few days ago. If we can only manage the closing days of this war as successfully as its opening and avoid complications with other nations, our administration will deserve the thanks of all citizens and will receive them too.

The Hardware jobbing trade is quiet in the interval between seasons, but travelers have started and will soon stir up some fall orders. Certainly the consumers ought to be in good condition for buying this season and we expect a good fall trade.

Logan-Gregg Hardware Co.

THE ALBANY TRADE.

"Man wants but little here below" has lately been in evidence, but it is surprising how frequently these "littles" are wanted. Numerous small orders have characterized the condition of business for a fortnight past, and the traditional "many a nickel," etc., has impressed one of its inevitableness. "After the future" (as the old lady said), we

Digitized by Google

may expect larger orders and of goods that "count up" or that run into money and not wholly into bulk (we don't refer to coal hods.) Probably most of the jobbers already have good orders booked for early fall shipment, for many of the leading articles that can be depended upon for steady sales each succeeding year, and many goods are in transit to supply these orders.

Observation shows the sales thus far to run into somewhat larger quantities than last season. This fact and the greater readiness on the part of buyers to purchase, encourages the belief that the outlook is promising and there appears to be no obstacle in the way to interfere with a good fall trade.

There is not much fluctuation in prices. Most leading goods continue low. In heavy Hardware the strength of the market in spelter, lead and zinc has its effect on the lines naturally influenced. Galvanized iron, which has been advanced by the mills, is sold by the jobbers who bought early, very close to lowest mill prices.

Nails are running along at prices fully as low as have prevailed for a month or two past, and there appears to be little promise of advances in the near future, or at least until some stocks of a few outside mills are disposed of.

With the probable close of the Spanish trouble, it will not be unreasonable to expect an increased export trade with markets that have been closed for the war period. This will, no doubt, use up many surplus goods and give tone and steadiness to prices which will be appreciated by even dealers who are not so fortunate as to have an export trade.

Activity in building circles continues, and the consumption of fine high grade trimmings is very noticeable, while the business from mills, foundries and factories shows an excellent condition, indicating prosperity and a healthy consumption of supplies and material. In fact, in this section, future prospects can be stated to be good, which is to be interpreted fair volume of business at small margins.

ALBANY HARDWARE & IRON CO.

THE KANSAS CITY TRADE.

In response to your enquiry as to the "Watchman; what of the night," business, wherein we are importuned in red-hot weather, to write a red-hot letter, we beg to indite this in red ink, and trust that you will not get unduly "red-headed" thereat.

We believe in a harmony of affairs, and the above, if it is read, will be read-hot, since the thermometer in these days is in the red-hot neighborhood often.

Business has cooled off materially in the past two weeks. We anticipate another four weeks of moderate business and steady prices.

Our particularly careful "Watchman" has drawn out his telescope to the last notch, cast his eye to the peep hole, gazed on the "night," and says that there is no night ahead of us. It is to be a busy, brisk, stimulating "day" during the entire fall, so far as present prospects can guide his judgment.

Out in this western country, you remember, we must not count our corn till it's hard on the cob. A better time is when the "frost is on the pumpkins, and the fodder's in the shock."

So far as trade conditions can be affected by the grain yield, two to three weeks now will fully determine this. The wheat yield will be much less than the hundred million mark. Corn will not be beyond danger for three weeks. Just now weather conditions are very favorable indeed.

We anticipate a very busy fall; have added very heavily to our stock in staple goods during July, and we are ready for the coming of Mrs. Prosperity and all her brood.

If we can have steady markets for produce, live stock etc., and equally steady and substantial business, there is nothing we can see to prevent an advance in prices nor difficulties in the jobbers' way of getting such.

With the increased expense of doing business, since the revenue tax cuts no inconsiderable figure, it would seem to offer a sensible reason for some sensible action in concert by the interested jobbers.

Just here is where the Watchman "falls down."—He watches his expense account too much to the exclusion of his profit on sales—and his competitor does the same—— and there you are.

Kansas City business men go to Omaha, Friday, August, 5th. Being from Missouri they expect you to "show me;" we are told that the Omaha "show" is everything from "no account" to "wonderful."

Hardware should be represented there and give us the latest in mining, mechanical and electrical appliances.

The Hardware trade is spreading yearly, until it will include a larger line of the appliances of science, art and business, than any other two mercantile pursuits known to the business world.

GILLE HARDWARE & IRON CO.

THE MINNEAPOLIS TRADE.

Nothing particular new here. Business continues fair, with prospects of improvement in the fall. Crop conditions were never better, everything looking fine. We hope for the farmers' sake as well as our own, that the price of wheat will be somewhat higher. Railroads are preparing to handle the largest crop known. Jobbing trade, in particular, is very busy. Country collections very good. City trade not quite up to what we would like, but we believe that will come later.

W. K. MORISON & CO.

THE OMAHA TRADE.

The prospects for fall trade are exceptionally good, and if present indications materialize, the fall business will break all records that have been made since 1892, which was the banner year in this locality. The crop prospect, as a rule, is favorable, though there are localities where lack of rain, and, in some places hail, have materially shortened the crop. These are not sufficient in area to have any bearing whatever on the general results.

Orders far fall goods are being freely placed, and all indications point to a large and prosperous fall trade.

The Exposition appears to be more than meeting the expectations of its friends, both financially and otherwise, and is highly spoken of by those who are competent to judge of its merits and compare it with other similar displays. The market on barbed wire and nails appears to be somewhat weak. and collections, as is usual at this time of the year, are slow, though quite above the average for the season.

RECTOR & WILHELMY CO.

THE ST. PAUL TRADE.

We have been experiencing an extremly hot and dry time here for the last thirty days, and as a consequence, some crops are injured, but our great staple, wheat, is in the main all right. In southern Minnesota and in North Dakota, where the grain has been cut, the result is more than satisfactory, while north of us, where the harvest is later, if the present prospects are realized, it will show one of the largest yields the country has ever seen. The president of one of our important railroads, whose headquarters and terminal are in St. Paul, has caused careful estimates to be made, and reports that he expects his road to take out 86,000,000 bushels of wheat from this year's crop. This, for one road.

A daily paper has the following: "From all indications a conservative estimate of the yield of wheat in the three states, Minnesota, North Dakota and South Dakota would be 200,000,000 bushels and 220,000,000 would not be extravagant."

Business during July, notwithstanding the heat, has

been remarkably good. Sales have been mainly of seasonable goods. Some buyers are anticipating their wants for fall and winter goods, but not to the extent that, as we suppose, prudence would dictate. The early buyer is usually the one who makes the most money, as he catches the early sales.

There is no reason why we should change our predictions made in former letters in regard to fall business. With good crops, fair prices, the war closed with honor to our country, and "General Confidence" in comand, we have every reason to expect, and we believe that we shall have, a most satisfactory business.

C. W. HACKETT HARDWARE CO.

THE GRAPHITE TRADE.

You advise us that "Watchman, what of the night?" has special reference to the prospects for the fall trade. Yet, so has the new addition to our factory, 90 feet by 40 feet, three stories high, special reference to the prospects for the fall trade. This addition was made necessary because the second quarter of 1898 was the biggest second quarter that we have ever had in any year, and the total for the six months of 1898 is less than $100 short of the total of the very promising year, 1893, when things boomed during the first six months and slumped desperately in the final six months.

Our vice-president and general manager, John A. Walker, has just returned from quite an extensive business trip abroad, and reports that England, France and Germany are expecting America to do a smashing business after the Spanish war matters are all settled.

Mr. Walker also learned while abroad that it was a very general sentiment that Uncle Sam should give the Don a thorough thrashing before ending with him—so very thorough that he would not forget it.

Collections have been quite good and continue to be so, but sometimes we think that there are a suspiciously large number of treasurers who are taking their vacations, and sometimes when we are in need of money, we wonder why it is that the treasurers go on their vacations without providing for the payment of bills and without leaving someone in power to sign checks. It is only human nature for us sometimes to think that a treasurer on his vacation is a convenient way of staving off the payments of an overdue bill.

Have you noticed what a number of proprietory papers there are nowadays? If this gets to be the fashion, we ourselves will be obliged to get out a paper on our own account and solicit advertising, and when all of us manufacturers have our own sheet, where will the trade papers come in? So far, the Dixon Co. has not gotten out a paper nor has it solicited advertisements for its large editions of catalogues: but there seems to be quite a number of honest dollars in the scheme of getting out a catalogue to boom your goods and to have other people take advertising space. You fellows who get out trade papers will have to look out that you do not get swamped in the avalanche of propretary papers.

Or, you will have to look out at least that advertisers do not spend all of their money in catalogues and such advertising. It may seem surprising to you that manufacturers spend any money in that direction; but when a customer writes you that he is getting out a catalogue and wants your advertisement for a page, the price to be $100, and then incidentally reminds you that he carries your goods in stock and pushes them, you can see that there is a hint and something else.

Orders are ever welcome, and we do not mind looking up names and places and getting all the necessary details; but doesn't it seem a little bit curious that there are so many large concerns who have such incomplete order sheets and letter heads, where the State is omitted, and so forth; or that large concerns so frequently will order on postal cards and simply sign their names without putting even the name of the town? Thanks to Uncle Sam's postal mark on the reverse side, we are usually able to locate such orders.

JOSEPH DIXON CRUCIBLE CO.

An Earnest Protest Entered.

At the last meeting of the Editorial Association of the State of New York the following resolution was adopted:

Resolved, That the President of this Association appoint a committee of five, of which the President and Secretary shall be members, to confer at their earliest convenience with the Governor and with any other constituted authorities that may be deemed necessary regarding the action that can and should be taken to put an end to the illegal and unwarranted use of street and other cars for advertising purposes.

The president appointed as such committee John A. Sleicher, of *Leslie's Weekly*; Thomas P. Peters, of the *Brooklyn Times* and W. J. Cline, of the *Amsterdam Democrat*.

Our readers will be interested to know what one of the most popular metropolitan journals has to say on the subject. The following is from the editorial page of *Frank Leslie's Weekly:*

"At the recent gathering of the State Editorial Association of New York, an earnest protest was entered against the further toleration of street car and elevated railroad advertising. It is the belief of the editors that the charters of street car lines were granted for public purposes, and that under these charters the surface and elevated lines have no more right to engage in advertising business than they have to engage in the dry goods, the grocery, or any other line of trade. In this connection it is interesting to observe that Attorney General Hancock, of this State, was recently asked to revoke the charter of the Manhattan Elevated Railroad Co., of New York City, because it is engaged in the advertising business, in violation of its charter. This suit was of the utmost importance to the newspapers throughout the country, and it was unfortunate that it was decided not on its merits, but on a technicality. The diver-

Digitized by Google

sion of advertising from the legitimate channels of the newspapers and magazines to the street car lines has become a serious matter within recent years, and the newspapers have not taken up the question a moment too soon for their own best interests. Every dollar diverted to street car lines in this way is a dollar taken from the regular advertising publications of the country. It is estimated that during the past year more than $2,000,000 of legitimate advertising was thus turned away from the daily and weekly newspapers, magazines, and other publications, into the coffers of street car lines and their allies, although the charter of the street car companies never contemplated, and, in fact, forbid the pursuit of any other business than that of carrying freight and passengers."

"Let Your Light So Shine."

Recent observations would lead us to believe that some men in the present day would do well to study the ways of those of the time of St. Matthew. The latter says: "Neither do men light a candle and put it under a bushel, but on a candlestick; for there it giveth light to the whole house."

Possibly they did not in those days, but we will undertake to find many who do to-day, despite our vaunted advancement along the lines of knowledge.

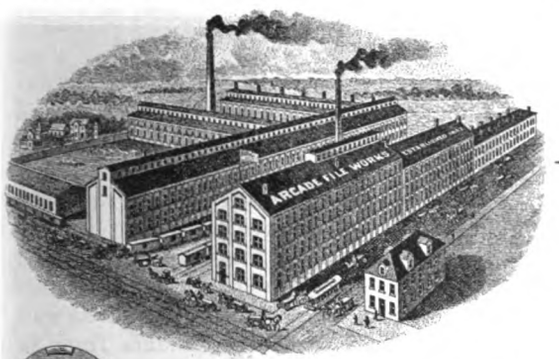
We have an example before us. Not long since we had occasion to mention the name of a firm producing a certain class of tools, and in the course of the article, described the points of merit in their production. These manufacturers were not advertisers in any trade journal. Their contention had always been that they covered the field by personal solicitation. Not many days after the publication of their names the result of their policy became apparent. Correspondents from a dozen different States wrote us, asking for fuller information and for the address of the firm. This information was, of course, furnished cheerfully; but, feeling that the manufacturers had concealed their light under the proverbial bushel, the inquiries were submitted to them. They had been the recipients of similar inquiries. One firm wrote them, addressing the letter simply "New York City," and saying that, in the absence of a more definite address, they had to trust to luck to reach them. The letter went on to say that the writer marvelled much that it had not been found desirable by the manufacturers to make known their whereabouts and business through some of the many organs devoted to the trade, and to which the retailer usually went for such information. It is, perhaps, needless to say the conversion was complete; and on the principle that "there is more joy in Heaven over one sinner that repenteth, etc.," their welcome was accordingly sincere.

This is but one case of many. Such men argue that their trade is "peculiar." What trade is not? They say that while advertising is good for most lines, that their own goods being of high grade and an accordingly higher price, must be brought immediately under the eye of the buyer to impress him with their desirability. We venture to state that there never existed a line of worthy goods, which, if *properly* advertised, would not respond generously to the effort. Other men will say that they have an established trade which covers all their output, and consequently it is not necessary for them to advertise. If this be true, they are just in the position where they need a wing to their factory. The man who allows his sales to be limited by his production is losing money needlessly and foolishly. The man who accounts his future assured because he has an established trade, and rests upon it without making constant efforts to extend it, will awaken some fine day to the fact that new firms have been springing up in his commercial garden; and old ones have been reorganized by the addition of men to whom he and his goods are unknown. Every time this occurs, our conservative manufacturer stands to lose a customer. And it does not require many years of such policy to convince one that effort, and constant, unremitting, intelligently applied effort, is essential to lasting success.

Advertising is your light; the trade journal is your candlestick. "Let your light so shine before men, that they may see your good works," and purchase accordingly. And don't forget the candlestick!

Smugglers and Comfort.

From the columns of a Canadian contemporary, we cull the fact that smuggling from the United States into Canada seriously affects the business of those merchants whose business is situated near the border. The case in point was that of a merchant in Chatham, Ont., who complains to the editor that the low fare to Detroit, Mich., a distance of about fifty miles, made it desirable for the residents of the former place to visit the latter, and smuggle their purchases home. The natural inference is that the smugglers saved money on the transaction.



The question naturally arises: How is it that in Canada, where the prevailing rate of wages is much lower, the purchasing power of money should be lower also? These points are presumed to have a direct bearing upon each other. But in this case it would appear that the man living in the country which re-imburses him less, can pay his railroad fare, expend his time, sacrifice his self-respect by becoming a smuggler, and still obtain more value for his money in the country which pays a higher rate of wages.

The most reassuring view of the case is this: When the American goods are smuggled into Canada they are, in avoiding the duty, placed on the same footing occupied by English goods, in whose favor a discrimination of tariff is made. And in view of the Canadian's preference for American goods, we must conclude that, either we produce satisfactory goods at a lesser price; or, that the quality of our goods is so much better as to make the price of no consideration. Which ever it is, we insist upon being comforted.

CABLE ADDRESS "ARCADEFILE"

WEED'S IMPROVED CUT SEAL GUARANTEE ALL FILES ARE FULLY GUARANTEED SPECIAL TEMPER

ESTABLISHED 1842

THE ARCADE FILE WORKS,

MANUFACTURERS OF SUPERIOR

Warranted Files & Rasps.

New York Aug. 10, 1898.

Gentlemen:

In every manufactured product, improvements are constantly being made which place one make ahead of another, and to keep abreast of the times it is absolutely necessary for a dealer to look into these improvements and see what they amount to--otherwise he may fail to get as good results for his customers as his competitors are getting.

We claim for the Arcade Files (made with Weed's Patent Increment cut) that they will equal in temper, material and results the best English hand-cut files, and that they will cut faster and wear longer than any other machine made files in the market, and as Arcade Files have a steady and increasing sale even in England (an assorted order for 648 dozen having been sent recently to a large manufacturing concern near Birmingham) there must be a basis for our claim.

If you have not tried them in your stock, perhaps you think this is all "talk;" but whatever you think, on general principles, would it not be good policy to TRY them at our risk? We shall be glad to furnish a sample order, however small, with the understanding that they are to be returned at our expense, if not as claimed.

Kindly let us hear from you on this subject, and greatly oblige,

Yours very truly,

THE ARCADE FILE WORKS,

C. C. Clarke

Secretary.

The Texas Hardware Question.

Readers of *Hardware* will recall the recent action taken by the Hardwaremen of Texas, in regard to the charges made by the railroad commission on car loads of Hardware and less. Some days since the Texas railroad commission held an open session at which the petition of the Texas Retail Hardware Dealers' Association was taken up and carefully considered. The Association petitioned in short for the abolition of commission circular No. 619, which prohibits the shipping in mixed carloads at carload rates of nails, iron or steel; fence wire, smooth or barbed; staples, hay bale ties, stoves, stove furniture and hollowware, sheet iron, plain, all kinds except Russia and planished iron; sheet iron, corrugated; chains, scale beams and scale beam weights, tin and galvanized ironware and other articles of iron and steel, and ammunition, and also to consider the matter of reducing the rates within the state on the above named articles.

The Association was represented by chairman W. H. Richardson of Austin, secretary C. B. Smith of Belton, and committeemen James G. Blaine of Taylor, and L. T. Fuller of Calvert. General Freight Agents Allen of the Missouri, Kansas & Texas, Mr. Jones of the Houston & Texas Central, Mr. Barnhart of the Cotton Belt, Mr. Turner of the International & Great Northern and Mr. Mangum, of the Aransas Pass were present. Commissioners Steere of the San Antonio freight bureau and Farley of the Dallas freight bureau were also present.

Mr. Allen contended that what the retail dealers were really complaining of was that the interstate adjustment on rates from St. Louis to Texas common points, which adjustment satisfied a certain class of dealers, known as jobbers, but in order now to satisfy the class coming before the commison it is necessary to disatisfy the first class now satisfied. Mr. Allen referred to that part of the petition which claims the jobbers have the best of the retailers because they can ship carloads of the same commodity while the retailers can not, but can fix up a mixed carload of kindred articles and branch out not more than twenty miles.

Mr. Robert Eikel, a Hardware jobber of Waco, complained particularly of the stove classification, which he said had been abused more than anything else. He said there is not a stove manufactory in the United States which manufactures stove hollowware and furniture, but these articles are manufactured separately, yet they are allowed to be put in mixed carloads, which allows the stove manufacturer to become a jobber, to the detriment of the legitimate Texas jobber. He claimed the classification was so wide that there was nothing but carload shipments from St. Louis of mixed articles.

A general discussion followed, and the commission took the matter under advisement.

After giving the matter full consideration, the commissioners decided to withdraw the order prohibiting mixed car loads. The Texas retailers received this decision with great pleasure, and the executive committee of the Association have issued a circular to the trade of that state which is as follows:

Your Executive Committee, after a hotly contested fight with the Hardware jobbers and railroads before the Commission, succeeded in having circular 619 canceled by the

NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

In favor of the

Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.

This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.

Respectfully,

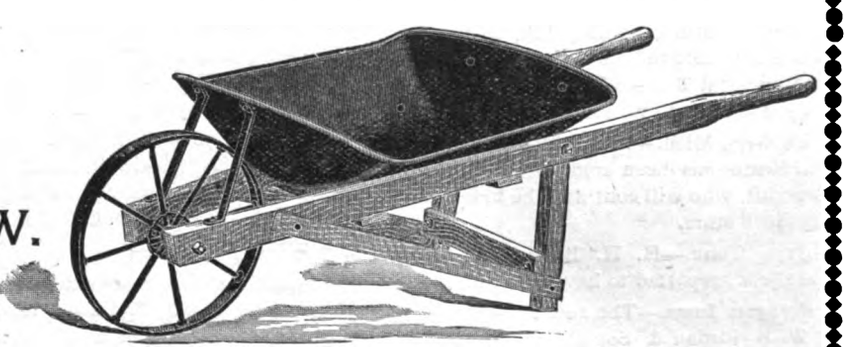
CARY MANUFACTURING CO.

S. C. Cary Pres't

Commission. It is with much pleasure we are enabled to report such a substantial result in so short a time.

In less than four weeks, by organization, we succeeded in having revoked one of the greatest wrongs in the shape of a law ever enacted against us. You are now requested to individually go to work at once on the interstate roads used by you and have them restore the rates and rules prevailing previous to June 1.

Although successful in this effort, much remains to be done. We have seen what could be done by persistent hard work. In four weeks we had accomplished what individuals utterly failed in. Remember the State of Texas fails to protect her tax payer. Your member of the legislature must be educated to represent and protect his people against the pirates on our trade.



This and many other matters need prompt attention and complete organization of every man in the business in the State. We would say to those not members that we want your assistance and co-operation. We need the influence and active support of every man interested in the State to make our organization a complete success. If you think well of this organization, that good may result to you, send this year's dues ($5.00) to Chas. B. Smith, secretary, Belton, Texas, and by your active co-operation we will go forward for good to our members and people.

W R. Richardson, President, Austin, Texas.
Chas. B. Smith, Secretary, Belton, Texas.

The Simmons Hardware Co., St. Louis, Mo., have issued several new catalogues, one of which shows their furniture and cabinet makers Hardware, another their brass and iron bedsteads, one on their line of axes, and still another covering fall goods of various character.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Albany, N. Y.—McNally & Foisy, new plumbing firm, have opened up at No. 37 Beaver Street.

Athens, Ga.—G. A. Bailey, Hardware and plumbing, will open new store on Thomas Street.

Chattanooga, Tenn.—The Secretary of State has granted a charter to the American Hardware Co., of Knoxville. The capital stock is $50,000, and the incorporators are: E. G. Oats, Walter McKey, D. E. Brown, W. A. Schuler and Thomas McCulloch.

Detroit, Mich.—Trombly's, stoves, Hardware, etc., opened new store at No. 103 Michigan Avenue.

Dixon, Ill.—The A. U. Thomas Co. has been incorporated by A. U. Thomas, Sadie Curtis and Margaret C. Thomas; to do a plumbing business. Capital stock, $2500.

Salt Lake, Utah.—Articles of incorporation of the Boyle Hardware Co., whose principal place of business is at Ogden, have been filed with the Secretary of State. The capital stock is placed at $10,000, in shares of $10 each, the greater part of which is subscribed for by Mary E. Scowcroft. The officers are: John A. Boyle, president; Mary S Boyle, vice-president; Joseph Scowcroft, secretary; Mary E. Scowcroft, treasurer, and Norman F. Boyle is the other director.

Springfield, Mass.—Selvey-Wyckoff Co. has been incorporated by William H. Selvey and others; steam fitters. Capital stock, $2000.

Changes and Improvements.

Alvin, Tex.—Pridmore & Kimmins, Hardware and agricultural implements, reported to have dissolved partnership.

Baltimore, Md.—J. R. M. Adams, dealer in builders' Hardware, etc., on the corner of Eutaw and Franklin Streets, has made extensive improvements by taking in Nos. 400 and 402 Franklin Street, throwing the two storehouses into one, which gives him now 40 feet front by 60 feet deep four-story, and about 9000 to 10,000 square feet of floor space. He found it necessary on account of increasing business and is looking forward to a large increase in trade which, for the present month, generally dull, he found is above the average.

Comanche, Tex.—W. C. Bowden, Hardware, succeeded by Bowden & Tribble.

Davison, Mich.—The I. T. Hurd stock of Hardware has been sold to A. Austin, of Bancroft, who will continue the business in the Hurd store.

Erin, Tenn.—H. H. Buquo Co., Hardware, etc., reported to have sold out.

Freeman, Iowa.—The new Hardware firm of W. B. Jordan & Son have purchased of W. C. Grant, the former J. W. Evans & Co. Hardware business, and are now in possession. The business will be conducted at the old stand in the Hamilton County State Bank building, corner Des Moines and Second Streets. Frank W. Evans will be continued in charge as general manager of the concern.

Glandorf, Ohio.—Jos. Thome & Co., Hardware, succeeded by Joseph Nienberg & Co.

Harlem, Ill.—Chas. J. Gotsch & Co., Hardware, succeeded by William Kolzow.

Hearne, Tex.—Adams' Hardware & Implement Co. have moved into new store.

La Cygne, Kan.—A. Mitzel & Son, Hardware, reported to have sold out.

Lynn, Mass.—Geo. E. Sleeper & Co., stoves, etc., succeeded by Perkins, Ballard & Co.

Maryville, Tenn.—James Henry, who has been connected with the Hardware store of Keny & Armbrister, of this place, has gone to Knoxville, where he will work in the Woodruff establishment.

Medford, N. J.—John Anderson has sold his Hardware business to Wm. Cooper.

Melrose, Ohio.—Edwards & Grant, Hardware, reported to have dissolved partnership.

Memphis, Mo.—The Foreman Hardware Co., sold to Ben Morris.

Menominee, Mich. — Buhl, Sons & Co., Hardware, Detroit, Alex. Stephenson has become a partner in the Menominee branch establishment of the firm.

Morristown, Tenn.—McCord & Williamson, Hardware, succeeded by C. E. Baylor & Co.

Ottawa, Kan.—C. H. Lee, who recently traded for the B. C. Fogle Hardware stock, has moved it away.

Painesville, Ohio.—Stephen Andrews has removed his Hardware store to the room formerly occupied by J. E. Callendar on State Street.

Racine, Wis.—Dixon, Malone & Co., Hardware, James F. Malone withdrawn.

Reading, Pa.—The new warehouse of the Bright Hardware store, Fifth Street below the Mansion House, has been completed. It is three stories high, about fifteen feet wide and sixty feet deep. The front is buff brick and contains three triple windows, presenting an attractive appearance. The bottom floor is laid with vitrified brick.

Utica, N. Y.—Roberts, Parry & Co., wholesale and retail Hardware, reported to have been succeeded by the Roberts Hardware Co.

Watertown, Minn.—Louis Krause, Hardware, succeeded by Boylan & Rohler.

Zanesville, Ohio.—E. B. Kemp has purchased the entire Hardware stock of G. E. Fillmore in his store on West Main Street, and will move it to the Odd Fellows' building on Putnam Avenue.

Business Embarrassments.

Bellaire, Ohio.—O. T. Mason, Hardware, reported to have made an assignment.

Boston, Mass.—Israel Mandelsyg, plumber and gas fitter, has petitioned in insolvency.

Bridgeton, N. J.—The Cumberland Nail & Iron Co. has gone into the hands of a receiver.

Chicago, Ill.—Edward Baggotte, proprietor of extensive plumbing establishment, has made an assignment. Liabilities are placed at $125,000, with assets at $300,000.

Cleveland, Ohio. — The Aurora Vapor Stove Co. has made an assignment. The assets and liabilities are placed at $40,000 each. Poor business is the cause.

New York, N. Y.—H. B. Griffing's Son, agricultural implements, at No. 70 Cortlandt Street, has made an assignment to Oliver Chan. Wells.

New York, N. Y.—Page, George & Co., plumbers' supplies, Nos. 59 and 61 West Sixty-sixth Street, have made an assignment to Augustus Appel, without preferences.

New York, N. Y.—The A. Edmund Hildick Co., dealers in cutlery and optical goods, at No. 84 Nassau Street, have assigned to Bailey Lloyd, without preferences. The company have a capital stock of $25,000.

Richmond, Va.—J. W. Anderson & Co., plumbers and stove dealers, Nos. 708, 710 and 712 East Main Street, have made an assignment. The liabilities are estimated at $8250.

Richmond, Va.—M. T. Rider, saddlery Hardware, etc., No. 1432 East Main Street, has made an assignment. The liabilities are about $2100.

Burglaries in Hardware Stores.

Baltic, Ohio.—Domer's Hardware store, $40.

Hallam, Neb.—Meyer & Elfeldt, $150.

Moline, Ill.—John Hemmingson, $200.

Moundsville, W. Va.—Smith & Son, cutlery.

Mt. Oliver, Pa.—John Wagner, $200.

Pratt, Kan.—Hopper Hardware Co., $90.

Recent Fires.

Albany, Ore.—F. E. Allen & Co., Hardware, destroyed by fire.

Boston, Mass.—The Hardware store of Burditt & Bynner has been damaged by fire to the extent of $3000: insured.

Camden, Mich.—A. & D. Friedman, store damaged by fire at a loss of about $5000.

Clinton, Ill.— The Hardware stock of Jameson & Son has been destroyed by fire to the extent of $7000.

Coopersville, Mich.—Boynton's Hardware store, damaged by fire.

Grand Rapids, Ohio.—James McDonald's Hardware store has been damaged by fire to the extent of $500, with $300 insurance.

Kansas City, Mo.—Richards & Conover Hardware Co., store at Fifth and Wyandotte Streets slightly damaged by storm.

Kendalville, Ind.—J. W. Stratton & Son, Hardware, etc., destroyed by fire; partly insured.

Murfreesboro, Tenn.—C. H. Byrn, Hardware, destroyed by fire; insured for $9000.

Paulding, Ohio.—F. M. Bashore, damaged by fire at a loss of $5500; insured for $6000.

Quincy, Mich.—James Pope, Hardware, store destroyed by fire.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements. etc , will be gladly received, and promptly published.

New Companies, Etc.

Baltimore, Md.—The Fox Gun Co. has been incorporated for the manufacture of firearms. The capital stock is $15,000, and the incorperators are: Ansley Herman Fox, Burr Howard Richards, Burr Howard Richards, Jr., Joseph Berton Pleasants and John P. Tabb.

New York, N. Y.—The United States No-match Light Co. has been incorporated, for the purpose of manufacturing, buying, selling and dealing in incandescent gas mantels, burners, etc. Capital stock, $500. The shares are $100 each, and are held by Thomas Adams, Jr., John S. Lewis, P. J. Carlin, Dr. Angelo Simmonini and F. V. Strauss, of New York City.

Ottumwa, Iowa.—Work will be opened shortly on the Janney Mfg. Co.'s plant for the manufacture of corn planters and other agricultural implements. The company was incorporated with a capital stock of $125.000.

San Francisco, Cal.—The McGann Stove Co. has been incorporated by Edward J. Lenforth, L. B. McGann, John Johns, William McGann and Frank Murphy. Capital stock, $5000.

Springfield, Ill.—The Krause Mfg. Co., of Chicago, has been incorporated. Capital, $1000; manufacture lawn mowers. Incorporators: Cassie R. Krause, Russell F. Krause and Sylvanus E. Lambert.

Taunton, Mass.—Lincoln & Wood Co. have been incorporated to manufacture Hardware. Capital, $5400.

Changes and Improvements.

Birmingham, Ala.—The plant of the Birmingnam Pipe Co., which is located on South Thirty-fourth Street, between Avenues D and E, has been sold, the purchaser being Theo. Ahrens, Jr., of Louisville, Ky. Mr. Ahrens is general manager of the Ahrens & Ott Co., manufacturers of plumbers' Hardware, soil pipe, etc., and it is probable that the plant will soon be put in operation.

Cortland, N. Y.—The Wickwire Bros. have let contracts to build a new factory building, 144 by 235 feet, near their present large buildings in which they manufacture wire cloth. This additional building was found necessary on account of the increasing demand for their poultry wire. The new building is to be devoted exclusively to that branch of the business. A new 100 horse power Corless engine is to be provided to run the machinery in the new building. This will provide employment for from fifty to one hundred men in addition to the hundreds already employed in this immense business.

Elmira, N.Y.—The Elmira Mfg. Co., with a capital stock of $300,000, divided into 3000 shares of $100 each, is soon to locate at Elmira Heights. The application for a charter is already prepared. Isaiah B. Coleman's iron and brass foundry in this city will be consolidated with the new concern, which will occupy the plant at the Heights formerly operated by the Elmira Machine & Foundry Co. The gentlemen who have made application for the charter are all well-known business men. Among them are Norman A. Johns, Frank E. Doolittle, Isaiah B. Coleman, Dr. Henry A. Moore, Irving D. Booth, Sherman C. Estey, Charles M. Marvin and Frederick Bright.

Houston, Tex.—The Simmons Hardware Co. are building a commodious warehouse in the Southern Pacific yards, to which the railroad company is constructing a side-track.

Kansas City, Mo.—The Kansas City Bolt & Nut Works intend erecting a rolling mill at Sheffield to cost $10,000. The new mill will be situated at Independence and Bristol Avenues and will be of brick and stone, with steel roof. It is on the site of the company's old mill, but will be much larger, the old one proving too small. The rolling mill will be used to manufacture bar iron and bar steel, and will be completed by September 15th. When finished they will employ about fifty more iron workers, which is an increase of 33⅓ per cent. over their present force.

Kansas City, Mo.—The John Deere Plow Co. will erect a new building at a cost of $20,000.

Kingston, Ont.—D. A. Davidson, of this place, is the patentee of an invention for putting on the caulks of shoes on horses without the shoes being removed. These shoes and caulks have been fully tested, and a company is now being formed to manufacture them.

New Haven, Conn.—The Winchester Repeating Arms Co. will erect a brick building, 40x160 feet, on Newhall Street, in the near future. The building is to cost $17,000, and will be used in connection with the arms department.

Sandy Hill, N.Y.—The Friction Pulley & Machine Works are having a two-story addition, 20x50 feet, built to their works, to be used for the electrical business of the Warren-Medbury Co.

Recent Embarrassments.

Bridgeton, N. J.—The Cumberland Nail & Iron Co., which was incorporated in 1852, with a capital stock of $500,000, recently passed into the hands of a receiver. The application for a receiver was made by Robert J. Buck, who has been president of the company for over twenty years, and by order of Vice Chancellor Reed, John Smalley is named as receiver. The company has an extensive plant in Bridgeton, and owns, besides, eighteen tenement houses in that city. Mr. Buck, in his own name and through his father's estate, controls a majority of the company's stock. The company owes him $19,000 on second mortgages and $2500 in unpaid salary as president. The company's liabilities are given by Mr. Buck, in his application, as $50,000, due on promissory notes and book account, in addition to $208,000 due on first and second mortgages on the company's property, given to secure bonds. A large portion of the promissory notes are already past due, while others are falling due, and there are no funds to meet them. Included in the company's liabilities is an indebtedness of $5000 to the city of Bridgeton for unpaid taxes for the past three years. The company has been under difficulties for some time and at last found it necessary to suspend business. The number of hands employed has been as high as 500, with an annual pay-roll of $200,000. The men are all paid up to date.

Miscellaneous.

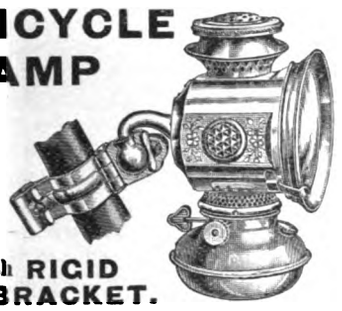
Abington, Mass.—The Abington Tack & Machine Association have gone out of business, and their plant has been sold to the Ansonia (Conn.) Brass & Copper Co., which has taken possession. It is hoped that the plant may be put in operation in its new location by the last of this month.

Birmingham, Ala.—The Southern Bolt Co., at Fourteen Street and Powell Avenue, are ready for business, and will be in regular operation in the next ten days. In fact, the plant is already turning out bolts. All the machinery is placed. This new industry is capitalized at $30,000, with J. M. Caldwell, president; Charles O. Locke, secretary, and Samuel Randolph, superintendent. The plant will manufacture everything in the way of iron bolts, nuts, rods, etc. It will employ about forty hands in the beginning.

Johnstown, Pa.—Considerable progress has been made in the direction of the buildings of the Johnstown Shovel & Forge Co. The buildings, which are of frame, are nearly completed, and a large number of the pieces of machinery have already been set in their places. It is expected that the plant will soon be in operation.

Middletown, Conn.— The Russell Mfg. Co. have been very busy on cartridge belts and have a fresh order that will force them to work overtime for some weeks to come. W. & B. Douglass are making several large brass pumps for the navy.

New London, Conn.—The New London Vise Works have received a large order from the government for vises and jack-screws, and work on the order will be commenced immediately. It is the largest order that the concern have received and will necessitate a material increase in the working force.



Reading, Pa.—During the past few days representatives of a large malleable iron works in Connecticut have been here looking for a site to erect a plant. They have examined several buildings and most likely will locate.

Southington, Conn.—At the annual meeting of the stockholders of the Southington Cutlery Co., held in July, the following directors were elected: M. C. Ogden, J. H. Baldwin, C. D. Barnes, W. R. Walkeley, George Munson, C. L. Campbell and C. H. Clark. M. C. Ogden was chosen president and treasurer, and J. H. Baldwin, secretary.

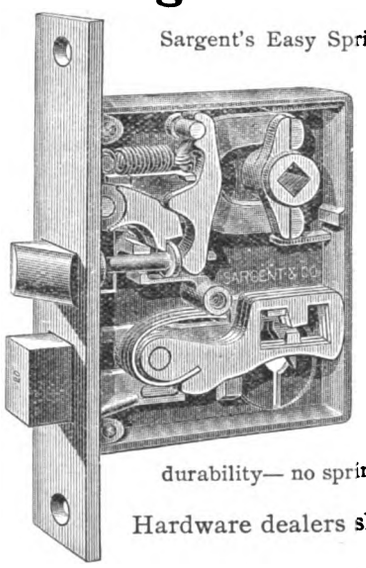
THE BANNER

BICYCLE LAMP



With RIGID BRACKET.

Workmanship, finish and burning qualities as near perfect as it is possible to make a Bicycle Lamp. . . . . .
The Wick Lock is the only practical one. Once the wick is adjusted nothing can move it up or down till you unlock it. . . .
Has a larger and better Lens than any other Bicycle Lamp. Is 3 in. in diameter, Double Convex and polished. . . . .
Guaranteed Wind-proof under Normal conditions in riding. . . . . .
All parts removable for easy cleaning. No lamp compares with it in this respect. . .

New York. Boston. Chicago. **Plumo & Atwood Mfg. Co.,** FACTORIES. Waterbury and Thomaston, Conn.

Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of

EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Auburn, Cal.—Robert J. Hancock, Hardware, sporting goods, etc., has opened store.

Bridgeport, Conn.—Articles of association of the Bridgeport Cycle Spring Co. have been filed in the town clerk's office. The company is capitalized at $10,000, and their business will be the manufacture and sale of cycles, cycle springs and all cycle appurtenances. The subscribing stockholders are: Almont E. Blakeman, James E. Wilson and Henry Bowser.

Charleston, S. C.—The Army Cycle Mfg. Co. has been incorporated with a capital stock of $5000. It has purchased the plant of the Southern Cycle Supply Co., and will continue the manufacture of bicycles.

Indianapolis, Ind.—The Bicycle Guarantee Co.; for dealing in bicycles and insuring them against loss. The capital is $5000. The directors are C. V. Hadley and M. B. Haag.

Magnolia, Ark.—Davis & Warnock, Hardware, sporting goods, etc., have opened new store.

Richmond, Ind.—The Richmond Bicycle Co. has been incorporated with a capital stock of $25,000.

Trenton, N. J.—The Howard Mfg. Co., of Mt. Holly, has been incorporated, to manufacture bicycle parts. Capital stock, $10,000. Incorporators: Henry H. Cross and Charles A. Root, Mt. Holly, and Chauncey O. Howard, Newark.

Ypsilanti, Mich.—The Samson Bicycle Factory, new concern, has commenced business.

Changes and Removals.

Amherst, Mass.—John Gordon & E. S. Wilbur, bicycle repairers, have dissolved partnership, and the business will be continued by Mr. Wilbur.

Charleston, S. C.—The Army Cycle Mfg. Co., successors to the Southern Cycle Supply Co., have opened up at the old stand, No. 5 State Street and No. 22 Broad Street, with a considerably augmented plant of machinery and a staff of expert workmen.

Chicago, Ill.—Fulghum Mfg. Co., bicycle hubs, reported to have been succeeded by Stewart Bros. Co.

Denver, Colo.—Robert Gerwing has sold out to Felker Cycle Co.

Denver, Colo.—The Denver Cycle Co., No. 1756 Stout Street, are retiring from business. They handle the Andraes, Snells, Barnes and Mansons wheels.

Lowell, Mass.—Ring's Big Store, Nos. 221-229 Dutton Street, bicycles, are endeavoring to dispose of their entire stock of wheels, to make room for sewing machines.

New Bedford, Mass.—G. & H. H. Davis, bicycles, are succeeded by H. H. Davis.

New York, N. Y.—V. P. Humason, No. 80 Chambers Street, has recently been appointed New York general agent for the Ide bicycle, made by the F. F. Ide Mfg. Co., Peoria, Ill.

Paterson, N. J.—H. M. Quick, bicycles, reported to have been succeeded by Quick Cycle Co.

Peoria, Ill.—Charles H. Barrer & Co., bicycles, etc., reported to have been succeeded by John L. Breese.

South Portland, Me.—The Lovell Cycle Factory will be extensively enlarged for next season.

Springview, Neb.—E. A. Milloy, Hardware, sporting goods, etc., succeeded by S. S. Allen.

Toledo, Ohio.—Wilson Mfg. Co., bicycles, reported sold out.

Westfield, Mass.—A. A. Sanborn & Co., bicycles and locksmiths, have gone out of business.

Recent Embarrassments.

Allegheny, Pa.—The Kepp Gear Wheel Co. have made an assignment to Peter Yocum.

La Crosse, Wis.—George Stangl, furniture and bicycles, reported to have made an assignment.

Louisville, Ky.—Martin & Martin, bicycles, reported to have made an assignment.

Philadelphia, Pa.—Robert L. Van Dusen and John M. Wilbour, trading as R. L. Van Dusen & Co., bicycle materials, No. 1127 Arch Street, have made an assignment to William W. Caffrey, No. 807 North Nineteenth Street, for the benefit of creditors.

Philadelphia, Pa. — Hill & Lyster, bicycles, reported to have made an assignment.

Portsmouth, Va.—Alfred J. Roach, bicycles, reported to have made an assignment.

Springfield, Mass.—The Warwick Cycle Co., assignees, are endeavoring to find a purchaser or purchasers for the insolvent company's big plant. Plans may develop for an organization of company to manufacture the wheels.

Recent Fires.

Cleveland, Ohio.—Morgan & Wright, bicycle repairs, damaged by water at a loss of about $500; insured for $1000.

New York, N. Y.—The store of the Excelsior Cycling Co., at No. 5 Grand Circle, has been damaged by fire.

North Tonawanda, N. Y.—The large factory of the Ellicott Cycle Mfg. Co. and three dwellings have been burned to the ground. All were frame structures, and burned rapidly. The total loss wil be in the neighborhood of $75,000.

Rochester, N. Y.—The Chainless Mfg. Co. Works, damaged by fire.

St. Paul, Minn.—The bicycle repair shop of J. Helwig, No. 442 East Seventh Street, has been damaged by fire to the extent of $100. The origin of the fire is unknown.

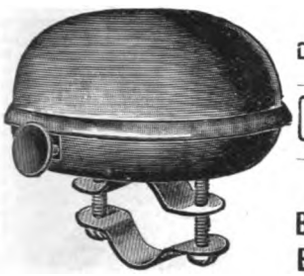
Woonsocket, R. I.—The stock in the bicycle store of rhe J. P. Lovell Arms Co. was damaged by smoke and water to the extent of $500. The damage to the building was small. Prompt work on the part of the fire department prevented a bad fire.

Miscellaneous.

Hartford, Conn.—It is announced that the Pope Mfg. Co. solicits the correspondence of all persons who are sure that they have new things that are not lacking in utility. The company, it is stated, intends to market a number of interesting specialties next year through its new sundry department.

Milwaukee, Wis.—Assignee Henry Herman made application to Judge Johnson for permission to sell the plant of the League Cycle Mfg. Co., at Fifteenth Street near Clybourn. The inventory showed assets of $59,135.21 and the liabilities in excess of $62,000. In the inventory 1898 bicycles are quoted at $15, representing the cost price of the wheel. The application states that the outlook does not justify the continuance of operations. The application was granted.

New York, N. Y.—According to official reports made by a British consul, the English and American cycle manufacturers have not found a good market in China and other places in the Orient because they do not put dragons and grotesque decorations on their machines. The regulation trademarks do not take, as they are not considered to be a favorable omen. There are certain colors which have peculiar recognition by the ordinary class of Chinese, while others offend their tastes or their superstitions. Chinamen, it is said, will frequently buy soap, medicine, biscuits and other small articles for the sake of getting a lucky label, and all that is needed to make American bicycles popular in the Flowery Kingdom is for the manufacturers to make a personal study of decorative work.



Northampton, Mass.—The Northampton Cycle Works, which have been run by Assignee T. G. Spaulding, have been closed, and will probably never be opened again for the manufacture of wheels. More than fifty employees are thrown out of work, and a business that could pay a 12 per cent. dividend is lost to the city. Mr. Spaulding has been unsuccessful in his efforts to organize a company to continue the business, and expects to sell the plant piece-meal at a considerable loss. He has made several thousand dollars for the creditors, however, by finishing up 2500 wheels. The total output of the factory this year has been more than 3000 wheels.

Toledo, Ohio.—Lucian Seymour, superintendent of the Geneva Cycle Co., of Geneva, Ohio, has accepted the position of general manager with the Snell Cycle Fittings Co., succeeding to the position formerly held by Samuel Snell. Mr. Seymour leaves the Geneva Co. with the best of feeling, and it was largely through its influence that he obtained the promotion.

FOR HAROWAREMEN

HARDWARE ADVERTISING

Written by a practical Hardwareman, embracing everything advertisable in Hardware and Bicycle stores. - - -

THOUSANDS OF DEALERS EVERYWHERE . . .

Have ordered it and find the Dollar it costs to receive it a judicious investment. . . .

100 ADS FOR $1.

The contents of this book were carefully selected from the thousands of ads a Successful retail firm have used, as these 100 brought the best returns and most Sales.

Type display as it should be. Copy that says what ought to be said in a convincing way. Perforated leaves ready for the printer. If it is not satisfactory, the money will be promptly refunded.

...FOR... BICYCLE DEALERS.

Hardware Advertising Is Different.

Not Ordinary Work.

However skillful a man may be in writing dry goods or grocery Ads. it is no criterion of his ability to produce good advertising for your line.

A Specialist Needed.

Hardware advertising, to be effectual, requires a specialist to produce it. He must know Hardware, Implements, Hardware Stores and Implement Warehouses from A to Z. He must be able to write from the standpoint of the buying class. He must have the insight and ability to write such ads. as will interest and attract the public to that particular store.

Making It Pay.

Our Burtis R Kessler has successfully written advertising for our firm for several years. Is still doing it. Three years' study in Chicago under Hardware Advertising experts gave him aid. Practical experience behind the counter taught him more than years of theory, and now he writes work that draws.

For One Dollar.

Send us One Dollar and we will send you prepaid a copy of "**100 Ads for $1.00**" which is fully described on this page. It will pay you as well as it has us. The Ads are written in such shape that they can be remodeled for any business.

John B. Kessler & Son,

HARDWARE,

Clayton, Mich.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

BERNARD'S PLIERS.

THE WM. SCHOLLHORN CO.,
NEW HAVEN, CONN.

AGENCY JOSEPH RODGERS & SONS, LTD.

THE BEST IS EVER AND ALWAYS CHEAPEST.

The merchant can recommend with confidence.
The consumer will report superiority.
Excellence will insure enlarged demand.
Satisfaction will leave no ground for complaint.

Why, then, sell inferior Cutlery when
THE VERY BEST
can be had at a small advance over poorer QUALITY?

FOR CENTURIES THE WORLD RENOWNED HOUSE OF
JOSEPH RODGERS & SONS, LTD.,
SHEFFIELD, ENGLAND,
Has had neither equals nor superiors in the manufacture of

CARVING KNIVES and FORKS,
TABLE CUTLERY,
SCISSORS,
RAZORS,
HUNTING and BOWIE KNIVES
POCKET CUTLERY, &c.

Its Corporate Mark

Is among the oldest, and now over 200 YEARS old. It is known the world over as a guarantee that all articles so stamped are absolutely superior to all others.
We are the sole agents in the United States for JOSEPH RODGERS & SONS and carry a full line of their manufactures in stock.
If you cannot procure goods of their make from your jobber we shall be pleased to supply full information on application.

SURPLESS, DUNN & CO.,
SOLE AGENTS.
55 Warren St., NEW YORK.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Tinned Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is bemoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices. It will gather Apples, Peaches, Pears, &c.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price per dozen, $5.00.* *Liberal discount to the trade.*

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

AMES SWORD CO.,

CHICOPEE, MASS.

MANUFACTURERS OF

Endless Silk Sewed Strapping Belts.

THE BURR PATENT
STEEL
Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.

Runs as freely as an ordinary rope tackle block.
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of." J. C. DEBES,
Supt. of the C. & G. Cooper Co., Mt. Vernon, O.

Old Fashioned Hand Process.
FAC-SIMILE OF AUSABLE BOX AND BRAND.

Genuine Ausable Nails are packed in boxes bearing their FULL NAME and Trade Mark.

LIGHT HEAD

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

A MATTER OF CONFIDENCE

Buying Solder is largely a matter of confidence. No living man can tell by sight whether Solder is "½ and ½" or whether it is something else. "Straight Solder" looks exactly like Solder which isn't straight. A buyer is wholly at the mercy of the manufacturer. "Straight" Solder is easy to make. No secret about it. Half is tin and half is lead. The "½ and ½" Solder we make is no better than that made by any other reputable manufacturer. Actual quality is what makes price. When a so-called "½ and ½" Solder is offered at a lower price than we ask, the chances are that instead of being half tin and half lead, there is less expensive and less desirable material in it. We never have and we never will resort to deception in order to make prices small.

IRON ROOF
FOR SALE.

Width of building, 155 feet out to out, divided into a center span 66 feet, with a wing on each side 43 feet 6 inches; total length of the building 350 feet. This building is designed with brick sides and gable walls, with Iron Roof Trusses and Iron Supporting Columns; originally built for an Iron Foundry, but owing to the failure of the purchaser is now offered for sale at a bargain. Is admirably adapted for a Foundry for light or heavy castings, Machine Shop, Car Barn, or for any other general manufacturing purposes. We guarantee the iron work as good as new, building never having been used.

"Bright and Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The prospect is gradually clearing away and preparations for a season of phenomenal business are causing an amount of hustling on the part of manufacturers and dealers that is very gratifying to witness.

Advancing quotations on raw materials, accompanied by strikes in several plants, have had the natural effect of withdrawing the less rigid quotations governing the wire nail market during the month past, and have braced the current prices very effectually, with every indication of an early advance of greater significance.

The noteworthy iron and steel combination between the Minnesota Iron Co. and the Illinois Steel Co., on account of the great and powerful interests back of the consolidation, will exert an incalculable advantage to American influence on the trade of the world. The financial strength supporting this centralization of productive power, insures a control of any market we may see fit to enter, and ensures the endorsement and encouragement of other large producers, even though they may not join in the tendency toward combining their collective strength into one great organization.

The large crops reported upon by government departments ensures a prosperity almost unequalled even though marketed at lower quotations than prevailed a year ago. The demand is likely to be as great as ever, as new markets for our agricultural products are being sought in every direction, and the extension of our commercial advantages as a result of the Spanish war, will naturally follow and become permanent factors in any movement having for its object the increase of our national commerce.

Reports from our numerous correspondents at the trade centres of the country, all indicate that while they are rejoiced that the war is closed and peace conditions will prevail from now on, they admit the prosecution of the war has had no detrimental effect on the season's trade just passed, which has more than equalled the sanguine expectations formed early in the season. The advances in prices in many lines, and the hardening quotations in those usually susceptible of weakness early in the season, are stimulating orders and enquiries to an extent rarely felt except under rapidly changing conditions, especially as inability to get raw materials from the mills makes promises for early delivery, problematical rather than certain.

The impression that we are on the eve of a substantial revival in commercial prosperity that will extend throughout the next ten years, is gaining ground with all classes of merchants and manfacturers, and if account is only taken of the natural expansion of trade, without anticipations of spasmodic boom, there will be no conclusions so reached but will be found justified by the exceptional condition of trade during the fall season.

To-day we are nearing the point which manufacturers have long been looking for, where consumption will have overtaken the limit of our productive facilities, and with orders daily increasing on factory order books, the firmness so rarely shown by manufacturers during recent years, has now become a cardinal virtue, and in the future will command respect.

A National Retail Hardware Association.

It is with pleasure that we present in to-day's issue, a series of letters from leading Hardwaremen, who are especially connected with the retail trade. Among these communications are several from officials of the various retail associations of the country, and from the study which these gentlemen have given to the subject of organized effort within the trade, they are certainly competent to speak with authority, and to set forth the present conditions and the possibilities of the future as they actually exist.

A great deal of consideration has been given in recent months to the question of National organization among the Hardware retailers. Questions have arisen, and suggestions have been thrown out, occasionally at recent meetings of the State Associations, in regard to the formation of a National Association but so far no definite steps have been taken looking to the accomplishment of the desired object.

In order that this question may have full consideration before the fall and winter meetings of the various associations, *Hardware* has taken occasion to invite the opinions of gentlemen who may properly be classed as experts, and the first series of letters is, as above stated, given in another portion of to-day's issue.

The question arises as to the character of this Association, in case the same should be created. The general opinion seems to be that the new organization should be composed of delegates from the various State Associations, while at the same time individual retail Hardwaremen should be given the fullest opportunity for representation in the organization, and every possible effort made to interest the retailer everywhere. These various views are submitted, with the suggestion that the State Associations at their coming meetings, take the matter up in a systematic manner, and if they do so, we believe that at the end of the coming winter a National Retail Association will be in actual existence. *Hardware* stands ready to do anything within its power to put that purpose into effect.

The Glorious End of the War.

Peace is an assured fact, and that portion of the army not needed in the garrisons intended for the conquered provinces, will soon be disbanded to return to the industrial environments from whence they were taken.

The early settlement of the questions involved in the contention with Spain, finds this country in an advanced position before the nations of the world, that cannot do otherwise than redound greatly to our moral, financial and industrial prestige in the future. We will occupy as never before a place in the councils of the nations that will surely bring us from a fifth to a second-rate power, and this will be backed by a naval supremacy, for the further establishment of which, steps of importance are already being taken; for the building of war vessels that shall be second to none in the world.

In the conduct of the war just closed, Americans have a right to feel a just pride, every step taken reflecting substantial credit on the administration and the people who so generously supported it, from the time when the Senate promptly voted additional taxes to the extent of $150,000,000, and gave authority to the government to borrow $200,000,000 more. What a noble response to this proposal was given, when the people subscribed for $1,000 000,000, showing, if wanted, how thoroughly the country could be relied upon to furnish the sinews of war for the sustaining of American principles and the planting of "Old Glory" on territory extending so greatly the boundary line of our territorial possessions.

The United States will always command the respect of the world for its display of national spirit and the exhibition of its unequalled fighting qualities. In no war into which it entered has this country ever suffered defeat. It assumes at this period of its existence a greater degree of responsibility than was deemed likely to follow the prosecution of this war, and the views of our government will in future be ascertained and her counsel solicited by other nations before again changing the map of the world. We know now that we are sufficiently powerful on sea or land to be feared and respected, and other powers now, more than ever, will recognize the fact that we can take good care of ourselves when the necessity for doing so is made apparent.

James Surpless for Congress.

We wish to extend our hearty congratulations to the 5th Congressional District of New York, on its most recent evidence of good hard sense. If the aforesaid District had one hand instead of many, we would be glad to shake it, and to assure its owner of our distinguished consideration.

For the past 48 years, there has resided within its limits, a man, whose many virtues and good common sense have won him a host of friends. We speak of James Surpless, head of the firm of Surpless, Dunn & Co., New York City. Time and again has Mr. Surpless been importuned by his many friends to represent them in various public offices, and no less often has he firmly declined. Two years ago he was mentioned for Congress, but he refused to allow his name to go before the convention. This year, however, it would seem that he must "fish, cut bait, or go ashore;" as the rank and file, wherein his strength lies, have simply decided to take the tiller in their own hands, whether he likes it or not.

Mr. Surpless is a Republican; and is credited with solidifying the many antagonistic factional interests of the 5th in far greater measure than they have been for many years. He is an original McKinley man; and fought long and hard for the sound-money plank. Of his personal worth we cannot say too much. His name is a synonym for all that is upright and conscientious. His quiet reserved force imbues his acquaintances with respect, both for his intellectual qualities, and for his sound sense; while his frank, manly bearing, inspires absolute confidence, and makes him hosts of friends.

The district in which he lives is a Republican stronghold; a nomination being regarded as equivalent to an election. The one occasion on which a Democrat has represented it of recent years was when the late John H. Graham was elected in 1892; and as he, also was a Hardwareman, this may be taken as a further evidence of the certainty of our esteemed friend's chances. *Hardware* is saving a good hearty handshake till next November for Congressman Surpless.

Where Spain is "At."

The advertising man, like Artemus Ward's kangaroo, is an "amusin' cuss." Some of his facetionsness has, of course, been recently directed to our friend, the enemy. In the office of one of these humorists there hangs upon the wall a large sized map of the world; and neatly printed in large letters is the conundrum: "Find Spain." Naturally, ones eyes seek that little spot in the south-west of Europe, where we have been accustomed to find the land of the Dons located, but instead of the multi-colored shape of the country of the appetizing olive and the langourious-eyed beauties of Andalusia we find a piece of white paper pasted neatly over it and marked U. S.

A tobacconist in New York's Hardware district who possesses an adaptive and possibly original bent of mind freezes the blood of the wayfarer with the following window card:

"*Dewey* sell good cigars? Well, if you *Havana* experience you will know that to be the *Maine* cause of our success. The *Merritt* of our good is what makes people come *Miles* to patronize us. Our customers are not compelled to take *Hobson's* choice."

Vacation Thoughts.

The "Man in the Corner" of the house of W. Bingham Co., Cleveland, Ohio, discourses of vacation season in his recent communication. He sighs as he says that "vacation time is nearly over," and continues: "It is the time when the workaday Jack wakes to the fact that he is growing to be a dull boy through the monotony of his routine and longs for a change—when the sound of a railroad whistle is a personal call to go and the sight of the summer excursionist with his jaunty air and big basket, arouses a wistful thought of the pleasures of a junket in agreeable company; when he feels again in anticipation the ecstatic thrill that comes back over the rod when a fish takes the hook, or in imagination looks along the barrel of a gun and enjoys the luxury of a rest and a real sleep after a day's hard tramp in the woods. Little things fret and worry him and ordinary pleasures lose their zest, and he finally gives up, turns his store over to his clerks and goes for the much needed outing. To the ordinary man an annual vacation is as much a necessity as a Sunday's rest. He is only wound for a year at a time, and Dame Nature carries the key that winds him up for another revolution around the great dial of time.

"Get under cover on fall and winter goods! If you do not do so early, you will surely find yourself without them when you need them, and none to be had. I told you the same thing in April and the scarcity of summer goods proved the wisdom of the advice. The probabilities are that before the year is over the lack will arise to a famine. Trade papers are sounding the alarm, long-headed buyers are placing orders now far ahead of their needs, and the patter of early orders will be a deluge when the condition of things is fully realized."

Digitized by Google

A NATIONAL RETAIL ASSOCIATION.

There has been more or less discussion within recent months, at the meetings of the Retail Associations of the various States, in regard to the formation of a National Retail Hardware Association. A great many opinions have been expressed, in a desultory way, here and there, in favor of the formation of such an Association, but no active steps have as yet been taken for the realization of that very laudable object.

For the purpose of crystalizing these various opinions, and in order that the subject may receive the thorough discussion which it deserves, *Hardware* has addressed a letter of inquiry to a number of the leading Hardwaremen of the country, including representatives of the several Retail Associations of the States, leading retailers, etc., asking them as to their opinion concerning the formation of a National Retail Hardware Association. They were especially requested to formulate practical suggestions as to the steps which should be taken. The responses have been prompt and general, and we take pleasure in laying the first installment before the readers of *Hardware* to-day:

PRESIDENT NEW ENGLAND ASSOCIATION.

Editor Hardware: Replying to your inquiry in reference to the matter of a National Hardware Association: While I do not doubt the possibility of forming such an Association—for to Hardwaremen all (material) things are possible—yet not having given the subject any previous consideration, I am unable to foresee the advantages others who may favor the project imagine they will receive.

Theoretically, wonders might be accomplished. Practically, I am skeptical enough to believe little benefit would be derived from a membership in such an organization.

If, however, *Hardware* would suggest a platform embodying the object and aims of the proposed Association, the writer would present the subject for discussion before the Association he has the honor to represent, and would be pleased to report their action.

Sectional, State and local Associations, where the interests of the trade are identical, are certainly desirable.

Presuming a National Association is formed, I would favor representation from retail associations now formed, from sections where such associations exist. Awaiting the "platform," I remain Yours truly,

EDWARD A. LOOMIS,

President New England Hardware Dealers' Association.

Providence, R. I., August 18, 1898.

CHARLES E. ADAMS' VIEWS.

Editor Hardware: Replying to yours of the 12th instant, relative to the formation of a National Retail Hardware Dealers' Association, would say that it must be conceded that the best ethical, governmental and commercial results are secured by organized concerted action whether the object is to benefit a town, city, State or nation.

A National body composed of individual members or small local organization, judging by observation and experience during the past ten years in this line of work, does not exert the influence that ought to be derived from such an association.

Every community, whether representing a city or group of towns, should have an organized body of Retail Hardware Dealers, and I believe either from a social or financial standpoint a merchant can ill afford to be outside of its membership.

A State organization ought to be formed from these local associations, whose work would include the consideration of many questions of importance to the Hardware fraternity, and also promote the public good by assisting similar bodies to secure the enactment of laws beneficial to the entire State.

A National Retail Hardware Dealers' Association composed of delegates representing the various State bodies and interested in the work, would make an ideal organization, as they would be fully prepared by previous discussion in the State boards, to act intelligently upon topics pertaining either to Hardware interests or those of a public National character, that might be presented at a National business men's conference.

Such meetings would exert great influence in securing the enactment of proper National laws, United States senators and congressmen have repeatedly stated during the past few years that they desired the opinion of business men, and welcomed with pleasure the increasing interest and attendance shown by those representing the mercantile and industrial interests of this country before congressional committees.

The National bankruptcy law, improved postal laws and various other reforms are largely due to the activity of commercial bodies through their representatives advocating strenuously before Congress these measures, and the future foreign policy of the United States, together with other great national questions to be considered by the coming Congress, should receive the attention of mercantile bodies, in order that our lawmakers may have the best results of business experience and observation.

The retail merchant, in his modesty, oftentimes labors under the apprehension that his efforts in a small community cannot effect the public policy of a great nation, but his individual work co-operating with others, is the only way that great attainments can be achieved; although he may not receive immediate financial returns, there will be a satisfaction in the thought that the Hardware fraternity is performing its part in making the United States the greatest commercial and industrial centre of the world. We have recently maintained our position in the front rank of nations as being able to maintain our honor and defend the cause of humanity, so let us all bend every effort to retain the same position in the arts, science and manufactures, by excelling all others in our National Exhibit at the Paris Exposition of 1900. CHARLES E. ADAMS.

Lowell, Mass., August 18, 1898.

D. FLETCHER BARBER'S SUGGESTIONS.

Editor Hardware: With regard to the formation of a National Retail Hardware Association would say my own idea on this would be that it should consist of representatives elected and sent by the local associations throughout the country; that they should take up matters referred to them by the associations which they represent, and some of the larger questions.

I should also think, that while every association of ten or more members should be entitled to one representative, there should be a basis for further representation for the larger associations.

Inasmuch, as we understand it, there are very few jobbers throughout the country but that do more or less retail business, we should think it would be better to have one large and general national association than two, but if this is impractical, I should certainly recommend that the national association be made up as above suggested, as other-

Digitized by Google

wise we cannot understand how it would differ from a local association.

Some of the questions which I should like to see discussed with a movement toward lessening the detail and annoyances which prevail in the retail business would be: A uniform system of letters or numbers denoting finishes; uniformity among manufacturers in carrying stock; and charges for different finishes; the most advisable way in which to carry builders' Hardware, and recommendations as to how it shall be packed by the manufacturers; collections and drafts; advisability of cash transactions both in receiving and paying bills, etc. These are what occur to me without having time for thinking the subject over as perhaps it demands, though of course these are the outcome of what I have been led to conclude are convictions regarding such an association.

Yours sincerely,

Office of Chandler & Barber,
Boston, Aug. 15, 1898. D. F. BARBER.

S. S. BRYAN'S ENDORSEMENT.

Editor Hardware: In response to your letter of the 13th asking for my views concerning the formation of a National Retail Hardware Association, I will say that I regard the formation of such an association as an absolute necessity, if the various state associations continue to exist, as their usefulness would be greatly enhanced by a national association to bind them all together.

It would occur to me that in such states where associations exist that they send a number of delegates to form a national association, and if there are any large towns in such states that are not represented in the state association, the dealers in such towns should be asked to send a representative. Of course there are many states that have no state association. In such cases it seems to me that it would be desirable to interest at least one dealer in every town of five thousand inhabitants or over, and get him to see his fellow-dealers and try to arrange to send one delegate to such towns, dividing his expenses among them.

After the formation of the national association, it is likely that they would employ an able man for secretary, one of whose principal duties would be to travel and organize the various states, and the various towns into local associations. "In union is strength" and without numbers the association will fail of its object.

I will be very glad to see such an association formed, and hope the time is not far distant when it will be a reality.

Yours truly,

Titusville, Pa., August, 1898. S. S. BRYAN.

WORD FROM WISCONSIN.

Editor Hardware: In reply to yours I would say that it has always been the idea of the Wisconsin State Association that we hoped to see the formation of a national association or at least of a good sized North Western Association.

As you are no doubt aware, there is already an association of the three states of Wisconsin, Minnesota, and North Dakota, which seems to be accomplishing a good work, and it has been our idea to try and interest other and contiguous states.

With a national association composed of all associations in the country it might be so large as to be unwieldly, but with a small representation from each state, that objection could be met, and I believe would result in great good. Our motto has been "In union there is strength," and I see no reason for a change of purpose.

I think this State's association has accomplished as much or more than its most ardent supporters expected, and while some may feel, that but little has been done, those who know most about it do not agree with them.

You can put me on record as being in favor of a national association properly run, and I believe it could be accomplished and good results gained. C. A. PECK,

Secretary Wisconsin Retail Hardware Association.

Berlin, Wis., Aug. 15, 1898.

NORTHWESTERN RETAIL ASSOCIATION.

Editor Hardware: I am in receipt of yours, requesting my views as to the possibility of the formation of a National Retail Hardware Association.

In reply, I beg to say that I believe it possible, and that it will be the final outcome of the present movement among the retail dealers.

In soliciting membership for our association, the statement, "Oh! you can't do so and so," is very often made to me, by referring to the possibility and probability of a National Association. I am in most cases able to satisfy dealers that final success is possible.

The many State Associations now in existence have, I believe, all expressed themselves as in favor of this greater association, to which they are but stepping stones.

The organization and the success of the Northwestern Retail Hardware Association is a fitting reply to the proposition: Is it possible to organize a National Association?

The benefits to accrue from such organization are too numerous to mention here. But when we consider the problems now before us, and the greater ones yet to be presented, well may we look forward to a National Association for a solution of them, only through which we can expect to pass proper legislation, which shall be broad and far-reaching in effect, preventing fraud and misrepresentation, and demand the protection of the Interstate Commerce Laws now being violated by mercantile companies through combination with railroads and express companies.

Is the time opportune?

The proper time to organize a National Association of Retail Hardware Merchants is an open question, and one I believe worthy of careful consideration.

The State Associations now organized are working under widely varying by-laws and resolutions. Local conditions and customs of trade, so different in many States, make this seem necessary. The experience of these organizations has been of great benefit to them and to the greater movement yet to come; it will be very valuable in simplifying and harmonizing the conflicting interests in different States.

As a majority of the States are still without organization, it has occurred to me, that to lay the foundation of a National Association broad and deep, we should have the experience of a larger number of States; much that appears correct in theory, will be found wanting when put to a practical test.

The expediency of the matter will no doubt be considered by those fully competent to judge. With the National Association once formed on correct principles, with the majority of the States as members, every free jobber and manufacturer will rally to its support.

Representation: As to representation in forming this association, I believe every State association should appoint delegates from among its members, and in every State in the Union where there was no association a call for a meeting should be issued to the retail Hardware dealers, and at said meeting this question should be discussed and special attention given to trade conditions and customs where they differed from those of other States.

Delegates could then be appointed who were informed and qualified to assist in moulding by-laws and resolutions to cover satisfactory all sections of the Union.

Yours respectfully,

J. W. CLARK,

Secretary Northwestern Retail Hardware Association.

Minneapolis, Minn., August 16, 1898.

PRESIDENT HARTFORD ASSOCIATION.

Editor Hardware: With regard to the formation of a National Retail Hardware Association—undoubtedly such an organization would be useful in many ways. Representatives chosen from the retail associations of the various

Digitized by Google

States would be most likely to accomplish any business in view; at the same time, it would seem wise to welcome to the meetings every individual dealer interested in the work of the association. I will submit the matter at the next meeting of our association. WM. FRANCIS,

President of the Hartford Hardware Association.

Hartford, Conn., August 13, 1898.

A VERY GOOD IDEA.

Editor Hardware: Regarding the formation of a National Retail Hardware Association we should think it would be a very good idea if composed and officered by the leading retail Hardware dealers of the country.

We assisted in organizing such an association at Chicago during the World's Fair in 1893, but for some reason it did not seem to accomplish much, and in a short time it died a natural death. We would give a proposition of this kind favorable consideration. Yours truly,

Minneapolis, Minn., Aug. 19, 1898. W. K. MORRISON.

SOME GOOD TO BE ACCOMPLISHED.

Editor Hardware: Many men of many minds can get together, and with an exchange of plans and ideas, make a composite plan of action, which will do each one of its members some good, in one way or another.

A National Retail Association would be too big if composed of individual members, and more good could be accomplished by having a few delegates from each Retail Association now established.

While the New England Association has or did not do some of the things which some of the original members expected, yet it has planned and carried forward some ideas which we had not expected.

Now if a small number of business men can, and they do, have a satisfactory return for their money, one or more delegates to a larger society, would put them in touch with a greater number of people and ideas.

Yours truly,

Woburn, Mass., Aug 20, 1898. L. W. THOMPSON.

Failure of the Tinware Trust.

The Central Stamping Co., manufacturers of tinware and sheet metal articles, No. 25 Cliff Street, New York, and factories at Hewes and South Second Streets, Brooklyn, and No. 573 Ferry Street, Newark, N. J., made an assignment August 18th to Alfred R. Turner, Jr., of Paterson, N. J. The deed was signed by John H. Sprague, president, and George W. Ketcham, secretary. Enoch W. Ketcham was treasurer and Walter M. Aikman, vice-president. The company was originally organized in December, 1884, with a capital stock of $500,000, absorbed five of the largest concerns in the tinware trade in the country, and was known as the "Tinware Trust." The concerns absorbed were Lalance & Grosjean and Frederick Haberman & Co., of this city; E. Ketcham & Co., of Brooklyn; James Aikman & Co, of Newark, N. J., and the St. Louis Stamping Co., of St. Louis, Mo. Bradstreet's reports state that when the consolidation took place the factories and equipment of the five firms were leased to the company for ten years at a rental of $15,000 a year each. During the ten years the company did a very large and prosperous business and claimed to have made a large surplus. At the expiration of the ten years there was a disruption of the relations between those in the company and Lalance & Grosjean; the St. Louis Stamping Co. withdrew and were followed by Frederick Haberman & Co. The stock of the retiring members was purchased by the other stockholders. The old company was involved in considerable litigation; its charter was attacked by some of the dissatisfied stockholders, and the company was finally reorganized, and reincorporated on June 1, 1896, with a capital stock of $400,000. In August, 1895, the company met with a serious setback by the destruction by fire of the Newark factory, as the company was obliged to have part of its goods manufactured by outside parties. The factory was rebuilt and made one of the best of its kind in the country. This required the outlay of a large amount of money, and the company took advantage of the good nature of a few creditors. By the withdrawal of three of the concerns the company no longer had a monopoly of the business. It had to meet the strongest kind of competition, and to lower prices and could not dictate prices.

Albert H. Gleason, of Hastings & Gleason, attorneys for the assignee, is reported to have said that the assignment was very unexpected and had been decided upon very suddenly. The large investment in the business and plants of the company had deprived the company of ready money, and it could not meet obligatious which were about maturing. Compeitition had been very sharp in the past few years. There were also interests of different estates in the company, and after careful consideration the directors had concluded that it was for the best interests of the stockholders and creditors that the company should go into liquidation. Mr. Gleason said that it is practically a liquidation, although it takes the form of an assignment to prevent any one creditor getting advantage over another. The company's paper is maturing all the time; some notes are coming due now. The liabilities are between $270,000 and $300,000, one-third for merchandise, one-third for bank discounts and one-third for loans to the compauy. The nominal assets are over $500,000 in machinery, plants, materials, merchandise and accounts. The company owns no real estate.

Organizing in Iowa.

A movement was recently inaugurated in Iowa for the formation of a Retail Hardware Association, similar to that which at present exists in several of the States. Active measures have been taken by H. A. Cole, Cole & Cole, Council Bluffs, Iowa, and a meeting of the retailers of the State has been called at Council Bluffs on Wednesday of the coming week, August 31st. In a call to the trade, published under his own name, Mr. Cole says:

"I take the liberty of issuing this call for a meeting of the Hardware dealers of the State of Iowa, for the purpose of organizing a State association similar to the Hardware Dealers' Association organized in many of the States. The importance and value of such organizations are becoming appreciated by the trade at large, and many reforms have been effected through their influence. Besides this, the interchange of wide-awake and up-to-date ideas is of great value to the dealers who participate in the convention.

"I have personally had the pleasure of attending a meeting of the Ohio Hardware Association, and have witnessed some of the benefits to be derived from associating ourselves together, and I urge you to try to be here personally or send a representative to join this organization for our State.

"The meeting will be called to order Wednesday afternoon, August 31st, at 2 o'clock, at which meeting the organization will be effected and officers elected. Thursday will be devoted to the question box and the discussion of practical trade topics which will be open to the meeting, and we hope many bright and valuable ideas will be developed. Some of the questions discussed here will be of great value to every dealer attending, with reference to the coming stove trade.

"The expense of maintaining an association is very small, and the details of similar organizations which have been effected in the past will be on hand for your enlightenment."

There is a new field opening for the Hardware dealer. We notice that the Pierce Hardware Co., Taunton, Mass., has taken the agency for a graphiphone, and will carry the machines in stock.

The Early Manufacture of Matches.

The first light-bearing matches, as sold in England in 1826, were made of strips of cardboard paper or of flat splints of wood, tipped first with sulphur, and next with a mixture of chlorate of potash and antimony. They were lighted by being drawn smartly through a piece of folded glass-paper. Needless to say, they were expensive, wasteful, offensive to the smell, and unsafe. A more effective form of match was introduced soon after by the name of "Congreve light," or "lucifer." It was in England also that machines for cutting the splints forming the body of the match were first brought out, though quite thirty years seem to have elapsed between the invention of matches and the advance of the industry to this stage of machine use. Naturally the retail sale of matches was at first mainly in the hands of pharmacists, who probably were manufacturers themselves in most instances. One of the day-books of the late John Walker, who was in business as a chemist and druggist, at Stockton-on-Tees, as early as the first quarter of a century, for instance, bears numerous entries relating to the sale of "friction lights." Another claimant for the honor of having invented the friction match is Sir Isaac Holden. Sir Isaac, in evidence he gave some years ago before a Parliamentary Committee on the Patent Act, stated that in October, 1829, when engaged as a teacher of chemistry, at Reading, he was in the habit of rising at 4 A. M., and of lighting up, as everyone then did, by means of a flint and steel. He often thought of the desirability of improving this cumbersome process, and the idea occurred to him to place sulphur between a piece of wood and some chlorate of potash, the explosive nature of which was well known at the time. He tried this plan in the classroom, and one of his pupils, the son of a London chemist, immediately wrote to his father about the experiment. Shortly afterwards, Sir Isaac had the satisfaction of hearing that lucifer matches prepared upon his system were being offered for sale in London. He was then urged to apply for a patent, but he thought that the matter was too small to trouble about.—*Exchange.*

Inventor of Lead Pipe.

There was born in Milton, Pa., in 1800, a man of genius. His name was Robert Seydell, and he died in 1847. He was a coppersmith, and was almost continuously working out some device connected with the machinery in his factory. To him, it is related by some of the oldest citizens of this place, belongs the discovery of the process of making lead pipe, and, like many other inventors, the idea of making the same was stolen from him and further developed to its present form of manufacture.

It was in the latter part of the thirties that the idea suggested itself to him, and the following is the way he wrought it out: He first took a slug, or casting of lead, placing it on a mandrel, or rod of steel, about sixteen feet long and one inch in diameter; the mandrel was highly polished, and upon this he drew, or rolled out, the lead to the full length of the rod, thus giving him an inch bore, and the material was rolled, it is said, to a one-fourth inch, making a total diameter, one and one-half inches for the pipe. After completing several sections of the length of the mandrel, he soldered them together, making the pipe of whatever length he desired. He put it to practical use by fastening it to pump heads, and also running it from springs to contiguous watering troughs and spring houses in the country round about here. Being greatly pleased with his discovery, and receiving the most flattering of comments from his friends and neighbors in this section, he concluded to make his invention more widely known, and hence made a visit to Philadelphia, taking his device with him. At the Franklin Institute in that city he gave his first exhibition to quite a number of inventors, artisans and mechanics. As it is now related, every one who witnessed it was more than delighted, and so expressed themselves in his immediate presence. It was not long that he was allowed to remain in a condition of supreme happiness over his invention, for a short time after he made a disclosure of his discovery, and while yet in Philadelphia, he found out that by the persons to whom he had given an exhibition of the process of making lead pipe his idea had been used and improved upon.—*Philadelphia Press.*

A Yankee Trick in Belgium.

It is so difficult to earn an honest living. A Belgian knight of industry has been trying to raise the standard of public honesty, and fill his own pockets at the same time. M. Vriendt's specialty was hand baggage stowed away in the netting of the railway carriage. He had observed that the public conscience is very lax in the matter of size and weight, while the Belgian law is correspondingly punctilious and severe. Therefore M. Vriendt armed himself with a pocket measure, took a cheap season ticket and opened his campaign. His plan was to get into conversation with the owner of some portly valise and, turning the subject to the question of proportion, to ask, as a matter of curiosity, to be allowed to measure the valise in the netting. This done he put off the amateur's bland curiosity and assumed the stern official. "Sir, do you know your portmanteau is seven and one half centimetres too long? I am one of the company's inspectors, and charge you at once five francs as a tax on unauthorized baggage." The money was generally paid, but one day he caught a Tartar.

A quiet Belgian, after paying the tax, requested to see the measure. He examined it carelessly and then lightly remarked: "And I, sir, happen to be an inspector of the government of weights and measures, and notice that there is no official stamp on the instrument you employ. The fine for this offense is fifty francs. Kindly hand it over." That money was also paid —*China, Glass and Lamps.*

Credit Described.

Credit is the most precious possession a business man can have. It is priceless. It cannot be bought. It is acquired, maintained and preserved by certain qualities that I believe are inherent in the man. Credit is like a delicate piece of porcelain. You may break it and put it together again, and for purpose of utility it may possibly be just as good as it ever was, but the cracks are there, and you can see where it was broken. And so it is with the man whose credit is once impaired. He may be able to buy goods again, his standing among mercantile houses may be very fair, but it never can be restored to the superb condition in which it once was. And so I would warn all merchants, young and old, to regard credit as a priceless possession. Do not let it be trifled with, and allow nothing to impair it or injure it.—From an address by Wm. B. Dean, of St. Paul, Minn.

Jack and His Uncle.

A young Irishman in want of £5 wrote to his uncle as follows:

"Dear Uncle—If you could see how I blush for shame while I am writing, you would pity me. Do you know why? Because I have to ask you for a small loan to help me buy a bicycle, and do not know how to express myself. It is impossible for me to tell you. I prefer to die. I send you this by messenger, who will wait for an answer. Believe me, my dearest uncle, your most obedient and affectionate nephew."

This was the reply:—

"My dear Jack—Console yourself and blush no longer, Providence has heard your prayers. The messenger lost your letter. Your affectionate uncle."—*Exchange.*

Guarantee of Success.

Editor Hardware: I enclose you a clipping of an address made before a graduating class by Josiah T. Marean and published in the *Brooklyn Eagle*. It would appear to me that this address is not only adapted to a graduating class, but can also be read, and carefully thought over, by every employee and employer in our mercantile community, and if followed out would result in much more individual rational enjoyment of life and a much more wholesome community for us all to live in.

Yours respectfully,

Kearney & Foot Co., New York. JAMES D. FOOT.

The address referred to is published below; Mr. Foot's opinion will be warmly endorsed by any thoughtful business man by whom the speech is perused:

The first condition of success is health. If you squander that, then get away into a corner somewhere and die. Life has nothing for you. Of course, you will not waste health in the excesses of vice; only idiots and lunatics do that. But do not exhaust your energies in any pursuit in the belief that what is to be done must all be done before you are fifty years old. With health, life is still sweet at fifty. While it lacks vista and that subtle charm with which at twenty the imagination invests the unknown and untried, it yet has a calm and satisfying fulness, which gives it value far above that of the feverish period of youth. If you have preserved your health, you should be ready at fifty to enjoy the rewards of life, and the long yellow autumn should be full of peace. It goes without saying that you will practice industry in whatever calling you may select. But do not forget to practice side by side with it the art of rational enjoyment. I know of nothing more pitiful than an old man whose years of labor are past who has forgotten the art of enjoyment; to whom travel is only discomfort, natural scenery only a bore, and art and music a jumble of unmeaning sound and color.

What part does money play in a successful life? Money is the principal source of power in modern times. But neither money nor any other form of power, for its own sake, is worth the devotion of a life. It is perectly consistent with the steady pursuit of some high purpose to accumulate by the slow and sure processes of saving and sound investment a reasonable competence. More than that is a burden which cannot be carried except at the sacrifice of better things. But so much it is almost the first duty of every man to find and keep. A consciousness of its sure possession is the steadying ballast of a career. It fosters self-respect; it removes temptation; it dissipates anxieties, and it is the condition which alone makes possible the enjoyments of old age.

But do not be tempted into any of the short cuts to wealth. If you ever get back to the beaten road again, it will only be with empty hands and heavy heart.

The desire for happiness which quivers in every fibre of man's being was planted in him not to be satisfied, but only to give direction to his energies, and through them to work out the inscrutable purposes which underlie the universe. The nearest approach to happiness as a permanent condition is the sense of strong and untrammeled activity, with an absence of actual pain. So much, but not much more, may you demand of life for yourself.

Above all, cultivate a philosophy which lifts life above the level of its own vicissitudes; not the philosophy of contentment. Heaven save you from that; the contented man has ceased to be a force in the world; but a philosophy sustained by which the fortified soul rises superior to fate. Nowhere has it found more noble expression than in these lines, written by one over whose head had gone all the billows of misfortune:

Out of the night that covers me,
Black as the pit, from pole to pole,
I thank whatever gods there be
For my unconquerable soul.

In the fell clutch of circumstance
I have not winced, not cried aloud.
Under the bludgeonings of chance
My head is bloody, but unbowed.

Beyond this place of wrath and tears
Looms but the horror of the shade,
And yet, the menace of the years
Finds and shall find me unafraid.

It matters not how strait the gate,
How charged with punishment the scroll,
I am the master of my fate;
I am the captain of my soul.

A New Record.

Chas. G. Kilpatrick, the one-legged trick cyclist, has lately added a novel and sensational shooting act to his already interesting exhibition, and it is proving a big attraction. It is none other than a "shooting act" *a la* Buffalo Bill, except that he rides a bicycle instead of a horse, which of course, renders the feat all the more difficult, as it is much harder to keep a firm seat.

"Kil," however, has managed this so that he can ride about in a circle with hands off, guiding the machine with his one leg. The act consists in breaking glass balls thrown into the air at about 30 foot rise; the rider, loading, aiming and firing at every revolution about the circle. He also removes the empty shells so that he is kept busy between caring for the wheel and gun and taking aim at the glass balls which he so successfully shatters. This is a comparitively new feat with Kilpatrick, but by hard practice he has become very proficient, as the following will show.

At Elmwood Driving Park, Danville Ill., on August 11th, he broke ninety-five out of one hundred glass balls while pedalling his wheel in a 20 foot circle, loading and firing at each turn, and never stopping until the last shot had been taken. After he had finished, the gun barrel was so hot that it was almost impossible to touch it with the bare hand. The time taken for this performance was thirty two minutes and part of this time the rider had to face a strong wind.

He broke thirty-eight balls without a miss, and his best run was fifty-two out of a possible fifty-three. He missed the 3rd, 10th, 25th, 64th and 74th balls.

This record would be very creditable for a person shooting from the ground and the difficulties encountered by the one-legged cyclist can be imagined as he was compelled to work constantly in order to keep his wheel in motion, and care for his gun, and the strain on the nerves must be killing.

"Kil," at one time during the performance was wellnigh exhausted and wanted to stop, but was urged to continue by his friends, who were greatly pleased at the fine record made.

The gun used was an Iver Johnson self-ejector, a new single gun just being placed on the market by the Iver Johnson's Arms & Cycle Works of Fitchburg, Mass.

New York Credit Men's Association.

The nominating committee appointed by the president, according to the constitution of the Association, report the following nominations to be acted on the third Thursday of September:

President: O. G. Fessenden, Hayden W. Wheeler & Co.

Vice-President: T. H. Bartindale, Morse & Rogers.

Treasurer: William Naumburg, Naumburg, Kraus & Co.

Executive Committee for two years: R. P. Messiter, Minot, Hooper & Co.; M. E. Bannin, Converse, Stanton & Co.; F. E. Lally, Crane Co.; Thomas J. Lewis, Merchants National Bank.; G. Waldo Smith, Smith & Sills.

Executive Committee for one year: Samuel Ullman, of Joseph Ullman.

Burning kisses always go with sparks.—*Exchange.*

Hardware Matters En Passant.

Editor Hardware: The peace talk has had a healthy influence on the trade. With hostilities ceased, we shall have the biggest fall trade on record. That's the general verdict. But even "at the war rate," movements in the iron and Hardware industries were seldom healthier. In many establishments night and day shifts are still the rule. Fortunately, there have been no serious labor troubles until the strike at the Cleveland branches of the wire and nail trust was declared. How long the trouble will last is as yet problematical. The supply will be adequate for some time to come at present quotations, but a prolongation beyond sixty days, a slim contingency, might create a decided price enhancement on nail and wire goods though stocks would cover visible wants. There is a strong probability that our manufacturers will not be hampered by a coal strike this fall.

A clever advertising trick was perpetrated by a Louisville wholesaler. There appeared in the newspapers an announcement to the effect that the firm had imported two big strapping Porto Ricans who are now on exhibition in their window. They really were strapping fellows and from all appearances might have been natives of our future possession. But strapping was the word, and they did it justice. They were strapping boxes with box straps.

An interesting window exhibit can be made of the specialties of the Enterprise Mfg. Co. and the cognate things you carry in stock. Meat and food choppers are a household necessity, and it pays to advertise them as such. So are fruit stoners, meat juice extractors, bone, shell and corn mills and like devices. To save time is a requirement of every up-to-date household, and everybody loves to be surrounded with every convenience possible. During the heated term conveniences are doubly desirable, and special sales of such goods would therefore be in order.

Crops will be good in all sections of the country, and prices rule higher than for years. This means a good fall trade. But there may be delay, for there is a tendency among farmers to hold for still higher prices, thus compelling or inducing country merchants to go slow in their purchases. There seems to be a disposition among country distributors to lay in large supplies of field fences and barb wire. The farmers seem to be modernizing everywhere along this line.

"Bicycles free to our customers," was the enticing card hung in a dealer's window. Upon inquiry I learned that the merchant had set apart a score of wheels, unmerchantable for some fault, which were let out to regular customers according to cycle livery methods, less charge. The scheme is said to have many advantages in the way of holding old and obtaining new trade.

Rubber tires for all sorts of vehicles are becoming an important feature and will soon develop into a regular line with many dealers. In another twelve-months this line will have entered into representative distribution through Hardware channels, manufacturers of such tires now seeking this outlet assiduously.

Vacations are coming to an end, and the wily traveler will soon be "on his metal" again.

No need to rush the season but better look over your stock of stoves and ranges. Sort out the antiquated styles and close them out at rush season bargains. Dealers in this line, the successful ones, have long since come to the conclusion that only makes of the best construction, handsome and artistic in design, perfect in operation and easy to regulate can be handled with profit. A cheap stove in itself is saleable; but an ugly cheap stove, or one that's built cheap to sell cheap to cheap people, is something the Hardwareman should fight shy of. Let the department stores or installment houses sell these. They are in the business to supply the cheap trade. The Hardware dealer has a reputation at stake. His relations to the public are closer than those of the bargain stores, and upon these relations depends the success or perpetuation of his business in a large measure.

Advertises a Texan dealer: "The Cuban woods are full of bushwackers. But they are no good. Reason: They can't hit and cut down. You ought to see our bushwackers. They clean out anything, from hedges to bushes. When in town, drop over, see them do it. We refer to the bush cutters of the Bemont Mfg. Co., for which we are sole agents." J. B. Rindfleisch.

Cleveland, August, 1898.

First Discovery of Tin.

It is believed by many, says an exchange, that tin was first discovered in the British Isles. From these countries tin was taken to Italy, where for a long period it was thought to be and was called lead by eminent historians and scientists. This occurred before the Christian Era when Great Britain was conquered by the Romans. It was some time before tin was given a specific name which distinguished it from lead. These are the main facts generally known about its discovery and origin.

In its native state tin is not found in very large quantities; but is usually found as the dioxide, known as tin stone. This oxide which is crystallized is often obtained from the beds of streams and is spoken of as stream tin. Another form is secured from crystalline rocks and is the vein or mine tin.

It is interesting to observe the methods by which tin is prepared from its crude state into the finished product ready for use. The crushed ore is roasted to remove sulphur and arsenic, washed and mixed with charcoal or anthracite and heated in a reverberatory furnace. The carbon at high temperature having greater affinity for oxygen than for the metal, combines with it and passes off as carbon dioxide, leaving the metal behind. The tin produced in this way still contains a quantity of other metals which makes it impure. By a process of liquation these can be partially removed. This is done by heating slowly the mass to the fusing point of the tin, which is then drawn off from its less fusible alloys with iron and arsenic.

Tin possesses a hardness between lead and gold. As is well known, this metal is very malleable and can be rolled or hammered as thin as fine paper. At 100 degrees C, it can be drawn into small wires. At 200 degrees C, it becomes brittle and can be powdered in a mortar. At a white heat it is subject to evaporation.

The most important use of tin in the metallic state is in the formation of its alloys and as a covering which protects more readily oxidizable metal, such as copper and irons. The coating is applied by dipping the clean article to be tinned into a bath of the molten metal one or more times. Tin which is not combined with other tins is known as block tin, as is used extensively for pipes and linings in soda fountains for condensers, etc., where ordinary metals would be subject to corrosion.

With other metals tin forms several valuable alloys which have been in use for hundreds of years. Pewter is an alloy of four parts of tin to one part of lead. Bronze is an alloy of copper and tin and usually some zinc. Tin unites readily with mercury, forming an alloy which is liquid or solid, according to the proportions used. By increasing amount of lead with tin solder is made.—*Exchange.*

The volante, the only carriage used in Cuba, is two-seated, slung low down by leather straps from the axle of two large wheels, and has shafts fifteen feet long. The horse in the shaft is led by a postilion, whose horse is also harnessed to the carriage with traces.—*Exchange.*

Most people are as bad as they look, and the rest a great deal worse.—*Exchange.*

A VIEW FROM THE OUTSIDE.

Among the recent visitors at the Hardware Club of New York, was S. G. Hobson, a representative of the *Hardwareman*, of Birmingham and London. This gentleman was enthusiastic in his comments concerning the club and the good results which have followed its creation. He has given his views permanent shape in a letter to the *Hardwareman*, an advanced copy of which we are permitted to herewith reproduce:

I would not care to compute the number of times the Editor of *The Hardwareman* has sighed for a Hardware club. When visitors have called upon us there has been no place wherein to entertain them. Nothing, save the cheerless hospitality of a mercenary hotel, deafened with the buzzing of voices, with the tramp of feet, with irrelevant conversation, and generally disconcerted by the goings to and fro of other folks, "alien of end and of aim." The Editor of such a journal as *The Hardwareman* entertains many visitors in the course of a year, but in the nature of things the merchants and manufacturers of the great Hardware centres must receive ten times as many guests. And yet in London, Birmingham and Sheffield we have no Hardware club, no home to offer our troops of friends that hospitality which sweetens business life. And times innumerable has the Editor of *The Hardwareman* lifted up his voice and cried aloud for redress.

SEEING IS BELIEVING.

The Hardware Club of New York is a splendid testimony to the wisdom of social association amongst business competitors. I have read so much of the club that I was naturally anxious to see it. I had sometimes vaguely wondered if all the good things written about it were really true; whether our Trans-Atlantic journalistic *confreres* were not genially exaggerating the virtues, comforts and general architectural beauty of the club. We all know how apt one is to over-praise something of which he is passing fond. Well, I have now seen the Hardware Club of New York and can testify that it surpasses everything our Trans-Atlantic friends have told us concerning it. It is a most happy combination of palace and home. It is palatial; it is the genuine home of the Hardware trade of New York. No praise need be higher; none can be truer. Situated at the top of that stupendous pile of buildings, the Postal Telegraph Building, on the celebrated Broadway, where it is joined by Murray Street, the club is now the recognised *rendezvous* of the manufacturers, merchants ("jobbers" as they are termed out here) and retailers of the New York Hardware trade.

I was fortunate in being the guest, on the occasion of my visit to the club, of Mr. R. R. Williams, the esteemed Hardware editor of the *Iron Age*, and one of the original promoters. I am indebted to him for his genial kindness and hospitality. A busy editor, immersed in many affairs, he gave his time freely to a British colleague and put at my disposal all the information concerning the club and the various Hardware associations which lies docketed in the ample archives of that great metal, machinery and Hardware journal. I was additionally fortunate in meeting at the club another Hardware editor in the person of Mr. James H. Kennedy, editor and manager of *Hardware* and secretary of the club, who promptly called upon me to demand anything of him, even to the half of his kingdom, and it should be granted. The influence which these two gentlemen exert upon the life of the club is at once high testimony to their personal worth and the position which trade journalism occupies on the American side of the Atlantic.

Arrived at the foot of the building, we found ourselves surrounded by lifts—elevators as they are called out here. We had the choice of five or six of them, but in reality only two adequately meet the purpose of the visitor. One is marked "Exclusive for the use of the Hardware Club," and the other "Express to No. 17." This means that the lift does not stop until the 17th floor is reached. Up, up, up we went until about twenty floors had been scaled when we stepped out into the domain of the Hardware Club. The first thing to do was to deposit hats and umbrellas with the cloak-room steward, who gave us brass checks (everything is done by checks in America). The next important function was lunch. I cannot do sufficient justice to that lunch. The "Carte du Jour, Wednesday, July 27, 1898," lies before me, and I forward it to the Editor just to tickle his appetite. Over 130 dishes are waiting our commands. My head swirls as I try to choose. I ask Mr. Williams to set me going on exclusively American dishes, and soon I am victim to the wiles of clams, gumbo of soft crabs, curry of veal a l'indienne, stuffed Philadelphian chicken, kohlrabi in cream, and watermelon, which comes on the table about the size of a water boiler. A cup of coffee, of the real American brew, sets me at peace with all men and renders me conscious for the first time of what an Anglo-American alliance really means!

AROUND THE PREMISES.

This is the main dining room. It is sumptuously, yet not extravagantly, furnished, in bright mahogany. It is a large hall, high ceiling and admirably suited not only for ordinary dining purposes but for a banquet hall and lecture room. At one end is the ladies' dining room, also a goodly-sized chamber, where we see several ladies entertained by gallant hardwaremen. Across the passage is an adequately furnished conference room, a reading room, a smoking room, where the cigar is joyously puffed, and lower down a lunch room, where the busy man enjoys a hurried snap with newspaper in hand and cigarette ready by his side. Mr. Williams conducts me upstairs to the kitchen, where I am initiated into the solemn mysteries of King Chef's wonderful kingdom. It is a busy place from 10 to 4. I ask the courteous steward how many are on his wages roll, and he takes my breath away with the information that he pays wages to no less than 85 employees. American ingenuity is everywhere manifested; the washing of the dishes is done by machinery, whilst every contrivance to lighten labor or facilitate work is in full operation. I go down to the club-rooms with some added inklings as to why our American cousins are capturing the export trade. There is a dash of thoroughness about it all, which secures my undivided admiration. Here is a trade club, run on such thorough lines that it has become a big social factor in the life of New York.

THE INFLUENCE OF THE CLUB.

So much, then, for the mechanical and domestic arrangements of the Hardware Club. But what does it do? First, it is undoubtedly an educational influence. I have been meeting various members, and cannot fail to be impressed with the remarkable unanimity prevailing in regard to trade policy. It requires but little observation to see that trade topics are as thoroughly discussed as the club *menu*. The result is that New York hardwaremen are keenly alive to everything which may favorably or adversely affect

Digitized by Google

their business interests. Take, for example, the European —and particularly the British—trade. These hardware gentlemen know the strength and weakness of the British industrial position as well as I do myself. Practically, I can tell them nothing they didn't know before. The subject has naturally been discussed a good deal in my presence, in divers places and manners; but I can see where so many of them find their inspiration. It is from the dining table and the lounge of the Hardware Club. The merchant or manufacturer who has just returned from Europe is button-holed by his colleagues, and states freely what are his latest impressions—what has been his experience. (Incidentally, I notice what a large proportion of hardwaremen in New York have travelled through Great Britain and Europe.) The result of all this social "colloguing" is that a policy in regard to American export trade has sprung up, a policy to which the New York hardwaremen respond with vigor and unanimity. Is it any wonder, I ask myself, that the American hardware exporter is becoming a power in England, Australia, South Africa, Japan, and other parts of the globe? Wonder were, were it not so.

We have heard a great deal about the American Hardware associations. There is the National Association, the State Associations, Jobbers' Associations, Retailers' Associations—in short—the *mot d'ordre* of American business life is association. And yet these associations are outside New York. Why? I asked the question of Mr. Kennedy. His reply was short: "The Hardware Club suffices." Everybody meets there—disputes are settled; terms arranged; business policy discussed. There the manufacturer, the merchant and the retailer settle their differences, always coming to an amicable understanding. It would surely be almost impossible to quarrel in the ambient shades of the Hardware Club of New York.

MAN A SOCIABLE ANIMAL.

Man is of gregarious habit—he likes to fraternize; and it is a poor business which makes its members antagonize each other. Co-operation and not competition is the keynote of the future. This is the rock-bottom principle of the Hardware Club, and it has prospered exceedingly in consequence. It is pleasant to hear the hardware merchants of New York speak of each other. Kindliness of thought and disposition pervades all that is said. I have been talking with many who are business competitors, but I have heard no unkind word, no suggestinn, no innuendo of any description. I know, of course, that British manufacturers and merchants are not niggardly in recognizing the good qualities of their business opponents; but candour compels me to admit that New York possesses a spirit of *bon camaraderie* not observable, as so general a rule, in England. A hardware club in Birmingham, Sheffield, or London would very soon put us on a level in this respect with our American friends.

LIONS IN THE PATH.

Let me at once admit that there are difficulties in Great Britain which do not obtain here. For example, the retailer is as often as not the wholesaler in America, whilst the distinction is much more clearly defined in the Old Country. This puts the hardwaremen of New York upon a more level footing than is perhaps possible in England. Then, again, the hardware trade of New York is localized. Nearly everybody in the trade can be found in the vicinity of Chambers Street, Murray Street, Leonard Street, and Reade Street, all of these being bisected by the busy Broadway. But this consideration would only operate in degree; it might—and I think would—mean a club on less ambitious lines. The Hardware Club since June, 1894, has actually paid off all the bonds which were issued to procure its equipment. This was done by running the club upon thoroughly broad lines: the spirit throughout has been one of genial inclusion, not suspicious exclusion. Although the vast majority of the members are *bona-fide* hardwaremen, there are some bankers and other capatalists who were only too glad to join. They were cordially welcomed. The result has been this—the first limit of membership has had to be extended, and now stands at 600 resident and 200 non-resident members; whilst towards that limit the membership on the day I was a visitor on the premises stood at 570 resident members and 137 non-residents.

So much, then, for the Hardware Club of New York. A visitor to this city, I am promptly elected an honorary member of the club for one week. How long will it be before a British Hardware Club can reciprocate the compliment to the American hardwareman who visits our shores?

Something unique in the way of catalogue making has come to us in the shape of a handsome book issued from No. 20 Warren Street, New York. The feature that is out of the ordinary is the fact that four distinct companies have united in the preparation of this publication. These are the Smith, Hemenway Co., manufacturers and importers of cutlery and Hardware specialties; the Utica Drop Forge & Tool Co., manufacturers of nippers and plyers; the Swedish Razor Co., manufacturers of razors; and the Ericsson Telephone Co., manufacturers and importers of telephones. The cover is handsomely printed in green, with the names of these four concerns on the first page, followed by an introduction which calls attention to the character and quality of the goods represented in the publication. The catalogue is printed on heavy paper in black and red, and contains full illustration, prices, etc.

Fred. I. Johnson, manager of the Iver Johnson's Arms & Cycle Works, Fitchburg, Mass., returned Saturday on the *Campania*, after a month's absence in Europe, and reports the outlook for export business in 1899 as very good. Iver Johnson and Fitchburg cycles are well-known; both in Great Britain and on the Continent, where they have been well-advertised, and Mr. Johnson was successful in placing considerable new business. He states that great interest is manifested in the war, and the idea of an Anglo-American alliance seems to meet with considerable favor in England. Mr. Johnson combined business with pleasure in this trip, and was accompanied by Mrs. Johnson, he having lately joined the benedicts.

The Bissell Carpet Sweeper Co., Grand Rapids, Mich., with New York office at No. 103 Chambers Street, have again given evidence of their wonderful vigor, by the formulation of a special proposition made for the benefit of such dealers as will exhibit at the county fairs throughout the country during the coming fall. They have prepared a blank which sets forth their proposition in full, and the same will be furnished to any dealers who are interested; and we cannot conceive of a Hardware dealer who would not be interested in carpet sweepers.

There are four cable lines to Cuba: The International Ocean Telegraph Co.'s cable from Habana to Florida; the West India & Panama Co.'s line connecting Habana with Santiago de Cuba, Jamaca, Puerto Rico, the Lesser Antilles, and the Isthmus of Panama; the Compagnie Francaise de Cable Sous-Marine, connecting Habana with Santiago de Cuba, Hayti, Santo Domingo, Venezuela and Brazil, and the Cuban Submarine Co., connecting Habana with Cienfuegos and Santiago de Cuba.—*Chattanooga Tradesman.*

James L. Perkins, Beloit, Wis., who has been in the Hardware business for twenty-five years, passed away from this life on July 30th.

EXPORTS OF IRON AND STEEL.

The phenomenal growth of our manufacturing industries, both in supplying our own markets and those of other parts of the world, is illustrated by some figures just compiled by the Treasury Bureau of Statistics regarding the imports and exports of manufactures of iron and steel. These tables show that the exports of manufactures of iron and steel in the fiscal year 1898 were five times as great as in 1880, more than double those in any year prior to 1896, and 23 per cent. greater than in 1897. On the other hand the imports of the manufactured iron and steel in 1898 were in value but one-sixth those of 1880, one-fourth those of 1888 and one-half those of 1896. To quote the official figures the exports from the United States of all articles classified as "Manufactures of Iron and Steel" amounted in 1880 to $14,716,524, in 1890 to $25,542,208, in 1896 to $41,160,877, in 1897 to $57,494,872 and in 1898 to $70,367,527. Meantime the imports of manufactures of iron and steel which in 1880 were $71,266,699 fell by 1890 to $41,679,501, by 1896 to $25,338,103 and in 1898 to $12,615,913. Thus, while the exports of manufactures of iron and steel are in 1898 five times those of 1880, the imports of the same class of articles were in 1898 less than one-fifth those of 1880. In 1880 our imports of manufactures of iron and steel were five times as much as our exports, while in 1898 our exports of iron and steel were more than five times as much as our imports. American manufacturers have, since 1880, taken possession of five-sixths of that portion of the home market which was held by foreign manufacturers of iron and steel and have at the same time increased their sales in foreign markets 400 per cent. While the imports of iron and steel were falling from 71,000,000 to 12,000,000 the exports of the same class of articles increased from 14,000,000 to 70,000,000.

While the list of articles of iron and steel is an elaborate one and a decrease in imports has occurred in nearly all articles, it is practicable to point out a few of the more important. Under the classification of "Ingots, Blooms, Slabs, Billets and Bars of Steel" the importations of 1888 were 414,489,698 pounds and in 1898 only 30,821,157 pounds. Wire rods, which in 1888 were 270,939,550 pounds were in 1898 39,601,639 pounds. Chains, which in 1888 were 2,065,787 pounds were in 1898 176,346 pounds. Imports of tin plate, terne plates and taggers tin which in 1880 amounted to 634,614,945 pounds were in 1898 171,662,345 pounds. On the other hand the increase in exports of the leading articles of this character has been equally striking. The exports of bar iron in 1888 were but 1,508,426 pounds and in 1898 were 12,308,615 pounds, an increase of about 700 per cent., of cut nails our exports in 1888 were 11,963,664 pounds and in 1898 were 32,310,393 pounds, while wire nails which in 1888 were 1,547,078 pounds were in 1898 22,894,099 pounds. Of locomotive engines we exported in 1888 $407,014 worth and in 1898 $3,883,719 worth. Of wire our exports in 1888 were 12,734,195 pounds and in 1898 136,951,924 pounds.

The people of all parts of the world seem to have developed a liking for our manufactures of iron and steel; our sewing machines hum in Africa, the East Indies, Colombia, Cuba, Central America and the islands of Oceanica. Our telegraph instruments click in Japan, China, Australia, Russia and in all parts of Europe. Our wire nails go to all European countries, to Canada, British Honduras, all the Central American states. Mexico, British West Indies, Cuba, Puerto Rico, the South American states, China, British East Indies, Hongkong, Japan, French Oceanica, British Australasia, British Africa and Liberia; our steel rails and locomotives go to Australia, China, Japan, Hawaii, Central and South America, Africa and Russia. Our electrical machinery is attracting the attention of the world and during the past year Austria-Hungary, France, Germany, Italy, The United Kingdom, Argentina, Brazil, Mexico, Japan, British Australasia, British Africa and French Africa have been among its purchasers. In every country in the world and in practically every inhabited island where articles of civilized or semi-civilized use are required American manfactures of iron and steel find purchasers and, as shown by the figures that follow, the demand for them is rapidly increasing.

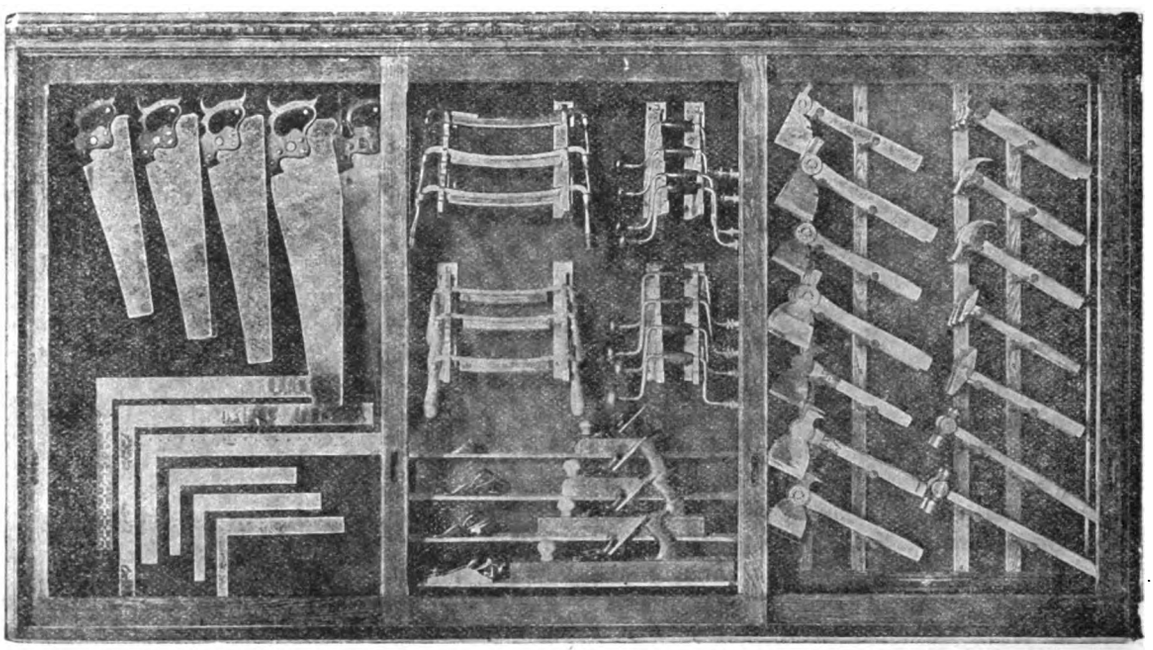
The following table shows the value of imports and exports of manufactures of iron and steel into and from the United States since 1880:

	Imports.	Exports.
1880	$71,266,699	$14,716,524
1881	60,604,477	16,668,767
1882	67,976,807	20,748,206
1883	58,495,246	22,826,528
1884	40,147,053	21,909,881
1885	33,610,093	16,592,155
1886	37,534,078	15,745,569
1887	49,203,164	15,918,502
1888	48,992,757	17,763,034
1889	42,377,793	21,156,077
1890	41,679,501	25,542,208
1891	53,544 372	28,909,614
1892	28,028 103	28,800,930
1893	34,937 974	30,186,482
1894	20,925,769	29,220,264
1895	23,048,515	32 000 080
1896	25,338,103	41,160,877
1897	16,004,557	57.497.872
1898	12,615,913	70,367,527

The good news comes from Elmira, N. Y., that the hanger and plyer works of the Cronk Hanger Co., are again running in first class shape, and that the company can fill orders promptly for all goods in that line. Their factory is a great improvement over the one recently destroyed by fire, being much larger and more convenient because of the new machinery that has been introduced. They have a main building which is 50x130 feet in size; a forging building 30x40 feet; a storehouse for steel and other material 25x80 feet; a shipping room and warehouse for finished goods 30x105 feet, and still another room for general purposes 20x20 feet. They own and operate their own railroad switch.

The death is announced of Henry Hannah, who was for many years known in the Hardware trade in this city. He was born in New York city in February, 1821, and in this city received his education. When a young man he entered the employ of Harmon, Hayes & Co., wholesale Hardware dealers in Warren Street. Mr. Hannah remained with this concern up to three years ago, when he retired, owing to his poor health. He was a member of the Veteran Association of the Seventh Regiment.

Adams Hardware Co., Wilmington, Ohio: Enclosed please find check for $1. Kindly receipt same and mail to us, and enter us for another twelve months subscription, as your market quotations are reliable and generally the correct bottom prices, and the best Hardware material for the retail dealer to tie to.



Peter Sensening, president of the Sensening Hardware Co., died on August 7th at his home at Goodville, Pa. He was one of the most prominent men of Lancaster County.

In Cuba about 80,000 people are ordinarily engaged in tobacco-growing.—*Ex.*

Case for Carpenters' Tools.

Among the new display cases placed on the market by the J. D. Warren Mfg. Co., Nos. 152–158 Lake Street, Chicago, is one specially designed for carpenters tools, as shown herewith. In this case the saws, braces, hammers, hatchets, etc., are conspicuously displayed, each bracket or hook containing one-half dozen or more, so that the customer not only sees the goods but an ample stock in the display case, thus enabling him to make his selection from those shown, as when the sample only is placed before him and the article taken from a package elsewhere, although he may not mention it, he is more or less suspicious that the one given him is not equal to the one displayed. By enabling him to take from the stock he sees before him, he leaves much better satisfied. It is made of thoroughly seasoned, choice antique oak, with paneled or beaded ends, ornamental top cornice, with return mouldings at each end when separate; when matched together the return end moulding is omitted as in cut. Sliding doors with double strength "AA" glass mounted with brass sheaves on metal track. Each bracket holds one-half dozen or more. The cabinets are practical for future use and can

be quickly changed to other lines as the brackets are put on after the cabinets are lined, thus not marring the felt. The felt lining enhances the rich appearance of the goods a large percentage over cabinets that are only painted or stained inside. They are made of such height that all goods can be conveniently reached from the floor.

Making Glass Pipe.

Glass pipe weighs much less than iron pipe of the same size, and the cost, compared with that of iron, is approximately one-half to two-thirds, says the *Philadelphia Telegraph*, while glass pipe is practically indestructible. The process of making glass pipe is interesting. In the Bonta improved process of manufacture the core is one of the important parts of the casting apparatus. It is in the form of a cylinder, of a length slightly greater than that of the pipe to be made, and can be expanded or contracted, thus allowing it to be removed the moment the pipe is cast. Into the mould is poured molten glass from a swinging vessel, filling up the space between the interior of the mold and the exterior of the core, these being made of cast iron. Before molding, the apparatus is heated in order to prevent chilling. After the pouring of the glass a heated metal roller is passed over the open top of the mold to roll down the molten glass and remove any surplus, making the upper surface smooth and compact. Next the core is contracted and withdrawn from the pipe and the latter rolled out on a platform made of tilting or rocking sections, which keep it in motion during the first stage of the hardening operation and prevents sagging, which would occur and spoil the operation if the pipe was allowed to remain in one position at the start. In the course of a few minutes the temperature is reduced sufficiently to permit the storing of the pipe in heated ovens, where the operation is gradually completed prior to shipment.

The ends of each section of pipe are flanged so that each of the joints is made perfectly true. In uniting these sections a cement, the basis of which is ground glass, is used, and after this hardens the strength of the pipe at the joints is practically the same as at any other point in its length. —*Age of Steel.*

Worth More to Stay in One Place.

John Wanamaker, writing in the *True Philadelphia*, declares his opinion that men for the most part get what they are worth.

It is the hardest thing in the world, he says, to find a clean, strong, earnest, upright young man—they're as scarce as hen's teeth. I had a boy working for me at three dollars a week, and one day his father, who was loom boss in a factory, came to see me, and said he guessed he'd take his boy out; he could make more in the factory.

"How much?" I asked.

"Four dollars a week."

"Well, let him alone and he'll be getting five a week here after a while."

When the boy was getting eight dollars the father came again, and again I persuaded him to leave the boy with me. When the boy was getting ten dollars a week the father came again and said he was going to take the boy away.

"What for?"

"He isn't making money enough."

"What will you do with him?"

"Put him in the factory."

"How much will he get?"

"Twelve dollars first; fifteen afterward."

"Any more?"

"Yes; he may get to be loom boss."

"What will he make then?"

"Seventy-five dollars a month."

"Well, then let the boy alone; he'll be getting a hundred a month here some day."

I had the hardest work to get that man to leave his boy, and we are paying the young man now $1000 a month.

The population of Cuba in 1887 was 1,631,687.—*Ex.*

Review of the Markets.

The trade reports show a satisfactory business prevailing during the summer season, in very many cases far in advance of the same season in recent years. While large orders on many lines are held in abeyance from force of habits formed in past seasons, there is no doubt existing in the trade but the season we are entering upon will prove one of the most active and prosperous with which the industry has been favored in many years. Advances along the line of raw material will certainly affect prices on goods into which material enters more largely than labor, and the stiffening of the nail market by a withdrawal of quotations and limitations of time on deliveries, indicates the possible trend of future trade conditions.

Wire Nails: Under improving conditions following advances on raw material, the wire nail market has perceptibly stiffened in quotations during the fortnight just passed. Some of the leading mills are withdrawing the favorable prices recently prevailing for large lots, and are less inclined to enter additional orders for any except late deliveries. Strikes prevailing in several mills compelling their remaining closed for a period however short, have a natural tendency to increase the apprehension in trade circles that higher prices may safely be looked forward to. The September trade, usually the heaviest of the season, will show a more largely increased demand than was known a year ago, creating a scarcity which it were wise to anticipate previous to that date. The local demand continues exceedingly fair. Prices are held at the mills on carload lots for prompt shipment at $1.30, f.o.b., New York prices being quoted as follows: Carload lots on dock, $1.45; smaller lots from store, $1.55@$1.60.

Cut Nails: While anticipations of a larger volume of business in this staple line are filling the minds of the manufacturers, there is but little business being done at present and prices remain as previously quoted: Carload lots on dock, New York, $1.20; smaller lots from store, $1.25.

Stove Boards: The extremely low prices recently prevailing on this seasonable line of goods has resulted in large orders having been placed with the leading makers, which, under the advancing conditions of the sheet and zinc market, would seem to indicate a very close margin of profit based on present purchases of material. Stiffening quotations naturally follow, and deliveries will be retarded by the inability of the mills to supply raw material in sufficient volume to fill orders promptly.

Sheet Zinc: Manufacturers of sheet zinc have issued revised prices on their product, covering a number of changes in the extras. The base price remains at $7 per 100 pounds, for sheet zinc in 600-pound casks, of the thicknesses between Nos. 9 and 15 inclusive, and of the widths between 32 and 46 inches, and of the lengths between 84 and 90 inches. The following table of prices will show the changes in extras:

Extras, in Cents per 100 Pounds.

Nos	5	6	7	8	9	10	11	12	13	14	15

The special discount for quantities of less than 3000 pounds remains at 6 per cent., with an additional 3 per cent. for cash with order.

Cordage: Under an ordinary demand, the rope market is without features of any great importance, business being light and requirements only nominal. Prices have remained steady under such circumstances for the past fortnight, and current quotations follow for carload lots, the usual advance being named for smaller quantities.

Manila, 7-16 inch and larger	per pound,	10 cents.

" ¼ and 5-16 inch.	"	10 "
Sisal Lath Yarn, medium	"	8½ "

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of August 10th, quote as follows: In lots of less than 5 barrels, 34 cents per gallon; in lots of 5 barrels or more 33 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE OMAHA TRADE.

The present month ordinarily is a quiet one, and from the general expression among the retail dealers who visit this market, this year is no exception to the rule. But this cannot be said to hold good as far as the jobbing trade is concerned. The volume of business comes steadily in, without any tendency to diminish or slacken, and August trade bids fair to exceed July, which is an exceptional condition of affairs. While some parts of the state have been slightly touched with drouth and hail, the general results will be an exceptionally good crop, which promises good returns to the producer, and fall trade will be largely above the average. The advanced market on nails and barbed wire has had a tendency to stimulate orders for these lines of goods, and dealers are all preparing for an active fall trade and are freely buying what they need and paying for what they have already bought.

RECTOR & WILHELMY CO.

THE COLUMBUS TRADE.

The extreme hot weather has abated somewhat and one can now wear a stand-up collar for ten hours, if he does not get excited. You know there have been instances when people got hot in the collar with the thermometer down to zero; but the past few weeks it made no difference how cool you kept under trying circumstances, you were bound to be hot in the collar.

Trade is holding its own very well, and each month so far during the year shows a handsome gain over 1897. The wheat, hay and oats harvest is in the dry or should be, and a good harvest it was. While wheat is not turning out the bushels per acre that was expected, still it is the largest crop Ohio has had for a long time. The failures for an average crop were few, and the acreage was never greater. Hay is of a superior quality this year but not as heavy as last. Prices of both wheat and hay are low and farmers are loth to sell hoping for another Leiter to corner the market. The price is much "lighter" since he was cornered. We see no reason why fall trade should not be good, and find that even small country merchants are preparing for a good fall business. We hope none will be disappointed.

We regret to see another strife between wire and nail manufacturers and their men. Nails and wire would stand an advance of $2 per ton and no one would complain. Both articles are too low in price. If some manufacturers can produce either or both articles at 75 cents to $1 per ton lower than others, why don't they pocket the extra profit? None of them have been able to fill orders promptly at any time during the year, which would indicate they would not have any trouble in selling their product. This perhaps is not true as to nails, but it has been the case with wire. Prices as a rule are pretty firm. There is some cutting among jobbers but that will always be the case.

The grand circuit races were trotted and paced here August 1st to 6th, and Columbus can boast of the fastest track in America. Talk about money being scarce, you would not think it if you could stand around the pool stands and merry-go-rounds. We mean the merry-go-round where they call out "Black Side" when you play the red, and "Red Side" when you play the black, and "Star" when you play both black and red. We do not play, but always see what is going on when we take an afternoon off at the races. They had money there by the corn basket full. We mean the fellow that had the wheel. The fellows who played (and the girls too) had no money unless they broke away very quickly. That kind of a merry-go-round is a bad proposition to go up against and we advise our brothers to play the wooden horse and dragon merry-go-round that only costs a nickel, and it will not make you half so dizzy as the other kind.

The writer has returned from his summer fishing and outing vacation and has settled down to business with renewed energy. THE SMITH BROS. HARDWARE CO.

THE CLEVELAND TRADE.

Ethics in business are commanding more and more attention. "Smartness and cuteness" are not evidence of business ability; the advantage gained by them is not permanent. Usefulness alone gives permanent success. The retailer who serves his customers and the jobber who helps his customer do this, are laying the only true foundation of success.

Aim to be a benefit to those who patronize you and you are building on a solid foundation. "Business at the top" is not overdone. Good places with large salaries are waiting for men to fill them, but ability and character must be united; head and heart must work together.

Evidence of improvement is shown in the improved character of traveling salesmen, and business men are more and more lending their influence to prevent bad habits instead of encouraging them.

Merchants should remember that they have large influence with traveling salesmen, for good or for evil. Many young men have been helped to ruin by the example of men they depend upon for their orders. This peculiar influence imposes peculiar obligations which should be recognized. The law of success is the moral law. There is not, nor can there be, any divorce between them. More than three quarters of religion is conduct, and upon that depends success in business.

A merchant in a country town should stand for all that is best. He should represent uprightness in the community as the first article in his business creed; asking for patronage imposes the obligation to be a good citizen. A few good books to loan among his patrons, and kindly counsel for the aggrieved, can be used with great profit and business advantage.

July is the vacation month. The intense activity of our time adds to the importance of vacation. Hard drudgery is a good school, but it gives zest to play.

Trade is good for the time of year and the promise is so bright that we are able to forget the things behind and enjoy bright anticipations for the future.

As the war is practically closed, August may be a waiting month; a change so radical will tend to create a suspension of business, but the foundations for prosperity are firm and delay will only augment its force. With Cuba and Porto Rico added to our territory, business is sure to boom.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURG TRADE.

There has been a perceptible hardening of values in goods near to pig iron during the past few days. Pipe, nails and wire are the first to move, and we are glad to see this, as an indication of the fact that our hopes for a good fall season's business are being realized already in the demand, which makes such advance possible.

We are at last getting to the point where consumption has overtaken production, and manufacturers can afford to hold firm in prices. We hope the great expectations for trade in Cuba and Porto Rico will be realized in the near future, and that we shall have a big share of the trade in far-off China, Japan and the islands of the seas, but we have a big domain at home only partially developed, and good times at home will use up a great quantity of Pittsburg's products.

We are looking forward to October, when the conclave of Knights Templar assembles in our city. Great preparations are being made to accommodate and properly entertain a large number of people. We can promise them a cordial welcome, and think we can show them some things which will not only be new to many of them, but which cannot be seen elsewhere in our country. Should this meet the eyes of Sir Knights who are Hardwaremen, we cordially invite them to make themselves at home with us when in our city.

A midsummer rise in our rivers has taken out a large run of coal which will bring back considerable money. The government work of improving our rivers goes steadily forward, and if continued as a settled policy, will soon render us independent of these freshets as the only means of getting our coal to market.

In a jobbing way, trade is fair for this time in the season and collections about the same.

LOGAN-GREGG HARDWARE CO.

THE BIRMINGHAM TRADE.

We have been having too much rain for the past sixty days, and hear some complaint that the cotton in injured. As you know, cotton has been regarded in a large measure, as the index of trade in the South, and when cotton growers were prosperous, trade was good and when they suffered, the merchants suffered with them. However, we are glad to say that trade compares favorably with former years; in fact, it is ahead, as it should be. Since the country continues to develop and increase in population, we would naturally expect an increase in trade and have not been disappointed. We rejoice that the war is about over and gather increased hopes from this result, looking to the enlarged trade that should follow. The ports of Cuba and Porto Rico will soon be open to commerce and they will begin to rebuild their waste places and should give new opportunities to trade in that direction. In all probability they will need lumber in increased quantities, giving work to the sawmills in the southern part of our State. Uncle Sam will have to keep a fleet in the Gulf to look after his interests in that direction. We trust that in this way there will be an increased demand for coal and that some of our mines in this section will gather some benefit. In any event, we are hopeful and when the people are hopeful, it goes a long way to make better times. Our people will now start new enterprises more readily and capital will make investments with more assurance. Work on the steel mill of the Alabama Steel & Ship Building Company is progressing nicely. We are also told that a rod mill which will use 300 ton of steel a day is now a certainty. We shall also look for a nail mill and other in-

Digitized by Google

dustries which will be the legitimate fruits of enterprises of this kind, making this an important center for steel and its various products. We are glad to think that those who have managed the war have done fairly well in most cases and we trust that they will make no mistakes in the future. Notwithstanding we have submitted to a very heavy expense, we look for good results, which will more than compensate for the great outlay. What our country needs is new outlets for its manufactured products and we trust that the extension of territory will give us this and take the surplus off of our own market, keeping our mills active and settling the great question of labor strikes. We have rarely known protracted labor strikes when all of the mills were full of orders.

We take a hopeful view and labor on.

MOORE & HANDLEY HARDWARE CO.

THE DAVENPORT TRADE.

The war is over. Harvesting done. Hay and small grain abundant. Corn promises well. Money plenty. Prices of staple Hardware are low; too low in fact. Territory recently acquired making up our "greater" United States must have goods. Our manufacturers will be over-taxed in supplying the increased demand. Seasonable goods will be scarce. Prices will be higher and trade will be better and business more profitable this fall than it has been for many years. SICKELS, PRESTON & NUTTING CO.

THE CHICAGO TRADE.

While we of the Middle West have been loath to acknowledge any ill effects on our business, or perhaps could not positively locate much that has been lost because of the "Three Months War of 1898," we must acknowledge a feeling of relief that comes with the cessation of hostilities and a feeling of renewed confidence in our country, because of its splendid achievement, and because of the intrepid bravery and ability displayed by our army and navy.

With the cleared horizon, we settle down to strict business, to find our entire section already enjoying what might be called a "boom," if we were not afraid of using a term which has too often proved a misnomer.

Chicago jobbers have already shipped more sheet iron, grain scoops, corn knives, corn huskers, stove boards and many other fall goods, than their entire fall business has amounted to in some recent years. This we attribute to the splendid weather, the assured large crop, the feeling that prices will be higher in many lines and to the certain shortage of the supply in others.

In proof of this we need only to cite the recent advances in nails, barbed and plain wire, zinc, screws, bolts, chain, sheet iron, rubber goods, etc., and the reports from the makers of stove boards, oil cloth, corn huskers, elbows, coal hods, screws, etc., some of whom acknowledge already that they cannot make satisfactory deliveries on orders now in hand and others refusing to accept new business at any price.

Add to the present phenominal demand, the impetus which must come from the settlement of the war, the new fields for trade in Cuba and Porto Rico, the incoming of gold from the Klondike and the readiness now of war-scared capitalists to aid legitimate enterprises, and we can see nothing ahead but *business, business, hustle, hustle!*

WELLS & NELLEGAR CO.

THE PHILADELPHIA TRADE.

The most satisfactory event, from a business, as well as a humanitarian standpoint, that has happened during the past few weeks, is the declaration of peace and the suspension of hostilities in the Spanish-American war.

At the outbreak of this war, there were many who, basing their prophecies upon the conditions existing at the time of the Civil War, freely predicted that a great increase of business would result from the war. We never shared this view, and think the business world will admit that the expected increase of business did not come, especially as the result of the war. If any one part of the country had reason to expect material benefit from the war, it would be the Eastern section, and yet during the past six months the East has not shared the prosperity of the West—at least not to the same degree.

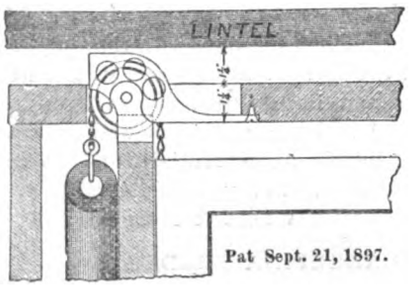
Now, however, with peace declared, and probably a vast increase in our foreign trade, with abundant crops and fair prices, there is room for great hope for the future and prospects are certainly brighter than for some years.

Already marked advances have occurred in steel billets, while iron is firmer, and goods which are near the raw material, or exceptionally low in price, show signs of strengthening.

As a rule, collections also show quite an improvement, and it is probable that some of the money paid out by the government, in the purchase of supplies, is now finding its way into circulation, to the benefit of general trade.

As might be expected under such conditions while prices change but little, an undertone of strength is beginning to be felt.

Wire nails have already advanced ten cents per keg and further advances are predicted; while wire of all kinds should naturally advance in consequence of the increase in the price of billets.



The demand for goods is fair, and perhaps on the increase; while some improvement is noticeable in the quantity ordered, showing that stocks are low and that the trade have more confidence in purchasing.

On the whole, therefore, the outlook is favorable and those who say they look for the best fall trade of many years have many sympathizers. BIDDLE HARDWARE CO.

Chicago. Washington. Boston. Baltimore. Philadelphia. St. Louis. Worcester.

Presidential Nicknames.

The nicknames of our Presidents furnish an interesting example of the readiness of our people to apply sobriquets to public men whom they either like or dislike. Washington was nicknamed the Father of his Country, Americus Fabius, the Cincinnatus of the West, Atlas of America, Lovely Georgius (a sarcastic nickname applied by the English soldiery), Flower of the Forest, Deliverer of America, Stepfather of his Country (applied by bitter opponents during his Presidency), the Savior of his Country. Adams was nicknamed Colossus of Independence; Jefferson, Sage of Monticello and Long Tom; Madison, Father of the Constitution; Monroe, Last Cocked Hat; J. Q. Adams, Old Man Eloquent; Jackson, Old Hickory, Big Knife and Sharp Knife, Hero of New Orleans, Gin'ral, the Old Hero; Van Buren was Little Magician, Wizard of Kinderhook, Follower in the Footsteps, Whiskey Van and King Martin First; Harrison, Tippecanoe, Old Tip, and Washington of the West; Tyler, Young Hickory and Accidental President; Polk, Young Hickory; Taylor, Rough and Ready, Old Buena Vista, and Old Zack; Fillmore, the American Louis Philippe; Pierce, Purse; Buchanan, Old Public Functionary, Bachelor President, and Old Buck; Lincoln, Honest Old Abe, Uncle Abe, Massa Linkum, Sectional President, Rail Splitter, and Father Abraham; Johnson, Sir Veto; Grant, Unconditional Surrender, Old Three Stars, Hero of Appomattox, and American Cæsar; Hayes, President de Facto; Garfield, the Martyr President; Arthur, Our Chet, the First Gentleman in the Land; Cleveland, the Man of Destiny, and Grover; and lastly B. Harrison, Son of His Grandfather and Backbone Ben.—*St. Louis Globe-Democrat.*

Havin' Fun.

A Cambridge mother sent her small boy into the country, and after a week of anxiety has received this letter: "I got here all right and I forgot to write before; it is a very nice place to have fun. A feller and I went out in a boat and the boat tipped over and a man got me out and I was so full of water I did not know nothin' for a good long while. The other boy has got to be buried after they find him. His mother come from Chelsea and she cries all the time. A hoss kicked me over and I have got to have some money to pay a doctor fixin' my head. We are going to set an old barn on fire to-night, and I should smile if we don't have bully fun. I lost my watch and I am very sorry. I shall bring home some mud turtles and I shall bring home a tame woodchuck if I can get 'em in my trunk."—*Exchange.*

The Juragua and Daiquiri iron companies of Cuba, ship between 30,000 and 50,000 tons of ore monthly to the United States, most of which is used, by a singular coincidence, at the very furnaces now making large quantities of armor plate and projectiles for the American navy.—*Exchange.*

On Giving Information.

The average man hungers and thirsts for information, but the average advertisement gives him very little of it.

This is due to the fact that most advertisers find it very difficult to say with a pen what they think with their minds, and to the further fact that the detail and minutiae of their business are so thoroughly familiar and so commonplace to them that they cannot understand how interesting they are to other people. This is particularly true of those who manufacture or handle staples or articles of a rough, common, practical kind.

I recently met a man who manufactures axes, and he showed me a little booklet he was using to advertise his goods. I looked it through and remarked that it didn't enlighten me much on the axe question.

"What do you expect?" he inquired. "What is there to say except that I make the best axes there are? Axes are not a romantic sort of an article. You can't get poetic or enthusiastic about an axe. You can't make pretty pictures of it. You can't use a lot of glowing adjectives about it, either. An axe is a plain, ordinary implement that everybody knows about. All you can do is to tell how good your axes are and how cheap you are selling them."

I didn't say anything more about his booklet, but I led him on to talk about axes. When he got interested, the amount of information he gave me was astonishing. He knew his subject thoroughly, and he talked for more than half an hour without stopping.

He told me all about axes, past and present. He told me what axes were made of, and the processes the metal had to go through. He explained the different kinds of axes, and why one axe was better than another. He told me lots of things about the axe industry of the United States, and where the most and best axes were made.

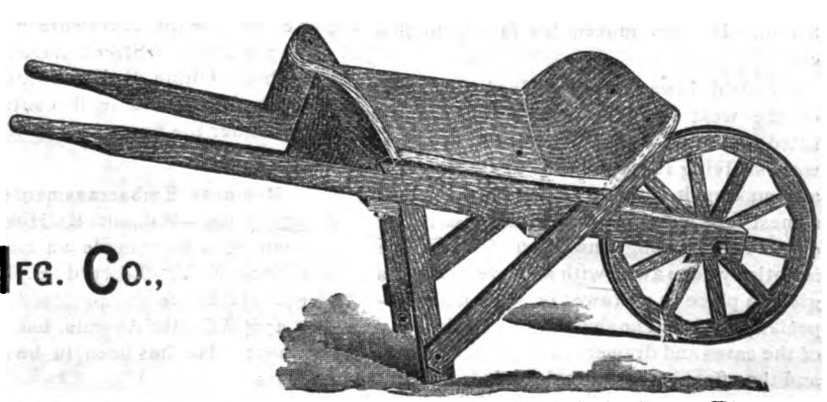
Coming down to his own business, he told me on what a small scale he had started, and where; how his business had grown; all about his plant, his machinery, and his run, and how many and what kind of axes he was then making. Better still, he explained wherein his methods were exceptionally good and economical, and why he could, and did, make better and cheaper axes than his competitors.

If this man had put into print the exact words he had used in his talk to me, he would have had a booklet of intense interest to everybody in whose hands he placed it. To the retailer who sells axes it would have been a revelation. He would have read it more than once; he would have laid it aside for reference. The next time he had occasion to buy axes, he would have had the firm that sent him that booklet uppermost in his mind.

Yet this man thought there was nothing interesting to print about those humdrum, prosaic axes of his!

It is so with every business. A man lives so close to his own wares that he forgets that other people are in almost total ignorance about their nature and the materials and methods employed in their manufacture.

People are really anxious to know all these things. They like to buy of the man who takes his goods apart and shows them all about how they are made, and explains to them just why they are better than the other man's.



No matter how common and humble an article may be, there is an interesting story behind it. There is no surer way or method of interesting the public in both the article and its maker than to tell that story.

An advertisement that tells us something that we did not know before can hardly fail to be a good advertisement.

Give people what they want—information.—*Thomas Sheridan in Printers' Ink.*

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Camden, Tenn.—Hudson & Corbitt, a new firm, will open a Hardware store in the building known as the Stock store, on the southwest corner of the Square.

Greenville, N. C.—There is to be opened shortly, in this town, the Greenville Hardware Co., of which Satterwaite & Co. are proprietors. They will carry a line of heavy and light Hardware, woodenware, stoves and tinware, and will make a specialty of the manufacture of tobacco flues. They are certain to succeed, having plenty of capital, energy and business experience.

Hartford, Conn.—R. C. Witte, who is about to open a new Hardware store with a full line of paints and brushes at No. 261 Main Street, is in New York attending to the purchasing of his new stock.

McComb, Ohio.—C. F. Spiece has just purchased a stock of Hardware and will immediately open a store here in the Oaks Block. Mr. Spiece was formerly in the drug business here and later has been operating a stave factory at Williams, Mich. McComb has only had one Hardware store for the past two years.

Norwich, Conn.—A. W. Linberg & Co., tinners and roofers, new firm, have commenced business.

Sweetwater, Tenn.—W. A. Jones, of the firm of McCaslin & Jones, Hardware dealers, one of the most enterprising young business men in the town, has disposed of his interest here and opens immediately a Hardware and implement store in Greeneville, Tenn.

Changes and Improvements.

Binghamton, N. Y.—The Babcock Hardware Co. have bought the entire stock of Hardware formerly carried by C. E. Harrison, of Chenango Street.

Bordentown, N. J.—Newell & Ford have dissolved partnership. Mr. Newell will still continue in the lumber business, and Mr. Ford will have the coal and Hardware business.

Des Moines, Iowa.—A. R. Daughenhaugh, who runs the Webster County State Bank at Gowrie, has bought the large stock of Hardware of the A. L. West Co. on Walnut Street. He has moved his family to this city.

Fairfield, Iowa.—Gage's Hardware store on the west side of the square has been fitted up with the Warren system of Hardware shelving recently, thus modernizing it and making it without exception the handsomest interior of any business house in the city. The old conglomeration of Hardware is entirely done away with and everything is given a place in a drawer or shelf made especially for it. The shelving is of oak, many of the cases and drawers having glass fronts, and the effect is most pleasing. It is a Hardware store to enjoy and to remember.

Meadville, Pa.—The most important business change which has taken place in this city in some considerable time has just been consummated, in the purchase by I. M. Rhodes and W. S. Zehrung of the Ehrgott & Co. Hardware store, perhaps more generally known as the Porter Hardware store. The purchase includes the entire stock, lease and good will of the former owner. Of the new firm, Mr. Rhodes has had twenty-five years' experience in the Hardware business—twelve years as clerk in the Gill Hardware store, in this city, and thirteen years on the road for the Reading Hardware Co. of Reading, Pa. During all these years, his home has been in Meadville. Mr. Zehrung is also a former Meadville man, having been employed for a number of years at the Phœnix Iron Works. For several years past he has had charge of the Montpelier, Ind., Electric Light & Water Co., as superintendent. Both members of the new firm are experienced business men and both are widely and favorably known in business circles throughout this section. The Rhodes & Zehrung Hardware store was established in this city in the neighboreood of half a century ago, and is one of the largest establishments of the kind in Northwestern Pennsylvania. The new proprietors bring to the business capital sufficient to hold the stock up to a high standard, and their known experience, business capacity and extended acquaintance makes them strong bidders for favor in the field of trade.

Sioux City, Iowa.—The Hardware stock which the Knapp & Spencer Co. purchased of C. W. Moore has been removed to the store of the Gillette Hardware Co.

St. Cloud, Minn.—Marcus Maurin intends to rebuild on the foundations of the late John Kiewel store and use the same only as a Hardware store, putting in a complete line of Hardware.

Toledo, Iowa.—Rasmus Rasmussen will move his Hardware store into the building William Swanlon is refitting east of the Poland House.

Toledo, Ohio.—T. J. Smith, Hardware, sold out.

Wheatland, N. D.—Charles Ditmer, agricultural implements, etc., succeeded by Ditmer & Campbell.

Wilmington, Del. — George Sigler and Gilpin S. Woodward, heretofore trading as Sigler & Woodward, Hardware merchants, at No. 303 Market Street, have dissolved partnership. Gilpin S. Woodward and J. Courtland Woodward will continue the business under the firm name of Woodward & Bro.

Business Embarrassments.

Acton, Mass.—William B. Holt, stoves, etc., reported to have made an assignment.

Brooklyn, N. Y.—Edward H. Richards, dealer in Hardware and painters' supplies, at No. 2755 Atlantic Avenue, has made an assignment. He has been in business fifteen years.

Buffalo, N. Y.—The firm of Metz & Meyer, dealers in Hardware finishings and fine furniture, have filed a general assignment of all their property not exempt by law, for the benefit of their creditors. Joseph Metz, of the firm, also filed an assignment of his personal belongings. Their debts amount to about $40,000.

Despatch, N. Y.—The Hardware store run by Mrs. Irene Warner has been closed by the sheriff on a judgment held against her by the Vanderbilt Improvement Co. for the sum of $120.08.

Richmond, Va.—J. W. Anderson & Son, dealers in stoves, tinware and house-furnishings, has made an assignment. Their liabilities are placed at $8000, and assets at about $4000.

Trenton, Mo.—The T. A. Murphy Hardware Co. has made an assignment. The liabilies are about $6000; assets unknown. Mr. Murphy is mayor of this city and has been engaged in the Hardware and implement business here for years.

Washington, D.C.—Bernard Baily, dealer in Hardware at No. 820 Seventh Street northwest, has filed a deed of assignment for the benefit of creditors. Assets are given at $4123 34, with liabilities of $3357.25. George J. Bond is named as assignee.

Burglaries in Hardware Stores.

Americus, Kan.—Ernest & Lesh, firearms, cutlery, etc.

Depere, Wis.—A. D. Race, $200 in goods.

Lock Springs, Mo.—W. B. Moren, rifles, ammunition, etc.

Moline, Ill.—Plambeek & Berglund, cutlery, etc., taken, to the value of $200.

New Hampton, N. Y.—D. C. Pullis, $30.

Oberlin, Ohio.—Wilkinson & Watson, $15.

Temple, Tex.—Sims & Dold, $150.

Recent Fires.

Auburn, N. Y.—A fire occurred recently in Evarts' sash, blind and Hardware store, Nos. 86 and 88 State Street. The blaze had gained considerable headway by the time the fire department arrived, and damage to the extent of at least $5000 was done. The fire started in the rear of the cellar among the paints and oils.

Clinton, Ill.—A terrible explosion caused by a lighted candle carried into the cellar of the firm of Jameson & Son, Hardware, started a big fire in the syndicate block. Gas arising from asphalt taking fire started the blaze, severely burning and almost blinding Mr. Jameson. The flames and water damaged the stock to the extent of $7000 and the building $5000.

Grand Rapids, Mich.—James McDonald, Hardware, destroyed by fire.

Millhall, Pa.—A fire destroyed the Hardware store of Mann & Co. and several other buildings.

Philadelphia, Pa.—A fire, causing damage to the extent of $2500, occurred at the Hardware store of John Decker & Sons, Girard Avenue and Twenty-seventh Street. The fire originated in the cellar. Loss covered by insurance.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Chicago, Ill.—Original Novelty Works Co. has been incorporated by Joseph V. Crane, John F. Crane and John Stelk; manufacturing. Capital stock, $6000.

Elyria, Ohio.—The Standard Cutlery Co. has been incorporated by John H. Wood, H. W. Ingersoll, F. L. Fuller, Frank A. Smith and S. B. Day; to conduct a general manufacturing business. Capital stock, $50,000.

Hartford, Conn.—The Peerless Oven Co. Capital, $500; for the purpose of treatment and sale of sheet metal.

Johnstown, Pa.—The Johnstown Shovel & Forging Co. will begin to operate its new plant soon. The plant is entirely controlled by home people, and will begin with a force of about thirty men.

St. Louis, Mo.—The Bolte Stove Co. has been incorporated by F. H. Astroth and E. H. C. Knickmeyer. Capital stock, $8000.

Trenton, N. J.—Heckert Baltzley Hollow Axle Co. has been incorporated by William Heckert, William H. Wallace, George B. Hibbard, John McIntyre and Edwin Baltzley. Capital stock, $1,000,000.

Changes and Improvements.

Ansonia, Conn.—A big lathe for the Driggs-Seabury Gun & Ammunition Co., which was drawn from the cars to the plant of the ordnance company, attracted considerable attention as it passed through the streets drawn by six horses. It is one of the new pieces of machinery for the gun department.

Bellaire, Ohio.—The new Bellaire stove foundry, with nearly double its former capacity, has a full force now at work and will ship about 1500 stoves within the next three weeks. Notwithstanding the new addition this manufactory is still cramped for room and all through the warehouse are false floors to enable them to properly care for the output. The nickeling department is kept busy and several patterns they make are finely mounted. The indications are that this company is having its busiest season, but the conservative secretary, E. H. Rider, was not giving out information as to the business they are doing. The improvements and busy scenes about the place are evidence sufficient.

Beman Park, N. Y.—The Bussey & McLeod stove foundry have resumed operations. This news was joyfully received by a large number of residents in this section who are employed in the foundry.

Brightwood, Mass.—The Bausch & Harris Machine Tool Co. is planning to erect a new building which will give the company one of the largest and best equipped plants of its kind in the country. The present capitalization of the company is $75,000, and it is now planned to issue preferred stock to the amount of $2500, most of which has been subscribed for. The corporation now employs 140 men, but the working force will be increased after the new building has been erected.

Chicago, Ill.—The National Shovel Works & Stamping Co. have secured a site and will establish a plant at Chicago Heights, which will give employment to 125 men. The building to be erected will be 80 by 350 feet and 22 feet high. It will be constructed of brick and stone and will cost $18,000.

Cincinnati, Ohio.—A substantial evidence of the returning prosperity of the times is shown in a transaction just negotiated by the Lodge & Shipley Tool Co. For some time it has been apparent that the present plant was entirely inadequate for the volume of business done. Mr. Lodge has closed a deal with Ethan B. Stanley, general manager of the lubricating department of the Standard Oil Co., by which the tool company secures a frontage of 262 feet on Colerain Avenue, and having an extension to the rear of over 300 feet average depth. The company will erect at once a steel structure 300 feet long by 100 feet wide, in addition to the necessary boiler and engine houses, etc. President Wm. Lodge was in consultation recently with a prominent contractor, and work will be commenced at once grading, excavating and preparing for the building. Said Mr. Lodge: "Yes, we have outgrown our present place of business; we have been located here since 1892. We shall offer the ground and buildings here for sale or lease when we leave. We hope to get into our new quarters in ninety days; if there is much grading to do it will probably be nearer four months. Our new investment will represent an expenditure of about $50,000."

Mansfield, Ohio.—Extensive improvements are being made by the Monarch Stove Co. Three additions are being built to the company's plant that will increase the capacity for output 33⅓ per cent. The additions are under way. A separate building is being erected to be utilized as a japanning room and paint shop. Formerly these apartments were connected with the main building. The cleaning room will be located in one of the additions, and in the present cleaning room will be placed new machinery in the shape of heavy stamping presses. The company is increasing its capacity to accommodate its growing trade and expects to employ one-third more men.

Moline, Ill.—The Moline Plow Co. shops were started up recently with a large force of men, which will be increased as initial work is turned out and ready for the finishers.

Monmouth, Ill.—L. S. Kingman, asignee for the Weir Plow Co., has made application to the County Court for permission to dispose of the plant. No objections being made, Judge Peacock granted the order for the sale to the highest bidder on September 15th. The sale will include all the interests of the company in this city and Moline. For twenty years the Weir Plow Co. controlled one of the leading agricultural plants in the Northwest. About four years ago fire destroyed the main building. From the effects of the disaster the company never recovered.

Monongahela, Pa.—Work on the new stove works and foundry of Graff & Co. is progressing rapidly. Several carloads of material have arrived. The foundation for the main building is nearly completed, and it will not be long until the buildings will be well toward completion. The works will employ 200 men.

Reading, Pa.—The Reading Stove Works have received an order for 5000 letter boxes from the government, the contract to be filled by the latter part of August. The stove business here is also very brisk, and the outlook for good fall trade is very encouraging.

West Toledo, Ohio.—The West Toledo Plow Works are working full time. Two carloads of plows were shipped away recently. They will improve their plant by erecting a new brick smokestack. It will be 200 feet in height.

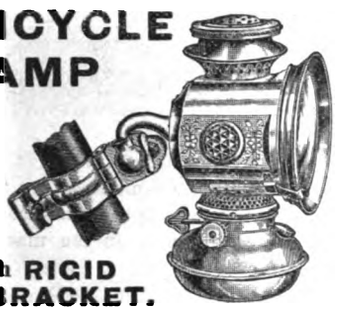
Recent Embarrassments.

Marion, Ohio.—The Marion Tool Co. has filed a deed of assignment to Daniel Uncapher. The assets of the company amount to over $2000; the liabilities about the same.

Miscellaneous.

Chicago, Ill.—The American Cutlery Co., manufacturing plant, Nos. 173-193 Mather Street, damaged by fire at a loss of $75,000.

Clinton, Iowa.—During the other night the Warner lock factory was completely wrecked by wind. The roof was torn off and the walls crushed on one side. The loss on the building and machinery is over $10,000, with no wind insurance. A curious feature was that no other property was injured, and the only other evidence of wind is a large tree blown down. A thunderstorm was in progress when the building was blown down. Parts of the roof were carried into the Mississippi River.



Middletown, Conn.—The property of the Mills Bell Co., which has been for some time in the hands of Franklin B. Shuster, of New Haven, as receiver, has been sold at public auction by order of the Superior Court. Horace R. Butler, of Middletown, acting for Middletown capitalists, was the purchaser, and it is purposed to reorganize the company.

Terryville, Conn.—At the annual meeting of the stockholders of the Eagle Lock Co. the following named were elected directors: M. C. Ogden, of Brooklyn, N. Y.; R. J. Plumb, of Terryville; R. H. Laimberer, of New York; H. P. Plumb, of Brooklyn, N. Y.; J. A. Carter, of Geneva, Ohio; H. L. Balch, of Brooklyn, N. Y.; F. P. Wilcox, of New York. The directors elected M. C. Ogden, president; R. J. Plumb, treasurer, and H. B. Plumb, secretary. There was a small number of the stockholders present, but a large proportion of the stock was represented by proxies.

Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of

EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Boonton, Morris Co., N. J.—The Standard Drop Forging Co has been incorporated with a capital stock of $10,000.

Charleston, S. C.—The Army Cycle Mfg. Co. has been incorporated.

Indianapolis, Ind.—The Bicycle Guarantee Co. has been incorporated with a capital stock of $5000.

Kemp, Tex.—Carlisle & Rierson, wheels, Hardware, sporting goods, etc., have opened a new store.

Merkel, Tex.—W. H. Dickson, wheels, Hardware, sporting goods, etc., has just opened a new store.

New Haven, Conn.—The Stowe Bicycle Co. has been incorporated with a capital stock of $500.

Norfolk, Va —Theo. Andrews will take up bicycles.

Oskaloosa, Iowa.—C. B. Gruwell & Co., bicycles, Hardware, sporting goods, etc ; new firm commenced business.

Toledo, Ohio.—H. A. Lozier Mfg. Co., bicycles, are reported to be preparing to add the manufacture of projectiles.

West Plains, Mo.—The Funkhauser-Davis Hardware Co. has been incorporated with a capital stock of $10,000, succeeding Funkhauser & Davis. They carry a line of wheels, Hardware, sporting goods, etc., and are now occupying new store which has been fitted up for their business.

Changes and Removals.

Americus, Ga.—J. R. La Sha, bicycles, reported to have sold out.

Big Rapids, Mich.—C. M. Wiseman, bicycles, announces closing out sale.

Detroit, Mich.—Detroit Bicycle Exchange, No. 206 Jefferson Avenue, have added a new feature in the nature of a repairing business.

Kaufman, Tex.—Ernest Washington, bicycles, succeeded by Guy Catlin.

Saginaw, Mich.—J. G. Fisher and Jacob Fisher, manufacturers of bicycles have dissolved.

Wellsboro, Pa.—Frederick K. Wright, Hardware, sporting goods, etc.; store purchased by Chas. H. Roberts & Co., who will conduct the same.

Recent Embarrassments.

Buffalo, N. Y.—W. T. Davis & Co., bicycle tires, etc., reported to have made an assignment.

Boston, Mass.—The Boston Woven Hose & Rubber Co.'s assignees, in a circular to creditors and stockholders, announce that they have decided to continue the business and operate the factory. A statement of the condition of the company at the close of business June 16th last, shows assets of $1,235,640, and liabilities of $1,160,736.

Columbus, Ohio.—On the application of John F. Hessen and Thos. J. Murphy, their bicycle store at Nos. 32 and 34 East Gay Street was placed in the hands of Frank H. Gale, as receiver. They were in the wholesale trade and had been established two months. It is said that their assets amounted to about $1500, while the liabilities are only about $900. The cause of the receivership was a disagreement between the partners over money matters.

Danbury, Conn. -Cyrus B. Ballard, bicycles and bicycle supplies, has made a voluntary assignment to John Meder. Arthur M. Ballard, who was associated with C. B. Ballard under the firm name of C. B. Ballard & Son, makes a separate assignment.

Marion, Ind.—Receiver Burke, of the Marion Cycle Co., has received a proposition by a company which offers to take the plant and pay all creditors, secured and unsecured, 40 per cent. of their claims, and re-start the factory. Meanwhile the unsecured creditors have made a proposition to the secured creditors to accept 50 cents on the dollar if the latter will guarantee the payment, otherwise they will try to set aside the mortgage given to the Marion Bank, aggregating $28,000, which was filed prior to the assignment. The receiver has addressed a circular to all of the creditors giving the details of the first-named proposition.

Northampton, Mass.—The Northampton Cycle Co., Timothy G. Spaulding, assignee, has not yet secured a purchaser for the bicycle works. The capitalization of $40,000 for a company to purchase the business of the Northampton Cycle Co., did not conceive the acquiring of the present plant.

Newark, N. J.—Vice-Chancellor Emery has appointed Edward H. Duryee receiver for the E. Alsdorf Co., dealers in bicycles, pianos and sewing machines, on Broad Street, near Bridge. The company sells on the installment plan. The nominal capital is $52,000. E. Alsdorf is the president. The vice-chandellor made an order limiting the creditors. Slow collections, it is said, caused the failure.

Miscellaneous.

Adrian, Mich.—Truman & Betz, bicycles, shop slightly damaged by fire.

Baltimore, Md.—The business of the E. D. Loane, Jr., Co., No. 14 West Lexington Street, is being removed to No. 25 West Baltimore Street. It is expected that the new place of business will be opened next week. W. J. Unverzagt, a member of the firm, will continue in charge of the bicycle department. The removal from the West Lexington Street house was made necessary by increasing business. In the new building the firm will have the use of six floors; a new combination hydraulic elevator has been put in, and the building has been repapered and painted from top to bottom.

Lexington, Ky.—The *Herald* asked a number of Lexington dealers about their sales, and all of those consulted replied that they were larger this year than ever before.

Lincoln, Neb.—The wheel dealers of the city report trade very good this year. One dealer, who sold seventy-five wheels last year, says he has already sold 135 and expects to reach the 200 mark before the season is over. The wheels this year are cheaper and better than those on the market last year, he says.

Minneapolis, Minn.—The Tribune Deere Bicycle Agency, Sixth Street and First Avenue S.; store burglarized, and two wheels stolen.

New York, N. Y.—The International Supply Co. of New York, which has just been incorporated, will sell a new invention for bicycles. In describing the invention, John T. McCarrier, of the St. Paul Building, said: "The object of this invention is to effect the easy running of bicycles and other vehicles using ball bearings. The six principal bearings in a bicycle generally contain sixty-four steel balls, each having five points of contact within the bearings. This device reduces the points of contact 60 per cent. and many of the contacts develop little or no friction. The device is simple, self-adjusting, cannot get out of place or repair, and will last longer than any bicycle."

Springfield, Mass.—Clinton B. Kidder, for two years superintendent of the Overman Wheel Co., has resigned his position with that company. It is a surprise for the people at the Falls, as Mr. Kidder was well liked among his employes. The assistant superintendent will fill the vacancy temporarily.

Swainsboro, Ga.—George N. Bell, bicycles; store burglarized and bicycle stolen.

Washington, D. C.—United States Consul Group has made a report to the State Department in regard to the bicycle trade at Malta, in which he says: "The roads of Malta, as a rule, are hard and smooth, and, with the exception of the period from May to November—during which time most of the people who ride wheels are away—are well patronized. The wheels are chiefly of English manufacture. There are a few American bicycles used, but they have been specially ordered, and their presence is not due to any influence of our manufacturers. American wheels are well regarded, the fact that a wheel is from the United States being sufficient guaranty of its reliability. By a little enterprise it is possible to gain a good market here for our wheels. At the beginning of the season, October 1st, people are returning for the winter months, and from that time on there is quite a brisk business done, both in the way of new wheels and in sundries, the assortment of the latter being somewhat limited. There seems to be no disposition to discriminate in the way of nationality of manufacture, and, while English wheels at present hold the market, American wheels are not sold only because the dealers here have not been brought into direct communication with our manufacturers."

West Oakland, Wis.—Homer Prescott will accept agency for good bicycle.

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. "American Hardware Trades Reference Book," published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. "Ladd's Discount Book," with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. "American Hardware Store," with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 50 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

In favor of the

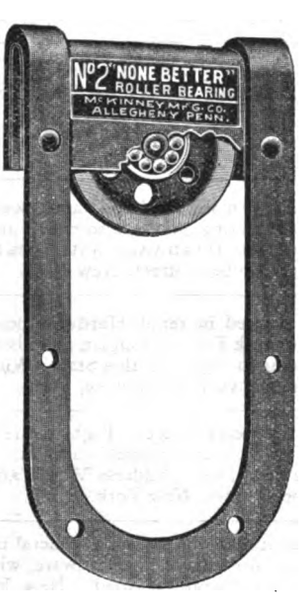
Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.

This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.



Respectfully,

CARY MANUFACTURING CO.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

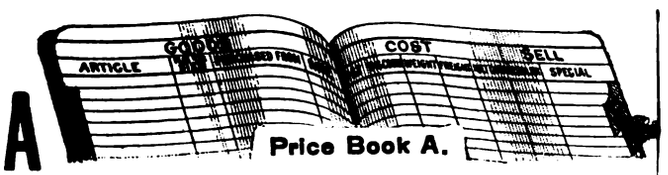
"GREAT VALUE AS AN ADVERTISING MEDIUM."



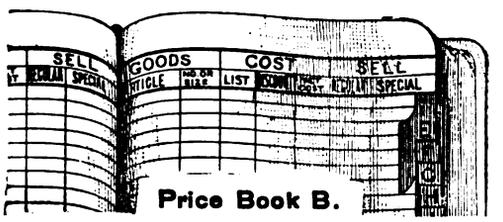
Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

Digitized by Google

HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

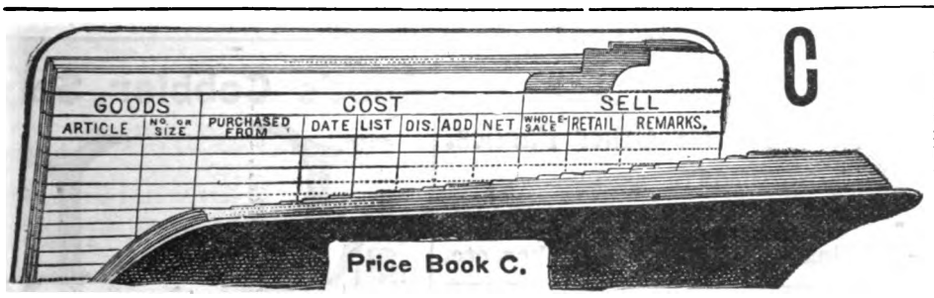


Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75



Price Book B.

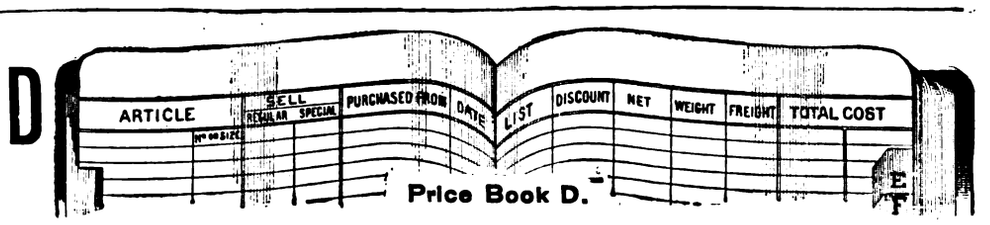
In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



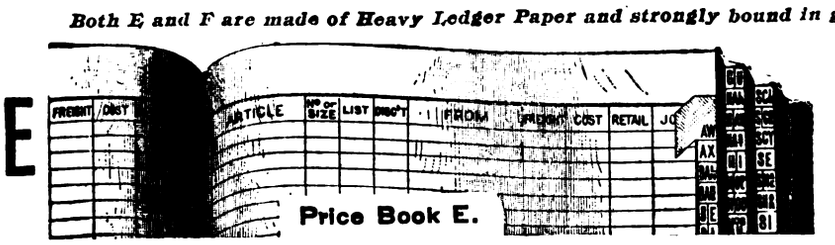
FOUR EDITIONS:

C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2.50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50



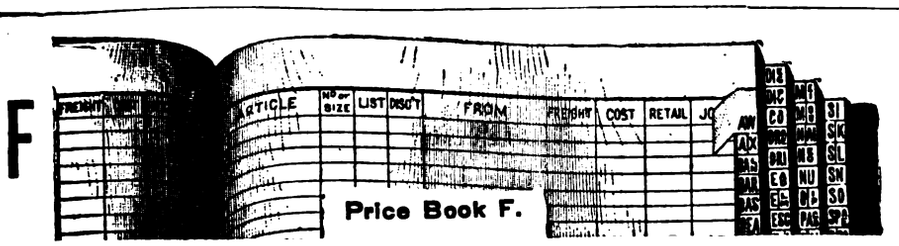
Price Book D.

MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to **AU** For Chisels, turn to **CH$^{I}_{U}$** For Iron, turn to **IRO**
" Parers, Apple " **PA$^{P}_{R}$** " Cutlery, " **CUT** " Irons, " **IR'S**

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.



Price Book E.

MANUFACTURER OF

Curry Combs and Sheet Metal Goods. . .

Solid Steel Spout Machine Oilers and Roller Skates.

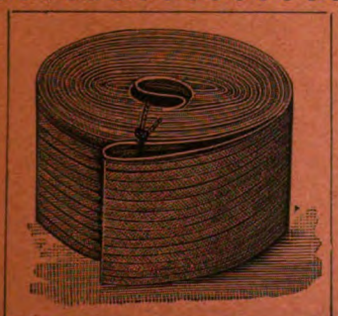
It will pay to write us for samples and prices.

SURPLESS, DUNN & CO.,
SOLE AGENTS.
55 Warren St., NEW YORK.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.



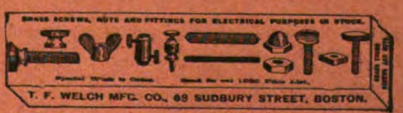
It is made of Heavy Tinned Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices. It will gather Apples, Peaches, Pears, &c.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price per dozen, $5.00.* *Liberal discount to the trade.*

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.



AMES SWORD CO.,

CHICOPEE, MASS.

MINING AND BLASTING POWDER Send for Catalogue.

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

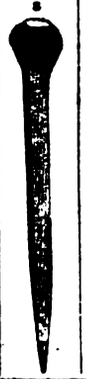
It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.



Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

The reason why we have sold **8,000,000** feet of Track and **800,000** sets of Hangers the last six years is because True Merit has been its own reward.

THE COBURN TROLLEY TRACK MFG. CO., - HOLYOKE, MASS.

HAHN'S LATEST IMPROVED

WATCHMANS' TIME DETECTOR,

WITH SAFETY LOCK ATTACHMENT.

Highest Award at Columbian Exposition.

This Clock is neat, thoroughly reliable and very durable. **Cannot be tampered with.** Price moderate. Is adapted for six or twelve stations, having a different key for each. Registering is done by number from 1 to 6 and 1 to 12, each station having its number. No chance for a fraudulent record here. Old style detectors mark by holes or an impression on dial, the same for all stations. Allowance made for old Detectors. Send for circulars, prices and further particulars.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

A MATTER OF CONFIDENCE

Buying Solder is largely a matter of confidence. No living man can tell by sight whether Solder is "½ and ½" or whether it is something else. "Straight Solder" looks exactly like Solder which isn't straight. A buyer is wholly at the mercy of the manufacturer. "Straight" Solder is easy to make. No secret about it. Half is tin and half is lead. The "½ and ½" Solder we make is no better than that made by any other reputable manufacturer. Actual quality is what makes price. When a so-called "½ and ½" Solder is offered at a lower price than we ask, the chances are that instead of being half tin and half lead, there is less expensive and less desirable material in it. We never have and we never will resort to deception in order to make prices small.

"Bright and Newsy."

Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Despite the severe heat of the past two weeks, delaying, as it unquestionably has, the full force of the opening of the fall trade, it is no difficult task to perceive the infallible signs of improved conditions.

Trade reports throughout the country indicate a marked picking up in volume, and a decided easing in collections. Statistics at hand for the month of August show a percentage of business embarrassments amounting to only one quarter of what they were during the same month of 1896. The bank clearings for August were not only larger than those of any other August; but exceeded the clearings of that month in 1892, which, it will be recalled, was a very busy year, by twenty-five per cent.

The general feeling in business circles, that we are at last to enter upon the enjoyment of a long promised and oft deferred business revival, is evidenced on all sides. Prices of staples in all lines show a decided tendency to strengthen; and terms are stiffening throughout the trade. The war, the hot weather, and the vacation season have come to an end together; and thereby removed all deterring influences.

The position is somewhat analogous to the ante-bellum days, when everyone looked forward to a decided improvement; and which would inevitably have come had not our entanglement with Spanish diplomacy occupied our attention for the time being. If a comparison be drawn, it must be in favor of the present time. The agricultural conditions of the country are most favorable; while reports from Russia and other parts of Europe indicate a shortage of crops that will ensure fair, if not large, prices to our farmers. The war has added several new and valuable outlets for our products; and the general effect of our victories has been to place us upon a much higher plane as a power, than our European friends have been willing to accord us before. This in itself will undoubtedly enable us to obtain trade concessions in foreign markets which have hitherto been most jealously guarded. The impetus to the investment of capital, afforded by our new possessions, is now taking definite form; and many companies, backed by our most progressive and influential business men, and having in view the most extensive improvements, are now an accomplished fact.

All these good things have we added to the prospect with which the year was inaugurated; and the possibility of another foreign entanglement coming up to again dissipate our hopes is too remote to be taken seriously. Another encouraging fact is that the war tax, instead of falling below the estimated cost of the war, will probably show an excess of $100,000,000.

Taken altogether it would be difficult to find a more pleasing combination of bright prospects in the business outlook of many past years.

English vs. American Commercial Morality.

In a recent issue of the *Hardwareman*, England, the following article appeared in the editorial columns:

"Every now and again we come across instances of that business iniquity euphemistically spoken of as commissions to buyers. Though the practice is but little alluded to it none the less largely flourishes. We have heard travellers say that the only way to the favours of certain buyers for retail houses, both in London and provincial centres, was to pave it well with commissions. The commission in this sense of the word is a bribe to the buyer—sometimes extending into a long series of bribes—to put aside his independence and reward himself at the expense of the best interests of his employers. There are some buyers we know to whom the suggestion of a commission from a traveller or manufacturer would meet with hot and angry indignation and promptly shut down all prospects of 'getting a line' from them. These are the best men, and the straight traveller only wishes that there were more of them. The latest example of commercial immorality to which our attention has been drawn is one to which Mr. P. G. Ebbutt, managing director of Messrs. Verity's, Ltd., Birmingham, has given publicity. The letter was addressed to the private residence of one of Messrs. Verity's employees, and was as follows:—'Dear sir,—Can you see Mr. C. D. at the pit door of the Grand Theatre, in Corporation Street, to-morrow night at eight o'clock? He will hold a *Mail* in his right hand. He has some commission to pay you. Please post the enclosed card early, and we shall get it to-morrow afternoon—Yours truly, A. B.' The actual names mentioned in the letter are of course suppressed, but as an attempt at bribery it is certainly more reckless than anything we have hitherto heard of. The man who wished to pay the 'commission' could not have even known by sight the person he wished to bribe. We can guess that Mr. 'A. B.'s' chances of further orders have been squelched. The moral, of course, is that straight business is the best business."

To the American business man this attempt to place business by means of a bribe, and such a clumsy awkward attempt at that, would seem to border on the ridiculous. It might be possible to imagine some novice of the grip, whose natural intelligence was not above par at best, conceiving some such expedient to place his first order, and thereby "change his luck;" but the experienced, shrewd, suave, jovial, insinuating salesman, whom we have come to know, would as soon think of taking an order at the point of a pistol, or the

Digitized by Google

end of a club, as to attempt the same end by making a sneaking, clandestine appointment with a man, whose allegiance to his employer's interests were so miserably subservient to his personal greed.

The "pull" by which our friend of the grip places orders in this country is on a higher commercial foundation. No one, not even a buyer himself, will deny that the personal characteristics of a salesman enter largely as one factor in the many that contribute to his success. His personal characteristics must be pleasing to aid him in making friends quickly, and in keeping them after having made them. But above all, the salesman must have good lines at competitive prices in order to retain the custom of any buyer worth the name. The department of the latter is probably the most closely scrutinized, and carefully watched of any in the business; and upon the intelligent conduct of the buyer's branch depends largely the success of the business. It is therefore essential that, with the close competition of the present day, the house itself should receive any additional consideration in the gift of the seller, in the shape of lower prices.

If the case be of such serious magnitude as our contemporary would lead us to believe, and for the sake of English commerce we trust it is not, it must argue one of two things: either that English Hardware buyers are less honest than their American brothers, and that would seem a harsh inference; or that the conditions governing trade in England are more conducive to commercial dishonesty than those of this country; and this view seems more plausible. In the former country competition and close buying are not so keen. Business in general is conducted on a very conservative basis. The activity in bidding for the public's custom is not so aggressively insistent as here. It is often the case that an English firm will continue to buy from a wholesale house or from a manufacturer, simply because it has become a habit formed by the course of time. A deep-rooted objection to change is probably responsible for this, but whatever be the cause, it is not good business. While the reputation of an established house is valuable, and while no business man of standing cares to deal with a firm of questionable reputation, we venture to say that no wholesale house could retain its custom here if it depended entirely upon the fact that it could look back over a half a century's business life and find no spot thereon. There is still another consideration, and that is the quality and price of their goods. To us this seems a more solid foundation for lasting success in a commercial sense than either bribes or sentiment.

Though others may go to Alaska,
To dig the rich gold from the ground,
And some even journey to Cuba,
Where 'tis said there is wealth to be found,
You need not depart for the Northland,
Nor to the far West Indies roam,
But just try a small "ad" in *Hardware*,
And you'll find there's a Klondyke at home.

—M. N. L.

In accordance with a decision arrived at in May last, it was voted to omit the September gathering of the New England Hardware Dealers' Association, and accordingly there will be no gathering during the present month.

In our country we have three unspeakably precious things: freedom of speech, fredom of conscience, and the prudence never to practice either of them.—*Exchange*.

A London Hardware Club.

A very determined effort is being made in London for the formation of a Hardware Club, to be established along the lines so successfully marked out by the Hardware Club of New York. The secretary of the New York Club has recently received a communication from Thomas F. G. Coates, the honorable secretary of the National Hardware Association of Great Britain, stating that the question is again brought into prominence largely through the publication of a letter of S. G. Hobson, from the *Hardwareman* of London and Birmingham, published in the last preceding issue of *Hardware*. In a circular letter addressed to the trade, Mr. Coates states that it is the general opinion that such a club should be founded under the auspices of the National Association, and suggests that an institution of that character, located on or near Holborn Viaduct, might prove to be a very great convenience. He adds that it should be a place where "those engaged in the Hardware trades—manufacturers, merchants and retailers—could meet in their own rooms, where facilities for luncheons, dining, smoking, etc., were provided, and where there should be a news room, containing every publication published throughout the world connected with the Hardware trade. Such a club would be the best meeting place for town and country members of the Hardware trades, providing an excellent rendezvous for Birmingham and Sheffield visitors to London, and their friends in the metropolis."

Mr. Coates believes that such a club is practicable, and could be founded on a sound basis along the broadest lines, independent in its character, and far-reaching in its results. He asks each member of the association and others to furnish him with an expression of opinion. The progress of this important movement will be watched with interest. Mr. Coates has asked for the fullest information as to the origin and growth of the Hardware Club of New York, all of which has been supplied by the officials of that organization.

John H. Graham & Co., No. 113 Chambers Street and No. 95 Reade Street, New York, have been appointed selling agents for the Wilcox Mfg. Co. of Aurora, Ill., for their line of house door hangers, among the oldest and largest line of hangers made in this country. The line consists, in part, of the following: Richards Improved; Prindle Wood Track; Ives Wood Track; New Era Steel Track; Richards Steel Track; Wilcox House Trolley. Also fire door hangers for special work. A full line of the above goods will be carried in their store in New York which will, no doubt, be of great convenience to the Eastern trade, in sorting up their stock.

AN editor has been inspired, after looking over his list of delinquent subscribers, to compose the following: "How dear to our heart is the old silver dollar, when some kind subscriber presents it to view; the liberty head without necktie or collar, and all the strange things which to us seem so new; the wide-spreading eagle, the arrows below it, the stars and the words with the strange things they tell; the coin of our fathers, we're glad that we know it, for some time or other 'twill come in right well; the spread-eagle dollar, the star-spangled dollar, the old silver dollar we all love so well."—*Troy Times*.

The E. S. Stiles Press Co, Watertown, N. Y., have opened an office at No. 243 Centre Street, N. Y., under the charge of Chester Cullingworth, formerly of the Garvin Machine Co. The increased demand for their product has made it necessary for the establishment of this agency, where they will carry a full assortment of presses, drop hammers, power shears and other sheet metal working machinery.

A NATIONAL RETAIL ASSOCIATION.—II.

MICHIGAN IS IN LINE.

Editor Hardware: Replying to your inquiries as contained in your favor of August 12th, will say: First, That I am heartily in favor of the formation of a National Hardware Association, for the following reasons: (A) That in my opinion it will have a tendency to enlarge and strengthen the State associations, by bringing into such association a large number of dealers over the various States, who do not consider the State association, as now existing, of enough importance to lend it their support; (B) That such an association will have a tendency to more closely consolidate the State associations and bring them in closer touch with earh other, thereby enabling them to work together to the mutual advantage and profit of all; (C) Grievances of dealers of one State against parties in another State could better be dealt with through the medium of such a national organization, made up of representatives from the various States.

Second, I believe that such an organization should be formed from representatives chosen from the retail associations of the various States, as being the best and only way that a strong National Hardware Association could be built up and maintained, and out of which much good would certainly come to every Hardware dealer. The Michigan Hardware Association has already taken steps looking to the formation of such a National Association, and I trust the day is not far distant when it will exist in fact. Very respectfully yours,

HENRY C. MINNIE,
Secretary Michigan Hardware Association.

Eaton Rapids, August 25, 1898.

A LITTLE PREMATURE.

Editor Hardware: In reply to your kind favor, we believe a National Retail Hardware Association at the present time rather premature. More effective work can be accomplished in the building up and organizing of local and State associations. What we mostly need at present is encouragement from our sister States still unorganized. With the majority of the States enlisted in the *grand good work*, we predict the necessity of a National Retail Association will soon be in evidence, with brain and might capable of surmounting any obstacle, and fighting for the just rights of every dealer in the country until they receive the recognition their combined interest commands.

Thanking you for the privilege of expressing our views, with continued success for *Hardware*, we remain,

Yours truly,
THE W. K. BOONE CO.

Lima, Ohio, August 25, 1898.

CANNOT SPEAK WITH CONFIDENCE.

Editor Hardware: In reply to yours, regarding the advisability of forming a National Retail Hardware Dealers' Association, I would say, that on general principles, I am, and have always been in favor of organization.

In association of kindred interests better feelings are created and intensified, and the business is broadened in its scope and uplifted in its character.

I affirm that on general principles the above statements are correct, but as regards the actual working of the Retail Hardware Dealers' Association, I am not sure that I can speak with confidence of their success, either as local, State or national organizations.

For some reason that I cannot fully explain, Hardwaremen seem very hard to get together; and by this statement I do not mean in numbers only, but in that spirit of unity, and consideration one for the other, and each for all, that is absolutely necessary to the best interest and success of any business organization.

Possibly, by further organization and effort such a spirit may be developed and cultivated, and better results than in the past may be obtained.

In furtherance of this object, I would suggest the formation of a national organization by delegates from each State organization, where one exists, and that the national, as soon as practicable, give its attention to the formation of other State associations, to the end that there should be representation from every State as soon as possible, local organizations to be represented in the State associations.

I trust that my suggestions, as herein outlined, may not be too late to be of service to *Hardware*, but owing to illness, I have been unable sooner to comply with your request. Yours very truly,

Boston, Mass., August 31, 1898. HIRAM G. JANVRIN.

MR. SIBLEY'S VIEWS.

Editor Hardwvre: I think much good might be effected by the formation of a National Retail Dealers' Association, and that this association should be formed from delegates selected from the State Retail Dealers' Association. We have, in Indiana, been unsuccessful in interesting the retailers in an association of this kind, owing to some unfortunate circumstances which exist and cannot be well overcome. There is no doubt whatever in my mind as to the benefit to be derived from an association of this kind, in many ways, not alone in the matter of mere uniformity of prices or restricting the sale of goods in a legitimate channel, but for the different retailers in the same line of business to get together and exchange views in different methods of doing business, is always a benefit to each one who participates. Yours truly,

South Bend, Ind., August 30, 1898. IRVING A. SIBLEY.

THROUGH STATE ORGANIZATIONS.

Editor Hardware: In reply to your request for my opinion with regard to the formation of a National Hardware Dealers' Association, I would say that I have given the matter much thought from the formation of our State association, and I have certainly felt the need more, if possible, since the formation of the Northwestern Association.

A national organization would add to our strength greatly, and then we would be able to accomplish what we have set out to do. Our Northwestern Association has accomplished a great deal, but it does not reach far enough. The representations should come from State organizations and the national association should be formed through State associations. It is the only plan by which general protection and satisfaction could be given.

Respectfully,
CLARK W. KELLEY,
President North Dakota Retail Hardware Association.

Devil's Lake, N. D., August 29, 1898.

IS A NATIONAL ASSOCIATION POSSIBLE?

Editor Hardware: Is a National Retail Hardware Association possible? I believe it is, but I do not believe the time is yet at hand for its organization. It would seem like taking the wagon by the hinder part and pushing—rather than the putting a good team to the front and pulling—until at least a majority of the States shall have organized State Retail Associations.

You remember this was attempted some years ago by

Digitized by Google

good men, and on what were thought to be then good lines, and it fell to pieces. Its failure then, it seems to me, was very largely due to lack of smaller State organizations, with a knowledge of what wants existed going towards their creation, what objects were to be brought forth, what wrongs to be corrected and the various ends to be gained.

It would seem that the tendency now is rapidly toward an organization, national in its nature, and which will be the result of State associations now existing, and those almost in process of formation. It would be almost impossible to carry through the formation of the national feature without representatives to make this possible, and these representatives must be either heads, or officials, or delegates coming from the various smaller State bodies

The objective points to be reached would be the same in a National that occur in the State, with the additional binding power in the larger association. Its composition would be very largely the result of the good work done in State organization.

Let us have a National Retail Hardware Association, by all means, as soon as practicable. But let us first urge the continued formation of the State organizations, until all, or nearly all, the States have held some sort of a Hardware gathering, and from these will come the material for a lasting, beneficial National Association. H. C. WISEMAN.

President Ohio Hardware Association.

Springfield, Ohio, September 2, 1898.

A Talk About Jobbers.

"The Man in the Corner" at the Bingham store, Cleveland, Ohio, has his own opinion in regard to the jobber, concerning whom he expresses himself in part as follows:

Do you know, just between you and me and the gatepost, that the Hardware jobber is the greatest promoter of diversified industry and the sturdiest foe to monopoly known to modern trade? It is a fact that is not generally bruited about or commented upon except by the persons individually interested, but it is recognized and acknowledged by a host of manufacturers who have at one time or another had to fight for existence against the efforts of some powerful competitor or, preferring to retain their independence rather than lose their identity in some "combine" have been made the target for the united missiles of its members. The great American sentiment of objection to coercion that furnishes the ready "I wont" in answer to every "you must" gains full expression here, and few indeed are the attempts to fasten a fictitious value upon Hardware or to force the jobber to buy any particular line that finds permanent success. It is true that the number of combinations increase from year to year, but it is likewise true that their failures have increased in like ratio, and the only lasting successful monopolies have been made by the merging of different concerns into one close corporation and seeking to gain an increased profit by the saving in manufacturing expenses rather than in any increase of price.

If it were not for the jobber—if the manufacturer sold his wares direct to the consumer—there is many a line that would never come into general use that is now found in stores all over the country, for the expense of introducing them would shut them out. Upon such goods as were carried the trade would gravitate to a few popular brands and it would become impossible for a new and unknown concern to gain a foothold except by years of patient effort. There is a great advantage in popularity, and in some instances it enables makers to float upon the market goods inferior to others that are comparatively unknown. Even as it is, the jobber finds that manufacturers whose names are best known are occasionally prone to exaggerate the commercial value of their brands and to sing a song of "prestige, price and quality," rather than "quality, price and prestige," which the jobber holds to be the proper order. The trouble in this direction is inconsiderable, for there is usually competition enough to keep such manufacturers somewhere near the mark, and jobbers' brands put upon equally good goods of other manufactures afford a means of fighting prestige with prestige when the big maker proves entirely refractory.

But the jobber has most frequently to do with illegitimate combinations of manufacturers to stifle competition and send prices skyward in defiance of all economic conditions, and it is here that the wholesale Hardware houses of the country, acting independently but in entire concert, show a determined opposition, and sooner or later see the combinations fail. Iron-clad agreements, forfeits and pledges to abide strictly to agreed prices all yield in time and the dealer and comsumer get the benefit. Very often a rumor of a "combine" will precede its consummation and permit the jobber to place contracts at anti-trust prices that will carry him and his customers over the brief period of inflation and the trade at large never feels the effect of its existence. As a fighter of trade injustice, commend me to the Hardware jobber!

Merchant & Co., Philadelphia, with branch houses in New York, Brooklyn and Chicago, have just published an illustrated catalogue and price list for 1898, showing illustrated descriptions of their great and various line of goods, covering roofing plates, bright plates, solders, babbitt and mixed metals, ventilators, gothic shingles, metal Spanish tiles, etc. The extent of these may be guessed from the fact that several pages are required simply for an index. The catalogue has been prepared with great care, with special purpose in mind of making it of direct practical use to purchasers of these lines of goods, and the descriptive letter text is illustrated all through with reproduction not only of the articles themselves, but their methods of use. There are a number of pages devoted to tables showing sizes and gauges, and if the publication was to be described in one word, we would use that eminently satisfactory word, "practical." The catalogue covers 112 pages, and is finely printed on heavy paper, and bound in colored covers. It will be sent to Hardware dealers on application.

W. J. Strange has opened a new Hardware store at No. 2432 Kensington Avenue, Philadelphia. Mr. Strange is widely known throughout Philadelphia as a prosperous retail grocer. He is running twelve retail stores, giving punch cards on his house furnishing department to purchasers of groceries. When these cards are punched to their full amount $25, the holder is entitled to anything in the store in value to $2.50 or ten per cent. of amount. He has bought a stock of about $4,000 from the Supplee Hardware Co. He is in a good neighborhood and his prospects are very bright for a successful business in his latest venture, Hardware. Mr. Strange is an old Hardwareman, having served about ten years in the general Hardware business in Ireland.

The Planet Mfg. Co. has removed its business from Holyoke to Springfield, Mass., where it is enlarging its business, by adding to its line the "Planet" Feed Bags, patented and plain patterns of all grades; the "Planet" carrying strap and other specialties in leather and duck goods, in addition to making the "Planet" dust beaters. They are also getting up a very heavy beater, made of one quarter inch round strands of leather; length of beater twenty-eight inches; especially for beating carpets, rugs and car seats, and is a fine article, every strand being glued and nailed in.

Faith is believing what you know ain't so.—*Exchange.*

IOWA HARDWARE DEALERS' ASSOCIATION.

In response to the call quoted in the last preceding issue of *Hardware*, a number of Hardware dealers of Iowa met at the Grand Hotel, Council Bluffs, on Wednesday, August 31st, and the result was the formation of the Iowa Retail Hardware Dealers' Association. The attendance was not as large as had been expected, but was sufficient to show that the retail dealers of the State are willing to support an organization of this character. There was a feeling of great enthusiasm among those who were present. Steps were taken for the appointment of a representative in every county of Iowa, to enlist the interest of the dealers of such county, and if possible to secure the organization of a local association. This work was specially committed to the executive committee, who are to report at the next meeting to be held in Des Moines on the second Wednesday in February, 1899.

A number of practical topics were discussed, but the most important feature of the meeting was the reading of a paper by H. A. Cole, of Council Bluffs, the secretary-elect, on whose authority the call quoted in our latest issue had been issued. In opening, Mr. Cole referred to the effective work done by like organizations in other States, and then said:

We are surrounded by organizations of like character that are doing splendid work for the retail Hardware dealer. The objects of associating ourselves together are, first and foremost, protection. There are many evils that threaten our very existence. Our future welfare is threatened by the illegitimate competition of department stores, racket stores and catalogue houses.

One of the crying evils of the present time that we have to contend with is the competition of catalogue houses. These concerns locate themselves in large centers of trade, where they do not have to carry stocks of the goods they catalogue. They use well-known staple articles at cut prices to secure trade, and follow the general tactics of the department store in their business methods. A new phase of competition which in the last year or so has grown to tremendous proportions has been the grocery store competition along the line of house furnishing goods. There is scarcely a month passes but what some wholesale grocer sends out circulars that he has put in a full line of tin, galvanized iron and granite ware, and often a full line of house furnishing goods, and urging his grocery customers to push departments along these lines. Every grocery store that follows out this idea means reduced sales for the legitimate Hardware dealer. We are met not only with this grocery store competition, the department store competition, the racket store competition, but we are also met, to a limited extent, by competition from our jobbing houses themselves.

There are also a flock of travelling men, representing the big lock works of the country, who come to our town and put in bids for every building of any size, giving the local dealers so low a margin that there is absolutely nothing in the bill to justify the amount of money required to carry it. To make this bad bargain still worse, the dealer is always hoodwinked into taking the responsibility for the payment of the goods. How many dealers of our State can look on their ledgers and point to such bills where the goods are still unpaid for or where mechanics' liens or law expenses have been necessary to enforce the collection of these accounts.

I tell you, gentlemen, when I have faced these gathering difficulties and looked forward to their increase as the years roll on, and have weighed the tremendous cost in nervous energy and patient work that are in these days involved to keep our balance sheets even, it has often been with forebodings as to the future of our business that I have made this summary; but I have seen with great pleasure the increased tendency toward co-operation among the Hardware dealers of the country at large, and I believe we have to a large extent in our own hands the solution of these problems by co-operation.

Let us organize and demand of our wholesale dealers and manufacturers that they shall not sell to these illegitimate competitors, who only use our profitable lines for the purpose of selling them at a sacrifice so that they may draw trade to the other lines that they carry, on which they make their money. They use the lines of the drug, grocery, music, notion and clothing stores, and alternately use them in the same way, making a specialty of these profitable lines, using one or more of them constantly at cut prices for the purpose of drawing trade, and selling everything else, except the leader that is out at the time, at as large or larger prices than the regular dealer holds them for in his own line.

These demands must be made with discretion and with consideration for the rights of our manufacturers and our jobbers as well, and the committee who pass on the complaints of our membership that arise under this part of our association will have as difficult and delicate work to perform as any committee that we may appoint.

We have the right to demand of the manufacturers of good money-making specialties, which are to-day recognized as the life of the Hardware trade, that they shall not sell these illegitimate channels of trade, and I feel sure that when this demand is made unanimously by the Hardware trade of the country there is not one manufacturer in 500 that will dare to refuse our request.

Besides this idea of protection there is an equally important idea that will come as the natural result of our organization, and one that is just as far-reaching in affecting the general welfare of our dealers at large. It is the enlarged fellowship that will come from our brushing up against our competitors and finding out that instead of the mean underhanded competitor that we have always thought our neighbor on the street to be, we find that he has held the same opinion of us, and that these ideas have too often led to bitter retaliation and sharp competition that might just as well have been avoided, and that really they are just as good fellows at heart as we are. These cut-throat methods of competition have cost the Hardware dealers of the State many an honest dollar.

While we are all of us condemning the department and racket store competition, let us calmly and fairly face the fact that some of the worst and most demoralizing competition which we have to meet comes from within our own ranks. How many of the dealers of Iowa are there who have not had a Hardwareman in some adjoining town handling the parallel lines with himself offer to ship to his town goods at much less price that he is willing to sell the same thing for to his own customers? This class of competition is especially aggravating and unfortunate in its results between dealers in county seat towns and dealers in small adjoining towns.

Why is it that to-day all cook stoves of recognized merit are handled by dealers at a margin of profit that barely will

Digitized by Google

pay the cost of blacking, delivering and setting up the stove? Why is it that many cook stoves of recognized merit and those makes that are handled largely by dealers in adjoining towns are sold at so low a margin as to make many of the dealers think seriously of throwing out the stove trade from their whole line? Why is it that wind mills are sold practically without profit when they are a seasonable article that involves a large outlay to handle them, great risks and long credit? Why is it, gentlemen, that iron pipe is sold the country over without any profit to the dealer? Why is it that barbed wire, one of the great staple articles of commerce in our line, is handled at a margin of profit that is often less than the actual percentage of cost to the dealer of doing business? Why is it that nails occupy the same position?

Simply because of this retaliating spirit existing in our ranks. And when we look calmly and dispassionately at this phase of Hardware competition we find that one of the great evils that we must overcome lies in the warfare among ourselves. This can and should be stopped, and it can be done without any widespread combination on prices. Simply let us recognize the right and the desirability of every one in business making a good fair profit. When you have a customer come to your store and tell you he can buy a standard article in an adjoining town at a price which you see nets the dealer a fair margin of profit, instead of telling him that he is being swindled by this dealer, and that you can sell him at much less money, try and sell him goods at the same price, and use the leverage to get the sale on other inducements. Say nothing about the prices of your competitors in the adjoining towns, but use the information quietly to nail the sale if you can.

Remember that your customers are deliberately laying for you. Many of them have no scruples against lying about offers they claim to have from other dealers if they can save 10 or 15 cents by so doing. Instead of believing the first story you hear as to the cut-throat prices that some competitor is making, and immediately retaliating and cutting the life out of the same article, probably below actual cost, better let one or two customers go. Explain to them that you are trying to make a reasonable profit on all your line by not holding out bait to get suckers with; then if you find this story repeated, make it convenient to drop into your competitor's store and ask him if he is making this price or if he is not. Very often such a call will prevent the demoralization in price of the profitable lines from which both stores might reap many dollars of profit.

I do not have much hope that we will be enabled to form combinations on prices that will be especially binding, and I myself doubt the advisability of dealers in a town trying to effect an out and out combination of this character, as it might lead to results that would be just the reverse of that intended, and might drive the trade to some neighboring town, for instance, where no such combination would exist; for we must remember that we are in competition not only with the Hardware dealers of our own town, but it is town competing against town, and hence the healthiest and best results can be obtained by free and open competition founded on kindliness and consideration for our competitor. Where competition exists between Hardwaremen having a friendly attitude toward one another, as we all should have, my prophecy is that all the cut-throat competition of the State would cease.

Let us recognize that when our competitor finds it necessary to make a leader of some article, he may have been driven to this step by the competition of some grocery store, catalogue house, racket store, or quotations that are brought him from some neighboring town, instead of aiming a knife at the vitals of our business, as we too often interpret the action.

Another great benefit that can come out of this friendly feeling will be co-operation in shipping heavy and bulky goods. I have been told many times by traveling men that it is almost impossible to arrange for combination cars of the same article between dealers in adjoining towns. Dealers are afraid their neighbors will know what they pay for their goods, assuming that their neighbors cannot buy as cheap as they. What is the result? Mr. Jones of Ottumwa orders half a car of Cook Stoves and pays 40 cents per 100 pounds, or $2 on every 500-pound Cook Stove he ships from the foundry. Mr. Smith of Fairfield, within 25 miles of Brother Jones, buys another half car of the same make of stoves, pays the mannfacturer the same identical price for them, and he, too, pays $2 on each 500-Cook Stove that comes into his store. Now their competitor in an adjoining town is fortunate enough to handle the whole line of these stoves, hence ships them in carload lots, and instead of $2 per stove he gets fifth-class freight, and pays $1.10 freight for the same identical 500-pound stove that Smith and Jones have paid $2 on.

He sets the price on the basis of carload freights, and the 90 cents freight that Smith and Jones have paid on the stoves they bought comes out of their profit. It is the same on barbed wire, the same on nails, the same on woven fencing, the same on steel ranges. To illustrate this idea: I have just received the bill of lading from a prominent St. Louis range manufacturer for a carload of stoves. This car contains twenty-five steel ranges for our store, which weigh about 10,500 pounds. It contains 600 pounds of stoves and ranges for my competitor, Charles Swaine. It also contains about an equal amount of stoves which I had forwarded from a foundry in Indiana, and these shipments combined will effect a saving to Mr. Swaine of $12, will effect a saving to our own retail store of $30, as against local shipments of these three lots of stoves.

This fact, gentlemen, has been brought about merely because Mr. Swaine and myself have found out that we are all of us guided by about the same ideas of business, and that friendship and co-operation pay in dollars and cents. How many thousands of dollars would have been saved by the Hardwaremen in the State of Iowa had this spirit of co-operation existed between the dealers of the same towns and the dealers of adjoining towns for the last ten years.

Suppose you, my friend, are buying stoves from one of the Detroit manufacturers, your competitor is buying a line of stoves that are made in Milwaukee, and perhaps a competitor in an adjoining town is buying a line of steel ranges made in Cleveland. Now every one of these manufacturers makes a freight allowance that will deliver these goods all to a common point. Why not combine them as Mr. Swaine and I have done in our shipments this year?

Some of us have been fortunate enough to buy stoves in car lots during the past five years of very hard times. Many of us who used to buy in car lots have been unable to do this. In looking back over our retail business in the past five years, if I had carried out this idea of co-operation before, as I have started to do this year, our profits would have been increased by the sum of $500, as near as I can estimate it—certainly not a dollar less.

Gentlemen, five years ago I could have subscribed heartily to the doctrine that friendship pays even between competitors, but with my powerful hind sights focused on the financial point I now say it pays bigger than anything else in the Hardware business.

Another thing that comes along the line of brushing up against our fellow Hardware merchants of the State is that we exchange ideas as to the best way in which we can meet this department store and catalogue house competition, as to the best way of selling desirable specialties, as to the best and most profitable way of handling the stove business. We get ideas of displaying goods, we find out

Digitized by Google

how to meet the range peddler's competition, we get wide-awake ideas that will last us through the year until another meeting and another exchange of new ideas that are constantly developed in the Hardware trade.

I will venture a statement that a large part of the stove dealers of the State could not estimate within 50 cents of the actual cost of blacking and setting up and delivering hard coal base burners. I will venture another assertion, that many of us fail to appreciate what is the percentage of cost to us of the items of clerk hire, deliveries, rentals, light, fuel, and the other items of dead expense that come out of the profits of our business before we can count a dollar profit. The difficulty is, gentlemen, we are all of us too sanguine and hopeful. We overestimate the net returns we will get from a certain margin on our goods. The result is that many times when our inventory is completed we are sadly disappointed at the outcome of one year's business, and curse the times, when not only the times are at fault, but we ourselves, in our lax methods of doing business, have done more than the hard times to bring about these results.

Let us unlearn many of our bad business habits; let us find out how other dealers of the State carry on their business. Get all the ideas possible from every dealer you meet and adapt these ideas to the particular conditions that underlie your local business. Another point which occurs to me is the margin of profit that we place on our goods. What goods can we mark at old prices? What line on a percentage basis? What shall be our leaders? What profit will staples stand? On what goods can we make up for goods sold without a profit? What should be the average profit on the Hardware line, etc.?

In effecting our organization we should have a constitution and by laws. We should have a president and vice-president, who shall perform the ordinary duties of such officers. We should have a secretary and treasurer, probably combined in the same party, whose duties will be the most arduous of any officer we may have, and who should, as soon as our organization is perfected and we have enough members to justify it, receive some compensation for his services. We should have an executive committee composed of the president, vice-president, secretary and four or five members whose duties would be to carry on the business and pass on all matters pertaining to the welfare of our organization between the yearly meetings. We should have a committee whose duty it should be to consider all complaints arising under the constitution, especially with reference to jobbers and manufacturers selling goods to department stores, grocery stores, and carrying on a business that tends to undermine the welfare of our calling.

As I intimated above, this is one of the most important and delicate tasks that any of our officers will have to perform. We should have a committee appointed in each county to secure the membership of every Hardware dealer in his country, so that by another year we can count three-quarters of the thousand Hardware dealers of the State among our members. Our secretary should have special charge of this department of our organization and carry on a constant correspondence with a view to increasing our membership and keep the benefits of our organization before our dealers.

We should have an entertainment committee whose duty it will be to provide speakers and proper entertainment for our convention, so that our meeting may not only be profitable in a business way but so filled with pleasant reminiscences that we can look back on our yearly meetings and anticipate the time with pleasure when it will return; but in carrying out this phase of our organization let us stand forth among the organizations of like character in the United States, and embody a clause in our constitution and by-laws which will make it impossible for any member of our association to bring the fair name of the Hardware dealers of the State into disrepute by drinking to excess at any of our meetings. We can do this by incorporating a by-law that liquor shall not be used at our banquets or our public entertainments. I make this suggestion simply because some of the trade assemblies of the country at large have come to be looked upon as a grand annual drunk for the members of the trade to participate in, whereas the idea that underlies it is of the greatest and gravest importance to the welfare and conditions of the trade.

With these preliminary remarks and suggestions as to what we should do and the idea that we should embody in our organization, I leave the matter in the hands of my fellow merchants.

We will probably get the largest interchange of ideas at this first meeting of our organization by establishing a question box, and each one of us asking such questions as involve problems that he wishes opinions on. The question box, if it is your will, we will open to-morrow, and after each question is propounded it is open to the house for discussion and for answer.

Among some of the questions which we should certainly discuss is the question as to the desirability of getting leaders before our trade at especially low prices. The question of syndicate buying; the question, if leaders are desirable, is it best to keep a leader out at a constant low price, or is it best to have special sales on certain days, as the department stores do, and offer these leaders at special prices only at the advertised time and sell them at regular prices the balance of the time. The question as to whether ten-cent counters pay. The question as to the best way to handle the stove trade. The question as to whether a cash Hardware business will pay. The question as to curtailment of long credits. The question as to the best method of collecting slow accounts. The question as to the best method of curtailing credits so that they will not overbalance our stocks. The largest question of selling on the installment plan, and of carrying this idea out in dealing with the farm trade. The question as to how to get the most out of our show windows.

The very large question that we in the aggregate waste thousands of dollars on because we have not solved it properly, is the question of advert'sing. How to get the best results; what kind of advertising pays best; what kind of advertising does not pay. Is it advisable or not to close out seasonable goods at cost prices. Does circular advertising mailed direct to our customers pay better than newspaper advertising, and many more questions that might be enumerated right along this line of advertising alone. Locals or display. I have seen a well established Hardware house absolutely go down until it amounts to nothing simply because of the improper solution of this question of advertising alone. I myself feel that in our own business we have wasted hundreds of dollars in unwise advertisements. We have failed to embrace opportunities for proper advertising that might have brought us hundreds of dollars in return for the expenditure of but a few. The above questions that have occurred to me are ones on which I, for one, want light, and I believe that very dealer in the State can give and receive ideas of great value along these lines. I will not burden you longer with a summary of these ideas that have impelled me to call this meeting. I sent out 950 invitations, but, unfortunately for the large attendance at this convention, it was impossible for me to arrange it earlier in the year.

Let us, with the nucleus which we have here effected, carry the Iowa Retail Hardware Dealers' Association to the top notch in the list of like associations. We have the best State in the Union to do business in. We have as intelligent a class of citizens as exist on the face of the earth. We have as uniform prosperity as can be found in a stretch of terri-

Digitized by Google

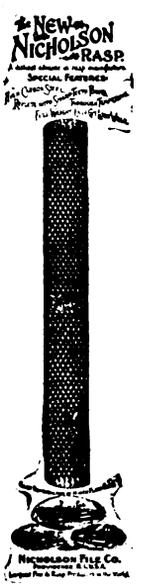
tory of like proportions anywhere in the world. Why should we not prosper and develop and carry on the Hardware business of our State until our position among the Hardware business of the world stands equally as high our State stands in other lines?

The election of officers to serve until the meeting of February next, was then taken up, and resulted in the selection of the following gentlemen:

President: P. C. Devol, Council Bluffs.

Vice-president: Mr. Peterson, Council Bluffs.

Secretary: H A. Cole, Council Bluffs.



Treasurer: Charles Swaine, Council B.uffs.

Executive Committee: M. E. Lewis, Orange City; C.W. Brelsford, Villisca; T. J. Lornas, Cresco; C. M. Doxsee, Algona; O. E. Miller, New Providence; A. T. Nelson, Wilton Junction; F. A. Woodruff, Correctionville.

A Gift to the Horse-Shoers.

The Horse-Shoers of the country are being presented by the Nicholson File Co., Providence, R. I., with a very handsome hanger illustrating the New Horse Rasp which the company have recently put upon the market. The hanger is about twenty-four inches long and five wide and makes a very attractive wall ornament.

At the top of the hanger appears in graceful red letters "The New Nicholson Rasp" with the four special features

of "high carbon steel," "replete with sharp tooth points," "thorough tempering," and "full weight, easy cut, long wear," set forth just below. The body of the hanger is occupied with a photoghraphic reproduction of a fourteen-inch plain rasp, standing boldly out and with nothing on either side to detract from its prominence. The color of the steel, together with the formation and shading of the teeth are splendidly brought out. At the foot of the hanger appears an artistic grouping of four of the company's five factories.

The whole makes a very ornamental and striking advertisement and is in keeping with the dignity and effectiveness of all of the Nicholson Co'.s efforts in this line. We deem it worthy of reproduction herewith.

American Clothes Wringers.

The first American clothes wringer produced, which was put on the market about thirty-five years ago, was a substantial and serviceable machine, but its price prevented it coming at once into common use. After some improvements the price was reduced, but it is only within twelve or fifteen years that the clothes wringer has come to be the article of common household use that it now is. The present price is about one-fourth of the original price. The present output of American clothes wringers is about 750,000 annually.

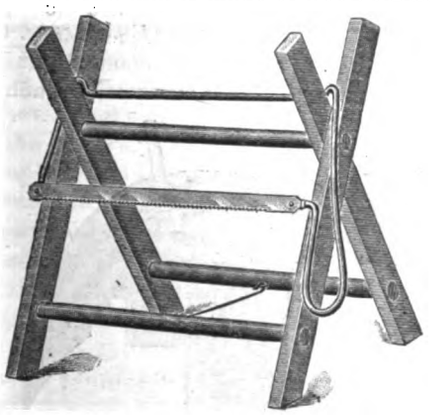
Clothes wringers are made with rolls of ten to twenty-four inches in length; wringers larger than that are made to order. Ten, eleven, and twelve inch are the sizes commonly operated by hand, though fourteen and even sixteen-inch wringers are sometimes used in that manner. Larger machines are operated by other power. American clothes wringers are sold in many foreign countries; though in some, owing to natural or other conditions specially affecting the use of such appliances, comparatively few are sold. Thus, while many articles of American manufacture are exported to South American countries, there are not many clothes wringers sold there owing to climatic conditions, which are such in most of the countries that clothes dry quickly there and wringers are not much needed.

Few American wringers are sold in France, where washing is done commonly in wash-houses, and few wringers of any kind are used. In Germany, Russia, all the Scandinavian countries, and in Great Britain, American wringers find a market, and they are sold also in Australia, South Africa, and other foreign lands. They cost more than German or British wringers, but they sell in competition with them, as many other manufactured American products do, because of their superiority of workmanship and better adaptability to use.—*N. Y. Sun.*

Hints to Foreign Shippers.

American manufacturers of machinery for import to Germany will save themselves trouble and complaint from customers as well as retain their hold on foreign trade by paying heed to the complaints of consignees to which Consul General Cole, of Dresden, calls attention in a note to the State Department. Heavy machinery insecurely or loosely packed in fragile cases results in breakages, which annoy and disgust purchasers, and when packed in cases too tightly nailed together, result in the destruction of packing cases by the Custom House authorities. Both extremes should be avoided. Invoices or bills of lading should surely reach consignees before shipment, else there is trouble about securing the goods. The fullest possible instructions as to setting up and operating machinery should accompany each machine. They should be printed in German, as should all circulars, as it is a waste of money to send such things printed in English. Germans will not trouble to translate and read them. All goods should be priced to expectant purchasers "free on board" at New York or other shipping port, with the actual cost of packing, instead of leaving the cost of railroad transportation in this country from the factory to point of shipment and the "at cost" price for boxing to the imagination of purchasers, as those expenses cannot be ascertained in Germany. All machines should be patented in Germany, else when a trade is built up German manufacturers will make the same machinery and drive out the American product. American shippers should ascertain the financial integrity of the firms with whom they are dealing, as "demanding cash on order bills of lading from Government railways or arsenals and from established firms of undoubted standing is provoking, and calculated to make these parties look elsewhere for supplies."—*New York Times.*

Ponce, a town of 15,000 people, in Cuba, and perhaps the healthiest in the island, is on the south coast, on a plain about two miles from Playa, a spacious port that will hold vessels of twenty-five feet draft. Playa has 5000 population and all the foreign consulates.—*Exchange.*



The timid man yearns for full value and asks a tenth. The bold man strikes for double value and compromises on par.—*Exchange.*

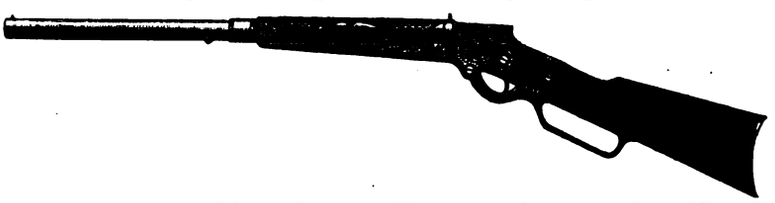
NEW GOODS AND SPECIALTIES.

A Midget Saw Mill.

This cute little article named "The Midget Saw Mill" has been created for the amusement of the children, and judging from the demand it has already raised, it would seem that it had filled a want long felt in the child heart. Its character can be seen from the accompanying illustration. This little saw mill is made of wood stained a bright

red, and when set up is ten inches high, nine inches long, and eight inches wide. The saw frame is made of one quarter inch round wire, and the saw blade is of steel nine inches long. It is described by the manufacturers as a rapid seller, and the price per dozen complete is two dollars. It is made by the Arcade Mfg. Co., of Freeport, Ill., who will be pleased to furnish further details on application.

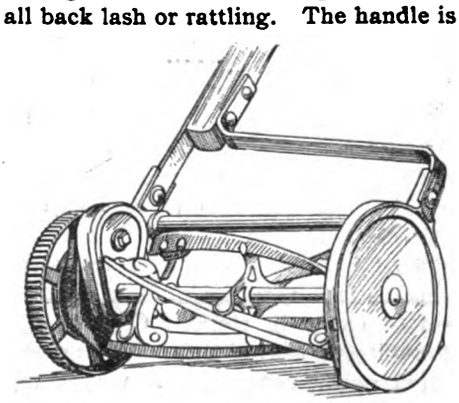
Stowell's Handy Clamp.



The accompanying illustration furnishes two views of Stowell's Handy Clamp, which is being successfully placed upon the market by the Stowell Mfg. & Foundry Co., South Milwaukee, Wis. This is a new device made of malleable iron, and tinned; is simple and durable in operation, and is described by the manufacturers as neither rusting nor breaking. It can be used for a large variety of purposes, some of which will be seen in a card of this

company on page 41 of this issue. The manufacturers inform us further that this article is something new, having just been put upon the market, and that the demand for the same has been large wherever it has been shown. A sample will be mailed for 25 cents in stamps, and the clamp will be on sale by the Hardware trade generally.

Columbian Air Rifles.

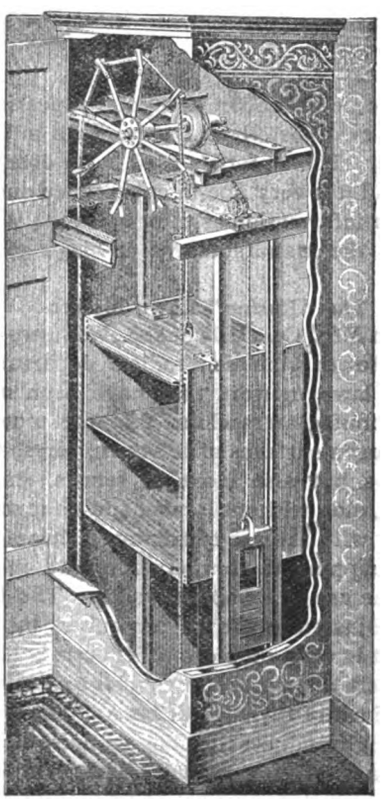


William G. Smith & Co., No. 1429 North Twenty-first Street, Philadelphia, are very successfully marketing their Columbian 1000-shot Air Rifle, an illustration of which we herewith give. This gun shoots one thousand times at one loading of the magazine, at a cost of ten cents. It is described as a triumph in magazine guns. It holds 1000 BB shot, and is very simple in its working. The parts are interchangeable, and can be replaced for a few cents, which is a new and valuable feature in air guns. The manufacturers describe it as very accurate, and a splendid article for target shooting. It is easily put together or taken

apart, and in style resembles a regular repeating rifle. It is packed in a neat paste-board case, with a list of parts and directions. The materials used in its construction are of the best, and it is very fine in appearance and workmanship. Further information as to prices, etc., will be found in the card of the manufacturers on page 46 of to-day's issue.

The "Racine" Lawn Mower.

The Lawson Mfg. Co., Milwaukee, Wis., are introducing a new Lawn Mower which is a radical departure from the usual style of lawn mowers that have been made in the past. The manufacturers claim that the mower will cut not only flat, even surfaces of the lawn, terraces and other difficult places, but also close to fences, shrubs, flower borders, trees, etc., without injury, and do it so effectually as to dispense with the use of trimming shears aud laborious work of clipping the borders of a lawn to finish it up. They avoid the use of a wooden roller. The bed-knife is pivoted and adjusted to the spider knives by set screws. Its adjustment is very simple and effective. The smooth wheel at the left allows the machine to cut within five-eighths of an inch of the edge of lawn. The single driving wheel at the right reduces the clicking noise to a minimum, avoiding all back lash or rattling. The handle is placed at

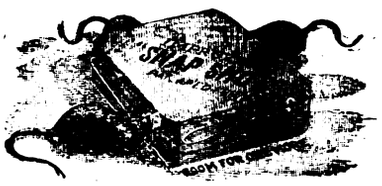


the right, equalizing the strain from the drive wheel. The blind wheel at the left is so arranged that it compels the operator to use the machine at an angle, that insures evenness in cutting the grass. The power required to operate this machine is much less than the old style with double drive wheels. Prices about the same as other high-grade mowers.

Sedgwick Automatic Lock Steel Dumb-Waiter.

The Sedgwick Machine Works, No. 86 Carroll Street, Poughkeepsie, N. Y., with New York salesroom at No. 110 Liberty Street, are placing upon the market the Automatic

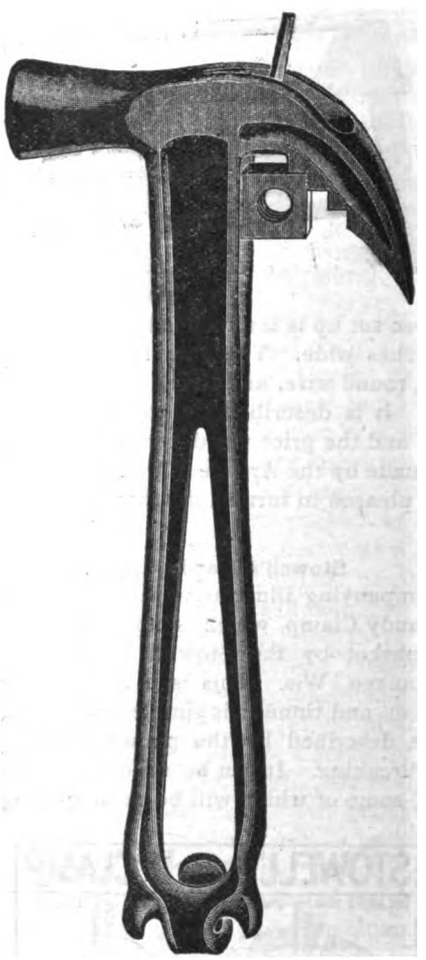
Digitized by Google



Lock Steel Dumb-Waiter which we illustrate herewith. The illustration shows it properly erected with door or panel in front of machine and studs back of rims, with the well either ceiled or plastered. The machines are claimed to be as nearly perfect as skilled labor and superior material can produce. All parts liable to break are made of steel. As steel rollers are used in every bearing, reducing the friction to the lowest possible point, they require but little oiling. The hand wheels have great holding power, the angled arms (pressed smooth in a die to fit the strands of the rope) prevent slipping and wearing of the rope, and also obviate the usual necessity for keeping the hand rope tight, greatly reducing the friction. The Automatic Lock Dumb-Waiter, when properly erected, is always locked except when pulling on the hand rope to raise or lower the load. The waiter and load being absolutely controlled automatically at any point without check rope, brake or friction, on account of the automatic lock, which is a patented improvement, located in the front bearing of the main shaft, the hand wheel acting as the key. It is always locked

except when a pull is made on the rope either to raise or lower the load. The shafting, hand wheel and pulley frames used in its construction are made of steel, and all bearings are fitted with steel anti-friction rollers to reduce the friction, the machine running easily, quickly and smoothly. As each machine is packed in a neat wood box, which includes the hand wheel, with full directions for erecting, it makes it a very desirable machine for Hardware dealers to carry in stock. Correspondence from dealers and architects. having reference to special requisitions, is desired by the company. A very complete catalogue, showing a large variety of dumb-waiters and elevators, will be furnished upon request, with prices on the same.

The "Snap-Shot" Mouse Trap.



"After all varieties of mouse traps are tried," says an authority, "the conclusion is universally reached that the trap that catches a mouse and quickly chokes it to death, is the most satisfactory and most humane method of exterminating the pests; and if the trap so disposes of several at a time, it is all the better trap." The "Snap-Shot" Mouse Trap patented and manufactured by John M. Mast, Lancaster, Pa., and now being sold by him direct from his factory to the jobbing trade without the intervening agent, is among the best of these choker traps, avoiding all the trouble in baiting and setting that has been the disadvantage of the old style chokers. This trap will now go on

the market to retail at five cents for four holes, with good profit to the jobber.

The Handy Hammer.

The Handy Hammer herewith shown is a new and serviceable article manufactured by the Ulrich Mfg. Co., Rock Falls, Ill. As will be seen by the accompanying engraving, this new article is at once a hammer, wrench, nail and

staple puller and wire splicer. It is made of the best malleable iron, is ten inches long and weighs one pound. It is handy whereever a hammer or wrench is needed. The claw is pointed to pull fence staples or spring keys. The nail pulling device is in front. The wrench is under the claw, and the wire splicer at end of handle makes a neat splice, saves wire and avoids injuring the hands in splicing barb or other wire. Address the manufacturers for further information.

Hartley & Graham, Nos. 313-315 Broadway, New York, have secured a limited quantity of genuine Spanish Mauser repeating rifles 7 m.m calibre, with knife bayonets and leather scabbards, also cavalry carbines, same as used by the Spanish army and largely by the Cubans during the recent war; and they will, within a very short time, be able to supply samples of these, together with Spanish Mauser cartridges, smokeless powder, to those desiring to obtain them. They can also supply samples of the U. S. Springfield rifle 45 calibre with angular bayonet, and cavalry carbines of the same description.

Review of the Markets.

Although the trade reports show a marked increase of business in some lines, it is felt that the rather unseasonable heat of the past fortnight has to some extent retarded the general volume of trade. A brisk demand has been anticipated, and September was expected to inaugurate it. That it will come, is assured, but that it would be delayed until there was some sign of cooler weather, was equally certain. The increase in prices of raw material has not, as yet, resulted in a general advance of completed products, as will eventually be the case, although some lines, such as wire nails, cut nails, glass and white lead are strengthening in tone.

Wire Nails: The market is firm and shows an inclination to strengthen. The local demand is fair, while that of the West is reported considerably brisker. The collapse of the strikes in some of the mills of the American Steel & Wire Co. is almost a foregone conclusion, many of the workers having signified their intention to resume at the desire of the owners. It is reported that jobbing stocks in general are light, and this, in conjunction with an anticipated increase in demand, is looked upon by manufacturers as a suitable opportunity for a slight increase in price in the near future to cover the advanced price on raw material. Prices, so far, remain the same as our last report: Carload lots at the mils, $1.30, f. o. b.; carload lots on dock at New York, $1.45; smaller lots from store, $1.55@$1.60.

Cut Nails: Local reports indicate more activity in the New York market, while conditions in the West remain about the same. While the demand in general is increasing somewhat, the prices remain about the same, though stronger in tone. Quotations are as follows: Carload lots on dock, New York, $1.20; smaller lots from store, $1.25.

Barbed Wire: Some improvement is noticeable in the barbed wire market. The export trade is brisking up, and is occupying the attention of the manufacturers, while the home demand is holding back somewhat. We quote New York prices as follows: Four-point galvanized, in carload lots, on dock, $1.85; painted wire, $1.55; smaller lots call for an increase of 5 cents.

Stove Bolts: A revised list of flat head stove bolts has been adopted by the manufacturers in order to correct the inequalities developed in the course of time between that and the list on round head. The discounts of 75 and 10 per cent. remain unchanged. The revised list is as follows:

STOVE BOLTS—FLAT HEAD.

Length.	⅛, 5-32 & 3-16	7-32	¼	5-16	⅜
⅜	$0.75	....	....	....	....
½	.75	$0.80	$0.85	....	....
⅝	.75	.80	.85	....	....
¾	.75	.80	.85	$1.20	$2.25
⅞	.80	.85	.90	1.30	2.30
1	.80	.85	.90	1.30	2.35
1⅛	.85	.90	.95	1.40	2.45
1¼	.85	.90	.95	1.40	2.45
1⅜	.90	.95	1.00	1.50	2.55
1½	.90	.95	1.00	1.50	2.55
1¾	.95	1.00	1.05	1.55	2.65
2	1.00	1.05	1.10	1.60	2.75
2¼	1.05	1.10	1.15	1.65	2.85

Joint or Oblong Nuts, Round Nuts, Double Cupped Nuts, Extra Thick and other special styles of Nuts made to order at special prices.

Glass: The American Window Glass Association, composed of the jobbers of New York, Philadelphia, Baltimore and Richmond, have announced an increase in price from 85 and 5 per cent. discount to 80 and 20 per cent. in orders of less than carload lots. Manufacturers' prices remain the same.

Linseed Oil: No change in linseed oil quotations has occurred since our last report. The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: Lots of less than 5 barrels, 34 cents per gallon; lots of 5 barrels or more, 33 cents per gallon. The latter price requires the

Digitized by Google

delivery of the quantity named at one time. Boiled linseed oil, 2 cents higher per gallon than raw. Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE OMAHA TRADE.

Angust trade has held its own in rather an unusual way, being considerable in advance of July business. The extremely warm weather appears to have had no effect whatever on business, which has pounded along at a steady gait, and made a most enviable record. The demand for all classes of merchandise has been exceptionally large and no line of goods appears to have been omitted. The unusually warm weather of the last two months has, to some extent, modified the ideas of our country friends in regard to the result of the corn harvest, which will, for this reason, fall somewhat below the estimates of thirty days ago. Outside the corn crop, which has been shortened by the dry weather, the harvest has been exceptionally large and the returns to the producer throughout the State will be unusually satisfactory.

Collections are above the average, and prices of staple goods are showing a decided tendency to firm up. The city is crowded with visitors to the Exposition, all of whom appear to be enjoying themselves, speaking in the highest terms of the beauty of the Exposition, and their enjoyment of the regular features, as well as the special entertainment which the management appear to be disposed to provide with a liberal hand for the entertainment of visitors.

RECTOR & WILHELMY CO.

THE PITTSBURG TRADE.

The best evidence that good times are coming is the fact that capitalists are ready to embark in new enterprises.

It is announced that another very large plate glass factory is to be built at once within a few miles of Pittsburg on the Allegheny River. This industry, already very large, bids fair to rival steel or any other in our midst.

County fairs are occupying the attention of our friends throughout the country at present. They are well attended, and while they last it is difficult for traveling men to get a hearing.

During the last day or two, while the thermometer ranged in the nineties, we have been mailing our fall and winter catalogue, asking orders for skates, sleds, horse covers, stoves, etc. We apologize to our merchant friends, but the date had come and catalogue had to go out without regard to weather. We shall hope for a speedy fall in temperature and consequent orders.

Our soldier boys are coming marching home and will gradually resume their places among the workers. Whether they succeeded in getting active service, or only lay in camp, they are entitled to honor for their willingness to go at their country's call. LOGAN-GREGG HARDWARE CO.

THE PHILADELPHIA TRADE.

The uppermost topic just now is the weather, and with the thermometer hovering between ninety and a hundred in the shade, the temptation to idleness and half-hearted business is very strong, and we can readily understand how the natives of warmer climes give way to idleness almost altogether.

A friend of ours, on his first visit to Florida, some years ago, emerged from his hotel one morning and found an able-bodied darkey stretched out on the grass half asleep at nine o'clock in the morning. Being an energetic business man himself, our friend accosted the darkey and asked how he could be idle at that hour of the day, to which the darkey replied: "Look a hyar massa! How long youse been down hyar?" "Just arrived last night," was the reply. "Well sah," came the answer, "when youse been down hyar as long as I has you will be sleepin' in the mornin' too."

It is rather encouraging despite this high temperature, business has been moving along with some signs of improvement, while all reports from manufacturing centres point towards an advance in the price of staples, owing to the increased cost in the raw material. Factories are generally busy, and it is confidently hoped that cooler weather will bring a very handsome increase in the volume of trade. It certainly looks as if the downward movement in price has been stopped, and as if all changes must show a tendency upward.

Another bright star in the outlook is to be found in collections, which show a decided improvement. On the whole, the gratifying reports published by the commercial agencies for August show that the number of failures during that month were smaller than in any month for years.

All of these indications give tone to the market and Fall trade, thereby, opens very encouragingly.

BIDDLE HARDWARE CO.

THE PORTLAND TRADE.

September opens with brighter prospects for New England trade than has characterized the business for the past six months.

The market is well sustained, and the trade have confidence to go ahead with more energy than they have been showing of late.

The agricultural conditions are very favorable and we are reasonably sure of good crops. This will put the farmers in condition to be more liberal than they have been for the past year, and now that confidence is restored, many of the building projects that were abandoned a short time ago will be started along.

Collections are rather poor.

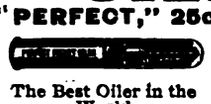
THE EMERY-WATERHOUSE CO.

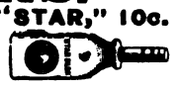
THE ALBANY TRADE.

The cold waves which have arrived, and the later ones promised by the weather bureau, together with the ending of vacation season and the settling down to business of most dealers, indicate a full resumption of business. The strength of the market in leading goods and the consolidation of large manufacturers, give considerable tone to the market. It has had a stimulating effect already, as is evident by the larger orders now coming in for immediate as well as future shipment.

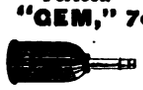
With nails a little higher, with the expected strengthening of screws, and a few other "straws" of this character, it is confidently expected that the dealers who are being supplied by the jobbers will buy rather more freely than in the past. The low prices of many manufactured articles are certainly a temptation to purchasers, and while no heavy advance may be made on the entire line of Hardware, yet it would seem from present indications that stronger prices will follow soon on many articles now being sold at very low figures. We count on a continued good trade, and believe our hopes will be realized.

ALBANY HARDWARE & IRON CO.



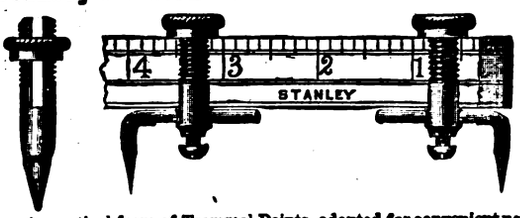


THE KANSAS CITY TRADE.



It is quite true that to "turn out" a "trade letter" to order, unless one feels particularly in the mood, is a difficult task. Now, if a fellow could sit down and "fire a letter" at you just when he felt "fired up," rather than have an unexpected summons reach him for immediate attention, the result would be better.

Under present circumstances, therefore, we are writing because we must. If our "muse" happens to be doing business to-day we shall hope to have the proper connection and combination necessary to relate our little story.



The merchants are by this time aware of the fall prospects. All over our territory, tributary to this market, the grains are harvested and "made." The corn yield, like that of wheat, is "spotted" and less than anticipated. Prices for cereals are fairly good indeed, and, strange to

Stanley's Patent Rule Trammel Points.

A practical form of Trammel Points, adapted for convenient use on a Carpenters' Rule. They can be attached to Folding Rules of any ordinary width; and on many kinds of work will take the place of regular Trammel Points, Calipers or Dividers.
A complete set, consists of two Brass Trammel Heads, with movable Steel Points, and one Head with a Pencil Socket.
No. 99. Rule Trammel Points, per set of three, in a box.....$0 50

say, we read often of the Kansas farmers refusing to sell this year's wheat crop unless given $1 per bushel.

Seeding conditions for the fall are very favorable indeed throughout the greater portion of this western region. This, with the present harvests assured, makes a buoyant feeling, which we are compelled to believe is to result in a lively trade.

August was duller than July, but September already gives evidence of the prevailing conditions, and the volume of trade is steadily now on the increase. Failures of any note seem to be rare; collections are "easy;" prices are steady and advancing on the staple lines, though not strictly maintained to the profitable limit justified by the market. This will always be the case.

GILLE HARDWARE & IRON CO.

THE COLUMBUS TRADE.

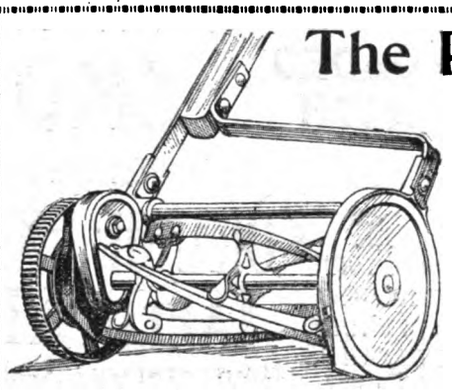
Trade is a little quiet, and it is not to be wondered at, as the weather has been too hot to try to do much. Last week was State Fair week, and it was a success as to exhibits and patronage; with rain enough one or two nights to keep the dust down. The grounds could not have been in better condition; but hot! Well, yes. You could see people that had melted and run all over themselves just like butter.

There have not been many changes in prices since your last issue. The dealers who read the trade journals no doubt have noticed the new list on flat-head stove bolts and nuts. The steel market is more firm and price on cut nails, wire and wire nails is higher. Manufacturers are not making small concessions as readily as they did thirty days ago.

Collections are not what we expected. Our customers say the farmers are not selling their wheat because the price is too low, and cannot pay their accounts until they do sell. Wouldn't it be a nice thing to carry that right through from farmer to manufacturer? The farmer is an independent cuss and pays when he pleases. Most of the country merchants cannot pay until they get what the farmer owes them. Now, if the jobber would say to the manufacturer that the farmer has not paid the country merchant and we cannot pay you, and then the manufacturer could tell his workmen that the farmer had not paid the country merchant and the country merchant hadn't paid the jobber and the jobber has not paid us, and we cannot pay you, and then the workman can sing the same song to his groceryman. Now, that would not be so bad because it has gotten around now to where the groceryman can get at the farmer. He can go through the list and come down to his customers who can't pay him, and, of course, he cannot pay the farmer for potatoes, corn, hay, etc. We cannot see why that wouldn't be a pretty good way to do business. You see we would not need any money at all, only to pay taxes and go to base ball games. If we thought we could figure the thing out on an equal basis we would go at it, but we fear we would get tangled up, so we leave it with some one else.

THE SMITH BROS. HARDWARE CO.

THE ST. PAUL TRADE.



In giving the present business situation here, we can only repeat in substance what we have said in former letters. The business for September bids fair to meet our previous expectations. A large number of customers are now in town, drawn here by the State Fair that holds this week. They are buying freely, and all of them seem to be confident that a prosperous business is before them.

The firm feeling manifested in the iron market is giving increased confidence to buyers, and cannot it be said that the increased confidence of buyers is giving a firmness to the iron market?

The usual after-harvest collections have not yet fairly commenced, and perhaps they will fall short somewhat of what might be expected in view of the large crop, owing to the fact that the price of wheat is not up to the expectation of the farmer, and that a good many will be inclined to hold their crop for a higher price. Yet the fact remains that money is generally plenty, and no great inconvenience need be apprehended from this cause.

Builders' Hardware is moving freely, both for city and country, all of which shows the general trend in the direction of Prosperity. C. W. HACKETT HARDWARE CO.

Where Germany Scores.

The following quotation from the report of Mr. Cusack-Smith, H. B. M. Consul in Samoa, shows why Germany is making such rapid strides in her foreign trade:—A high-class German commercial traveller has visited Samoa with excellent samples at really cheap prices, and obtained £2,000 worth of orders mainly from British traders. He will be three years absent from Germany, visiting the colonies. At each colony there awaits him a completely new and different set of samples suited to the particular colony, and he anticipates doing a very large business. The buyer's wishes as to special labels, trade marks, lengths, widths, trade terms, and commission are readily acceded to. This traveller declared that most or many of his goods were originally made in Manchester. The were ordered by German firms, and marked in Germany with German trade marks. On being told, "Well, then, you Germans get the credit for many things 'Made in Germany,' which you never make at all," his reply was, "That is quite true. The English manufacturers won't send out the goods, so we do it, and make the profits." This, again, points to the lesson so repeatedly given of the necessity of studying the needs of the foreign buyers. Study those needs; make the goods as the buyers want them, send out travellers who speak the languages of the people they visit, and who quote in the currencies and measures with which the foreign buyers are familiar, and the orders and the full profits will come to the British makers direct.—*Hardware Trade Journal, England.*

Varieties of Asbestos.

Manufacturers of asbestos goods are supplied for all practical purposes from four principal sources:—1. Canada, whence the asbestos is white, silky, very unctuous, having supple fibres from 5 to 25 millemetres in length. 2. Siberia, whence the mineral is yellowish, some species being of a straw yellow. 3. The Cape of Good Hope asbestos has a characteristic blue color. It occurs in larger masses than either the Canadian or Russian. 4. In Italy there are different kinds of asbestos, some with long silky fibres, of little resistance, employed for gas furnaces; while others are very short, and used only for making heat retaining coverings.—*The Iron and Coal Trades Review.*

To Test the "Bite" of a File.

In the matter of file testing, if one has the chance to "shove" the tool under working conditions, it is the best way to test the sharpness. But there is another way which is quite good, and within limits, is helpful to the buyer—although I learned it from a seller. This looks to the so-called "angle of repose" of a block of metal resting upon the file, while the latter is inclined to the horizontal. Thus, suppose we have two files, one of which will keep a flat metal block from sliding when it is at a certain angle; while the other, when it is inclined at a greater angle, will keep the same block still; then the second one will have the sharper teeth of the two. The maximum angle at which the file lies to the horizontal, while keeping the block in place through the "bite," does not quantitatively measure the sharpness of the file teeth; but it is a pretty good straw by which to judge the wind, and better than the usual thumb tests made over a store counter.—*Machinery.*

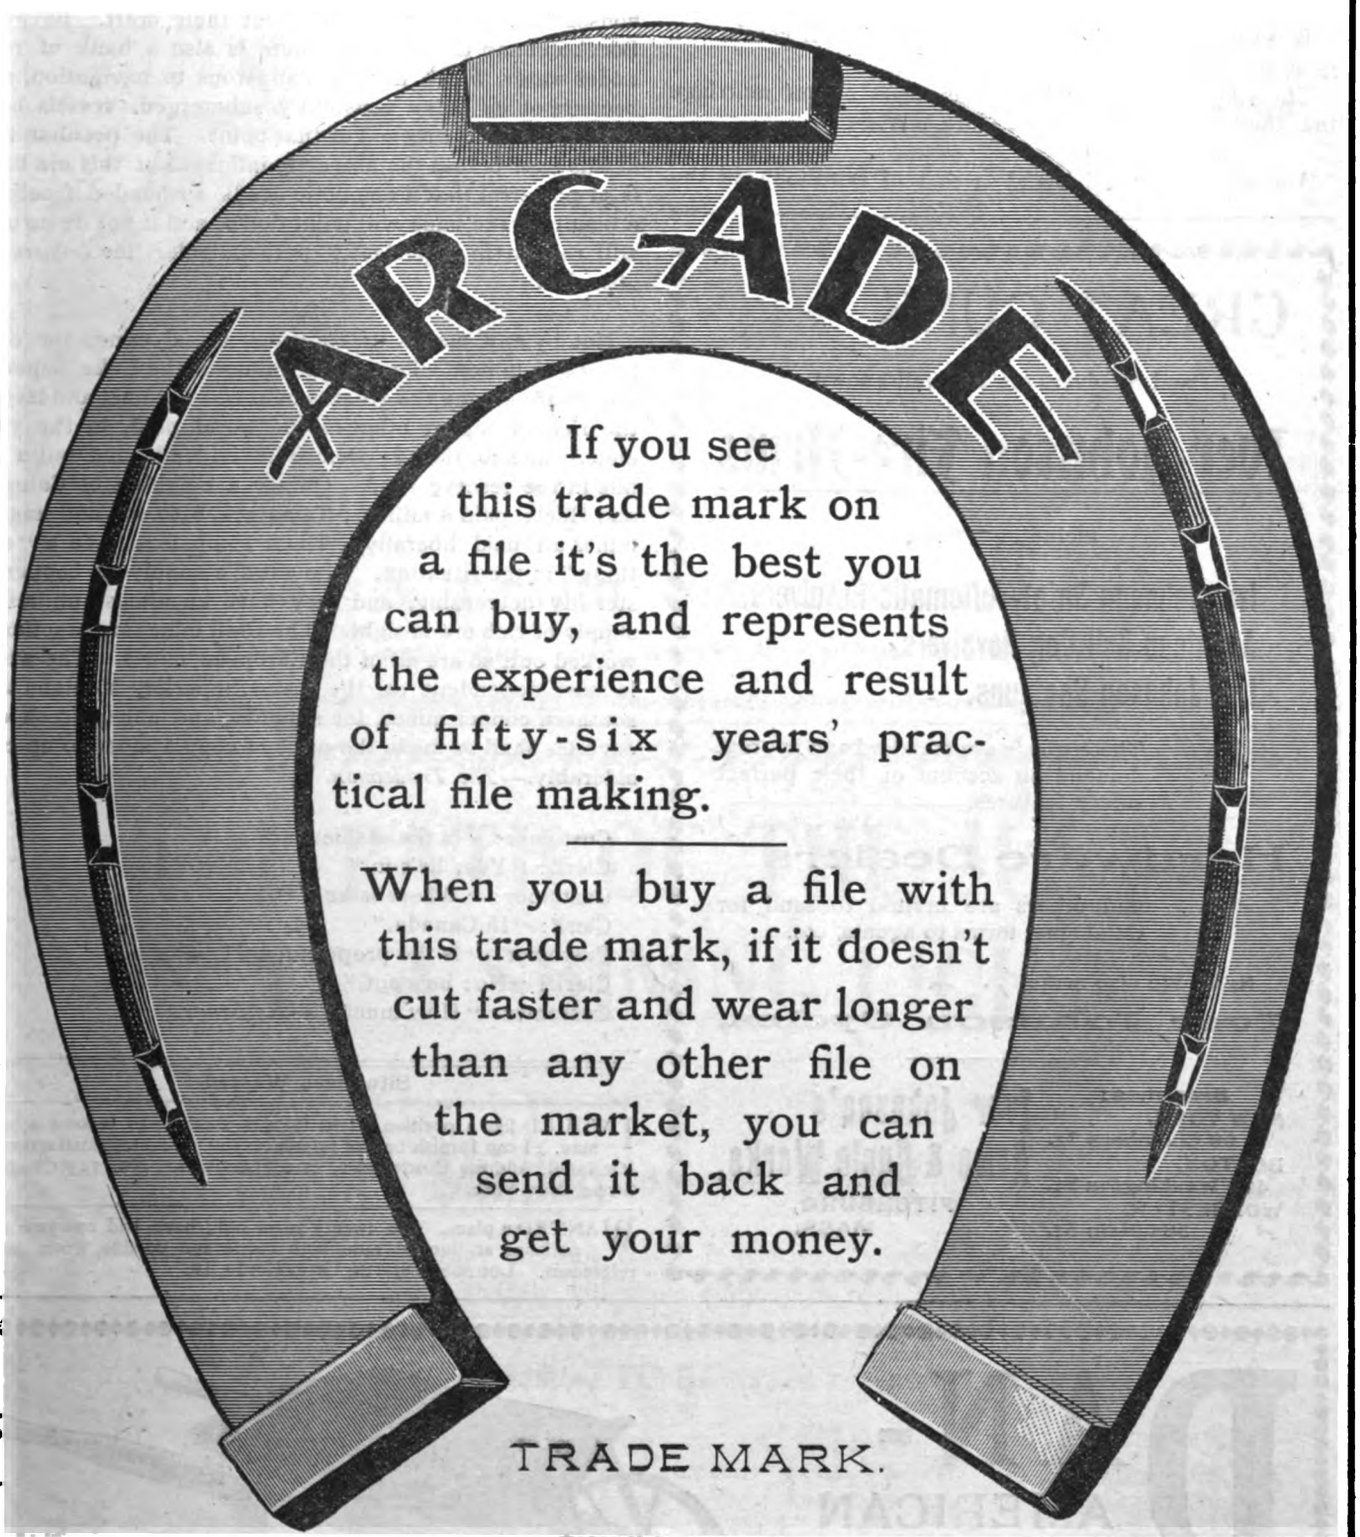
Took Him at His Word.

A plumber engaged a new journeyman who, although possessed of great talking powers, was woefully incompetent with his hands when practice was required of him. He was set by his employer to make an ordinary trap, and, after spending twice the usual time at the job, was so thoroughly ashamed of his own performance that he tossed the article under the bench out of sight and began the operation afresh with new material. His second attempt was almost as bad as the first, and was just finished when "the boss" came along. The latter eyed first the piece of work, then the workman, next spoke out in language painful and free, and finished with the withering sarcasm: "I'll put up your wages if you show me a more wretched piece of work than this." "Here you are, sir," returned the undismayed employe, pulling his first effort from its hiding-place and calmly placing it in front of his master.—*Ex.*

The estate of C. M. Robertson, Montville, Conn., recently lost by fire their boiler house. In order to obviate, if possible, a like experience in the future, they have decided to put up a thoroughly fire-proof construction in its place. The building will have steel framework, brick side walls, and an absolutely fire-proof roof, consisting of corrugated iron covering laid on the Berlin Iron Bridge Co.'s patent anti-condensation roof lining. Steel trusses will support the roof. The building is about fifty feet square, divided by a corrugated iron partition through the center, making a boiler room and pump room. The ventilation is obtained by monitors on the ridge of the roof, having sash on the sides. The Berlin Iron Bridge Co. are furnishing and erecting the steel work.

When your watch gets out of order you have choice of two things to do: throw it into the fire, or take it to the watch-tinker. The former is the quicker.—*Exchange.*

To be good is noble; but to show others how to be good is nobler, and no trouble.—*Exchange.*



Be good, and you will be—lonesome.—*Exchange.*

Sententious Sayings.

About the best way to get even with a man is to pay what you owe him.

When a couple are matched but not mated, it is a sort of friction match.

A young widow's health usually improves when her physician gets married.

Any man who can save money during his engagement can afford to marry the girl.

After a woman reaches a certain age she never mentions it.

It is easy to walk the tight-rope of society if you have a good bank balance.

The other half gets all the happiness out of marriage that the better half puts in.—*Chicago News.*

A most phenomenal island is that of Bornhohn, in the Baltic, belonging to the kingdom of Denmark. It is famous for its geological peculiarities, consisting as it does almost entirely of magnetite, and its magnetic influence is not only very well known to the navigators of those waters, but also much feared by them, on account of its influence on the magnetic needles, which makes the steering of a ship correctly a matter of much difficulty. In fact, this influence is felt even at a distance of miles, and so palpably that, on the island being sighted by mariners on the Baltic, they at once discontinue steering their course by the needle, and turn, instead, to the well-known lighthouses and other holds to direct their craft. Between Bornhohn and the mainland there is also a bank of rock under water, which is very dangerous to navigation, and because of its being constantly submerged, vessels have been frequently wrecked at that point. The peculiar fact in this case is that the magnetic influence of this ore bank is so powerful that a magnetic needle suspended freely in a boat over the bank will point down, and if not disturbed, will remain in a perfectly perpendicular line.—*Scientific American.*

Not by any means are precious metal mines the only profitable mines. The copper mines of the Lake Superior region are among the great bonanzas. Calumet and Hecla, the richest copper mine in the world, paid, in the year ended June 30, 1897, $4,000,000 in dividends, and put a big pile in the reserve fund. Quincy a neighbor of Calumet and Hecla, paid a million; Tamarack, $360,000, and smaller mines all paid liberally. These companies have a "soft thing" in the situation. The world's supply of copper is steadily decreasing, and they have an almost unlimited supply of rich ore in sight. The Chili mines are practically worked out, so are all of the European mines. The world is now dependent on the Lake Superior, Montana and southern copper mines, for supplies, and unless fresh discoveries shall be made the price of copper must go up considerably.—*The Tradesman.*

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Battle Creek, Mich.—The DuBois Hardware Co. has been incorporated with a capital stock of $15,000.

Butte City, Mont.—The Davis & Weimscary Co. has been organized, with J. E. Davis, A. J. Davis and J. F. Weimscary as principal stockholders. The new company has purchased the interest of Ras Rochester in the Butte Hardware Co., North Main Street, and will carry on business at that place. The management will be in the hands of Mr. Weimscary, who has had an extensive experience in that line and who for several years past has been the Montana representative of Hibbard, Spencer & Bartlett, of Chicago. The new company will greatly enlarge the stock and make the establishment the rival of any house in its line in this section.

Ogden, Utah.—The Boyle Hardware Co. has been incorporated with a capital stock of $10,000. They carry a line of Hardware, sporting and athletic goods, etc., and propose to do both a wholesale and retail business.

Changes and Improvements.

Bendena, Kans.—J. W. Fulton & Co., Hardware, etc., succeeded by J. W. Fulton.

Benkleman, Neb.—Ough & Barger, Hardware, etc., succeeded by King & Barger.

Fargo, N. D.—F. F. Brauer, the Hardware, furniture and harness dealer here, is the pioneer merchant of Harvey. He is about to have built a stone warehouse, 25x35 feet, and an addition to his store, 25x40 feet, two stories high, with a ten-foot basement. Gackle & Billigmier, Hardware merchants here, are soon to erect a new store building 24x80 feet.

Galesburg, Ill.—J. C. Toler, Hardware, sold to Kendall & Co.

Herkimer, N. Y.—G. P. Munson has closed his Hardware store in the Fox Block and will retire from business after nearly twenty years' service. The stock was purchased by J. M. Metzger, Metzger & Getley, and Silliman Bros.

Hornellsville, N. Y.—One of the oldest Hardware firms in this city has passed out of existence and the firm of Sheldon Bros. becomes that of Davis & Olcutt. This business change will made one less Hardware store in this city, as E. J. Davis will close his Seneca Street store and devote his time to his new establishment. Mr. Olcott is from Fonda and a stranger to most of our citizens, but in connection with such a hustler as Mr. Davis, there is no question regarding their future. The new firm will occupy the entire Sheldon Block and will fit it with a stock second to none in this section of the country.

Irvington, Ky.—McGlothlan & Piggott, the enterprising Hardware and implement dealers, have moved into their new building and now have one of the most attractive stores here.

Lebanon, Ill.—Jacob Striegel has retired from the firm of Stoffel & Striegel, Hardware merchants, and Mr. Stoffel will assume entire control of the business.

Port Deposit, Ind.—Stephenson & Reynolds, Port Deposit's enterprising Hardware merchants, are having their store thoroughly renovated. When the carpenters and painters finish their work it will look like a new establishment.

Princeville, Ill.—Minkler & Adams, Hardware, sold to Minkler & Harrison.

Riverside, Cal.—The Trowbridge Hardware Co.'s business, under the proprietorship of G. M. Piper, has grown in such magnitude since it changed hands that is remarkable, taking in account the partial failure of crops in the back portions of the county. Mr. Piper is giving his undivided attention personally to all branches and his close connection with Eastern firms gives him an advantage in buying goods that few possess.

Salamanca, N. Y.—C. E. Gallagher has opened the Gallagher store and is receiving goods which he is putting on shelves and arranging. Mr. Gallagher is agent for several Western manufactures of wagons, buggies and agricultural goods, who will send goods by the car loads, and make Salamanca a distributing point to re-ship in smaller quantities.

Topeka, Kan.—The stock of the W. A. L. Thompson Hardware Co. is being transferred four doors north. This storeroom has been extended back to the alley and is opposite the new wholesale building being erected.

Washington C. H., Ohio.—The Brown-Bare Co. changes its name to the Brown-Potter Hardware Co.

Wayne, N. Y.—George H. Savage is closing out his Hardware business in this village and arranging to return to Holley, where he will engage in the marble and granite business.

Waynetown, Ind.—Harvey Works, Hardware, succeeded by Harvey & Little.

West Acton, Mass.—Maynard & Nichols have purchased the Hardware, tin and stove business heretofore conducted by William B. Holt. W. L. Maynard the senior member of the firm, has heretofore conducted a successful Hardware business at Townsend, Mass.

Williamsburg, Kan.—R. G. Warwick has moved his Hardware stock into the building lately vacated by the removal of the C. H. Lee stock of Hardware.

Business Embarrassments.

Bloomfield, Ind.—Grant Gordan, dealer in farm implements, has made an assignment to S. W. Jarvis.

Brooklyn, N. Y.—Edward H. Richards, Hardware dealer, No. 2756 Atlantic Avenue, has made an assignment to George A. F. North.

Henderson, Ky.—The Banks Hardware Co., of this city, made an assignment for the benefit of creditors. The assets are estimated at $30,000, and it is believed the firm will pay all its indebtedness. S. J. Banks, the president, has been in ill health for some time.

Mobile, Ala.—D. C. Williams, dealer in Hardware, has filed a petition in bankruptcy.

Mt. Washington, Ohio.—James W. Corbly, dealer in groceries and Hardware, has made an assignment.

New Albany, Ky.—George H. Devol, stoves and Hardware, has filed a voluntary petition in bankruptcy. Liabilities, $8000; assets, $5000. He and his father have been in business, at the same stand, for fifty years.

Northport, Wash.—C. H. Williams, Columbia Hardware Co., made general assignment.

Springfield, Mo.—Irving C. Steere, dealer in Hardware on West Commercial Street, made a deed of trust to G. G. Lydy for the benefit of his creditors. Mr. Lydy is now in possession of the store as trustee. The debts will aggregate about $2600 and the assets will be, it is believed, sufficient to cover the liabilities. The stock will be sold at retail for ninety days, and if at the end of that time the indebtedness is paid the remaining stock will be turned over to Mr. Steere, if not it will be sold at public auction.

Waverly, Ill.—James H. Christopher and Frank Christopher, Hardware and implement merchants, filed petitions in bankruptcy in the United States District Court. The liabilities are $7500, and the assets $5500.

Burglaries in Hardware Stores.

Addison, N. Y.—Moore & Weatherby, $60.

Cambridge, Vt.—H. W. Gray, small loss.

Hillsboro, Tex.—Glenn & Rowe, revolvers, etc.

Pittsfield, Mass.—Barker & Belden, cutlery, revolvers, etc.

Sleepy Eye, Minn.—Klossner & Mueller, Hardware, store burglarized and a quantity of articles stolen.

Recent Fires.

Le Roy, N. Y.—E. H. Buell, Hardware, damaged by fire.

Waxahachie, Tex.—W. A. Briggs, implements and storage house, damaged by fire.

Miscellaneous.

Detroit, Mich.—Geo. G. Bogue and James A. Whiting, formerly members of the Fletcher Hardware Co., have severed their connection with that firm. Mr. Bogue is now connected with the Standart Bros., wholesale Hardware company, and Mr. Whiting is cashier of the Detroit City Gas Co.

Fort Collins, Colo.—George Stidger of Denver, counsel for the creditors, applied to Judge Boughton for the removal of Benjamin W. Coleman, assignee of H. L. Decker, a Hardware dealer of Eldora, who assigned recently. The petition was granted.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Albany, N. Y.—The Albany Foundry Co., incorporated with a capital of $50,000, and will take over the old Perry stove foundry plant on the island south of the city. The company will manufacture iron and other metal castings. The capital stock is divided into $100 shares and the directors are: Frank White and John D. Green, of this city, and Andrew McNamara, of Troy, each of whom subscribes for ten shares of the stock.

Bradley, Ill.—Eureka Steel Mfg. Co. has been incorporated for manufacturing purposes.

Chicago, Ill.—The Crescent Specialty Mfg. Co., capital, $2500; to manufacture Hardware specialties.

Cleveland, Ohio.—The National Mfg. Co., has been incorporated with a capital stock of $100,000, to manufacture bolts and nails.

Geneva, N. Y.—Geneva Steam Heating Co., has been incorporated by Frank E. Smith, T. H. Chew, Samuel Southworth. Capital stock $30,000.

Louisville, Ky.—The Auxier Plow Works, with $2500 capital, with privilege to increase to $10,000, filed articles with the Secretary of State. J. D. Auxier, Thos. Voorhis and G. B. Stapleton are among the incorporators.

Owatonna, Mich.—The Washington Tool Co. filed articles with a capital stock of $20,000. The name of the new concern indicates the nature of its business. The following are named as incorporators: George B. Hossfield, George W. Hastings, Oliver N. Olson, Willis Sperry, Silas E. Ware and O. P. Johnson.

San Francisco, Cal.—Economy Smokeless Furnace Co., has been incorporated by John C. Howard, Henry C. Richards, Douglas R. Wilson and others.

St. Mary's W. Va.—The American Drilling Tool Co. has been incorporated by W. P. Kingsbury, H. P. Boyle, A. J. Boyd, D. W. Reynolds and M. D. Hanes. Capital stock $50,000.

Changes and Improvements.

Batavia, N. Y.—The Johnston Harvester Co. has just placed an order with a number of the leading steel producing concerns of the country for 3500 tons of steel to be used in the factory. The total cost of the consignment will be $100,000.

Birdsboro, Pa.—The Brooks Iron Co., nail factory and plate mill, has resumed operations, after being idle for some time.

Birmingham, Ala.—A steel wire and rod mill costing $500,000 will be built by members of the Illinois Steel Co. and kindred concerns, at Ensley City, in the near vicinity of the big steel mill now in the course of erection. The new mill will manufacture wire, rods and nails for export purposes exclusively.

Chicopee Falls, Mass.—The J. Stevens Arms & Tool Co. have found it necessary, in order to catch up with orders, to run a gang of men nights. About fifteen men work all night. The company employ at present about one hundred and twenty men. They expect to build an addition to their plant in the near future. This is the busiest time of the year, as they are preparing for the fall demand of rifles. They have recently shipped rifles to India, Africa and England.

Glasboro, N. J.—The DuPonts recently purchased a large tract of land adjoining their powder works at Gibbstown, and it is said they are about to enlarge their plant to three times its present size, making it by far the largest in the United States. They will manufacture smokeless powder.

Kansas City, Mo.—The John Deere Plow Co. has taken out a permit to build its $25,000 annex to the warehouse at Nos. 1312–22 Hickory Street. The company's rapidly increasing business has compelled it to enlarge and it will have the second largest floor area in the implement business in Kansas City.

Terryville, Conn.—The Eagle Lock Co. will soon begin the erection of a new four-story building. Work on the iron house extension is being hurried to remove the stock when part of the main building will be torn down to make room for the new shop. The new building will be of brick and will be 40 by 60 feet in size.

Recent Embarrassments.

Cincinnati, Ohio.—A deed of assignment has been filed in the Probate Court by Wm. Resor & Co., stove manufacturers, on State Avenue. The business was established many years ago by Wm. Resor, Sr., and as his sons grew to manhood they were admitted to partnership. For years they did an immense business and were rated as one of the first concerns in their line in the country. Prior to 1893 they had become indebted in various ways, and since then they have been paying off their obligations. In doing so they drew too much upon their resources, and the business was necessarily crippled. They struggled hard to tide over the hard times, but found they could not do so, and decided to make an assignment for the purpose of straightening out the tangled affairs and reorganizing the concern on a sound basis. The assets are $80,000 and the liabilities $36,000. Deeds were also filed by the individual members of the firm. The assignee of the individuals is Morrison R. Waite, and of the firm the Union Savings Bank & Trust Co. The assets of Wm. Resor, Jr., and I. Burnet Resor are $60,000 and liabilities $20,000 each. The assets of Chas. H. Resor are $15,000 and his liabilities $6000. The individual members of the firm own real estate to the amount of $135,000, on which there is an incumbrance of $46,000. Part of this property is held jointly by them and part of it separately, but all independent of the firm.

Recent Fires.

Jackson, Mich.—Crawford & Lampton Bros., manufacturers of Pope's side harrow, and one of the largest industrial concerns in Jackson, was destroyed by fire last week.

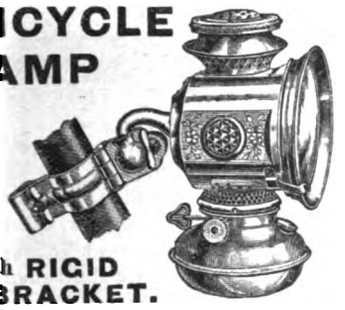
Miscellaneous.

Chicago, Ill.—The plant of the Chicago Stamping Co. was sold by the sheriff recently to Frank Sturges for $75 000. Sturges holds a $240,000 judgment against the corporation, the validity of which is as yet undecided by the courts. He gave a bond of $60,000 for the return of the property in case his judgment should not be sustained. It is understood Sturges will proceed with the manufacture of about 5000 unfinished bicycles which are a part of the corporation's assets.

New Haven, Conn.—The Winchester Repeating Arms Co., of this city, is still running on a twenty-four-hour schedule, and will continue to do so indefinitely. The Marlin Fire Arms Co. started in on a twelve-hour schedule to fill a number of big orders for sporting guns and rifles.

Providence, R. I.—The American Screw Co. has shut down it factory at the corner of Eddy and Henderson Streets for a month to allow time for repairs on the factory's large chimney and flues.

Reading, Pa.—The Chantrell Tool Co. is busier than ever they were before in August. The orders that are now on hand for various articles they manufacture will keep the plant running full-handed for some time to come. Large shipments are being made daily of axes, hammers, etc. Bicycle chains and sundries are also being made in large quantities.



Toledo, Ohio.—The Toledo Machine & Tool Co. held its annual meeting recently and the following officers and directors were elected for the ensuing year: E. P. Breckenridge, president; G. F. Donaldson, vice-president; G. M. Acklin, secretary and treasurer, and H. J. Hude, superintendent. Directors: E. P. Breckenridge, E. W. Tollerton, J. D. Robinson, G. M. Acklin, and G. F. Donaldson.

Tyron, Pa.—At a meeting of the citizens and stockholders of the Burley Heater Co., the committee appointed at a former meeting reported that the total amount of lots and stock sold by them amount to about $7500, being about one-half the amount needed to put the company on a good paying basis. The report was received and the committee continued until the balance needed could be provided for. The stockholders present proceeded to elect a board of directors, which resulted as follows: G. H. Burley, Joshua Burley, T. T. Shirk, D. H. Haagen, R. A. Wilson, G. L. Owens and H. G. Elder, with power to elect officers of the company. After the adjournment of the meeting, the board of directors elected the following as officers: President, G. H. Burley; vice-president, T. T. Shirk; secretary, H. G. Elder; treasurer, R. A. Wilson.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Gadsden, Ala. — The Bon Ton Livery Stable has decided to handle bicycles for rent in connection with the livery business.

Camden, N. J.—The Gentry Gear & Wheel Works; to manufacture bicycles, with an authorized capital stock of $50,000. The incorporators are: O. H. Gentry, J. E. Blackman, Chas. Halldane and F. S. Halldane.

Chicago, Ill. — Avery & Jennings Co. Capital, $10,000; to manufacture bicycle specialties.

Chicago, Ill.—Bestede Pneumatic Tube Co. has been incorporated; to manufacture tubing. Capital stock, $100,000.

Changes and Removals.

Bloomfield, N. J.—Coggeshall & Smith, bicycles, etc., reported to have dissolved partnership.

Boulder, Colo.—Thomas Hussey, bicycles, succeeded by Boulder Bicycle Co.

Chicago, Ill.—The American Cutlery Co., Nos. 175 to 193 Mather Street, have opened a department for the manufacture of bicycle pedals.

Denver, Colo.—Hart Bros. Sewing Machine Co., sewing machines and bicycles, No. 730 Sixteenth Street, selling out bicycles, to make more room for their sewing machine business.

Erie, Pa.—Contractor Henry Shenk is now building an addition to the plant of the Black Mfg. Co., which will call for the expenditure of about $9000. The company manufactures the Tribune bicycle, and the present extensive buildings are not large enough to permit the company to keep up with the orders, hence the enlargement. The new building will adjoin the present shop buildings at Nineteenth and Liberty Streets. It will be 120 feet long and 45 feet wide, three stories high, and will be constructed of brick, stone and iron. The arches, roof and other parts of the building will be of iron. The contract calls for the completion of the building the first week in October.

Hartford, Conn.—John F. Barnett, bicycle repairer, reported sold to C. H. Hurd.

Keokuk, Iowa.—G. L. Ackerman, sporting goods, succeeded by J. H. Woodburry.

Lake City, Colo.—J. J. Browning, bicycles, moved to Rocky Ford.

Louisville, Ky.—Emil Pragoff, sporting goods, succeeded by Pragoff Bros.

Minneapolis, Minn.—Schramm & Meyer, bicycles, reported to have dissolved partnership.

Paso Robles, Cal.—Smith Bros., bicycles and jewelry, succeeded by C. S. Smith.

Springfield, Mass.—H. M. Pierrepont has rented S. B. Call's bicycle repair shop and is equipping it in a first-rate style, and will be in a position to do all kinds of repairing.

Worcester, Mass.—R. Washburn, bicycle supplies, reported to have sold out.

Recent Embarrassments.

Findlay, Ohio.—The bicycle store of C. C. Van Tine was taken possession of recently by Deputy-Sheriff Wright on an execution in favor of the American National Bank for $500. The judgment was taken in Wyandot County.

Grand Rapids, Mich.—The Machine & Cycle Co., manufacturers of bicycles, filed trust mortgages recently. The company had been in operation less than one year. The failure is ascribed to the falling off in business caused by the war. Creditors are protected to the amount of $2000.

New Britain, Conn.— Senf & Hadley, sporting goods, reported to have made an assignment.

New York, N. Y.—On the application of D. H. Barker Judge McConnel has appointed J. L. Foust receiver of the New York Bicycle store at No. 127 East Eighth Street. It appears that Mr. Barker is one of the directors of the company, which was chartered some months ago under the name of the New York Bicycle Co. Mr. Foust qualified as receiver and has taken charge of the business. Chancellor McConnell has authorized him to convert the property on hand into cash.

Racine, Wis.—The Charles H. Seig Bicycle Mfg. Co., Elmer Week and Attorney Fisher, of Kenosha, appointed receivers. This was done on the petition of the Morgan & Wright Tire Co., of Chicago. The bond of the receivers was placed at $200,000. The court ordered that pending official proceedings, the receivers proceed to convert the stock for the market. There is $40,000 worth of the stock on hand. When this is made up the plant will be offered for sale by the receivers.

Miscellaneous.

Buffalo, N. Y.—A Cleveland inventor has originated a device to fasten the handle bars within the head, with the intention of making a neat finish for the top of the steering head. He attains his object by a split plug within the handle bar steering head, tightened by a screw elongated to issue between the forks at their head, in a square nut. An Illinois inventor provides for a speed changing device allowing three variations. A lever worked by the foot throws the mechanism into play, and provides for an ordinary gear for road riding, a low gear for hill climbing and for throwing off the gear when coasting The hands are always left free for guiding the wheel.

Buffalo, N. Y.—All the tools fixtures, appliances, furniture, etc., of the Superior Cycle Co., whose plant is at No. 1453 Niagara Street, were sold for the benefit of the firm's creditors by Charles Newton, attorney, for John F. Nagle, the assignee, The property was bid in by Charles Callahan, but the consideration was not made public.

Buffalo, N. Y.—Deputy-Sheriff Burns sold the plant of the Iroquis Cycle Mfg. Co., No. 393 Broadway, to satisfy an execution of $790.45, filed against it by William Hellriegel. Six bicycle men bid on the property. The first offer was about $200. It was finally sold to Mr. Hellriegel for $790. Deputy Burns said the plant was worth about $4000. An execution of $2826.09, filed against it by the Union Bank, and one of $54 80, filed by the Shelby Steel Co., were returned unsatisfied.

Cleveland, Ohio.—Rate cutting and the general demoralization of the trade has caused the bicycle repair men to organize. A meeting was held at No. 32 Ontario Street recently. It was attended by about twenty-five of the leading repair men in the city. A temporary organization was formed by electing W. H. White, president, and Chas. Willard, secretary. It was then decided to suggest the advisability of having the board of consuls of the L. A. W. conduct an examination and indorse about twenty shops around the city as "L. A. W. repair shops." Steps will be taken to fight the department stores which sell bicycle sundries at cut rates. Definite action was postponed until the consuls of the L. A. W. reported on the practicability of the scheme.

Jacksonville. Fla.—Louis J. Hathans, bicycles, No. 323 Laura Street, store robbed, and $30 in cash taken.

Springfield, Mass.—The Warwick Cycle Co., assignee has nearly completed the work of putting all stock, which was on hand at the time of the assignment, into wheels. There is no truth in the reported offer of New York capitalists for the big bicycle plant.

Washington, D. C.—Canadian wheelmen and wheelwomen regard with apprehension a proposal to manufacture heavier wheels for the season of 1899 Consul M. J. Burke reports that 30-inch wheels are likely to be made and at a higher price. Modifications are also promised in bearings, adjustments, sprockets, cranks and enaamel; and the '99 models are likely to be prettier than those of '98. It is not known exactly what the machines of the '99 pattern will weigh, but if accounts are true, they will be one pound and perhaps two pounds heavier than the wheel of to-day.

NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

In favor of the

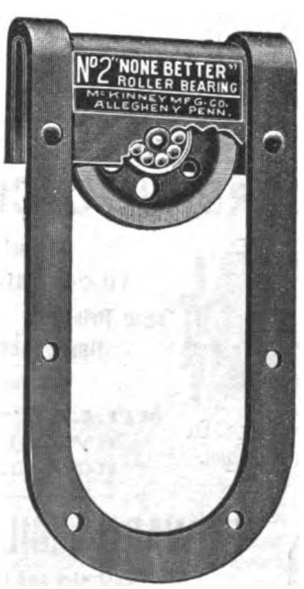
Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.

This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.



Respectfully,

CARY MANUFACTURING CO.

Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.

CHAMPION MODEL.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. List, per doz., Enameled, $30.00; Full Nickel, $42.00.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

THE
WM. SCHOLLHORN CO.,
NEW HAVEN, CONN.

AGENCY **JOSEPH RODGERS & SONS, LTD.**

THE BEST IS EVER AND ALWAYS CHEAPEST.

The merchant can recommend with confidence.
The consumer will report superiority.
Excellence will insure enlarged demand.
Satisfaction will leave no ground for complaint.

Why, then, sell inferior Cutlery when

THE VERY BEST

can be had at a small advance over poorer

QUALITY?

FOR CENTURIES THE WORLD RENOWNED HOUSE OF
JOSEPH RODGERS & SONS, LTD.,
SHEFFIELD, ENGLAND,

Has had neither equals nor superiors in the manufacture of

CARVING KNIVES and FORKS,
TABLE CUTLERY,
SCISSORS,
RAZORS,
HUNTING and BOWIE KNIVES
POCKET CUTLERY, &c.

Its Corporate Mark

Is among the oldest, and now over 200 YEARS old. It is known the world over as a guarantee that all articles so stamped are absolutely superior to all others.

We are the sole agents in the United States for JOSEPH RODGERS & SONS and carry a full line of their manufactures in stock.

If you cannot procure goods of their make from your jobber we shall be pleased to supply full information on application.

The ROOT BROS. CO, Plymouth, O.

CELEBRATED "HEINISCH" SHEARS.

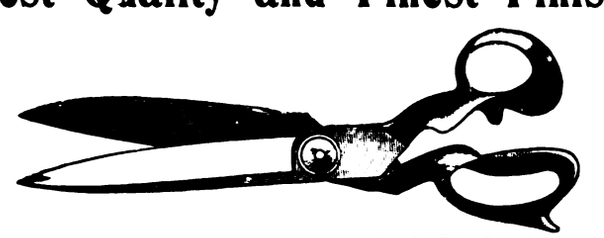
Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name HEINISCH or H. C. HEINISCH on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,



NEW YORK OFFICE:
90 Chambers St.

R. HEINISCH'S SONS, CO.
NEWARK, N. J.

WHEN YOU WANT THE

Best Quality and Finest Finish

SHEARS, SCISSORS & TINNERS' SNIPS

Factories: Palmer, Mass. Worcester, Mass.

GENERAL OFFICE, WORCESTER, MASS.
WESTERN BRANCH, CHICAGO, ILL.

S. H. HARMAN, ... BLOOMSBURG, PA.

MANUFACTURER OF . .

Curry Combs and Sheet Metal Goods. . .
Solid Steel Spout Machine Oilers and Roller Skates.

It will pay to write us for samples and prices.

SURPLESS, DUNN & CO.,
SOLE AGENTS.
55 Warren St., NEW YORK.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

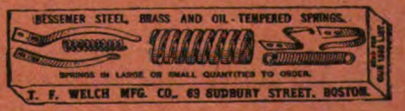
It is made of Heavy Tinned Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices. It will gather Apples, Peaches, Pears, &c.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price per dozen, $5.00. Liberal discount to the trade.*

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.



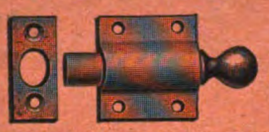
AMES SWORD CO.,

CHICOPEE, MASS.

MANUFACTURERS OF

Endless Silk Sewed Strapping Belts.

Correspondence Solicited. Discounts Quoted.



GALVANIZED

Chain Pump Tubing.

. . . . Better than wood tubing because clean, wholesome, light and indestructible. In lengths of 4, 5, 6, 7, 8, 9 and 10 feet. Write us for sample and prices.

LIGHT HEAD S

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

HIT THE PIPE

as hard as you like with chisel or mallet and observe that the surface finished with simply one coat of our

ELASTIC IRON ENAMEL

is scarcely marred. It also withstands a high degree of heat; in truth it is as nearly indestructible as it is possible to make a varnish. For smoke-stacks, fire-place casings and stove-pipes

ELASTIC IRON ENAMEL has no equal.

The accompanying cut represents a miniature stove-pipe finished with one coat of

ELASTIC IRON ENAMEL.

We send these display pipes with dealer's orders for this specialty. Pints, half pints and quarts are its most salable packages.

A MATTER OF CONFIDENCE

Buying Solder is largely a matter of confidence. No living man can tell by sight whether Solder is "½ and ½" or whether it is something else. "Straight Solder" looks exactly like Solder which isn't straight. A buyer is wholly at the mercy of the manufacturer. "Straight" Solder is easy to make. No secret about it. Half is tin and half is lead. The "½ and ½" Solder we make is no better than that made by any other reputable manufacturer. Actual quality is what makes price. When a so-called "½ and ½" Solder is offered at a lower price than we ask, the chances are that instead of being half tin and half lead, there is less expensive and less desirable material in it. We never have and we never will resort to deception in order to make prices small.

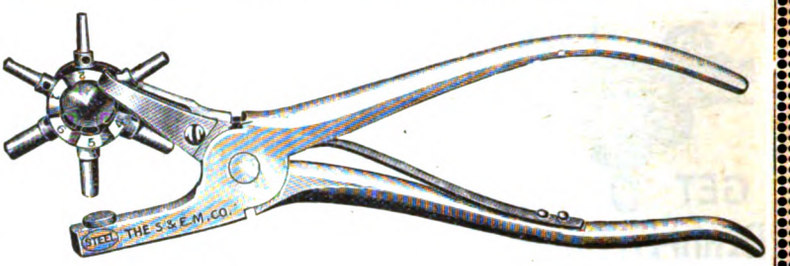
"Bright and Newsy."



Biddle Hardware Co., Philadelphia, Pa. [*General Hardware and Bicycles*]: In season and out, we have claimed that the Hardware trade was the proper medium for the disposal of bicycles and bicycle sundries throughout the country, and our opinion on this point is so well known, that it does not seem as if we could strengthen it materially by saying it again. Of course large cities may be able to support a few exclusive bicycle men, but in the majority of towns and cities throughout the country the man must have other business in order to make it pay. We appreciate the fact that from the first HARDWARE has held the same views, and we think they have been fully justified by the trend of events. HARDWARE is always welcome in our office, and its bright and newsy columns are often a relief amid the cares of business.

HARDWARE

VOL. XVII. SEPTEMBER 25, 1898. NO. 12.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

It is a remarkable illustration of the power of adaptability grained in the American character that, although peace with Spain is by no means concluded, and there are prospects of difficulties with that power before a treaty shall be ratified, the assumption is general that the Spanish-American war is a thing of the past, and people everywhere are going ahead with their business arrangements as though no such power as Spain existed. This feeling may be justified by events, as in all probability a firm stand on the part of our government and the Peace Commission will compel Spain to accept our terms, and relinquish all the territory, wherever it may be situated, that we may demand.

The advent of peace has not been heralded by any boom in business, and those who have the best interests of the country at heart, sincerely hope that there will be no spasmodic rush, either now or in the immediate future, which shall be followed by reaction and a disappointing stagnation.

In the Hardware line there has been a slow but steady increase of business during the past two weeks, and the merchants and manufacturers both find themselves fully as busy as they had expected to be, and almost as busy as they would like to be. There are indications in all directions that heavy calls are being made upon the stocks of the jobbers, and the great majority of orders are accompanied by requests for immediate delivery showing that the shelves of the retailers are quite low, and that the consumers, who are getting good money for their labor and products, are beginning to buy. There has been a healthy reaction in the West over the dullness that prevailed during the recent hot weather. In the Far West, it is yet a little early for the full volume of fall trade, but there is even now a good demand, with the indications in favor of an early increase. It is reported from the Pacific Coast that there is an improvement in collections, that prices are well maintained, and that things are looking well for the future.

In the Middle States, we learn that September promises to be a first-class month in all respects, that prices are firm, and that there is a steady tone in the market for staples. Like reports come from the South, while in New York the jobbers report themselves as fairly busy.

Taken all in all, the indications for the future are as hopeful as they have been for several years past, and the expectations of conservative business men in regard to the present season, are being fulfilled. Those whose imaginations travel in advance of their judgment, may meet disappointment because things have not been carried off with an hurrah. Their disappointment, however, is really a matter over which the people at large should feel a satisfaction.

American Machinery Abroad.

Yankee ingenuity has not only demonstrated itself in battleships, naval machinery and guns during recent times, but is also complimented in the highest degree by the great demand being made from all parts of the world for high-grade instruments and machinery. It is especially in connection with delicately constructed machinery which must be operated thousands of miles from the place of construction, that America has won the confidence and regard of the world at large, both as to quality of material and faithfulness of construction.

During the past year large orders have come to American manufacturers for the finest kinds of machinery, such as telegraph instruments, electrical machinery, sewing machines, printing presses, musical instruments, fire engines, shoe manufacturing machinery, etc., and a report from the Bureau of Statistics shows that goods of this character to the value of over $50,000,000 have been sent by us during the year past to all parts of the world. In other words, a million dollars a week has been paid by foreign nations to the United States for the products of the above described character. These orders come not only from such great countries as England, Germany and France, but are also received from India, China, Japan, Persia, Spanish Oceanica, Africa and Asiatic Russia. As one writer has well said: "Japanese fingers manipulate our typewriters, Chinese feet and hands give motion and life to our sewing machines, skilled operators in the great European centres communicate with others in distant parts of the world with our telegraph instruments, and the natives of Africa, India and Oceanica disport themselves on our bicycles. Complicated instruments from our workshops are carried to the opposite side of the globe and to inaccessible and sparsely populated parts of the earth in a calm confidence that in inexperienced hands they will perform and continue to perform the duties for which they are constructed."

The demand for American machinery of all kinds has steadily increased during the past several years, and is bound to largely increase in the near future, through the tremendous advertisement which America has received by its conduct of the recent war. For

Digitized by Google

years this country has exported from two to three million dollars' worth of sewing machines alone, and in this direction the figures of the past year range far above the average. The same can also be said of typewriters and bicycles, the exportation of which ranges into the millions. This is a hopeful sign, and if American manufacturers exhibit in the future that rare judgment and push which have been noted in the past, the fruits of industrial activity to be gathered during the next decade will be far in excess of any time in the past.

Organization At Home and Abroad.

It is with pleasure we learn that members of the Hardware associations of the various States look with very marked favor upon the proposition for the formation of a National Retail Hardware Association. The various letters from leading members of the trade, which have appeared in recent issues of *Hardware*, have called very marked attention to this subject, and more than one State Association will, during the meetings of the present fall and winter, take up the subject in earnest, and bind themselves to further the matter so far as within their power lies. The general opinion seems to be that a national association, to be successful and effective, should be composed of delegates from the various State associations, rather than of individual members taken haphazard from the trade. This would give each delegate, or member, a large and powerful constituency for which to speak; make the deliberations of the national association more interesting and varied; and give a powerful effect to its decisions. There is little doubt that this movement will crystallize into effective shape before the spring of 1899, and we hope to see, before that year is ended, a solid, compact and powerful organization of the retail Hardwaremen —covering this field as thoroughly and with such grand results as have been achieved through the National Association of Jobbers.

This work of organization has been taken up effectively, and we hope with success, in London, as has been outlined through recent numbers of *Hardware*.

The *Hardwareman* of London is at work vigorously for the furthering of a proposition to establish a Hardware club in London. In a recent issue, it published communications from several leading Hardwaremen, who express themselves as in favor of the movement, but who, unfortunately, give voice in several published letters, to very serious doubts as to the success of the movement. One writer says that he has been entertained in the Hardware Club of New York, is personally acquainted with several of its members, and declares that a similar institution in London, Birmingham or Sheffield would be a good thing "if it could be successfully conducted." He dwells, however, altogether too much upon the little word "*if*," and thinks that the absence of a spirit of comradeship would be one of the strongest obstacles. He bases this opinion upon the fact that class feeling, which is much more pronounced in England than in America, would tend to prevent the club being run on thoroughly broad lines. Another writer declares that, as intercommunication between the various members of the trade is advantageous, the Hardware club would be a great advantage *if* it were made use of, but adds that the immense size of London, and the long distances between the various places of those engaged in the Hardware trade, renders the idea rather impracticable.

We would say to our friends of London that, while publication of views of the trade is a good thing, the surest way to kill the movement is to give too great a prominence to objections such as are cited above. When the Hardware Club of New York was conceived, and while those having it in charge were vigorously at work in its behalf, objections of all sorts were raised by timid and obstructive members of the trade, all of which have been answered or brushed aside by the magnificent success which the club has already achieved. The surest way of doing a thing, is to go ahead and do it; and our English friends will find that the only way to create a club, is to get the members of the trade together, decide upon a plan of organization, and push it to success as rapidly as possible. After the club has once been established, the small difficulties will disappear, and the members of the trade will find that they have reaped a golden harvest of comradeship and fraternal good will, that could have been garnered in no other way.

The fact that British imports into the United States have fallen off greatly in the past year, while American exports to Great Britain have greatly increased, has been announced from time to time during the year, but the full year's figures, just presented by the Treasury Bureau of Statistics, bring to the surface some interesting details not heretofore published. These show that while the exports from the United States to the United Kingdom have increased twelve per cent., the imports from the United Kingdom have fallen off thirty-five per cent. The exports from the United States to the United Kingdom during the past year were in round numbers five times as much as the imports from the United Kingdom, the figures of the Bureau of Statistics being: Imports from the United Kingdom, $109,138,365; exports to the United Kingdom, $540,860,152.

The interest in the business opportunities offered in Cuba and Puerto Rico, which is felt by the business men of the United States, is shown by the large number of letters on that subject now being received by the Treasury Bureau of Statistics. These come from all parts of the country, but especially from the great manufacturing, producing and business centers. The inquiries are generally for statistics as to the imports into those islands, the purpose evidently being to determine the class of articles demanded and the countries from which the supplies have been drawn in the past few years.

An Impossible Possibility.

The editor sat in his splint-bottom chair—
Oh, Ho!
His heart, it was heavy, and so was the air
With the blue circling mists of profanity there—
Ho, Oh!
For the amateur poets—at last—were all dead—
And never a poem in hand unread!
Then the editor said:
"No poets. No verses. Not one to return—
Not an ode or a blank-verse this winter to burn—
It's hard on the office—God bless my poor soul;
I must do as do others, and lay in some coal."
And the room, it grew darker, and bluer the air
With the heart-breaking language encircling there.

One point of difference between a man and a jackass is usually overlooked. The jackass never kicks unless he has something definite to kick against.

In love there are no immunes. You can catch it every year.

HARDWARE NOTES BY THE WAY.

Editor Hardware: Conditions in Ohio, Indiana and Michigan, territory recently covered by me, are shaping themselves for a healthy and voluminous fall trade. Harvests were generally good, prices for agricultural products are higher than for years, and now since peace is practically assured, the hoarded capital is finding its way into the channels of industry, trade and commerce more freely than any other period during the year. The numerous new and reorganized enterprises, corporate and otherwise, now springing up, betoken an abundance of confidence in the financial body of our nation.

Builders' Hardware continues with brisker features than usual at this season and merits close attention during the balance of the year. The rehabilitated prosperity among our farmers is inducing manufacturers of agricultural implements to commence operations early and with normal capacity.

The waning days of the cycle season are devoid of any interest, save grotesque bargain features. The chainless model has not proved a commercial success thus far, chiefly owing to the high prices asked for it, but as an experimental success its debut was all that might have been expected. At $75 the chainless pattern may reach normal sales next season. The cycle situation is a very intricate one just now, and in the attempt to unload superseason stock next spring, a standard of prices can scarcely be maintained. So '99 may be a season of bargains and outselling competition from start to finish.

The stove season has opened with the brightest of prospects. The demand is not cheap, either. It seems we have a new race of stove buyers. The modern stove buyer exhibits a wonderful store of sagacity. He is a pamphlet incarnate of "All about stoves," or "What I don't know about stoves, no merchant can tell me." But the merchant is the beneficiary of this enlightened advancement. He sells good stoves at good prices, and has "no kick coming" after the stove leaves his premises. The American of pride and energy loves to enjoy a comfortable home, and no home can be really comfortable without good heating and cooking apparatus.

A pick from recent stove ads.: "We line up with any of them in the sale of stoves and ranges. Pass our store and review the day's sales on the sidewalk."

Following up this ad.—it interested me for its audacity—I actually encountered a row of stoves and ranges in front of the store that would have stricken any competitor with envy. Each article was ticketed to the purchaser. I feign some of these were fictitious. That was really the meat of the ad., but the effect upon the public was strikingly significant in the number of spectators and prospective buyers flocking to the store.

"The base burner may be an ornament, but it is a fuel waste. In every ton of anthracite you burn up $2 which you might have saved. Let us tell you the economical secret of the bituminous and semi-bituminous coal burner."

This ad. is as wondrous in its originality. But the merchant carried his point by both theoretical and practical demonstrations. If he could not sell a stove outright or carry conviction with his words, he would inveigle the prospective purchaser into the basement where the practical demonstration, under the auspices of a tutored attendant, was going on without intermittance. After an hour's or so devotion to the subject—the merchant shrewdly allowed for the time on the bill—a sale was either made or hopelessly lost. The hopeless cases were in the minority.

"Household art in stoves. Come inspect our windows, and see what ornamental uses a stove may be put to. Don't let the stove mar the otherwise artistic or symmetric aspect of your apartments."

The uptodateness of this ad. is obviously evident. The windows had been transformed into parlor and other apartment views, with the stove as focus point. All the modern paraphernalia going with the stove had been conspicuously assembled and assigned to their proper place. "Don't burn or injure the carpet" and "prevent ash spills" devices touched up the exhibit with wonderful effect. As it was, the merchant did not only sell stoves, but stove tools and novelties, and imbued the purchaser with the conviction that what he (the merchant) did not know about the stove business was not worth looking for elsewhere.

A living tome of nomenclature, what is it? This riddle was put to the clerks of a large jobbing house by way of dispelling the dog-days monotony. A correct answer would entitle to a month's vacation at full pay. After a day's deliberating, the sundry department manager brought in the reply, "The modern hardware jobber." He was the winner.

An Ohio sign printing house conceived the motto, "Hardware for Hard Wear." It submitted a sample to a jobbing house which immediately purchased the right to use and handle the sign. Now, what does the jobbing house intend to do?

The wireworkers' strike at Cleveland has become an entangling affair. As yet, the strikers have not overcome the barb wire trocha, wiry as they are, by trade and profession, and have not succeeded to rule the management with an iron rod. The approaching cold winds will, no doubt, drive the nail on the head, and hammer the strikers into submission if reason or nothing else will do it.

A commission traveler, making Cincinnati his home, and earning upwards of $10,000 a year, has, like scores of others, gone daft over the visionary riches of "our future possessions." He's made a trip to Porto Rico and Cuba and would have gone to the Philippines and Hawaii had he not been so sorely disappointed "at first sight." He's back now, and willing to find his fortune in Uncle Sam's continental domain. He says the prospects for branch houses in any of the islands visited by him are poor, and only houses of unlimited resources and grit may hope for ultimate success. Conditions may improve under American influence and commercial aggressiveness, but for the time being, and for some time to come, American investors and manufacturers, especially commercial travelers, should content themselves with selling to those countries en route, and thus gradually build up a prestige for American manufactures and merchandise.

County fairs occupy the attention of our country merchants just now, and travelers count up wild goose chases by the score. This happened to an old "road dog" so often that he swore to get even. His territory comprises about twenty counties, and every one of these has a fair or two during September and October. Formerly he timed his arrival to the close or prior to these fairs, but schedules go to smash as easily as china, and the absentees usually outnumbered those he found ready to talk business. It's different now. The wily drummer's signs are now seen in the vicinity of every fair ground conspicuously posted. They simply announce the arrival of Mr. So-and-so, representing So-and,so, with a line of goods to knock any body down and win the first heat every time. The drummer

Digitized by Google

hunts up his customer, pays for all the lemonade, gingersnaps and peanuts he wants to eat and finances his whole family to enjoy the fair from fence to fence. A fair is very refreshing to the ruralist's mind and he will buy during the fair. "Come around when the fair is over" does not go with this drummer any longer. J. B. RINDFLEISCH.

Cleveland, September, 1898.

The Changes of Fifteen Years.

A very entertaining comparison has been made in a recently published article, by Sidney F. Stevens, of Foster, Stevens & Co., Grand Rapids, Mich., between the Hardware business of to-day and that of fifteen years ago. He speaks of the conditions existing in his immediate neighborhood, but many of the changes noted will naturally hold as good in other localities. Some of his conclusions are here summarized:

Fifteen years ago the Hardware trade of Michigan was visited by agents representing the jobbing houses of Buffalo, New York, Cleveland, Toledo, etc , but to-day in the territory tributary to Grand Rapids, it is rare to meet agents from any of these points.

The jobbers of Detroit, Saginaw and Grand Rapids are able to take care of this trade on much more profitable terms than these foreign houses can possibly do.

Fifteen years ago but one house in Grand Rapids was doing a jobbing trade; to-day there are two, with sales of not less than a million and a half dollars in aggregate.

The greatest change has been in the steady decline in prices on nearly everything made of iron or sieel, as well as new articles that have come into general use.

Wire nails, fifteen years ago, were not carried in stock, and were made in very small quantities in this country, if at all.

The iron cut nails were then used, sales running as high as fifty thousand kegs in a year.

Then came steel cut nails, which soon took the place of the iron, and then wire nails began to show their heads. At first the dealers were loath to take many of them, and orders would be for ten kegs at a time.

Now, iron cut nails are not made, steel cut nails are not in demand—about five hundred kegs would supply this market for one year—while it now takes one hundred thousand kegs of wire nails to supply the jobbing trade of Grand Rapids.

When wire nails first came they were worth $5 to $6 per keg; now the price is less than $1.60.

Many articles in general use now were not thought of fifteen years ago, a few of which come to my mind, as follows: Potato planters, bug sprinklers and sifters, gasoline stoves, blue flame oil stoves, hand corn shellers, as well as many other things which at present will not come to mind.

In all articles of Hardware, steel in a great many instances has taken the place of iron, at a much lower price.

To-day, owing to lower prices of Hardware, the merchant is obliged to do three times as much work to get the same net profit out of his business as he did fifteen years ago.

Wages are higher, expenses more, competition greater, and the percentage of profit lower, consequently in the volume of business and close attention to details lies the success of the Hardware merchant of to-day.

George A. Church, member of the Hardware firm of Church & Morse, of Meriden, Conn,, died suddenly in his office of heart disease. He leaves a widow and three sons. Mr. Church had been in the Hardware business in Meriden since 1872, when the firm of Church & Sprague was established. In 1879 the firm of Church & Morse was organized, and has done a successful business since. He was a Mason, a member of Merriam Post, of the I. O. O. F., the Red Men and the Royal Arcanum.

The Silver-Plating Consolidation.

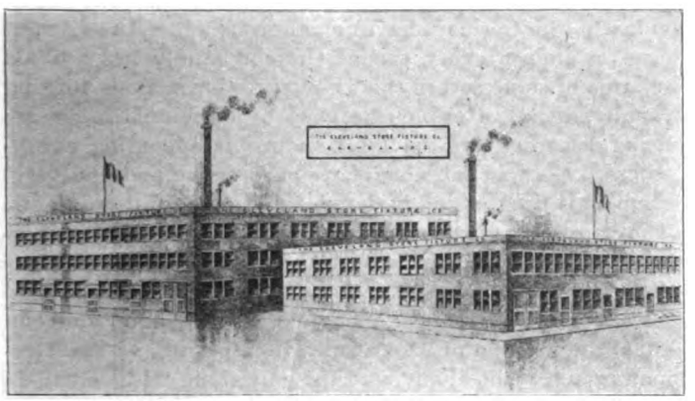
The various rumors which have been afloat in recent times, in regard to the consolidation of the silver-plating companies of the country, have been made good by the incorporation of the International Silverware Co., which has been organized under the laws of New Jersey, with a capital of $30,000,000, of which $15,000,000 is common, and $15,000,000 preferred stock. It is the object of this company to acquire control of the silver-plating companies, which are to be operated as one concern. The companies which are quoted as being interested in this movement are as follows, which are said to represent seven-eighths of the production of silver-plated flat and hollow ware of the United States:

Rogers Cutlery Co., Hartford, Conn.
Homan Silver-Plate Co., Cincinnati, Ohio.
Meriden Silver-Plate Co., Meriden, Conn.
Manning, Bowman & Co., Meriden, Conn.
Wilcox Silver-Plate Co., Meriden, Conn.
C. Rogers & Bros., Meriden, Conn.
Simpson Nickel & Silver Co., Wallingford, Conn.
Rogers & Hamilton Co., Waterbury, Conn.
Norwich Cutlery Co., Norwich, Conn.
Standard Silver Co., Toronto, Can.
R. Wallace & Sons' Mfg. Co., Wallingford, Conn.
Meriden Britannia Co., Meriden, Conn.
Rogers & Bro., Waterbury, Conn.
Rogers Silver-Plate Co., Danbury, Conn.
Holmes & Edwards Silver Co., Bridgeport, Conn.
Middletown Plate Co., Middletown, Conn.
Simpson, Hall, Miller & Co., Wallingford, Conn.
Barbour Silver Co., Hartford, Conn.
Wm. Rogers Mfg. Co., Hartford, Conn.
Manhattan Silver-Plate Co., Lyons, N. Y.
Watrous Mfg. Co., Wallingford, Conn.

Latest reports are to the effect that Samuel Dodd, of the Wilcox Silver-Plate Co., is to be president, and George H. Wilcox, president of the Meriden Britannia Co., is to be vice-president, and that only $24,000,000 of the preferred and common stock will be issued, which is to be used in paying for the companies which are to go into the combination. The remainder is to be held as treasury stock for the purpose of acquiring other companies.

A Close Connection.

"Some years ago, when the telephone was something of a novelty," said an old newspaper man, at the Hardware Club, a few days ago, "I was the Cleveland correspondent of the New York *Times*. I had gone home early and was in bed, when the telephone bell down in my library began to tinkle. It was then midnight. I answered the call, and a night operator at the main telegraph office said to me: 'Here's a message from the *Times*, asking for two hundred words about L. D. Thoman, who has been appointed a member of the first national civil service board.' 'All right,' I answered, and rang off. I knew Thoman well, although he was then utterly unknown to fame, and had been dug up and appointed as a personal favor to Senator George H. Pendleton, the author of this law. Right back of me was a volume of a biographical cyclopedia of Ohio, and in a moment the index led me to Thoman's sketch. In fifteen minutes I had the two hundred words in manuscript; called up the telegraph office, where a clerk obligingly took the message from my dictation, and before one o'clock the matter was in type in New York."



"That wouldn't count for much now," said the narrator, "but back in 1877 it was considered quite a case of close connections."

Each person is born to one possession which outvalues all his others—his last breath.—*Exchange.*

The Cleveland Store Fixture Co.

Without having the subject brought especially to their attention, few people are aware of the extensive business being done by such large companies as the Cleveland Store Fixture Co., Cleveland, Ohio, in turning out complete the interior fittings and embellishments of an up-to-date Hardware store in which there will be a place for everything and

FACTORY CLEVELAND STORE FIXTURE CO.

everything in its place. To give some kind of an idea of the extent to which this successful business has been developed, we present herewith illustrations of the office and salesrooms of the Cleveland Store Fixture Co., Nos. 302 to 308 Seneca Street, corner of Champlain Street, and also of the factory located at Nos. 153 to 159 Case Avenue and Nos. 1046 to 1052 Hamilton Street. This successful company was established in 1890 and since that time has grown and expanded until to-day no company in Cleveland is in possession of so complete a factory plant fitted with up-to-date machinery and appliances, which during the past six months have been greatly added to, making them the leading commercial furniture and fixture manufacturers in the State of Ohio. The company are not only the architects and designers of store interiors, but manufacture also all the necessary fixtures so essential to make an artistic interior pleasing and harmonious to the modern taste. Included in the many things that contribute to this ambitious perfection, may be mentioned: show cases, desks, counters, shelving, wall cases, railings, screens, mirrors, telephone cases, sideboards, refrigerators, etc., furnishing the entire outfit from complete plans, designs and specifications for Hardware, office, bank, bar, drug and cigar stores, including the finest cabinet work to make one harmonious whole in all its parts. The present advanced facilities for manufacturing such store fixtures, enable any merchant to equip his store in a symmetrical and artistic manner, at a cost much less than half of the expense formerly incurred for less pretentious results. Then again in former years it was necessary for the merchant to provide the plans and specifications for the proper construction and general arrangement of the fixtures required; to-day this is all furnished by the manufacturer, together with the advantages gained by his experience in the fitting up of numerous similar establishments, whereby hints are given for economical use of space scarcely possible to be obtained from one who has not made a study of such professional perfection. The Cleveland Store Fixture Co. make a business of constructing and handling a job of this character, at their extensive works, from beginning to end in all its multifarious and complex details. And making, as the company do, a specialty of this kind of work, from the moment that the lumber is stocked in the yards, kiln dried and worked from the rough into fine polished furniture, every detail of the work is done on their premises. It requires a comparatively short time and is convincing as to the progress made in this advanced industry. Instead of one or two men doing all the work, as in the past, the work is passed from one department to another under capable and efficient supervisors. The Cleveland Store Fixture Co. point with commendable pride to the many stores which they have fitted up throughout the United States, giving evidence of the skill and good workmanship constantly obtainable from the facilities possessed by them in the prosecution of their work. The company desire to enter into correspondence with parties contemplating making changes in established stores or expecting to fit up new ones. When, by simply sending on to them a rough floor plan, giving as near as possible the dimensions of the store room, the designers of the company will do the rest. We hope at an early date to illustrate a few of the artistic interiors they have already created.

OFFICE AND SALESROOMS CLEVELAND STORE FIXTURE CO.

A Horseshoer's Difficulty Done Away With.

It has been a complaint among horseshoers for years that their rasps (the tool which they use more than any other), while of fair quality, are too often not what they should be. Even some rasps accepted as popular have the defect of being soft, and therefore not lasting long; the difficulty which the manufacturer finds in throwing up a good tooth on hard steel, *i. e.*, steel of high carbon, being circumvented by his using a poorer quality of steel, with the result that it does not temper so well.

The Nicholson File Co., Providence, R. I., have worked upon this problem for a considerable time and have, within the past few months and as a result of their experiments and inventions, placed upon the market a horse rasp which is strong in the very respects in which the rasps above described are weak. The secret of their patents, taken out some time since, is that their rasp-punching machines handle steel of high carbon, and this steel, when tempered by the Nicholson Co.'s own perfected processes, is naturally much harder and more durable. Such of the leading farriers as have been consulted from time to time by the company in order to get a tool fitted for the needs of the trade, declare that the new Nicholson rasp is adapted to give satisfactory service. Besides these most important points of high carbon steel and thorough tempering, the rasp has the additional strong point of being replete with sharp tooth points, which make it work easily and quickly. At the same time the tooth does not clog.

The shoers of this country and abroad have quickly recognized the merits of the rasp and a large sale is already secured.

In St. Peter's Churchyard at St. Albans, England, the following lines appear on the tomb of one William Braithwaite, a whitesmith, who died in 1757:

"My sledge and hammer lie reclined;
My bellows, too, have lost their wind;
My fire's extinct, my forge decayed
And in the dust my bones are laid.
My coal is spent, my iron's gone;
My nails are drove, my work is done;
My rusted corpse is here at rest.
My soul soars smoke-like to be blest."

Atlas Bolt & Screw Co.

Among the leading industrial enterprises in Cleveland' Ohio, may be mentioned the Atlas Bolt & Screw Co., whose extensive plant is favorably located at Nos. 139 to 163 Marquette Street. They are manufacturers of tire bolts, stove bolts (see Figure 1), sleigh-shoe bolts (see Figure 2), sink bolts, rivets and stove rods, and iron and brass machine screws. Any variety of special bolts and screws are made to order from sample. The plant is one of the most modern in its equipment of any in Cleveland, as it is run

FIG. 1.

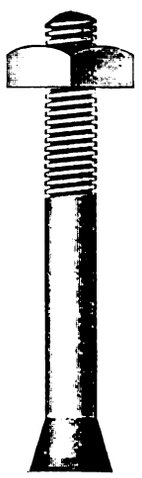

FIG. 2.

FIG. 3

FIG. 4.

FIG. 5.

FIG. 6.

entirely by electricity. It has been in successful operation since 1896, and during most of the time since has been fortunately so well supplied with orders, resulting from their perfect product, that it has been necessary to run night and day.

We present herewith a few illustrations, giving some idea of the manner and style of their product, in addition to which they turn out special articles in the bolt line, enumerated herewith:

Round Head Counter Sunk Stove Bolts.	Desk Bolts.
Round Head Counter Sunk Stove Bolts.	Square Head Brass Bolts, with Brass Nuts
Nickel Plated Mica Bolts.	Thumb Screws.
O. H. Fin Neck Bolts.	Malleable Iron Thumb Screws.
Pinch Head Bolts.	Pad Screws.
Steeple Head Bolts.	Pad Screws.
Collar Screws.	Caster Pins.
Dog Point Screws.	Headless Bolts.
Brass Chandelier Screws.	Caster Pins.
Special Machine Screws.	Pinch Head Pins.
Headless Screws.	Pointed Wire Pins.
Headless Screws (see Fig. 3).	Pointed Wire Pins.
Pinch Head Bolts.	Cockeye Screws.

Also cold punched, hexagon and square, chamfered and plain nuts (see Figures 5 and 6). Their advertisement appears on the fourth page of cover, and a simple request will result in receiving their desirable catalogue.

Mr. Bindley At Home.

John Bindley, president of the Bindley Hardware Co., Pittsburg, has returned from a three months' trip to Europe, having visited England, Germany, France, Switzerland, Austria and Holland. Mr. Bindley not only enjoyed himself, and made good use of this period of recreation, but also kept his eyes open as to the condition of business in the countries through which he passed. In an interview with a Pittsburg reporter, Mr. Bindley said that the first thing that impressed him was the commercial power of England. "The English people," he continued, "are liberal, besides being progressive, and would make the best ally in the world for the United States. They are the best colonizers, and they know how to handle colonies in the proper manner. Let England plan the civilization, and then the United States, as her ally, will come in for a part of the commercial advantages. In evident contrast to this is the spirit shown throughout Germany. They oppose us for political reasons, as they connot bear with tranquility to see a rival nation thrive more rapidly than their own. Individually, the Germans have no animosity against the Americans, as almost every second German family has a blood relation of some sort in this country. Germany is forging rapidly ahead. Her old methods of individual labor are being discarded and the large factory is appearing everywhere. German merchants are progressive and the Government is progressing in demanding rights for its subjects. They are seizing every opportunity to push their manufactures, and the success which they are having threatens American progress. The American is too prone to regard his adversary as beneath his notice, for he thinks, what can equal the product of American manufacturing? The German product will, if any, and the only thing that we can do now is to follow their example in leaving nothing undone to gain the trade of foreign countries. They are introducing extensive machinery, and they only pay a master mechanic four marks (about $1) for a day's work, so the American must look to his ingenuity to put him at the head. The American manufacturer must cease to trade as if he had no competitor, and strive to beat out the growing power of Germany. He will awake to that fact at some time, and his blindness now will only hold it in check, but he will be greatly benefited if he would only start now."

A Modern Jackson.

The New Britain (Conn.) Hardware Mfg. Co. has received by mail the following unique application for employment. It is dated Harrison, N. J. If any one desires to employ him, his address will be furnished by the company:

Gentlemen: In accordance to the science of phrenology a person possessing my characteristics should be employed in making Hardware and iron goods, and, as I have experience in that line, and done better at that than I ever done before or since, I am very desirous of acquiring employment in that line. I have worked at drilling, at riveting, at grinding, tempering on sash pulleys, chopping knives, portable forges, shoe daubers, etc. My character is of the General Jackson variety, of good quality, and I am not making a written application to you because I am ashamed to be seen, but because I do not see a chance to get work here, and I cannot afford to be running around. I want steady work, so I can settle down, and I can prove myself a useful addition to any respectable community. I have never had a steady job yet, and I am sure I could appreciate and hold one if I had it. My age is twenty-four years. Please give me a chance if you can.

Members Elected.

At a meeting of the board of governors of the Hardware Club of New York, held on September 15, 1898, the following gentlemen were unanimously elected to membership:

F. Stuart Williamson, No. 52 Broadway.
Frank Presbrey, No. 12 John Street.
Walter A Schiffer, Fifty-third Street and Second Avenue.
Edward L. Swift, No. 108 Chambers Street.
Brown Caldwell, No. 16 Warren Street.
Enoch Rutzler, No. 176 Centre Street.

There isn't a Parallel of Latitude but thinks it would have been the Equator if it had had its rights.—*Exchange.*

Prosperity is the best protector of principle.—*Exchange.*

OUR INVASION OF CHINA.

The success of the United States in the invasion of the markets of China is illustrated by some figures just prepared by Treasury Bureau of Statistics, showing that our exports to that market have of late increased much more rapidly than those of other parts of the world, and that the heavy falling off in imports of certain lines of goods into China in the last year has not been as seriously felt by the United States as by other nations with which we come in competion. An examination of our exports to China during the fiscal year just ended shows a marked increase in large numbers of articles, and that the reduction in cotton goods, which has caused the slight decrease in the total, is much less proportionately, than that of our chief rivals in supplying the cotton goods market of that country. While our total exports to China during the year just ended fell off a little less than two million dollars, the fall in cotton goods alone was two and one-quarter million dollars, thus showing that the falling off in this class of exports was responsible for the reduction in the grand total of our exports to that country. A further examination, however, of this reduction in cotton goods exports to China shows that t was incidental to an enormous reduction of cotton piece goods importations by that country and that the United States suffered less by that reduction, proportionately, than did other countries with which she is competing for that market. The recent report on the trade of China, published by the Inspector General of Chinese Customs, says of the import trade in cotton piece goods: "The year 1897, owing to the fall in exchange, and the heavy stocks carried over from 1896, was one of the worst on record for the piece goods trade." That the reduction in imports in cotton goods was partly due to an increase of cotton manufactures in China as well as heavy stocks carried over from the preceding year, is shown by a further statement contained in the same report, which says that the importation of raw cotton increased more than 60 per cent. in 1897, and that of Japanese cotton yarn more than doubled. That the American imports of cotton goods suffered less than those of other countries is shown by a paragraph of the report in question, which says: "The trade in cotton piece goods shows, as was expected, a falling off from the figures of 1896; American goods, however, continue to increase in favor, these being almost the only exception to the general decline. The favor which the American goods find in the Chinese markets is due to their cheapness."

Another evidence that American goods exported into China have suffered less by the general reduction than those of our chief rivals for that trade, is shown by a comparison of our own exports to China, during the past six months, with those of Great Britain to China during the same period. The June statement of Trade and Navigation of the United Kingdom, which covers six months exports by articles, specifies the amounts of cotton and woolen goods and manufactures of metal exported to various countries. This shows that the exports of these articles to China and Hongkong in the six months ending with June, fell off nearly three million dollars, or over 17 per cent., as compared with the corresponding six months of the preceding year. Our own statement of exports to China and Hongkong includes, beside manufactures of cotton and metal, provisions, breadstuffs, naval stores, manufactures of tobacco and manufactures of wood, the list containing double the number of articles of that named by Great Britain in her reports, yet the net decrcase in the list of articles named in our own reports amounts to less than eight hundred thousand dollars, against the net decrease of nearly three million dollars in a much smaller list of the exports of Great Britain in the corresponding period of time. Our own statement of the commerce of the year shows an increase in exports of flour, bicycles, carriages and cars, fruits and nuts, telegraph instruments, telephones, scientific instruments, canned beef, bacon, hams, butter, cheese, seeds, tobacco, lumber and other articles to China during the year just ended, as compared with the preceding year.

The steady gain which the United States is making in its effort to obtain a share of the market which China affords is shown by the following comparison of our imports into China and Hongkong, from 1880 to 1898, with those of Great Britain during the same period. The table, it will be observed, shows an increase of over 300 per cent. in exports fron the United States to China and Hongkong during that period, and a decrease of 25 per cent. in those from the United Kingdom to the same market in the same time.

United States figures include domestic and foreign merchandise, while those of the United Kingdom include domestic merchandise only.

EXPORTS FROM UNITED STATES AND UNITED KINGDOM TO CHINA AND HONGKONG, FROM 1880 TO 1898.

Years ending June 30.	United States. Dollars.	United Kingdom. Pounds
1880	$ 3,978,775	9,482,821
1881	8,364,534	10,034,192
1882	9,123,880	7,645,337
1883	7,858,031	7,116,331
1884	7,710,427	7,372,148
1885	10,545,811	8,945,529
1886	11,576,817	7,564,531
1887	9,230,668	8,796,152
1888	7,934,537	9,016,568
1889	6,477,512	7,220,613
1890	7,385,362	9,137,194
1891	13,469,705	8,987,921
1892	10,557,546	7,581,906
1893	8,117,059	6,446,943
1894	10,072,273	6,262,810
1895	7,856,880	7,166,645
1896	11,613,134	8,539,390
1897	17,984,472	7,117,716

Trade Philosophy.

The apothecary does business on a small scale.

Fancy drinks will put a plain face on a merchant.

A stirring young clerk isn't by any means spoony.

Every man has his price except the cut-rate merchant.

You can't write gushing sentiments with a fountain pen.

A stern sense of duty keeps many a business man out of a boat.

The tombstone man will say a good word for a merchant when he is down.

A cut-rate merchant is committing business suicide on the installment plan.

Some hotel men are not counterfeiters, if they do offer drummers poor quarters.

Some business men are so narrow-minded that a sensible thought would get dizzy and fall off.—*"Clyde W Francis" in Trade.*

Lady visitor (at office of eminent physician): "I have called, doctor, to ask if there is any cure for sleep-walking. I have had the habit for years, and lately it has become worse." Dr. Highprice: "It can be cured, madam. Take this prescription, and have it made up at Colde, Steele & Co.'s." "Colde, Steele & Co.'s! Why that is not a drug store; it is a Hardware store." "Yes, Madam. The prescription calls for a paper of tacks. Dose—two tablespoonfuls scattered about the floor before retiring."—*New York Weekly.*

Making Good their Promise.

Does the German advertiser exercise care in making good all the promises which are made in his advertising? The indications are that if he has not exercised much care in the past, he will do so in the future, as the government has recently taken some very decided steps toward compelling him to make them good. In Hamburg recently an advertiser advertised an "infallible grease eraser." Several competitors who did not believe that the eraser was infallible, entered a complaint, and when the case was taken into court, the judge, with a practical wisdom worthy of Solomon, compelled him to step up, make grease stains on certain garments, and then employ his eraser in removing the same. For some reason not fully explained, the enterprising advertiser failed in his task, and he was severely fined. Another man, who advertised that he was selling out for the purpose of retiring from business, but failed to retire as he had promised, was also fined. Another was fined for falsely advertising "Sale for stock-taking," and still another for "Sale on account of removal." In commenting on the above facts, the *Ironmonger* of London, says: "Perhaps the queerest cases reported under the act are those in which shopkeepers, convicted of having falsely marked up their goods at '20 per cent. below cost price,' or 'without profit,' have been sentenced actually to sell the whole of their stock at the percentage of loss at which they led the public to believe that they were sacrificing their wares, and in innumerable instances people, who untruly professed to sell at manufacturers' prices, or at cost price, have been sentenced to fines up to £10 and the insertion of the sentence, at their own cost, as an advertisement in the local papers. So close are the meshes of the act that in one instance a firm was heavily fined for advertising, under its own address, 'fifty-two establishments in the large towns of Germany,' although the assertion was strictly true. The 'fifty-two establishments' were so many different firms, and the fifty-three together formed an association who bought the same goods from the same sources, but sold independently of each other. The court held that the words 'fifty-two establishments,' etc., were calculated to lead the public to believe that they were all branch houses of the firm advertising. As competition is at least as keen in Germany as here, while middlemen's profits are generally much smaller, the lot of the German shopkeeper can hardly be described as a happy one."

American Iron and Steel Abroad.

American steel and iron are certainly making their way in the European markets. It is stated on eminent authority that a single firm in London is now receiving United States steel at the rate of nearly 250 tons per annum, and American steel largely in use for bicycle work is going into Birmingham in large quantities. At a recent meeting of a large steel and iron company of Wales, one of the directors stated that there would be anxiety for some time to come among the steel makers of that country, owing to the new appliances and the improved methods introduced from America, as well as the keenness of competition.

An eminent English manufacturer, who was recently interviewed upon the above question, can be quoted as follows: "It is no pleasure for the British manufacturer to find himself compelled to use American-made brass, but he claims that it is drawn so much truer than the English that it can be worked in automatic machinery with much less trouble and with greater economy. A leading manufacturer states that it is from 15 per cent. to 20 per cent. cheaper than the English. In another article, which is rapidly growing important—steam india rubber hose piping—one authority claims that he had the American make delivered on his premises at 20 per cent. to 25 per cent. cheaper than the English makers had supplied. Here it is only fair to say that the railway rates helped the foreigner, the rate from New York to Liverpool being positively lower in several instances than from Liverpool to Sheffield.

"Another item may be mentioned—the smaller sizes of malleable iron castings. American firms are delivering these castings in Sheffield at fully 30 per cent. below local prices. Here again it is but right to admit that the railway rates materially aid the foreigner. It will not do to say, however, of these castings that they are simply sent over by way of advertisement, or that they are not of good quality. The very opposite is the case.

"They come over in the regular way of business—a business which is steadily increasing—and they come over of such quality that the workmen themselves are openly heard to confess their preference for the American production. In one of the establishments where they are used in very large quantities I have asked various workmen which they preferred, the American or the British casting. Although 'Yankee notions' are as little in favor with the British worker as things 'made in Germany,' the invariable reply I got was that the American casting was preferred, because it was truer and more uniform in quality. The users, too, mention another difficulty which is surely capable of prompt remedy, That difficulty is to get adequate deliveries of these small malleable castings where large quantities are required. The head of one house told me that he had often been disappointed in not getting his order completely filled, and in the end has had to send a cablegram to American manufacturers, who have sent him all he wanted in a much shorter time than he could have got them within a few miles of his own door. It is impossible for any one who is much in the habit of visiting the large industrial establishments of this country to avoid seeing how rapidly American labor-saving machines are being utilized."

Mr. Hazell, M. P.

Walter Hazell, Member of Parliament for Leicester, England, accompanied by his two sons, W. Howard Hazell and Ralph Hazell, arrived in the city some days since, intending to spend two months in the United States and Canada. Howard Hazell was among the recent visitors to the Hardware Club, having letters of introduction to the officers, and made a minute examination of the establishment, with special reference to the movement now on foot in London for the creation of an organization of a similar character. Walter Hazell is one of the best representatives of all that is good in English public life. He is a high-minded gentleman, who devotes much of his leisure and his wealth to philanthropic work. He is the head of the printing and publishing firm of Hazell, Watson & Viney, which consequently makes him chief proprietor of the *Hardware Trade Journal* of London. His firm is one of the very few in England capable of turning out printing equal to the best productions of the United States, and this is doubtless very largely due to the fact that he has spent large sums of money on American printing machinery. The probability is that Mr. Hazell would not have spent these sums in the United States if he could have found machinery of equal value in his own country, and the above fact therefore remains a practical testimony to the excellency of machinery-making in the United States.

The Berlin Iron Bridge Co., East Berlin, Conn., have the contract for furnishing the steel work for the memorial hall being erected at Westerly, R. I. This building is to be fireproof throughout, has steel floor beams and columns supporting the floor structure, and steel trusses and beams for the roof.

It is easier to stay out than get out.—*Exchange.*

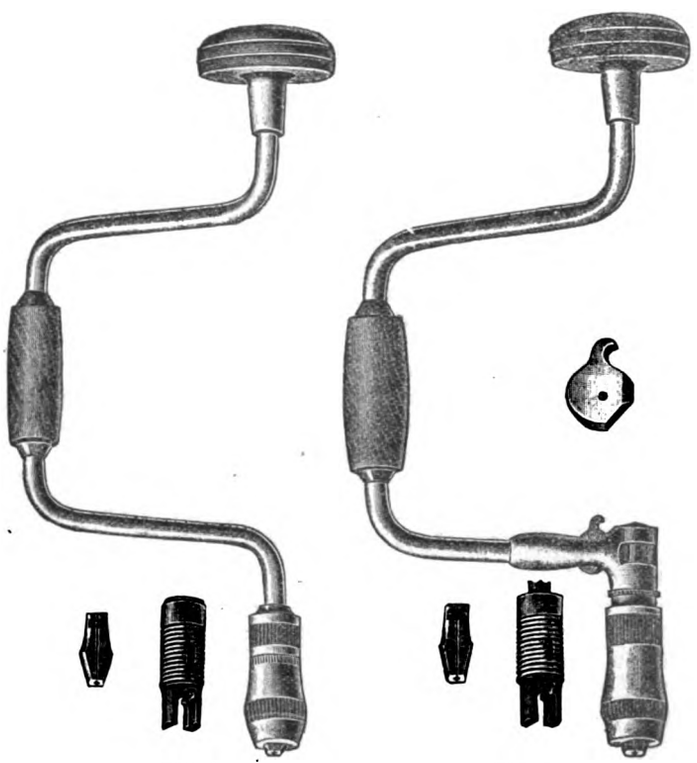
NEW GOODS AND SPECIALTIES.

Bargain Oil Heater.

An announcement of special interest to the trade just at this season of the year is made by the Novelty Mfg. Co., Jackson, Mich., on pages 34 and 35 of this issue. The illustrations there presented, taken in connection with that shown herewith, will give a very good idea of this line of goods, without any very special description. They boldly announce that "there is only one line of aluminum oil heaters in the world," and proceed further with the declaration that they have them. They call special attention to their beauty, finish and working qualities, and guarantee that they will not tarnish from the heat. They are made in three sizes, full description of which, with prices, will be sent by them on application. In this connection, we call special attention to their "Bargain" Oil Heater, which is illustrated herewith. They state that this heater is rightly named, because "it is the greatest bargain ever offered in this line." It is made entirely of polished steel, polished brass and polished aluminum, is nicely japanned and nickel-plated. They further state that there are no castings to break, which consequently makes the stove practically indestructible. The manufacturers guarantee every stove, and add that they burn with a clear white flame, without smoke or odor. The "Bargain" is made in the following dimensions: height, 26 inches; size base, 13½ inches; size drum, 7 inches; circular wick, 8 inches; weight, 10 pounds. The manufacturers further say: "Aluminum Oil Heaters are the most brilliant and highly polished stoves ever exhibited. It is impossible to produce such a rich lustre and elegant finish on any other metal. These stoves contain our celebrated wick device, which is so simple that a child can operate and rewick them. The upper pars of the stove is hinged to the lower part in such a manner as to allow it to be easily tipped back for the purpose of lighting, rewicking or filling. All parts are interchangeable, as they are put together entirely with polished and nickeled-head stove bolts. The founts and burners are portable. The tops on all Aluminums are removable for the purpose of placing on kettle, oven, etc. These are the only stoves that are absolutely free from smoke and odor. They are guaranteed by the manufacturers, and money refunded if not as represented. Aluminum is the only known metal that will not tarnish with heat. It is expensive but practically indestructible. This is why we use it. We make no additional charge for it. In fact, our heaters are sold cheaper than any others of corresponding size. They are made in three sizes, and, being the lightest stove on the market, they are all that their name implies. They are practically indestructible, being made entirely of polished steel plate, together with burnished brass, and adorned with aluminum plates where the heat is so intense as to tarnish and discolor other metal. Not one piece of casting is used in their entire construction." That large proportion of the Hardware trade who are interested in heaters would do well to send to the manufacturers for a full description and illustration of these lines.

New Line of Lancaster Braces.

The Lancaster Machine & Knife Works, Lancaster, N.Y., are placing upon the market an entirely new line of plain and ratchet braces, forming a lower-priced line of these meritorious goods than they have previously produced; and it is claimed by them to be the best low-priced brace ever offered the trade. We give illustrations of these desirable goods herewith. Fig. 1 shows the plain brace having polished cold drawn steel sweep 7-16 inch, with satin wood head and handles. These are made in two sizes: No. 40, 8-inch: list, $3.80 per dozen; and No. 41, 10-inch: list, $4 10 per dozen. The ratchet braces, Fig. 2, are made to correspond, and same detail of description. No. 17, 10-inch: list, $9.00 per dozen; and No. 18, 12-inch: list, $12.00 per dozen. This new line is well calculated to meet with a welcome by the trade, being made with the same conscientious desire to excel, which characterizes all the products of this company. The new line is intended to



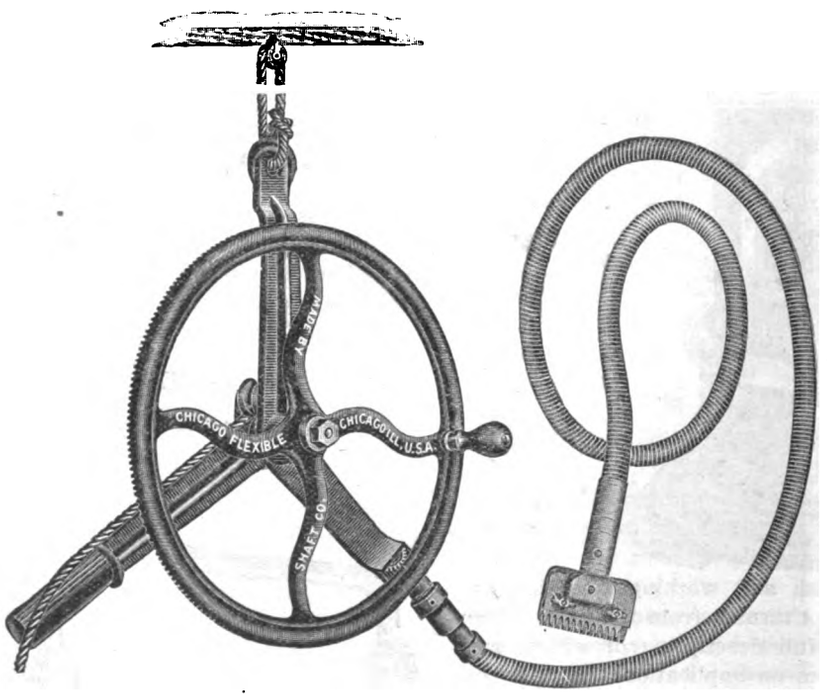


FIG. 1. FIG. 2.

supersede to a great extent the many low-priced goods on the market that are put together to be sold at a price without regard to any underlying merit in the goods themselves.

A Revelation in Clipping Machines.

The illustration herein shown represents the New '98 Chicago Clipper, which has recently been brought out by the Chicago Flexible Shaft Co., Nos. 158–160 Huron Street, Chicago. This machine is "an entirely new departure over the old style Clipping machines, doing away with all unnecessary weights, belts, balance wheels, etc. It is very simple in design. Gears are substituted for belts, thus doing away with the great amount of slippage which was such a source of trouble with the old style belt machines. The knives may be forced as fast as the operator can work, and there is no such thing as clogging. High speed may be maintained with but trifle exertion, as the number of moving parts are few and all unnecessary friction is done away with." The machine is suspended from the ceiling by a braided rope, which passes through a screw eye; the free end is passed under an eccentric pulley journaled in the frame, which, from its peculiar construction, locks it at any point desired by simply letting go of the rope. This feature will be much appreciated, as it accommodates the apparatus to the height of the operator instantaneously. The large balance wheel has teeth on its edge which engage with small steel pinion, which in turn transmits the power through the flexible shaft to the knives. The list price on this machine is $10.75, which brings them within reach of every stable owner, blacksmith and horseman. The makers say: "It is fast displacing the old-fashioned belt machines and two-hand horse clippers. It was with this machine that all records were recently broken by Ted Hansom of New York by clipping a horse complete in fourteen minutes, which is the fastest time ever known, beating all other records by twelve minutes. This is a Clipper for the Hardware trade to handle in place of the two-hand variety, as the day has gone by when a man will spend a half day clipping a horse when better work can be done in as short a time as fourteen minutes. The weight boxed is 50 pounds; without being boxed 35 pounds. This Clipper is protected by patents in the United States, Canada, England, Germany, France and Russia, and is on sale generally throughout the jobbing trade of the United States and Europe." For catalogue or any other information address the makers, the Chicago Flexible Shaft Co., Nos. 158–160 Huron Street, Chicago, Ill.

A man may have no bad habits and have worse.—*Ex.*

"Are You Aware of It?"

Bommer Bros., No. 351 Jay Street, Brooklyn, N.Y., have the greatest faith in the character and quality of their product, and certainly set forth a strong argument in support of this faith:

"We argue that spring hinges have to perform the hardest duty of any Hardware; not only do they carry the weight of a door, and suffer the wearing friction of constant usage, but besides, must automatically close it.

"This being admitted, the importance of using a durable spring hinge fully able to do its work is apparent.

"Bommer Spring Hinges, manufactured by Bommer Bros., Nos. 351 and 353 Jay Street, Brooklyn, N. Y., are both durable and efficient.

"They combine great durability with a pleasing exterior which blends harmoniously with any style of decoration, and cost no more than other kinds.

"They are made of wrought steel, and, says the World's Fair Award, are '*practically unbreakable.*'"

The Proposed National Association.

Editor Hardware: In reply to yours asking my opinion in regard to the forming of a National Retail Hardware Dealers' Association, would say I have given the matter careful thought, and can really see no material benefit to be derived from it until the State associations shall have assumed more definite shape.

Doubtless it might prove a pleasant organization, but otherwise I can see no benefit to be derived. If all the States were well represented by associations a national organization might do much good in pressing matters of national importance to the Hardwareman.

Respectfully,

S. H. THOMPSON,
The Thompson Hardware Co.

Lowell, Mass., Sept. 19, 1898.

At a recent meeting of the executive committees of the Retail Hardware Association and of the Hardware Jobbers' Association of Texas, a satisfactory compromise was arrived at in the classification of iron and steel articles. It is expected that this agreement will result in a settlement of the troubles which have arisen over carload lots of goods of this character.

"Father, what does 'Morro' mean?"
"It's a big bluff, my son."
"Don't the Spaniards make them?"
"Not now, my son."

Review of the Markets.

A decidedly firm tone has been exhibited by the markets of recent days. Prices in shelf Hardware remain about the same, and while there is no special advance, the market is pretty well maintained. Reports from various sections are to the effect that business is improving, and that there is a larger demand for tools and builders' Hardware, while the near approach of cold weather naturally creates something of a demand for winter goods. A possible shortage in several directions is looked for, and in numerous instances repeated demands are made for immediate shipment before the goods are delivered.

Wire Nails: In New York an advance has been made because of the action of manufacturers, and prices are therefore noted as follows: Carload lots on dock, New York, $1.50; small lots from store, $1.60. At a recent meeting of the wire manufacturers of the United States in Chicago, there was a large representation present, and a permanent organization was formed for the purpose of keeping in touch in regard to trade conditions. George T. Oliver, of Pittsburg, was elected president, and an advance of five cents per keg was made in nails, and a corresponding advance in wire, quotations on nails being as follows: To jobbers, carload lots f. o. b. Pittsburg, $1.35; single carload buyers f. o. b. Pittsburg, $1.40. In Cleveland, prices are 2½ cents per keg higher than the above figure; in Cincinnati, Louisville, Chicago and Joliet, 7½ cents higher; and at St. Louis, 12½ cents higher. No sales or contracts are to be made on longer deliveries than thirty days. There was also a change made in the wire nail classification by the addition of a new nail to be known as the 3d extra fine, 1⅛ inches long and No. 16 wire, which will take an advance of 65 cents over the base price. This new nail is to be made to meet the demand for a lighter article which is required in certain localities.

Cut Nails: Prices in this regard are quite well maintained, quotations in New York being as follows: Carload lots on dock $1.25; small lots from store $1.30.

Barb Wire: At the meetings of the manufacturers in Chicago above referred to, a decision was reached that painted barb wire should be sold at an advance of five cents per 100 pounds on the price of wire nails per keg; while galvanized wire is placed at an advance of thirty cents on painted. In New York, prices in this direction are as follows: Four-point galvanized in car load lots on dock $1.85 and $1.90. Small lots from store $1.95 to $2.00.

Cordage: A reduction of one cent a pound in the price of rope has been announced by the manufacturers because of the decline in the values of hemp. The prices now quoted are as follows:

	Per pound, cents.
Manila, 7-16 inch and larger	9
" ⅜ inch	9½
" ¼ and 5-16 inch	10
Sisal, 7-16 inch and larger	8
" ⅜ inch	8½
" ¼ and 5-16 inch	9

These prices are for carload lots, ¼ cent advance being asked for smaller quantities.

Linseed Oil: A change in linseed oil quotations has occurred since our last report. The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: Lots of less than 5 barrels, 35 cents per gallon; lots of 5 barrels or more, 34 cents per gallon; latter price requiring the delivery of the quantity named at one time. Boiled linseed oil, 2 cents higher per gallon than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE KANSAS CITY TRADE.

So far as the weather conditions can affect business, matters of this sort have been very favorable.

The volume of business in a general way for the past two weeks has been indifferent in character, except as to the usual rush of fall goods. The staple goods have not moved with the freedom anticipated, and yet we are not in the least worried over this. People in the "house" cannot account for the light orders from the salesmen, while he might, and doubtless could, offer very reasonable explanations.

Local conditions in the trade are favorable, for the reason that Kansas City is extensively engaged in building up.

She has several times let out her bellyband, because she was too tight for comfort; and with her new park, new warehouses, new rolling mill, flouring mills and numerous other industries seeking to swell her proportions, she is to-day the first city in the United States in percentage of new buildings for the year 1898; in fact, almost double the percentage of her nearest competitor.

With two new railroads recently entered, the writer hereof believes he is correct in saying that she is the second largest railway centre in the United States. These new roads open up to us hitherto inaccessible territory, and we expect to profit thereby.

Our Kansas friends are greatly disappointed in the 1898 corn crop, which is the third lightest for many years. However, this will not at all affect the volume of business in that State, for reasons too numerous to mention.

Missouri is long on apple orchards but very short on apples this year. Applejack as a political factor may therefore be less in evidence, so that the Democratic majority may be somewhat "rejuiced," as Mr. Dooley would say. The grocery trade is a factor in the demoralization of prices that wholesale jobbers must in some way undertake to protect themselves against. Wholesale grocers out this way, almost without exception, solicit business from the Hardware trade in house-furnishing goods, coal hods, elbows, washing machines, woodenware, loaded shells, etc., and they often demoralize prices, which Hardware jobbers seldom take note of, thinking they soon will cease handling such goods. On the contrary, their competition is on the increase. We presume our Eastern friends have the same nuts to crack. To us it appears largely a matter of "hustle" and "get there," and the salesman is the key to the situation. We do not imagine that the grocery jobber buys his goods for less than the Hardware jobber. If he can, or if he does do business with a satisfactory profit, for less than the Hardware jobber can afford to venture upon, the Hardware jobber must "come to time." That is the long and short of it.

We will right here relate an incident to show another case of some folks' methods, which no doubt all jobbers occasionally grow weary over, and wish that the foolkiller had a permanent location in the "house" guilty of the offense. Some months since one of the largest manufacturers of the east, with a Chicago branch, opened a branch store here in our city. Both our competitors and ourselves in the wholesale Hardware business had been here for years in open, legitimate competition with their Chicago and Buffalo houses. They were cordially welcomed to Kansas City, and our business interests in no way changed by their "invasion" of our territory. Nor has our trade diminished in the least in their line, but has grown largely in spite of it. We believe we can venture to say as much for our esteemed Hardware competitors, with whom we are most friendly and cordial. However, the manager of our eastern friends seems to think for some reason apparently that he can build up by tearing others down.

To one of our old customers in this city the above firm made an offer that if he would cancel an order given our salesman for twenty kegs of nails, they would sell him the twenty kegs at five cents per keg less if he went directly to the car and made his own delivery.

We sold the nails at seven cents per keg above the then delivered price and were to deliver besides. Inasmuch as we had just bought 7,000 kegs of nails and had probably gotten as near the bottom as our friends could on t e

Digitized by Google

carload they had coming, the littleness of the "deal" can be readily grasped. No doubt "there are others." What shall be done with this kind of "competition?"

If some brilliant genius can evolve a scheme to prevent or lessen even such deplorable "business," what riches and fame the man could attain to!

GILLE HARDWARE & IRON CO.

THE ST. PAUL TRADE.

With the war at an end, with a good crop, a Republican administration, good weather and good health, we feel in our section that we have nothing to complain of. We would like to see higher prices on wheat, but we cannot expect to have all good things at one time or we should become unmanageable. All the jobbers in St. Paul are having an excellent trade, with good prospects for the winter and next spring.

Last week saw our State Fair in St. Paul begin and finish, and such a crowd as there was, surprised the city. They came from the farthest part of our State, and from other States as well. The fair was a success, and the jobbers had their hands full in entertaining the numerous customers. All houses had their salesmen in from the road, and they were necessary. We never sold as many goods or talked to as many well satisfied merchants as we did last week, and we feel that the entire country was never in as good a shape as it is at present. It is not a boom, but a good, healthy condition which confronts us. We are having no great trouble about prices. Staples are very firm and somewhat higher. C. W. HACKETT HARDWARE CO.

THE DAVENPORT TRADE.

Wire nails, barb wire and plain wire have advanced 7½ cents per hundred pounds.

The quarterly meeting of the Iowa Hardware Jobbers' Association will be held on Wednesday, the 21st inst., at Oskaloosa, Iowa.

Trade thus far is about the same as in September last year. Collections are improving.

SICKELS, PRESTON & NUTTING CO.

THE PITTSBURG TRADE.

Consolidation of large interests goes bravely on, despite public protest, and this latest development of commercial affairs will soon produce a race of giants in the business world which would astonish the men of the preceding generation, were they permitted to see it. The greatest good for the greatest number of people will win in the end, and if these giants are wise enough to use their power to that end, they will succeed; if they try to use it to oppress the people, their size and great resources cannot save them from defeat.

We are now making great preparation for the reception of the Knights Templar Conclave, which meets in Pittsburg October 10th. Great numbers are expected, and our people intend to give them a welcome and entertainment that will be remembered to the credit of our city.

Business is moving on in a jobbing way steadily, with some increase over last year's sales. There is still room for improvement, however, and we believe the fall trade will show a steady increase as the months pass.

LOGAN-GREGG HARDWARE CO.

THE OMAHA TRADE.

Trade is holding fully up to the average for the year, and the demand for season goods is considerably above average, and the apparent slowness with which they come forward from the manufacturers, indicates a decided tendency to a scarcity in many staple lines before the close of the season. Prices are being well maintained, and the general conditions leave nothing to be desired. While our corn crop in this locality was shortened to some extent by a couple of weeks of dry weather, the crop of small grain is above the average, and there will be a sufficient supply of corn to cover all reasonable demands. Nothing stands in the way of an exceptionally good fall business. Collections are good. RECTOR & WILHELMY CO.

The Tin Plate Situation.

The announcement that the former owners of the largest tin plate establishment in the world have disposed of their works at Swansea, Wales, and are about to establish a manufactory in the vicinity of Pittsburg adds interest to the situation.

Tin plate, as is well known, was not produced in any considerable quantities in the United States prior to 1891. The tariff act placing a duty of 2.2 cents per pound on tin plate was enacted October 1, 1890, and the Government statistics of tin plate production cover the period beginning with July 1, 1891. The production in the fiscal year ending June 30, 1892, was 13,646,719 pounds; in the following year, 99,816,202 pounds; in the fiscal year 1894, 139,223,467 pounds; in the fiscal year 1895, 193,801,073 pounds; in the fiscal year 1896, 307,228,621 pounds; in the fiscal year 1897, 446,982,063 pounds, and for the fiscal year 1898, is estimated by experts at 640,000,000 pounds, the official figures for the year being not yet available. Meantime the decrease in importations of tin plate has kept pace with the increase in domestic production. The imports of the fiscal year 1891 were 1,036,489,074 pounds, being much above the former average by reason of the desire of importers to anticipate in importations the tariff rates imposed by the act which went into effect during that fiscal year. Those of the fiscal year 1892 were 422,176,202 pounds; those of 1893, 628,425,902 pounds; those of 1894, 454,160,826 pounds; of 1895, 508,038,938 pounds; of 1896, 385,138,923 pounds; of 1897, 230,073,683 pounds, and those of 1898, 171,662,345 pounds.

Beaman & Smith, Providence, R. I., are erecting a new machine shop 60 feet wide and 130 feet long, with lean-to addition 20 feet by 50 feet. The construction will be modern in every respect. It will have a maximum amount of light consistent with good construction, will be practically fireproof, and will be arranged with traveling cranes, trolleys, and such appliances for easy handling of materials and machines. A portion of the building will be two stories high, arranged for suitable offices, draughting rooms, storerooms, etc. The entire framework of the building is steel built in brick work entirely supported by the structural framework of the building. An electric traveling crane, having a capacity of 15 tons and a span of 40 feet, will run the whole length of the main building. The sash in the sides of the building and in the monitors are arranged so that they can be readily opened for ventilation. The framework of the building is arranged with a view of easy attachment of shafting and counter-shafting for the transmission of power. The entire building was designed by and the steel work is being furnished and erected by the Berlin Iron Bridge Co., East Berlin, Conn.

I've allus notissed fellers,
Hit's a risky thing to do
To kalkerlate according
To how things looks to you.

The man as talks the nicest
Don't help you up the hill;
The one that prays the loudest
Don't allus pay his bill.

Sometimes the biggest fishes
Bites the smallest kinds o' baits;
An' mighty ugly wimmin
Can make the best o' mates.

The smartest lookin' feller
May be a reg'lar fool;
You'er allus kicked the highest
By the meekest lookin' mule.

"Helps in Brazing."

The Dixon Crucible Co., Jersey City, N. J., has published a little pamphlet with this heading. It treats incidentally of brazing graphite, the application of which to bicycle tubes prevents the adherence of the spelter and so effects a saving in labor by making unnecessary the filing which is otherwise needful. The pamphlet, however, especially treats of the process of brazing by the dipping method, or "liquid brazing," as it is called. The brazing crucible is described, together with instruction and caution in regard to its use. Instructions are given how to build and set the necessary furnace, time required for brazing, etc., etc.

In regard to the economy of liquid brazing as against the old-time fire brazing, the following is quoted from a well-known bicycle manufacturer:

"We have been using the process of liquid brazing all this summer, but at first found some difficulty in keeping the spelter at the proper temperature. We built several furnaces before we succeeded in getting one entirely successful. The one we have now in operation enables us to do as much work with one man and a boy, as we were able to do before with five to seven men, and the results are much more satisfactory. We figure that we effect a saving of $20 per day, every day we run the new furnace. Besides requiring fewer workmen, we use only about 125 pounds of hard coal in a day's run, which is quite a contrast to the expense we were under with the old gas furnace, when our gas bills amounted to $250 per month. With the new process one man and a boy can turn out seventy-five machines in a run of seven hours."

This pamphlet is of interest to all bicycle manufacturers and others who do brazing. It is sent free of charge.

Hardware Going Up.

There is no surer sign of a trade improvement than advancing Hardware prices. Whenever we want to ascertain if a trade revival is holding, and if there is anything behind it more than newspaper talk, it has been our custom for many years past to take a view of the Hardware market, and to try and ascertain by bird's-eye observation whether Hardware prices are rising. This we have just done upon the present occasion; and we have been able to ascertain that there is a distinct upward move in some branches of the Hardware trade just now in the matter of prices. This is a most encouraging indication, and for the benefit of ironmongers who may not have been carefully watching the markets, we append a few particulars of the lines in which all hardwares have this season advanced over the past two or three months.

The dearer cost of foundry numbers of pig-iron, which is becoming an increasingly prominent feature of the raw iron market every week, has sent up the price of builders' castings and spouting and drain-water goods this summer 5 to 7½ per cent. on the net, the Scotch and Staffordshire iron founders having joined in this advance. The advance in the price of steel sheets and strips has resulted in cut nails going up 10s. per ton, the Leeds and Birmingham and Staffordshire cut nail houses being agreed in this policy. The dearer prices prevailing on the copper market have occasioned this summer a rise of from 5 to 7½ per cent. in all classes of brassfoundry goods turned out by the plumbers' brassfounders, including bar fittings and electric brass fittings; and if the upward condition of copper continues we shall expect the receipt of further circulars. Last, but by no means least, is the reduction in gross discounts lately achieved in the Birmingham and district wrought-iron tube trade, representing a net advance on gas, water, and steam goods of about 7½ per cent., and on galvanized tubes and fittings 5 per cent. Hose piping and rubber tubing, whether the product of Birmingham or Manchester houses, has also this season gone up more than 10 per cent. It is not difficult to learn the lesson of all this. Clearly Hardwares are distinctly on the up grade, and the trade revival is coming.—*Hardwareman, London.*

The rooms of the Hardware Club of New York have undergone an unusual summer renovating, and shone forth in the glory of new carpets and a general refurbishing. The main hall revels in one of these new coverings, and the main dining-room in another. Several new pictures adorn the walls. A new book case fills one corner of the library. The flowers which come each day from the New Rochelle gardens of James D. Foot, governor, are fragrant with welcome to the weary business man who sets foot within these quiet rooms. No wonder that to the stranger who has been down in the hot streets, the club seems like the shadow of a great rock in a weary land.

Ebenezer Herbert Barrett, who has been for many years a salesman with Smith, Lyon & Field, wholesale Hardware, No. 139 Duane Street and Nos. 62–66 Thomas Street, New York, has opened a new Hardware store at No. 1388 Fifth Avenue, New York. Mr. Barrett is a gentleman thoroughly competent to make a success of this new undertaking, and those who have dealings with him will find that he understands the Hardware business thoroughly, and is straightforward in every respect. He would be pleased to receive catalogues and price lists from manufacturers of Hardware.

By trying, we can learn to endure adversity—another man's adversity, that is.—*Exchange.*

The man with a new idea is a crank—until the idea succeeds.—*Exchange.*

Great Fortunes From Little Inventions.

It has become almost an axiom with the majority that larger fortunes are to be raised from some simple invention than from difficult and expensive inventions that involve a great outlay of money in manufacture. This, says George Ethelbert Walsh, in *Cassier's Magazine*, is, to a certain extent, true. A certain American patent for fastening kid gloves has yielded a fortune of several hundred thousand dollars for its fortunate owner, and the inventor of a collar clasp enjoys $20,000 a year royalty as the reward for his endeavor. A new kind of sleeve button has made $50,000 in five years for its patentee, and the simple twisting of safety pins in such a way that there is no possible danger of the point sticking in the child, promises to enrich its owner beyond any of his early dreams of wealth. A man one day turned a piece of wire so as to hold a cork more securely in a bottle, and forthwith somebody saw a brilliant idea and patented the modern wire stopper holder, which is now used annually on several million bottles. The accidental bending of a hairpin by a woman to prevent it sliding out of her hair so easily produced a fortune for her husband, who immediately saw the possibilities of a crinkled hairpin for women.

Instances could be multiplied indefinitely by large fortunes being made from small inventions; but, fortunately for those inventors who make a life study of intricate problems of mechanics, and disdain to waste their talents upon trivial, popular articles of the day, there is often also ample reward held in store for the products that take years to produce, and which revolutionize existing methods of industry and mechanics. Edison has reaped honors and riches of a princely character from his discoveries; McCormick has realized, in his reaper, the fortunes of a millionaire; the Corliss engine brought honors and decorations to its inventor, and enabled him to amass a great fortune in a few years; Professor Bell found in his telephone not only the consummation of his early hopes and ambitions, but a pecuniary reward; Harveyized steel armor has become anonymous with the inventor's name, and it brings an annual income of huge proportions to its discoverer; Elias Howe, the inventor of the sewing machine, realized over $2,000,000 from his inventions; Nikola Tesla, though still young and rich in promises, finds abundance of money in his work.

Mica Mining.

The mica trade is controlled practically by three or four large concerns in New York, Chicago and Boston. These houses have an agent who buys for cash whatever mica is brought by the miners. They control the market, and fix the prices to be paid to the miner, as well as the prices for which it is sold in the markets.

Mica, says an exchange, is a very valuable, almost precious mineral, as those who are obliged to buy a small strip for their stove doors will testify. A package worth hundreds of dollars can be carried in a basket slung over the arm, or in a pair of saddlebags on horseback. When prepared for the market the solid block, as taken from the mine, is split into sheets. These are cut into squares or rectangles of almost every possible size, from 2x2 inches up to 8x10 inches, and sometimes even larger. There are no less than 183 regular sizes kept in stock by dealers.

The mining of mica is the poetry of mining. It is impossible to conceive of a more exciting and fascinating employment. The vein of mica-bearing quartz, lying between rocks of different formation, has been found. The cap rock has been blasted away. Little "niggerheads"—small lumps of crumbling mica mixed with slate and other rock—are growing plentiful. The rock is carefully examined by the experienced miner, and all indications are that mica will soon be found. A blast is made. The rock and debris are cleared away, and there in the bottom is a block of the precious stuff, a ragged corner showing itself black and glittering in the white quartz in which it is embedded. With the tips of the fingers the miner gently and affectionately brushes away the dirt and small stones which partly cover it. Its thickness is carefully noted, its position in in the rock is learnedly discussed, and many a speculation indulged in as to its size and quality. The hole is quickly drilled, the small blast is made, just loosening the rock, and all eagerly crowd around as one of the men with his pick pulls away the broken stone. There it lies, a black, glittering mass, nine or ten inches across its face, three or four inches thick, and irregular in shape, as all blocks of mica are. A good-sized block, and, if solid and of a perfect cleavage, will be worth several dollars. The excitement is not allayed, however, and will not be until the block is split open and we know how it looks on the inside. It is a very bad thing to split open a block at the mine, and contrary to all rules, for there is danger that the fine polished faces will be scratched.

The fifth annual convention of the National Association of Agricultural Implement & Vehicle Manufacturers, which will be held in Philadelphia on October 18th, 19th and 20th, promises to be one of the most important gatherings which has been assembled in Philadelphia for a long time. In point of numbers this will be the largest convention of business men which has been held there for several years. All indications now point to an assured attendance of about eight hundred delegates, representing several hundred plants in nearly every State in the Union, which involve an invested capital of millions of dollars.

"I told my wife I had to stay down town late to get a balance."

"What did she say?"

"She said I seemed to have lost it before I got home."—*Exchange.*

The Bracelet a Charm.

An old captain residing in the south of England has a curious iron bracelet upon his right wrist. He has worn it for years, and regards it as a most valuable "charm." Its story, as related by him, is a strange one. The bracelet was originally a horseshoe, which he found on his twenty-first birthday while going to apply for the position of mate on board a sailing vessel. He obtained the berth, and, ascribing his success to the horseshoe, had the metal hammered into a rough bracelet, which he placed on his right wrist.

Six months later, while leaning over the taffrail, a block fell from aloft on to the bracelet, which probably saved him from a broken arm. Two years after, a mad dog flew at him, only to break its teeth upon the bracelet. Subsequently, in a mutiny aboard ship, it saved his hand from severance by the blow of a cutlass. He now treasures this bracelet most highly, and not without reason.—*New York Telegram.*

A firm which should do well in the world is sending out a circular in an envelope bearing the following inscription: "Caution.—Remove the envelope carefully, and exercise still greater care in handling the enclosed circular. Don't throw it in the waste paper basket, or give it to the servant to light the fires with, as the most disastrous results will follow, inasmuch as the circular is dipped in a solution of dynamite, the most powerful explosive known. Hang it up in a cool, dry place, and after a few days' exposure its dangerous properties will disappear, and it can be burned like any other circular." Then, at the lower edge of the envelopes, we read: "N.B.—Most firms do their heavy lying in their circulars; we alone do all of ours on the envelopes."—*Ironmongery*, (*Eng.*)

Knew What He Wanted.

Customer—I want some kind of a door spring; one that won't get out of order.

Hardware Dealer—A door spring?

Customer—Yes. And one that won't require the strength of an elephant to open.

Dealer—Hem!

Customer—And yet it must be strong enough to bring the door all the way to, and not leave it swinging a couple of inches.

Dealer—I see!

Customer—And when the door closes I don't want it to ram shut like a catapult, with a jar that shakes the house from its foundations.

Dealer—Yes. You want one that will bring the door all the way to, and yet do it gently.

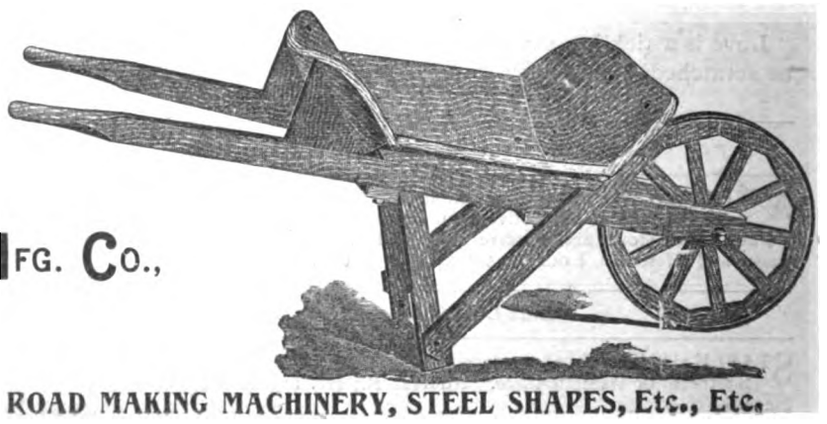
Customer—That's the idea. But I don't want any complicated arrangement that requires a skilled mechanic to attend to it.

Dealer—No, of course not. You want something simple, yet strong and effective.

Customer—That's the talk. Something that can be put on or taken off easily—something that will do its work quietly, yet thoroughly, and won't be eternally getting out of order.

Dealer—I see. I know exactly what you want, sir; just exactly.

Customer—Well, show me one.



Dealer—We don't keep door springs.

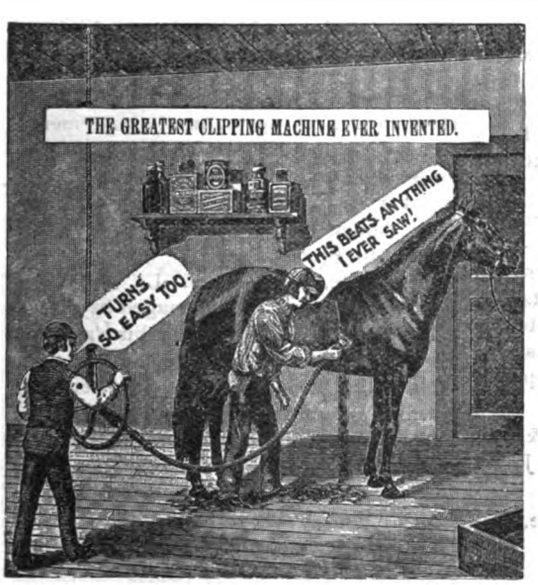
Jackson, Mich , U.S.A.

Window Dressing.

It would be well for Hardware dealers to take a walk sometimes through dry goods stores and observe some of their methods in arranging and displaying goods, says an exchange. Much profit might be obtained from such visits, particularly when the management of their notion department is considered. There are odd lots, and the last of certain lines of goods in Hardware, which could be very appropriately termed notions and disposed of in a more advantageous manner if effectively displayed in a window, located in a conspicuous position. It often happens that these articles are left hidden in boxes or compartments where no one sees them and their existence is almost forgotten. Such articles may be very useful, but people may not always remember what they need or want until they catch sight of the things in the store where they are arranged in a window, with a price ticket attached.



It was the first quarrel in Eden.

"I'll go home to my mo—oh, I'm the only woman in the world who never had a mother to go to!"

"Thank heaven, I've got you!" and Adam clasped her in his arms.

Aultman, Miller & Co., of Akron, Ohio, manufacturers of mowers and reapers, will resume operations October 1st. Employment will be given to 500 men.

There are 13,000,000 acres of primeval forest in Cuba.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Augusta, Ga.—F. C. Dos Passos has established a plant for the manufacture of his patent razor strop.

Cleveland, Ohio.—The Columbia Pump Co. has been incorporated; capital stock, $20,000. Incorporators: George H. Burrows, W. E. Rice, John N. Weld, Charles F. Wobel, Charles J. Seaman.

Cleveland, Ohio.—The King Fastener Co. has been incorporated at Columbus, by P. F. King, B. B. Avery, L. R. Loomis, Chas. Seaton and J. J. Thomas, with $30,000 capital.

Cleveland, Ohio.—The Langeman Mfg. Co. has been incorporated by W. C. Langeman, J. F. Langeman, Mars E. Wagar, W. W. Powers and others; to manufacture steel and metal products.

Paintsville, Ky.—The Auxier Plow Co. has been incorporated with a capital stock of $2500.

Painesville, Ohio.—The Horton Mfg. Co. has been incorporated; to manufacture machinery, implements, tools and vehicles. Capital stock, $50,000.

Pittsburg, Pa.—The Anchor Tack & Nail Co. has been chartered at Harrisburg with a capital of $45,000. This company is but a reorganization of the old Chess Bros. Co. of this city, and the works at South Nineteenth Street will be run on full time. Those named in the corporation are Walter Chess, Harry Chess and Oliver Bateman.

Pawtucket, R. I.—Articles of incorporation of the William H. Haskell Co. and the Pawtucket Nut Co. have been filed in the office of the Secretary of State in Providence. The former company is located at No. 451 Main Street, opposite the Slater mill, and is engaged in the manufacture of bolts, nuts, washers and coach screws. It is incorporated with a capital stock of about $50,000 and has the following officers: William H. Haskell, president, and E. S. Mason, treasurer. The Pawtucket Nut Co. is owned by Jacob Stephans and is located on Jenks Avenue in the rear of No. 170 Main Street. This company manufactures nuts and bolts, and is capitalized at about $20,000.

Trenton, N. J.—The National Shear Co. has been incorporated with an authorized capital of $3,000,000. The incorporation is the result of negotiations that have been pending several months for the consolidation of leading manufacturers of shears in this country. The new company was formed by outside capital under the management of J. H. Parks, of Boston. The other incorporators are C. B. Fuller, Newark, W. P. Chapman, Jr., New York. The company will absorb the following firms: Heinisch, Sons & Co., Newark, N. J.; the Seymour Cutlery Co. of Holyoke, Mass.; J. Wiss & Son of Newark, and the Clauss Shear Co. of Fremont, Ohio.

Changes and Improvements.

Buchanan, Va.—The Buchanan Brass Hardware Co., which employs 450 persons, is to remove to Despatch, N. Y.

Buckhead, Ga.—P. H. & A. E. McWhorter will soon start an axe and hoe handle factory in this town.

Cincinnati, Ohio.—The Mt. Lookout auger factory will be removed to Linwood. The factory building will be erected on Eastern Avenue, opposite the La Blond Machine Works.

Decatur, Ala.—The Turner, Day & Woolworth Mfg. Co., makers of wood handles, with about twenty branch manufactories at different places, will locate a branch of their business in this city. For this purpose a site has been secured on the west side of the railroad, immediately on the bank of the river, east of the Standard Oil Works. The Turner, Day & Woolworth Co. was established in 1836 and has a cash capital of $200,000; the parent plant is at Louisville, but it operates about twenty branch works.

Ensley, Ala.—The Alabama Steel & Shipbuilding Co. will build a wire rod and nail mill in connection with their steel mill now being erected.

Kansas City, Mo.—Work on the new warehouse which Parlin & Orendorff, the implement firm, are planning to build in connection with their other buildings at Fifteenth and Hickory Streets, will be commenced immediately and rushed as fast as possible The warehouse will be 195x127 feet, and will be six stories in height.

Middlesboro, Ky.—The Middlesboro Foundry & Machine Co. was organized here recently, and will shortly put the plant used by the Holliday Stove Works in commission. Local capitalists are at the head, and as the plant has plenty of sound backing, its success is considered certain.

Monmouth, Ill.—The plant of the Weir Plow Co. has been sold at assignees' sale for $33,000. Kingman & Co., of Peoria, were the purchasers.

Portland, Ind.—The Plant of the Wright Shovel Works will be removed from Greenfield, to Alexandria.

St. Joseph, Mo.—The St. Joseph Plow Co. is one of the latest concerns to appreciate the growth of the city and to keep pace with its forward movement. Already the St. Joseph Plow Co. is one of the leading institutions of the city, but recently it took steps to greatly increase the size of its plant and its output. Two new additions to the plant will be erected, equipped with all the modern machinery necessary for manufacturing plows and other agricultural implements. The number of employes will be increased by a third. Work on the new additions will begin at once and the new machinery will be installed as soon as possible so that the company will be fully prepared for next season's business.

Recent Fires.

Frankfort, Mich.—The Frankfort Hardware Mfg. Co.'s broom handle factory has been destroyed by fire.

Gananoque, Can.—The warerooms and offices of the Parmenter & Bullock Mfg. Co., Ltd., manufacturers of rivets and nails, have been entirely destroyed by fire.

Southington, Conn.—A slight fire in the oil room at the Ætna Nut Co.'s works occurred recently.

Miscellaneous.

Alton, Ill.—The Hapgood Plow Co. has received orders for no less than 10,000 of their sulky plows, to be delivered just as fast as possible. Manager H. L. Black says they have enough work now on hand to keep the big plant running steadily until next June.

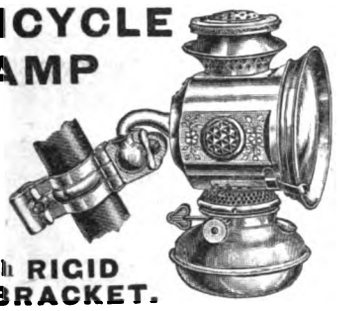
Anderson, Ind.—A report has been confirmed here that the Anderson Knife & Bar Co. are building a plant at the foot of the Eighth Street Viaduct, in Cincinnati.

Beaver Falls, Pa.—The Keystone Axle Co. has got its plant in such shape that it can turn out axles by a patent rolling process. The company has expended $200,000 in perfecting machinery, and has several large orders.

Bridgeport, Conn.—The American Ordnance Co. of this city was included among the bidders whose estimates for furnishing the Government with 100,000 six-pounder steel shells, 100,000 three-pounder steel shells and 100,000 one-pounder steel shells for the use of the United States navy, were opened at the navy department. The local concern put in two bids for six-pounders, $1.25 and $1.16; for three-pounders 77 cents and 74 cents; for one-pounders 42 cents and 39 cents.

Hamilton, Ohio.—The Niles Tool Works have awarded a contract for the erection of a new annex to the immense machine works. The building will be 69x200 feet, and is to cost $10,000, and be located on the east side of Third Street between the pattern and the machinery building at the corner.

Kansas City, Mo.—With the completion of the new rolling mill now being built, the production of the Kansas City Bolt & Nut works will be doubled to 24 000 tons of finished iron products annually, and requiring a force of 500 skilled mechanics. Bar iron, bolts, nuts, spikes and screws are the general products, distributed all over the West and South.



Kenosha, Wis.—The Laflin & Rand Powder Co. have completed the purchase of nearly 600 acres of land upon which new gunpowder mills are to be built immediately, having determined to remove its extensive plant from Platteville, Iowa, to this point. The mills will represent an investment of $250,000.

Rockford, Ill.—The stockholders of the Forest City Bit & Tool Co. have held a meeting and elected directors for the coming year. The election resulted in the choice of the following: L. M. Noling, C. Peterson, Ed. Alverson and W. Johnson.

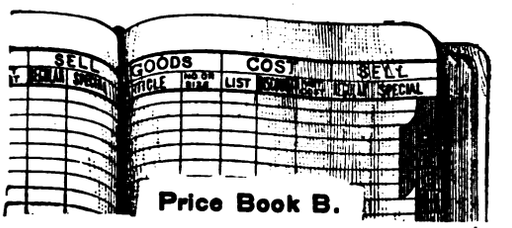
HARDWARE PRICE BOOKS.

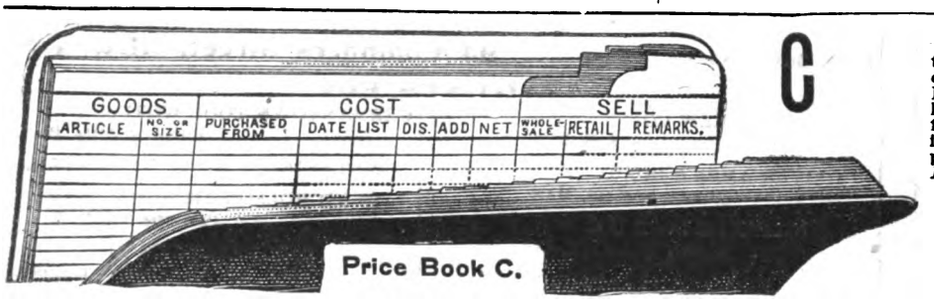
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:



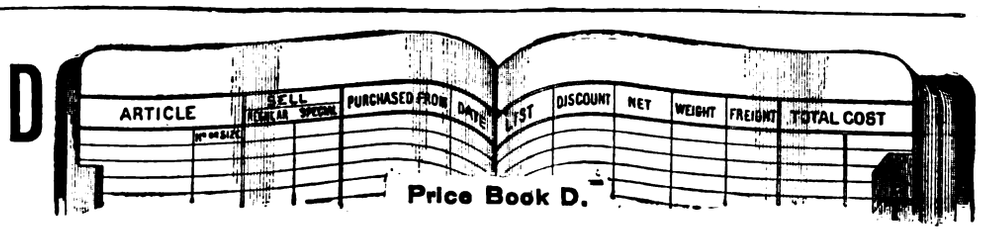
A, 200 pages,	$1.00	**A 2**, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2**, 400 pages with flap,	1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages,	$1.00	**B 2**, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2**, 400 pages with flap,	1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



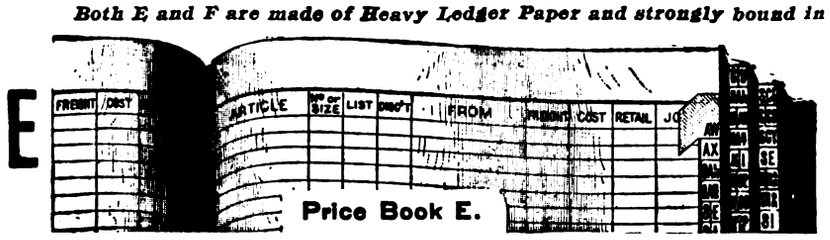
FOUR EDITIONS:

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

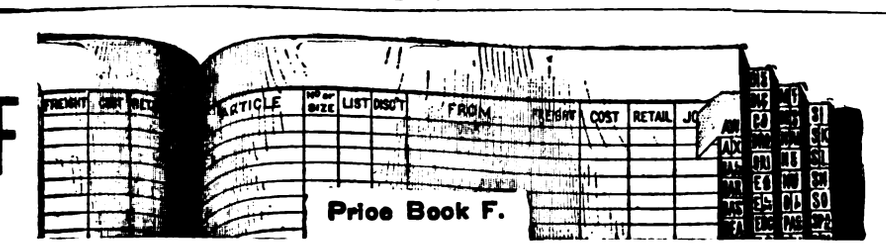
D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to	AU	For Chisels,	turn to	CHI	For Iron,	turn to IRO
" Parers, Apple	"	PAP	" Cutlery,	"	CUT	" Irons,	" IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

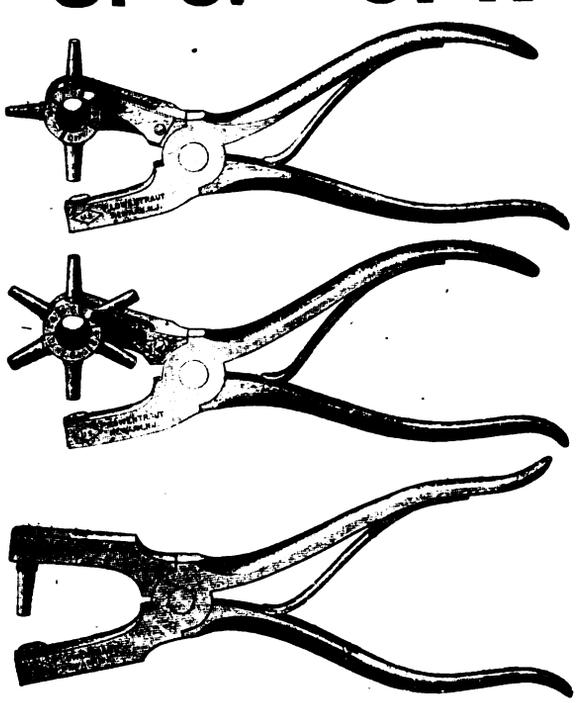
In favor of the

Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.



This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.

Respectfully,

CARY MANUFACTURING CO.

S. C. Cary Pres.

"U. S." SPRING PUNCHES.

Manufactured by

P. LOWENTRAUT.

A new line of high grade spring and revolving punches. They will be known as the *"U. S."* brand and are not to be confused with Lowentraut's regular line of punches.

They are highly finished and fully warranted.

"Has Our Esteemed Favor."

Edward Darby & Sons, Philadelphia, Pa. [*Wire Goods*]: For the past few years we have been in HARDWARE, and we beg to remind you that it has our esteemed favor, and will recommend the same to anyone desirous of a good, useful, common-sense trade journal such as HARDWARE is.

The CENTENNIAL

WATER CUT OFF

FOR CISTERNS.

There are others, but none like or equal to the Centennial. It is the only Cut Off in the market to-day that can be used in any position without extra pipe or elbows. Try them and you will use no other.

For sale by all the leading jobbers.

Manufactured only by

COONEY, SEINER & CO.,
17, 19 and 21 E. South St., INDIANAPOLIS, IND.

SNELL MANUFACTURING COMPANY, FISKDALE, MASS.

Ship Augers & Ship Auger Bits....

These goods are made by skilled mechanics on new and improved machinery from especially selected cast steel made for the purpose. . . .

The large increase in their sales testify to their quality that they are superior to any other make.

They are finished so they can be used to bore with the grain as readily as across the grain, through the knottiest timber without swerving. . . .

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"TOO VALUABLE TO BE WITHOUT."

Charles T. Mitchell, Baltimore, Md.: HARDWARE is too valuable to be without.

"GREAT VALUE AS AN ADVERTISING MEDIUM."

Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

Digitized by Google

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offers:

1. "American Hardware Trades Reference Book," published by Thomas Publishing Co., with "HARDWARE" for one year, will be sent on receipt of **$1.50.** Those who are already paid subscribers to "HARDWARE" will receive the book, on sending **50c.** This book is a complete directory of the manufacturers of Hardware in the United States. Each manufacturer is classified under the name of every article he makes. The financial rating is given in each case; 8000 Names; 25,000 Headings.

---

2. "Ladd's Discount Book," with "HARDWARE" for one year, for **$3.00** Single Index, and **$4.00** Double Index. Present subscribers will be credited for one year in advance. If you have to calculate discount this comprehensive work will save many times its price in time, trouble and mental strain. Its comprehensive character may be realized from the fact that it contains nearly 200 pages of positively accurate tables or more than 120,000 computations giving at a glance the net of any sum at all discounts from 1 per cent. to 95 per cent. together with a great range of combinations.

---

3. "American Hardware Store," with "HARDWARE" for one year, for **$3.00.** The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription.

Fill out Order, and address as below:

ORDER BLANK.

CHARACTER is what *is* really in us. . . . REPUTATION is what *they say* is in us.

A good reputation generally follows a good character as a natural consequence; just so with cutlery. The reputation of the **GOODELL KNIVES** comes as a natural result of the high grade material and skilled labor put into them. . . . It costs but a little more to make the best. We aim to make the best and at a reasonable price.

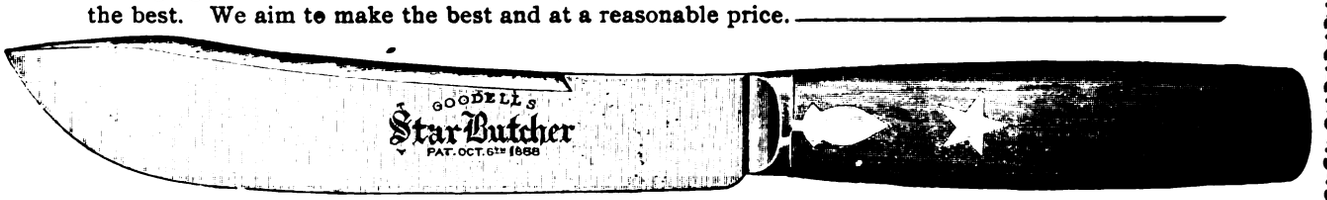

Table Knives and Forks, Carvers, Table and Butcher Steels, Butcher Knives, Boning Knives, Skinning Knives, Sticking Knives, Hunting Knives, Cheese Knives, Butter Spades, Bread Knives, Slicers, Scraping Knives, Cigar Knives, Kitchen Knives, Shoe Knives, and Can Openers. . . . . .

CATALOGUE FREE. THE BEST JOBBERS SELL OUR GOODS. ASK FOR THEM.

GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

Solid Steel Spout Machine Oilers and Roller Skates.

It will pay to write us for samples and prices.

SURPLESS, DUNN & CO.,

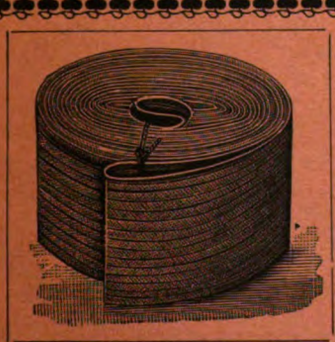
SOLE AGENTS.

55 Warren St., NEW YORK.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.



It is made of Heavy Tinned Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices. It will gather Apples, Peaches, Pears, &c.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price per dozen, $5.00. Liberal discount to the trade.*

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

AMES SWORD CO.,

CHICOPEE, MASS.
